Section 386. The masonry of manholes shall be carried up so that the top of the iron head when set shall be at the level of the established grade of the street at that point or to such height as the Engineer may direct, and from templates correctly made and set at top and bottom, between which not less than eight lines shall be drawn. Where manholes are not built to the established grade of the street, they shall be covered, when necessary, by selected bluestone slabs eight inches in thickness, to support the manhole heads. All joints shall be neatly struck and pointed on the inside. Each manhole shall be plastered thoroughly on the outside with cement mortar one inch in thickness, mixed in the proportion of one part of cement to two parts of sand.

Foundations.

Section 387. The foundations for manholes shall be of concrete or masonry of the kind indicated on the plans and shall be not less than twelve inches below the invert elevation of the sewer, except as otherwise indicated on the plan. When foundation additional to that indicated on the plan is required, it shall be built as directed by the Engineer.

Section 388. Sewer pipes shall be built in and trimmed, when necessary, so as to be flush with the inner face of the manhole, and an arch, laid in cement mortar, shall be turned over the pipe.

Vitrified Bricks or Granite Blocks.

Section 389. The invert shall be built of vitrified brick, granite blocks or concrete masonry, as indicated on the contract drawings.

Use of Bats.

Section 390. A reasonable number of bats not smaller than half bricks may be used in the construction of manholes or receiving basins, provided all interstices are thoroughly filled with mortar.

Steps.

Section 391. Standard steps of good quality of galvanized wrought iron, of the size, length and shape required for steps, shall be built into the interior sides of all manholes at a distance apart of not more than fifteen (15) inches vertically and they shall be so arranged that the lowest step shall be not more than two feet above the bench at the bottom of the manholes nor more than two feet above the invert of the sewer where there is no bench. Each manhole head shall be cast with a wrought iron step on the inside, when directed by the Engineer.

Bluestone.

Section 392. Hammer-dressed bluestone shall be furnished and laid of the form and thickness required as indicated on the plans or as otherwise directed.

Manhole Head and Cover.

Section 393. A cast iron manhole head and cover of the quality specified for cast iron, and except in special cases, of the pattern adopted by the President of the Borough in which the work is located, and in dimensions, weight and all other respects satisfactory to the Engineer shall be fitted on a bed of mortar to each of the above described manholes. Manhole heads and covers which do not conform to these specifications shall be at once removed from the work.

Perforations.

Section 394. Covers to be used on manholes in the street shall be perforated. Those used on sidewalk manholes shall be tight-fitting, without perforations.

Weights.

Section 395. Each manhole head and cover shall have its weight distinctly marked upon it with oil paint. The following shall be allowed as the minimum and maximum weights:

Street manhole head, 475 to 500 pounds.
Street manhole cover, 135 to 150 pounds.
Sidewalk manhole head, 300 to 310 pounds.
Sidewalk manhole cover, 100 to 110 pounds.

Noiseless Heads and Covers.

Section 396. When the pavement of the street is asphalt on wooden block, the manhole shall be fitted with a noiseless head and cover, to be approved by the Engineer, where new heads and covers are necessary.

Sealed Manhole Heads and Covers.

Section 397. All manholes in station platforms, vaults or other structures shall be provided with sealed manhole heads and covers according to the design indicated on the plans.

Emergency Manholes.

Section 398. Where a sewer crosses under the subway, emergency manholes shall be provided when directed by the Engineer and according to plans to be furnished by him.

Manholes to be Completed.

Section 399. Manholes shall in all cases be fully and completely built and fitted with their covers as the work progresses, and the sewers shall not be laid beyond or in advance of any uncompleted manhole.

Receiving Basins.

Section 400. Receiving basins shall be built as located on the plans or as the Engineer shall direct and in accordance with the plans to be furnished. Each portion of the basin shall be built of the size and materials designated on said drawings and shall be thoroughly plastered, both inside and outside, with cement mortar in the proportion of one part of cement to two parts of sand.

Foundations.

Section 401. The foundations for receiving basins shall be of concrete or masonry of the kind indicated on the plans and shall extend not less than twelve inches below the finished floor of the basin, except as otherwise indicated on the plans. When additional foundation is required, it shall be built as directed by the Engineer.

Stone Flooring.

Section 402. The flooring shall be of hammer-dressed North River bluestone flagging, not less than three inches thick, in not more than two pieces, and shall be well set in a full bed of mortar and rammed into place. The floor may be finished with cement mortar mixed in the proportion of one part of cement to one part of sand if so directed by the Engineer. The mortar shall be spread, while fresh, upon the concrete base and before the latter shall have reached its first set; it shall be in such quantity that after thorough manipulation it shall be one inch in thickness.

Head Stone and Gutter Stone.

Section 403. Where head stone and gutter stone are required they shall be of sound, durable granite of the dimensions indicated on the plan, hammer dressed to an even surface and cut to the satisfaction of the Engineer. Cast iron basin heads and gutter pieces of the design indicated on the plans shall be set instead of the above when required.

Cast-Iron Cover.

Section 404. A cast-iron cover of approved pattern weighing not less than eighty nor more than ninety-five pounds shall be fitted to the opening in the head stone.

Grate Bar.

Section 405. A grate bar made according to the plan shall be fastened solidly into the said head stone in the manner indicated.

Cast-Iron Trap.

Section 406. A cast-iron trap of the form and dimensions indicated on the plan free from imperfections, and properly coated with coal pitch varnish shall be furnished and built into place as directed by the Engineer.

Joints.

Section 407. The joints shall be tightly fitted with an oakum gasket or with cement mortar if so desired.

Iron Steps.

Section 408. Galvanized iron steps of the same design required for manholes shall be built into the walls.

Culvert Pipes.

Section 409. The culvert pipe for connections with sewers shall be 12-inch vitrified pipe unless otherwise indicated on the plan, and of the kind and quality previously described, and shall be laid, in all cases, in a concrete cradle of the form and dimensions required for pipe sewers in accordance with the directions of the Engineer. In case it becomes necessary to connect any basin already built, with the work to be constructed, so much of such culverts as in the opinion of the Engineer may be necessary shall be taken up and rebuilt or relaid with vitrified pipe, or brick as the case may be, in the manner described above and reconnected in a straight line from the basin to the sewer.

Flush Tanks.

Section 410. Automatic flush tanks of a type approved by the Engineer shall be built where indicated on the plans or where directed by the Engineer.

Waterproofing.

Section 411. Whenever, in the opinion of the Engineer, it is necessary to waterproof a sewer, chamber or receiving basin, or their appurtenances, it shall be done as indicated on the plans or as directed by the Engineer and in the manner described elsewhere in these specifications.

Mortar.

Section 412. All masonry shall be laid in Portland cement mortar of the quality described in these specifications. It shall be mixed in the proportion of one (1) part of cement to two (2) parts of sand, excepting as otherwise specially provided.

Concrete.

Section 413. All concrete for sewers shall be made in the proportions of one (1) part of cement to two and one-half (2½) parts of sand and four and one-half (4½) parts of stone of the quality described in these specifications.

Paving.

Section 414. On the completion of each section of one hundred feet of sewer, the sidewalks and roadways shall be restored as provided under the heading of "Street Surface and Park Surface Restored."

Permits for Connections.

Section 415. The Commissioner of Public Works shall have the right to connect any sewer or sewers with the sewers herein described or to grant permits to any person or persons to make connections therewith at any time before it is finally completed, and the Contractor shall not interfere with or place obstructions in the way of such person or persons as may be employed in building such new sewer or sewers or in making such connections. This is not to be construed, however, as permitting the introduction of storm water or sewerage into any sewer being constructed under this contract before its final completion.

Thoroughly Cleaned.

Section 416. During the progress of the work, and until the entire completion and final acceptance thereof, the sewers, drains, basins, culverts and connections shall be kept thoroughly cleaned throughout, and left clean, and the drainage of any old sewer that may be taken up or intercepted shall be provided for and taken care of by the Contractor, all at his own expense.

Payment for Sewers.

Section 417. Payment for sewers will be per lineal foot of sewer complete as herein provided in Schedule Items 37 to 74, both inclusive, except as hereinafter specifically provided. The price for each class of sewer is to include each and every item applicable thereto as herein given in Sections 333 to 416 of these specifications and as otherwise provided in the contract and as indicated on the plans; excepting as is hereinafter specially provided.

Excavations.

Section 418. In addition to the price per lineal foot for completed sewer, as above provided, excavation will be paid for at the prices herein stipulated in Schedule Items 2-A and 3-A (which prices shall include all the matters referred to in Section 107), on the basis of size of trench stipulated in Sections 337 and 340, excepting where the sewer is built by tunneling, in which case tunnel excavation will be paid for at the price herein stipulated in Schedule Item 5-A (which prices shall include all the matters referred to in Sections 117 and 120), on the basis of the net ordered lines of the sewer. Payment for street surface restored shall be as provided in Schedule Items 30-A or B.

Steel Beams and Reinforcing Rods.

Section 419. Where steel beams or reinforcing rods are required and ordered, such beams and rods will be paid for in addition to the price bid for the sewer and at the prices herein stipulated for furnishing and placing such material and all work incidental thereto, in Schedule Item 20 or 21

Automatic Flush Tanks.

Section 420. Where automatic flush tanks are built as provided in Section 410 of the specifications they will be paid for as herein provided in Article XII of the contract.

Waterproofing.

Section 421. Where waterproofing is required and placed in accordance with Section 411 of the specifications it will be paid for at the prices herein stipulated for waterproofing, Schedule Item 15 or 16.

Siphons.

Section 422. Where inverted siphons passing under the subway structure are called for and built, they shall be considered as part of the regular subway construction from outside to outside of the sewer chambers or between points of departure from standard sewer construction, such limits being indicated on the plans; and payment for such siphons will be made in accordance with the various classes of work or material as are applicable thereto in the Schedule and at the prices therein stipulated for such items.

Cast-Iron Pipe Sewers, etc.

Section 424. All cast-iron pipe sewers wherever built, and the parts, within the limits of the Railroad, or as indicated on the plans, of all other sewers crossing over or under the Railroad, will be paid for in accordance with the various classes of work or material applicable thereto in the Schedule and at the prices stipulated therein for such classes of work or material.

House and Drainage Connections.

Section 425. The cost of the maintenance, support or construction of all house or other drainage connections made necessary by construction under Sections 422 and 424 will be included in the prices for the several classes of work and material entering into such construction.

21—REQUIREMENTS FOR PIPES.

Generally.

Section 426. Whenever it is necessary to relay any water main, all new material required for the same shall be of the quality and laid in the manner specified below, and subject to the various clauses of these specifications applicable thereto.

Pipes to be Cylinders.

Section 427. The pipes shall be circular cylinders, with the inner and outer surfaces concentric, and of the full interior diameter required.

Hubs and Spigots.

Section 428. The hub or socket and the spigot end shall be shaped in exact conformity with the standards of the Department of Water Supply, to be furnished by the Commission, and will be tested by circular gauges.

Section 429. The seat or shoulder of the socket and the end of the spigot shall be straight and even, and at right angles to the axis of the pipe, so as to make a smooth, tight joint. Special care will be required in making the sockets and spigots

to conform to the drawings and all pipes will be rigorously inspected at these points. No pipe will be received whose eccentricity at either the spigot or socket ends, exceeds one-eighth (1/8) of an inch, or whose dimensions differ by more than one-eighth (1/8) of an inch from those required.

Section 430. The pipes shall be designated by dimensions of the interior diameter

Section 431. Bands, lugs, buttons, or ribs shall, if required, be cast on the pipes, of such forms and dimensions as the Engineer may direct.

Length of Pipe.

Section 432. The straight pipe shall be twelve (12) feet long, exclusive of hub; other pipe as may be directed.

Section 433. All straight pipes shall be straight in the direction of the axis of the cylinder.

Thickness and Weights.

Section 434. The thickness of the pipes, branches and special castings shall correspond with the standards of the Department of Water Supply. The weight for straight pipe shall be approximately as follows:

60-inch pipes, 12,835 pounds each.
48-inch pipes, 8,270 pounds each.
42-inch pipes, 6,860 pounds each.
36-inch pipes, 5,305 pounds each.
30-inch pipes, 3,940 pounds each.
24-inch pipes, 2,660 pounds each.
20-inch pipes, 2,005 pounds each.
16-inch pipes, 1,475 pounds each.
12-inch pipes, 1,015 pounds each.
8-inch pipes, 580 pounds each.
6-inch pipes, 415 pounds each.

High Pressure Fire System.

Section 435. For high-pressure fire system standard spigots and grooves—The weights for straight pipes, with lugs, shall be approximately as follows, in pounds per length:

	Of 3 ft.	Of 4 ft.	Of 6 ft.	Of 12 ft.
8-inch	355	420	550	935
12-inch	615	745	1,000	1,765
16-inch	1,005	1,215	1,635	2,905
20-inch	1,475	1,795	2,425	4,320
24-inch	2,105	2,585	3,535	6,385

All requirements as to weights, laying, tests, etc., shall be in strict accordance with the standard requirements of the Department of Water Supply, Gas and Electricity.

Section 436. The thickness of the metal of the pipes and special castings will be tested by calipers after the castings have been freed from sand and cleaned.

Variations in Thickness.

Section 437. No pipe will be received when the thickness of metal is less by more than one-twelfth (1-12) of an inch than the thickness required by the standards.

Underweight.

Section 438. No straight pipe or casting will be received which weighs less than the weights above mentioned by more than five (5) per cent., for pipes 16 inches or less in diameter, or more than four (4) per cent. for pipes more than 16 inches in diameter. No special casting will be received which weighs less than the standard weight by more than ten (10) per cent. for pipes 12 inches or less in diameter, and eight (8) per cent. for larger pipes.

Straight Pipe Cast Vertically.

Section 439. All straight pipes shall be cast vertically, and all pipes 12 inches or more in diameter shall be cast with the hub end down.

Section 440. All the castings shall be made in such molding sand or loam as will leave the surface clean and smooth.

Castings, How Marked.

Section 441. All the castings shall have the year in which they are cast, the running number of the castings of the same size and form, the letters D. W. S., and

the initials or name of the Contractor, and of the foundry where cast, cast on the outer side in raised letters of not less than two (2) inches in length and one-eighth (⅛) of an inch in relief, in such manner as the Engineer may designate; and in case any pipe shall be condemned, the letters D. W. S. shall be erased by the Contractor.

Quality of Cast Iron.

Section 442. The metal of which the castings are to be cast (which shall be remelted in a cupola or air-furnace) shall be pig-iron, made without any admixture of cinder-iron, or other inferior metal, and shall be of such character as to make a pipe strong, tough and of an even grain, entirely free from uncombined carbon when seen under the microscope, and such as will bear, satisfactorily, drilling and cutting, and shall have a tensile strength of at least sixteen thousand (16,000) pounds to the square inch.

Section 443. The castings shall be free from scoria, sand holes, air bubbles, and other defects and imperfections.

Castings to be Clean.

Section 444. The castings shall be perfectly cleaned and no lumps shall be left on the inner surface of the barrels or sockets, or on the outer surface of the spigot end. The castings shall be subject to hammer inspection. Iron-wire brushes shall be used, as well as softer brushes, to remove the loose dust. No acid or other liquid shall be used in cleaning the castings.

Pipes to be Coated.

Section 445. Every pipe, branch and special casting shall be carefully coated inside and out with coal pitch and oil. Every casting shall likewise be entirely free from rust when the coating is applied. If the casting cannot be dipped immediately after being cleaned, the surface shall be oiled with linseed oil, to preserve it until it is ready to be dipped. No casting shall be dipped after rust has set in.

Pitch.

Section 446. The coal-tar pitch shall be made from coal tar distilled until the naphtha is entirely removed and the material mixed with linseed oil so as to make a smooth, tough and tenacious coating. Pitch which becomes hard and brittle when cold will not answer for this use.

Section 447. Pitch of the proper quality having been obtained, it shall be carefully heated in a suitable vessel to a temperature of three hundred (300) degrees Fahrenheit, and shall be maintained at not less than this temperature during the time of dipping. The material will thicken and deteriorate after a number of pipes have been dipped; fresh pitch shall, therefore, be frequently added, and occasionally the vessel shall be entirely emptied of its old contents and refilled with fresh pitch.

Section 448. Every casting shall attain a temperature of three hundred (300) degrees Fahrenheit, before being removed from the vessel of hot pitch. It shall then be slowly removed and laid on skids to drip.

To be Inspected Before Dipping.

Section 449. No casting shall be dipped until the authorized inspector has examined it as to cleaning and rust, and subjected it thoroughly to the hammer test. It may then be dipped, after which it will be passed to the hydraulic press to meet the required water test. The proper coating shall be tough and tenacious when cold on the pipes, and not brittle or with any tendency to scale off.

Tests.

Section 450. The castings must be capable of sustaining a pressure, in the hydraulic press, of three hundred (300) pounds to a square inch, and any casting which shows any defect by leaking, sweating or otherwise, will be rejected. This test shall be made at the foundry, and at the expense of the Contractor.

Weighed and Marked.

Section 451. The castings shall be weighed, and the weight distinctly marked on the castings in white paint. The Contractor shall provide at the foundry where the pipes and castings are to be manufactured proper sealed scales and weights for weighing the castings, which shall be done at the expense of the Contractor, under the supervision of the Inspector.

Blocking and Wedges.

Section 452. Each pipe over eight (8) inches inside diameter, unless otherwise ordered, shall be placed on two (2) blocks and four (4) wedges of hemlock timber, the wedges to rest on the blocks and the pipe on the wedges.

Timber for Blocking.

Section 453. The blocks and wedges shall be of sound hemlock timber; 48 and 36-inch pipe shall be laid on blocks 4 feet long, 12 inches wide and 6 inches thick, with wedges 18 inches long, 6 inches wide, 4 inches thick on one end and ½ inch thick on the other; 30 and 24-inch pipe on blocks 3 feet long, 10 inches wide and 5 inches thick, with wedges 15 inches long, 5 inches wide and 3½ inches thick on one end and ½ inch thick on the other end; 12 and 20-inch pipe on blocks 2 feet long, 8 inches wide and 4 inches thick with wedges 12 inches long, 4 inches wide, 3 inches thick on one end and ½ inch thick on the other.

Joints.

Section 454. The spigot end of the pipe shall be inserted into the hub to within from one-fourth (¼) to one-eighth (⅛) of an inch of the full depth of the hub, and the space around the pipe shall be equalized so as to give as nearly as possible an equal space for the packing. The space between the pipe and the hub shall be packed with clean, sound jute packing yarn, free from tar, far enough to leave the proper space for lead. The remaining space shall then be filled by running it full of lead to a depth of four (4) inches, with a bead outside of the face of the hub large enough to allow for caulking, so that when the joint is properly caulked the lead will be flush with the hub of the pipe. After the joint shall have been run with lead, it shall be caulked by means of proper tools, so as to make a watertight joint

Lead.

Section 455. The lead to be used shall be of the best quality of pure, soft lead. and in every respect suitable for the purpose.

Notice of Interruption to be Given.

Section 456. In case it becomes necessary to cut any connection with any other main, house or hydrant, or in any way to interfere with the continuous and normal flow of water, due notice shall be sent at least forty-eight (48) hours in advance to the Engineer and to the Commissioner of Water Supply, and the Contractor shall, if so ordered, make a temporary by-pass or other arrangement to preserve the flow of water while breaking connections.

Connections Interfered With.

Section 457. All connections cut, interfered with or injured shall be restored under the directions of the Engineer, without delay and in accordance with the rules and regulations of the Department of Water Supply governing such matters, to a suitable condition as good as existed before commencing work.

Stopcocks, etc.

Section 458. Stopcocks, boxes, branches, curved pipe, and other specials according to the standards of the Department of Water Supply shall be set where necessary.

Section 459. For gas pipes, steam pipes, air pipes, mail tubes and any other pipes not herein enumerated, the standard weights and all other requirements shall be in accordance with the standard specifications and requirements of the several owners of such structures.

22—STREET SURFACE AND PARK SURFACE RESTORED.

Pavement to be Restored.

Section 460. As soon as the structure in any excavation or trench made within a street shall be completed and the trench backfilled, a temporary pavement shall be laid and maintained in a condition satisfactory to the Engineer; and after the earth shall have become, in the opinion of the Engineer, sufficiently settled, the Contractor shall proceed to restore the surface to a condition similar to, and equally as good as, that existing previous to the commencement of construction; except that the Contractor will not be required to permanently restore the pavement of roadways between curb lines, but shall provide a temporary roadway pavement as follows:

Temporary Roadway Pavement.

Section 461. Upon the backfill, placed and compacted as provided under the clauses relating to backfilling, shall be placed a layer of sand, about an inch and

a half in thickness, on which shall be laid a pavement of granite blocks carefully laid and rammed to the required finished grade of the street surface. The end and side joints shall be thoroughly filled with sand, and shall not exceed ¾ of an inch in thickness. The granite blocks required for this temporary pavement, if found in or under the original pavement, shall be stored at a suitable place until required for use. In case granite blocks are not found in or under the original pavement, they may be obtained by the Contractor, free of cost, from the Bureau of Highways at the corporation yards.

The Contractor shall maintain the temporary roadway pavement thus laid for a period not exceeding six months from the time of its completion in any one block or street intersection. During this period the Contractor shall, without requiring previous notice, readjust or relay any portion of the pavement wherever and whenever a straight edge 3 feet long, laid in any direction, shows a depression of more than ¾ inch.

All the requirements as to street surface restored, including temporary roadway pavements, shall apply to the trenches for sewers, pipes or other subsurface structures along or off the line of the Railroad. Within the limits of private property to be taken by the City for the extension of Irving Place, these requirements will not apply.

Other Sidewalks May be Laid.

Section 462. Nothing contained in these specifications shall be understood or construed as prohibiting the Contractor from making any arrangement with any property owner to lay another style of sidewalk, or other surface covering within curb lines, in place of the sidewalk or other surface covering taken up; in which case the Contractor shall file with the Commission a copy of his contract with such property owner, duly acknowledged in writing by both parties.

In case any property owner desires to lay a sidewalk, or other surface covering within curb lines, affected by this contract, different from the one removed, and shall notify the Commission in writing that he has failed to make satisfactory arrangements for such work with the Contractor, then the Commission, in its discretion, may direct the Contractor to finish and dress off the filling over his work to such grade as the Engineer may select, and further direct him to remove from the area to be restored all material of whatever nature not required to be relaid, and to permit another contractor to lay such sidewalk or other surface covering; in which case the liability of the Contractor under this contract shall cease, as far as that part of his work is concerned, whenever the Engineer shall report to the Commission that the instructions of the Commission have been complied with, exactly the same as if the Contractor had fully completed the restoration as hereinbefore provided.

Payment for Street Surface Restored.

Section 463. Payment for street surface restored will be made as provided in Schedule Item 30-A or B, which prices shall include the cost of restoring all curbs, manhole heads and covers, gratings, vault lights, etc., that formed a part of the original street surface.

Measurements.

Section 464. The measurement for payment for street surface restored will be to the net line of ordered excavation.

Outside of Net Lines.

Section 465. All other pavement outside of the net lines of ordered excavation, either along or off the line of the Railroad, that may have become damaged, directly or indirectly, as the result of the Contractor's operations, shall be restored by the Contractor at his own cost and expense to a condition similar to and equally good as that existing previous to the commencement of construction.

Parks and Parkways.

Section 466. All parks and parkways including trees, shrubbery, etc., as elsewhere provided in this contract and the specifications, are to be restored to the satisfaction of the Department of Parks.

Measurement.

Section 467. Measurements for park surface restored are to be to the net lines of ordered excavation.

Payment For.

Section 468. Payment for park surface restored will be made at the price provided in Schedule Item 31.

Outside of Net Lines.

Section 469. Any damage done outside of the net lines of ordered excavation in connection with the construction of the work to park surfaces or growths, under the jurisdiction of the Department of Parks, shall be restored to the satisfaction of the said Department, and at the Contractor's own cost and expense.

23—VAULT LIGHTS, GRATINGS AND HAND-RAILS.

Vault Lights.

Section 470. The roofs of the stations, where under sidewalks, parks or parkways, shall, to as great an extent as possible, consist of vault light construction. These lights shall be made with lenses, not exceeding three (3) inches in diameter, of strong glass set in cement; they shall be provided with non-slipping treads, buttons or other devices all of design approved by the Engineer; and shall be of sufficient strength to carry, when supported in a manner similar to that in which they are to be permanently set, an equally distributed load of at least five hundred (500) pounds per square foot without signs of failure, deformation or permanent set, when such test load is removed. The right is reserved to test at least one (1) frame or panel in every ten (10), as selected by the Engineer. Should the one selected fail, another will be selected by the Engineer; and if that fail, then the whole lot may be rejected. The vault lights must be set in place with cement, lead or other means to be absolutely waterproof. Any tests required shall be at the Contractor's expense.

Measurement and Payment.

Section 471. The area for payment for vault lights shall be to lines not exceeding one (1) foot outside of the inner faces of the supporting walls, and the price paid will be as provided in Schedule Item 29, which price shall include all material and work incidental to the completed vault lights in place.

Steel Gratings.

Section 472. Steel gratings shall be provided and placed over fan and other ventilating chambers, over stations and station approaches, at places shown on the plans, or at other places if required by the Engineer. They will be constructed as shown on the detailed plans for gratings.

Measurement and Payment.

Section 473. Gratings will be measured to the lines as constructed and payment therefor will be made as herein provided in Schedule Item 28, which price shall include the grating in place in the work, all frames and framing, and all incidental work.

Galvanized Iron Pipe Hand-Rails.

Section 474. Galvanized iron pipe hand-rails will be placed in the Railroad over the benches containing the ducts. They shall be securely fastened to the wall of the tunnel by means of expansion bolts, and as shown on the contract drawings. Measurements for payment will be per lineal foot of hand-rail in place in the work, complete, and at the price as stipulated in Schedule Item 27.

IV.—SECURITY TO BE FURNISHED BY CONTRACTOR.

Security by Contractor. Contractor's Bond.

Article 27. Simultaneously with the execution of this contract the Contractor shall give security for the performance of his obligation by filing with the Comptroller a bond in the form annexed hereto, entitled, "Form of Bond," executed by the Contractor and by two or more sureties to be corporations or persons approved by the Commission in the sum specified in the Invitation to Contractors for the Section embraced in this contract. In case any of the sureties upon the bond shall become insolvent or unable in the opinion of the Commission to pay promptly the amount of such bond to the extent to which such surety might be liable, then the Contractor within ten days after notice by the Commission to the Contractor shall, by supplemental bond or otherwise, substitute another and sufficient surety to be approved by the Commission in place of the surety so insolvent or unable. If the Contractor shall fail, within such ten days or such further time as the Commission may grant, to substitute another and sufficient surety, then the contractor shall, for all the purposes of this contract be deemed to be in default in the performance of his obligations hereunder and upon the said bond, and the Commission may terminate the contract or may bring any proper suit or proceeding against the Contractor and the sureties, or either of them, or may require to be deducted from any moneys then in, or thereafter coming into, the hands of the City and due to the Contractor

the amount for which the surety insolvent or unable as aforesaid shall have justified on the bond; and the moneys so deducted shall be held by the Comptroller as collateral security for the performance of the condition of the bond.

V.—Payments to Contractor.

Partial Payments.

Article 28. In order to assist the Contractor to prosecute the work advantageously, the Engineer shall, from time to time, as the work progresses, but not oftener than once a month, make in writing an estimate, such as in his opinion shall be just and fair, of the amount and value of the work done and materials incorporated in the work by the Contractor according to the terms of this contract (but it is understood that in making such estimates the Engineer shall not necessarily be governed by the unit prices contained in the Contractor's proposal), provided, however, that estimates may at any time be withheld or reduced, if, in the opinion of the Engineer, the work is not proceeding in accordance with the contract. The first such estimate shall be of the amount and value of the work done and materials incorporated in the work since the Contractor commenced the performance of this contract on his part. Every subsequent estimate except the final estimate shall be of the amount and value of the work done and materials incorporated in the work since the last preceding estimate was made, provided, however, that no such estimate shall be required to be made when, in the judgment of the Engineer, the total value of the work done and materials incorporated in the work since the last preceding estimate amounts to less than ten thousand dollars ($10,000). The Engineer shall further include accepted structural iron and steel delivered on the site of the work, but not incorporated in the work, at the rate of forty dollars ($40) per ton of two thousand pounds. But the quantity of such structural iron and steel included in any partial estimate shall not exceed the quantity of such material, as determined by the Engineer, required for the ensuing six months, and any material included in a partial estimate which may subsequently become unsatisfactory, shall be deducted from succeeding partial estimates. No materials not incorporated in the work, excepting such structural iron and steel, and none of the Contractor's plant shall be included in partial estimates.

Not by Strict Measurement.

Article 29. Such estimates shall not be required to be made by strict measurement, but they may be made by measurement or by estimation, or partly by one method and partly by the other, and it shall be sufficient if they are approximate only.

Vouchers.

Article 30. Upon each such estimate being made and certified in writing to the Commission, the Commission shall forthwith prepare and certify a voucher for ninety per cent. of the amount stated in such estimate or certificate to be the value of the work done and materials furnished, and the City shall within thirty (30) days after the date of the certification of such voucher by the Commission pay the same; provided, however, that the City may at all times reserve and retain from said partial payments, or any of them, in addition to the ten per cent. above mentioned to be retained and reserved, any sum or all sums which by the terms hereof, or of any law of the State of New York passed prior to the date hereof, it is or may be authorized to reserve or retain.

Final Estimate.

Article 31. Whenever, in the opinion of the Engineer, the Contractor shall have completely performed this contract on his part, the Engineer shall so certify, in writing, to the Commission, and in his certificate shall state, from actual measurements, the whole amount of work done by the Contractor, and also the value of such work under and according to the terms of this contract. On the expiration of ninety (90) days after the acceptance by the Commission of the work herein agreed to be done by the Contractor, and the filing of a certificate of the completion and acceptance of the work in the office of the Comptroller, signed by the Engineer and the Commission, the City shall pay to the Contractor the amount remaining after deducting from the amount or value stated in the last-mentioned certificate, all such sums as shall theretofore have been paid to the Contractor under any of the provisions of this contract, and also any sum or all such sums of money as by the terms hereof the City is or may be authorized to reserve or retain; provided, that nothing herein contained shall be construed to affect the right, hereby reserved, of the Commission to reject the whole or any portion of the aforesaid work, should the said certificate be found, or known to be, inconsistent with the terms of this contract, or otherwise improperly given. All prior certificates upon which partial payments may have been

made, being merely estimates, shall be subject to correction in the final certificate, which final certificate may be made without notice thereof to the Contractor, or of the measurements upon which it is based.

Interest in Case of Delayed Payments.

Article 32. If the payment of the amount due the Contractor on any voucher shall be delayed beyond the time stipulated in Article 30, in the case of partial payment, or Article 31, in the case of final payment, the City shall pay the Contractor interest on such amount at the rate of four and one-half (4½) per cent. per annum for the period of such delay; it being understood that such payments of interest, if any, are to be in lieu of any claim of the Contractor for alleged damages for breach of contract or otherwise in case of delayed payments. The term for which interest shall be paid shall be reckoned, in the case of a partial payment from the thirtieth day after the certification of such voucher by the Commission, and in the case of a final payment from the ninetieth day after the acceptance of the work by the Commission, to the date of payment of the voucher. The date of payment of a voucher shall be considered the day on which the voucher is ready for payment as evidenced by the records of the Department of Finance. If interest shall become due on any partial payment the amount thereof, as determined by the Commission, shall be added to a succeeding payment. If interest shall become due on a final payment it shall be paid on a supplementary voucher prepared by the Commission and forwarded to the Comptroller for payment in the usual manner.

No Estoppel.

Article 33. The City shall not, nor shall any Department or officer thereof, be precluded or estopped by any return or certificate made or given by the Commission, any Engineer, or other officer, agent or appointee thereof under any provision of this contract, from at any time either before or after the final completion and acceptance of the work and payment therefor pursuant to any such return or certificate, showing the true and correct amount, quality and character of the work done and materials furnished by the Contractor or any other person under this agreement, or from showing at any time that any such return or certificate is untrue and incorrect or improperly made in any particular, or that the work and materials, or any part thereof, do not in fact conform to the specifications; and the City shall not be precluded or estopped, notwithstanding any such return or certificate and payment in accordance therewith, from demanding and recovering from the Contractor such damages as it may sustain by reason of his failure to comply with this contract or the specifications.

No Waiver.

Article 34. Neither the acceptance of the Commission or its Engineer, or any of its employees, nor any order, measurement or certificate by the Engineer, nor any order by the Commission for payment of money, nor any payment for, nor acceptance of the whole or any part of the work by the Engineer or the Commission, nor any extension of time, nor any possession taken by the Commission, or its employees, shall operate as a waiver of any portion of this contract or of any power herein reserved to the Commission, or any right to damages herein provided; nor shall any waiver of any breach of this contract be held to be a waiver of any other or subsequent breach.

Final Payment to Terminate Liability of City.

Article 35. The acceptance by the Contractor of the last payment aforesaid shall be and shall operate as a release to the City, from all claim and liability to the Contractor for anything done or furnished for, or relating to, the work, or for any act or neglect of the Commission, the City or of any person relating to or affecting the work, except only the claim against the City for the remainder, if any there be, of the amounts kept or retained as provided in this contract.

Contractor's Claims for Damage. Statements of Damage to be Filed With Engineer.

Article 36. If the Contractor shall claim compensation for any damage sustained by reason of the acts of the Commission, or its agents, he shall, within ten days after the sustaining of such damage, make a written statement of the nature of the damage sustained to the Engineer. On or before the fifteenth day of the month succeeding that in which any such damage shall have been sustained, the Contractor shall file with the Engineer an itemized statement of the details and amount of such damage, and, unless such statement shall be made as thus required, his claim for compensation may be forfeited and invalidated, and he shall not be entitled to payment on account of any such damage.

Lien Law.

Article 37. If at any time before or within thirty days after the whole work agreed herein to be performed and all the labor and material herein agreed to be delivered have been performed or delivered or completed and accepted by the City any person or persons claiming to have performed any labor or furnished any material toward the performance or completion of this contract shall file with the Commission and with the Comptroller of the City any such notice as is described in the Lien Law, the City shall retain until the discharge thereof from moneys under its control so much of such moneys as shall be sufficient to satisfy and discharge the amount in such notice claimed to be due, together with the costs of any action or actions brought to enforce such lien created by the filing of such notice.

VI.—Contractor's Liability for Injuries to Persons or Property.

Contractor Approves Plans as Involving No Damage.

Article 38. The Contractor expressly admits and covenants to and with the City that the plans and specifications and other provisions of this contract, if the work be done without fault or negligence on the part of the Contractor, do not involve any danger to the foundations, walls or other parts of adjacent buildings or structures or to navigation; and the Contractor will at his own expense make good any damage that shall, in the course of construction, be done to any such foundations, walls or other parts of adjacent buildings or structures or to navigation. The liability of the Contractor under this covenant is absolute and is not dependent upon any question of negligence on his part, or on the part of his agents, servants or employees and the neglect of the Engineer to direct the Contractor to take any particular precautions or to refrain from doing any particular thing, shall not excuse the Contractor in case of any such damage. Where the work is required to be done by tunneling the same admission and covenant shall also apply to the foundations, walls and other parts of buildings and to any railroad track or structure, subway, street, conduit, pipe, sewer or other structure or surface over the tunnel. But this admission and covenant shall not apply to the foundations, walls or other parts of buildings or any part thereof acquired by the City and which the Engineer may determine should be razed.

Traffic to be Maintained.

Article 39. The Contractor shall, during the performance of the work, safely maintain the traffic on streets, avenues, highways, parks, waters or other public places as provided in the specifications, and shall take all necessary precautions to place proper guards for the prevention of accidents and put up and keep at night suitable and sufficient lights.

Indemnification for Accidents, etc.

Article 40. The Contractor shall be solely responsible for all physical injuries to persons or property occurring on account of and during the performance of the work hereunder, and shall indemnify and save harmless the City from liability upon any and all claims for damages on account of such injuries to persons or property, and from all costs and expenses in suits which may be brought against the City for such injuries to person or property; it being distinctly understood, stipulated and agreed that the Contractor shall be solely responsible and liable for and shall fully protect and indemnify the City against all claims for damages to persons or property occasioned by or resulting from blasting or other methods or processes in the work of construction whether such damages be attributable to negligence of the Contractor or his employees or otherwise.

Money Due the Contractor or May be Retained to Meet Claims.

Article 41. In case any claim shall be made by any person or corporation against the Contractor or the City for loss or damage to person or property as aforesaid, the amount of such claim or so much thereof as the Commission shall deem reasonable, shall, upon the requirement and in the discretion of the Commission, be retained by the Comptroller out of any moneys thereafter growing due to the Contractor hereunder (in addition to the other sums hereinbefore authorized to be so retained), as security for the payment of such claim or claims. If and when the liability of the City or the Contractor on such claim or claims shall have been established by a judgment of a court of competent jurisdiction, or shall have been admitted by the Contractor to be valid, the said claim or claims shall be paid from the amount so retained and the balance, if any, paid to the Contractor. Should there be any unsatisfied claims for injuries to persons or property at the time when the final estimate for the work is made and returned, the Engineer shall have the right to retain out of said final estimate a sum in his judgment sufficient to protect the City in regard

to all unsatisfied claims as aforesaid and in case the amount thus retained should be insufficient to pay the amount adjudicated to be due upon such claim the City may sue for and recover from the Contractor the amount or balance as a debt from the Contractor to the City. The Engineer may further, if in his judgment such a course is necessary, at the time of making the final estimate, and as a condition to making the same, require the Contractor to continue his bond or any part thereof, for a time not exceeding the time when such claims would be barred under the existing Statute of Limitations, as security against any claims then unsatisfied or not presented.

Examinations of Abutting Property.

Article 42. In order to safeguard the owners or tenants of abutting property and at the same time prevent unjust or fraudulent claims against the Contractor or the City in respect thereto, the Engineer shall cause a detailed examination of all adjacent or abutting property to be made before construction is begun. The owner, or tenant of each parcel or his or their duly authorized representative, shall be invited by a notice in writing delivered to a person apparently in charge of the premises, to be present, and the Contractor, or his duly authorized representative, shall attend and with the Engineer shall make such detailed examination. A complete record of the existing conditions of each parcel shall be made in triplicate, signed by the Engineer and the Contractor, and one copy shall be delivered to the owner, one to the Contractor and one shall be retained by the Commission. At such times as the Engineer may direct, and upon the completion of the work, or upon notice to the Engineer by the owner or tenant that physical injury has occurred, further examination shall be made and the findings recorded and filed as above.

Damage to Works During Construction.

Article 43. All risk of loss or damage to the works, or to any part thereof, or to any of the materials, tools, implements or other things used in doing the work, prior to final completion, is assumed and shall be borne by the Contractor, and any such loss or damage shall be made good by the Contractor at his own cost, and the construction shall be carried forward by him in accordance with this contract, without additional cost to the City by reason of such loss or damage.

VII.—CITY TO SECURE CONTRACTOR AGAINST INTERFERENCE BY INJUNCTIONS, TO ACQUIRE REAL ESTATE, ETC.

City's Assurances to Contractor of Right to Construct.

Article 44. The City hereby stipulates and covenants to and with the Contractor that the City will secure and assure to the Contractor so long as the Contractor shall perform the stipulations of this contract, the right to construct the railroad as prescribed in this contract free of all right, claim or other interference, whether by injunction, suit for damages or otherwise, on the part of any owners, abutting owner, or other person; but not including any interference, legal or otherwise, by patentees or persons claiming to be patentees of tools, methods or appliances.

Claims for Infringement of Patents.

Article 45. The Contractor shall hold himself responsible for any claims made against the City for any infringement of patents by the use of patented articles in the performance and completion of the work, or of any process connected with the work agreed to be performed under this contract, or of any materials used upon the said work; and shall save harmless and indemnify the City for all costs, expenses and damages which the City shall be obliged to pay by reason of any infringement of patents used in the performance and completion of the work.

Acquisition of Real Estate.

Article 46. The City will acquire all such real estate and rights of way or other rights, terms, franchises, easements and privileges therein which, in the opinion of the Commission, it shall be necessary to acquire or extinguish for the purpose of constructing the works free of interference or right of interference; provided, however, that this covenant shall not apply to or include any damages for physical injuries to property referred to in chapter 6 hereof, whether or not compensation for such damages be awarded in a condemnation proceeding. If compensation for any such damages shall be included in an award in condemnation proceedings the Contractor shall, upon demand, promptly reimburse the City for any payments made by it for such purposes.

VIII.—TIME FOR COMPLETION, DAMAGES FOR DELAY, ETC.

Commencement and Completion of Work.

Article 47. Time is of the essence of this contract. The Contractor shall begin actual work within sixty (60) days after the execution of this contract. The entire work covered by this contract shall be completed in all respects within forty-two (42) months from the date of the delivery of this contract.

Price to be Reduced for Delay.

Article 48. In the event of delay in completion of the works beyond the period herein prescribed, or beyond the period to which such time may be extended by resolution of the Commission for good cause shown, the City shall—whether the working force be increased as provided in the specifications or not—be paid damages for such delay. Inasmuch as the amount of such damages will be extremely difficult to ascertain, especially in view of the fact that the railroad herein contracted for is only a part of a complete system, the remainder of which is to be constructed under other contracts, it is hereby expressly agreed that damages shall be liquidated and paid by reducing the price to be paid the Contractor as follows: From the amounts which shall become payable to the Contractor after the expiration of the periods above limited (but not including the retained percentages from amounts theretofore certified to be due) there shall be deducted and retained by the City the following percentages: From the amount due for the first month after the expiration of such periods one (1) per centum thereof; from the amount due for the second month after the expiration of such periods two (2) per centum thereof; from the amount due for the third month after the expiration of such periods three (3) per centum thereof; from the amount due for the fourth month after the expiration of such periods four (4) per centum thereof; similarly from any amounts which may subsequently become due there shall be deducted a percentage, the rate of which shall equal the number of months which may have elapsed between the expiration of the periods above limited and the time when such payments shall become due. These amounts shall be deducted and retained by the City and are hereby agreed upon and determined as the measure of liquidated damages (and not as a penalty) to the City. But in case the Contractor shall be delayed by reason of any labor strike not caused or instituted or provoked by the Contractor, or by any subcontractor, agent or representative of the Contractor (which fact the Contractor shall prove to the satisfaction of the Commission), or in case the Contractor shall be delayed by any injunction or by any interference of public authority, and in case the Contractor cannot, notwithstanding such injunction or interference, with reasonable diligence make up for the delay so occasioned by speedier work when the Contractor shall not be so interfered with, then the said date for completion shall be extended by resolution of the Commission to a date later than the expiration of the said period by the amount of the time of such delay.

Commission May Intervene in Case of Injunction.

Article 49. But no injunction, strike or interference of public authority shall be ground for such extension, except if and from the time when the Contractor shall give the Commission notice of the injunction or other cause of delay, with copies of the injunction or other orders and of the papers upon which the same shall have been granted. The Commission and the City or either shall be accorded the right to intervene or become a party to any suit or proceeding in which any such injunction shall be obtained, and to move to dissolve the same or otherwise, as the Commission or City may deem proper. If necessary the Corporation Counsel or the Counsel of the Commission or both shall be authorized by the Contractor to appear, for that purpose, as counsel or attorneys for him.

Article 50. The time stipulated within which to complete the works is based upon the quantities of the various items entering into the work as stated in the form of proposal, which are given solely for the purpose of classifying bids. In case these quantities are exceeded or diminished then an extension or diminution of the term of this contract shall be made. It is, however, understood and agreed that in case an increase in any one item is balanced or offset by diminution of other items, no change in the term shall be made, and in any event the Engineer shall determine the amount of extension or diminution of time in respect of the relative increase or reduction in the quantities involved in the final completion.

Suspension of Work and Additional Time for Performance.

Article 51. The Commission reserves the right of temporarily suspending the execution of the whole or any part of the work herein contracted to be done, if it shall deem it for the interest of the City so to do, without compensation to the Contractor

for such suspension, other than extending the time for completing the work as much as it may have been delayed by such suspension.

Time for Completion to be Extended in Case of Delay in Acquiring Real Estate.

Article 52. In case the Contractor shall at any time give notice to the Commission that any real estate is necessary under this contract for any of the purposes specified above, which notice shall give a brief description of such real estate, the Commission shall (if it finds that such exists) begin and conduct with diligence, proceedings to acquire the real estate described; and in case the Commission shall fail to put the Contractor in possession of such real estate within three (3) months from the date of the delivery of such notice the Commission shall allow the Contractor so much additional time wherein to perform and complete this contract on his part as the Engineer shall certify in writing to be just, but no allowance by way of damages shall be made for such delay.

Extensions Not Cumulative.

Article 53. It is expressly understood, however, that the periods of extension referred to herein shall not be cumulative, but only the single period of delay giving the greatest extension shall be taken into consideration.

Permission to Complete Contract Not a Waiver.

Article 54. The permitting of the Contractor to go on and finish the work, or any part of it, after the time fixed for its completion, or after the date to which the time for completion may have been extended, or the making of partial payments to the Contractor after any such periods, shall in no wise operate as a waiver on the part of the City of any of its rights under this contract.

IX.—Remedies in Case of Contractor's Default.

Article 55. If the work to be done under this contract shall be abandoned by the Contractor, or if this contract shall be assigned, or the work sublet by him, otherwise than as herein specified, or if at any time the Engineer shall be of the opinion, and shall so certify in writing to the Commission that the performance of the contract is unnecessarily or unreasonably delayed, or that the Contractor is wilfully violating any of the provisions or covenants of this contract, or of the specifications, or is executing the same in bad faith or not in accordance with the terms thereof, or if the work be not fully completed within the time named in this contract for its completion, or within the time to which the completion of the contract may be extended by the Commission, the Commission may

(1) Notify the Contractor, by a written notice, to discontinue all work, or any part thereof, under this contract, and thereupon the Contractor shall discontinue the work, or such part thereof, and the Commission shall thereupon have the right to contract for the completion of the works in the manner prescribed by law, or to place such and so many persons as it may deem advisable, by contract or otherwise, to work, and complete the work herein described, or such part thereof, to take possession of and use any or all of the materials, plant, tools, equipment, supplies and property of every kind provided by the Contractor for the purpose of his work, and to procure other materials for the completion of the same, and to charge the expense of said labor and materials to the Contractor. The expense so charged shall be deducted and paid by the City out of such moneys as may be due or may at any time thereafter grow due to the Contractor under and by virtue of this contract, or any part thereof. And in case such expense shall exceed the amount which would have been payable under the contract if the same had been completed by the Contractor, he shall pay the amount of such excess to the City; and in case such expense shall be less than the amount which would have been payable under this contract if the same had been completed by the Contractor, he shall forfeit all claim to the difference; and when any particular part of the work is being carried on by the Commission, by contract or otherwise, under the provisions of this article of the contract, the Contractor shall continue the remainder of the work in conformity with the terms of this contract, and in such manner as in nowise to hinder or interfere with the persons or workmen employed, as above provided, by the Commission, by contract or otherwise, to do any part of the work, or to complete the same under the provisions of this article of the contract. And

Or Proceed Upon Bond.

(2) The City may also proceed as to the Commission shall seem proper upon the bond. And

Or May Bring Suit.

(3) The City may also bring any suit or proceeding for specific performance or for injunction or to recover damages or to obtain any relief or for any purpose proper under this contract.

X.—MISCELLANEOUS PROVISIONS.

Changes in the Contract.

Article 56. No correction or change in this contract shall be made except by written instrument duly authorized by the Commission and consented to by the Contractor and by the sureties upon his bond; but this provision shall not limit or affect the right to prescribe variations whether of construction or location of route as in this contract elsewhere provided.

Members of Commission Not Liable.

Article 57. No claim shall be made by the Contractor against any member of the Commission personally by reason of this contract or of any of its articles or provisions.

Contractor Not to Assign, Sublet, Etc.

Article 58. The Contractor shall not assign, transfer, convey, sublet or otherwise dispose of this contract or his right, title or interest in or to the same or any part thereof without the previous consent in writing of the Commission, and he shall not assign by power of attorney or otherwise any of the moneys to become due and payable under this contract unless by and with the like consent. If the Contractor shall without such previous written consent assign, transfer, convey, sublet or otherwise dispose of this contract or of his right, title or interest therein or any of the moneys to become due under this contract, to any other person, company or corporation, this contract may at the option of the Commission be revoked and annulled and the City shall thereupon be relieved and discharged from any and all liability and obligations growing out of the same to the Contractor and to his assignee or transferee; and no right under this contract or to any money to become due hereunder shall be asserted against the City in law or in equity by reason of any so-called assignment of this contract or any part thereof or of any moneys to grow due hereunder unless authorized as aforesaid by the written consent of the Commission; provided that nothing herein contained shall be construed to hinder, prevent or affect an assignment by the Contractor for the benefit of his creditors made pursuant to the statutes of the State of New York.

Provisions in Case Commission Ceases.

Article 59. In case the Commission shall cease to exist the Legislature may provide what public officer or officers shall exercise the powers and duties of the Commission under and by virtue of this contract; and in default of such provision, such powers and duties shall be deemed to be vested in the Mayor of the City. In case any officer or officers other than the Commission shall hereafter have the powers of the Commission or any of them, then the provisions of this contract shall be applicable to such officer or officers to the extent to which the powers of the Commission shall appertain to such officer or officers, and any official act or determination of such officer or officers or of this Commission shall be sufficient hereunder, anything herein to the contrary notwithstanding, if the same be done or had by lawful vote or resolution or in such manner as the Legislature may from time to time prescribe.

Labor Law.

Article 60. The Contractor agrees to comply with the provisions of the Labor Law, including section 3 thereof as re-enacted by chapter 36 of the Laws of 1909. The Contractor further agrees and stipulates that no laborer, workman or mechanic in the employ of the Contractor, subcontractor or other person doing or contracting to do the whole or a part of the work contemplated by this contract, shall be permitted or required to work more than eight hours in any one calendar day, except in cases of extraordinary emergency, caused by fire, flood or danger to life or property; and further, that the wages to be paid for a legal day's work as hereinbefore defined to all classes of such laborers, workmen or mechanics upon the work contemplated by this contract or upon any material to be used upon or in connection therewith, shall not be less than the prevailing rate for a day's work in the same trade or occupation in the Borough of the City, where the work hereby contemplated, about or in connection with which such labor is performed, is in its final or completed form to be situated, erected or used; and that each such laborer, workman or mechanic employed by the Contractor or by any subcontractor or other person on, about or upon the work contemplated by this contract, shall receive such wages herein provided for. This contract shall be void

and of no effect, unless the Contractor shall comply with the provisions of this section. In obedience to the requirements of section 14 of the Labor Law, it is further provided that if the provisions of the said section 14 are not complied with, this contract shall be void.

All Necessary Legal Provisions Deemed Inserted Herein.

Article 61. It is the intent and understanding of the parties to this agreement that each and every provision of law required to be inserted in this contract should be and is inserted herein. Furthermore, it is hereby stipulated that every such provision is to be deemed to be inserted herein; and if, through mistake or otherwise, any such provision is not inserted or is not inserted in correct form, then the contract shall forthwith, upon the application of either party, be amended by such insertion so as to comply strictly with the law, and without prejudice to the rights of either party hereunder.

Provision in Case of Unlawful Provision.

Article 62. If this contract contains any unlawful provision not an essential part of the general structure of the contract and which shall not appear to have been a controlling or very material inducement to the making thereof the same shall be deemed of no effect and shall, upon the application of either party, be struck from the contract without affecting the binding force of the contract as it shall remain after omitting such provision.

In witness whereof, this contract has been executed for The City of New York by the Public Service Commission for the First District under and by resolution duly adopted by the Commission and the seal of the Commission has been hereto affixed and attested by its Secretary and these presents have been signed by its Chairman; and the Contractor has caused its corporate seal to be hereto affixed and these presents to be executed by its proper officers the day and year first above written.

PUBLIC SERVICE COMMISSION FOR THE FIRST DISTRICT.
By...................., Chairman.

Attest:
...................., Secretary.

State of New York, County of New York, ss.:

On the .... day of ...., 1910, before me personally appeared William R. Willcox and Travis H. Whitney, to me known and known to me to be the said William R. Willcox, the Chairman, and the said Travis H. Whitney, the Secretary of the Public Service Commission for the First District; and the said William R. Willcox and Travis H. Whitney being by me duly sworn, did depose and say, each for himself and not the one for the other, the said William R. Willcox, that he resides in the Borough of Manhattan, in the City, County and State of New York, that he is the Chairman of the said Commission and that he subscribed his name to the foregoing contract by virtue of the authority thereof; and the said Travis H. Whitney, that he resides in the Borough of Brooklyn, in the County of Kings, City and State of New York, that he is the Secretary of the said Commission and that he subscribed his name thereto by like authority; and both the said William R. Willcox and Travis H. Whitney that they know the seal of the said Commission and that the same was affixed to the foregoing instrument by the authority of the said Commission and of a resolution duly adopted by the same.

State of New York, County of New York, ss.:

On this .... day of ...., 1910, before me personally came .... to me known and known to me to be the individual.. described in and who executed the foregoing instrument, and ..he.. duly acknowledged to me that ..he.. executed the same.

State of New York, County of New York, ss.:

On this .... day of ...., 1910, before me personally appeared ...., to me known, who, being by me first duly sworn, did depose and say: That he resided in ...., in the State of........; that he is .... of ...., the corporation described in and which executed the foregoing instrument; that he knew the corporate seal of said company; that one of the seals affixed to said contract was such corporate seal, and that it was affixed thereto by order of the Board of Directors of said Company, and that he signed his name thereto by like authority.

FORM OF CONTRACTOR'S BOND.

Route No. 5, Section No. 8.

Know All Men by These Presents, That .... of ...., hereinafter called the Contractor, and .... and ...., hereinafter called the Sureties, are

held and firmly bound unto The City of New York, hereinafter called the City, in the sum of .... dollars ($........), lawful money of the United States of America, to be paid to the City, for which payment well and truly to be made the Contractor and the Sureties do hereby bind themselves and their, and each of their, executors, administrators, successors and assigns firmly by these presents, as follows: The Contractor to be so held and bound for the full amount of the said sum of .... dollars ($........), and each of the said Sureties to be so held and bound only for a portion of said sum as follows:

The said ....
for the sum of..........................dollars ($........); the said ....
for the sum of..........................dollars ($........); the said ....
for the sum of..........................dollars ($........); the said ....
for the sum of..........................dollars ($........).

In Witness Whereof, The Contractor and the Sureties have hereunto set their hands and seals and such of them as are corporations have caused their respective seals to be hereto affixed and these presents to be attested by the proper officers, this .... day of ...., 1910.

Whereas, The City by the Public Service Commission for the First District (hereinafter called the Commission) is about to enter into a contract with the Contractor bearing even date herewith for the construction of that portion of a Rapid Transit Railroad known as Section 8 of Route 5, in ...., and extending from .... street to .... street, in the Borough of ...., in The City of New York, more particularly described in the said contract; and

Whereas, The City is about to enter into such contract with the Contractor upon the condition, and not otherwise, that this bond shall be given to the City, and upon the faith thereof, now therefore,

The condition of the foregoing obligation is such that if the Contractor shall fully perform the said contract, then this obligation shall be null and void, but else it shall remain in full force and virtue.

It is expressly agreed, between the City and the Sureties (and it is upon such agreement that the City accepts this bond) that the Sureties will and do waive any and every notice of default on the part of the Contractor; that they will and do permit the City to extend the time of the Contractor to make any payment or do any act; that no omission on the part of the City to give any notice of extension of time granted by or on behalf of the City shall be availed of by the Sureties or any of them as a defense upon this Bond; that the Sureties shall not set up or have any defense upon this bond by reason of any alteration of the said contract unless such alteration shall be represented by a formal written instrument duly executed between the City and the Contractor which shall have been duly authorized by a vote of the Commission; and that in case of such alteration, however made, the same shall be a defense to the Sureties only to the extent of the actual injury or damage caused to the Sureties by said alteration.*

ROUTE 5, SECTION 1, BATTERY PARK TO DEY STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 1.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of invitation to contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned† ....
.... do..
hereby, in pursuance of the invitation to contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form

---

*The execution of the bond must be duly proved before delivery in the form essential to proof to entitle a deed to record in the State of New York. Full affidavits of justification of sureties must be added.

†The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

annexed hereto with The City of New York for the construction of section 1 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard........................	....	160,000	....
2.	For earth excavation, below mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard........................	....	143,000	....
2a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard........................	....	9,000	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard.........	....	61,000	....
4.	For underpinning buildings, including all incidental work and material, per lineal front foot of building underpinned as follows:			
	(a) For buildings less than seven stories in height, per front foot................	....	3,000	. ..
	(b) For buildings from seven to twelve stories in height, per front foot........	....	400	....
	(c) For buildings over twelve stories in height, per front foot..................	....	300	....
6.	For concrete masonry, in place, per cubic yard	....	70,500	....
7.	For protective concrete masonry in place, outside of waterproofing, per cubic yard.	....	10,300	....
8.	For rubble stone masonry in place, per cubic yard	....	2,300	....
9.	For brick masonry, in place, per cubic yard	....	100	....
10.	For hollow terra cotta brick masonry, in place, per cubic yard..................	....	770	....
12.	For timber piles, in place, and prepared, per lineal foot........................	....	5,000	....
13.	For timber foundations, placed and fastened, per thousand feet, B. M..........	....	2M	....
14.	For broken stone or gravel, in place, other than that used in concrete, per cubic yard	....	3,200	....
15.	For waterproofing, treated woven fabric, laid with pitch or asphaltum, in place, as follows:			
	(a) For 1-ply, per square yard..........	....	80,000	....
	(b) For 2-ply, per square yard..........	....	100	....
	(c) For 3-ply, per square yard..........	....	4,000	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	(d) For 4-ply, per square yard..........	....	100	....
	(e) For 5-ply, per square yard...........	....	100	....
	(f) For 6-ply, per square yard...........	....	100	....
16.	For waterproofing, brick laid in asphalt mastic, in place, per cubic yard..........	....	12,200	....
17.	For vitrified or cast-iron drain pipe, in place, as follows:			
	(a) For 12-inch vitrified pipe, per lineal foot	....	100	....
	(b) For 10-inch vitrified pipe, per lineal foot	....	100	....
	(c) For 8-inch vitrified pipe, per lineal foot	....	2,430	....
	(d) For 6-inch vitrified pipe, per lineal foot	....	200	....
	(e) For 4-inch vitrified pipe, per lineal foot	....	100	....
	(f) For 8-inch cast-iron pipe, per lineal foot	....	....	....
	(g) For 6-inch cast-iron pipe, per lineal foot	....	100	....
	(h) For 4-inch cast-iron pipe, per lineal foot	....	1,800	....
18.	For tunnel ducts, in place, as required by Section 305 of the specifications, per duct foot	....	238,000	....
19.	For riveted steel, painted and erected, per ton of two thousand pounds............	....	5,500	....
20.	For steel beams and shapes with connections, painted and erected, per ton of two thousand pounds	....	4,400	....
21.	For steel rods and bars built in concrete, per ton of two thousand pounds........	....	660	....
25.	For miscellaneous iron castings, other than tunnel lining, such as manhole heads and covers, gratings, etc.; but not including castings for sewer work or pipes; in place, per ton of two thousand pounds..	....	10	....
26.	For wire mesh in place, per pound........	....	10,600	....
27.	For one and one-half inch (1½ inch) galvanized iron pipe hand rail, in place, including expansion bolts, etc., per lineal foot	....	100	....
28.	For steel gratings for ventilation, in place, including frames, etc., per square foot..	....	9,000	....
29.	For vault lights, in place, per square foot..	....	4,500	....
30.	For street surface restored:			
	(a) Sidewalks, including curbs and all structures and growths therein or thereon, per square yard...................	....	7,140	....
	(b) For temporary repavement and maintenance of roadways, per square yard...	....	14,520	....
31.	For park surface restored (all classes), per square yard	....	20,800	....
32.	For wrought iron or fibre electric conduits, in place, in stations, as follows:			
	(a) For three-fourths inch (¾-inch) wrought iron, per lineal foot..........	....	18,900	....
	(b) For one and one-half inch (1½ inch) wrought iron, per lineal foot..........	....	3,230	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	(c) for two inch (2 inch) wrought iron, per lineal foot........................	....	1,730	....
	(d) For two inch (2 inch) fibre, per lineal foot	....	6,600	....
33.	For cast-iron outlet boxes in place, in stations, each	....	1,030	....
34.	For six inch (6 inch) cast-iron pipe and fittings, including specials ("extra heavy"), in place in stations, per lineal foot......	....	140	....
	SEWERS—ITEMS 37 TO 74.			
	Vitrified and Cast-Iron Pipe—Items 37 to 43.			
38.	For 15-inch vitrified pipe sewer, per lineal foot	....	1,250	....
39.	For 18-inch vitrified pipe sewer, per lineal foot	....	720	....
	Egg-Shaped Brick or Concrete Sewers—Items 44 to 51.			
45.	For 3 foot 6 inch by 2 foot 4 inch per lineal foot	....	*2,168	....
47.	For 4 foot by 2 foot 8 inch per lineal foot.	....	*452	....
	SURFACE AND SUBSURFACE STRUCTURES—ITEMS 75 AND 76.			
75.	For street surface railroads, including the support, reconstruction, rebuilding, etc., where necessary (but not including permanent masonry supports, if required and added, and not including additional vaults, if required and constructed in excess of the number existing), as follows:			
	(a) For electric railroads, per lineal foot of single track........................	....	5,500	....
	(b) For horse railroads, per lineal foot of single track	....	240	....
76.	For the temporary and permanent support and maintenance of elevated railroad structures, and all work incidental thereto, per column........................	....	120	....
	PIPES IN STREETS—ITEMS 77 TO 126.			
	For Work and Material as Called for by Section 71 of the Specifications. Water and Gas Pipes—Items 77 to 108. Water Pipes—Items 77 to 88.			
	For water pipes in place, as follows:			
78.	For 4-inch water pipe, per lineal foot.....	....	100	....
79.	For 6-inch water pipe, per lineal foot....	....	760	....
82.	For 12-inch water pipe, per lineal foot....	....	730	....
84.	For 20-inch water pipe, per lineal foot....	....	680	....
	Gas Pipes—Items 89 to 99.			
	For gas pipes in place, as follows:			
90.	For 4-inch gas pipe, per lineal foot........	....	280	....
91.	For 6-inch gas pipe, per lineal foot.......	....	610	....
96.	For 20-inch gas pipe, per lineal foot......	....	90	....

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York, pursuant to the terms of the said contract, a bond in the sum of five hundred thousand dollars ($500,000) in the form hereto annexed with the following named sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room .... on the ...... floor of the building .... in the Borough of ...., in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of fifteen thousand dollars ($15,000). If the Commission shall notify the undersigned that this contractor's proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the invitation to contractors and this contractor's proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said invitation to contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this proposal shall not be ac-

cepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this proposal.

(6) There are no persons interested with the undersigned in this proposal, except*

(7) This proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District, is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated the ...., 1910.

Affidavit of Verification.

State of New York, City and County of New York, ss.:

...., being duly sworn, says: I am† the proposing contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this .... day of ...., 1910.

ROUTE 5, SECTION 2, DEY STREET TO WALKER STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 2.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of invitation to contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned‡.. .... do.. hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 2 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of ...."; if a corporation, say, "the (President or other officer duly authorized) of the........ .... Company."

‡The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard	....	256,100	....

	New Steel-Welded Flanged Steam Pipe Delivered on the Work, as Follows—Items 115 *to* 120.			
116.	For 8-inch steam pipe, per lineal foot.....	....	100	....
	DUCTS IN STREETS. *Electric Ducts and Conduits in Streets.* (Other than tunnel ducts and street railroad ducts, which are provided for in Items 18 and 75-a).			
127.	For electric ducts and conduits in place, as provided in section 71a of the specifications, per duct foot....................	....	31,000	....

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York, pursuant to the terms of the said contract, a bond in the sum of six hundred thousand dollars ($600,000), in the form hereto annexed with the following named sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room ...., on the .... floor of the building ...., in the Borough

of ...., in the City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of fifteen thousand dollars ($15,000). If the Commission shall notify the undersigned that this Contractor's proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this proposal.

(6) There are no persons interested with the undersigned in this proposal except*

(7) This proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the Contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated the ...., 1910.

ROUTE 5, SECTION 2-A, WALKER STREET TO HOWARD STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 2-A.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of invitation to Contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned‡...
.... do..
hereby, in pursuance of the Invitation to Contractors, a copy of which is attached

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of ...."; if a corporation, say "the (President or other officer duly authorized) of the .... Company."

‡The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 2-A of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard....................	....	28,070	....
2.	For earth excavation, below mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard....................	....	59,370	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard......	....	100	....
4.	For underpinning buildings, including all incidental work and material, per lineal front foot of building underpinned, as follows:			
	(a) For buildings less than seven stories in height, per front foot...............	....	318	....

107.	For new cast-iron spigot and groove straight pipe delivered on the work, per ton of two thousand pounds............	....	10	....
108.	For new cast-iron spigot and groove pipe, special castings, delivered on the work, per ton of two thousand pounds........	....	3	....
	DUCTS IN STREETS.			
	Electric Ducts and Conduits in Streets.			
	(Other than tunnel ducts and street railroad ducts which are provided for in Items 18 and 75-a.)			
127.	For electric ducts and conduits in place, as provided in Section 71-a of the specifications, per duct foot.................	....	42,000	....

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of three hundred thousand dollars ($300,000) in the form hereto annexed with the following named Sureties, viz.:

....
....
....
....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No. .... on the .... floor of the building No. .... in the Borough of .... in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate

as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated the ...., 1910.

Affidavit of Verification.

State of New York, City and County of New York, ss.:

.... being duly sworn, says: I am†..

the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this .... day of ...., 1910.

Route 5, Section 4, Bleecker Street to 14th Street.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 4.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of Invitation to Contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned‡..
.... do.. hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 4 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids, and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of..."; if a corporation, say "the (President or other officer duly authorized) of the........ .... Company."

‡The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard....................	....	181,400	....
2.	For earth excavation, below mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard.......................	....	14,100	....
2a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard.......................	....	9,000	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard........	....	25,700	....
4.	For underpinning buildings, including all incidental work and material per lineal front foot of building underpinned, as follows:			
	(a) For buildings less than seven stories in height, per front foot................	....	2,100	....
	(b) For buildings from seven to twelve stories in height, per front foot........	....	1,600	....
	(c) For buildings over twelve stories in height, per front foot.................	....	70	....
5.	For tunnel excavation, including disposal of material, timbering, etc., per cubic yard	....	33,000	....
6.	For concrete masonry, in place, per cubic yard	....	46,400	....
7.	For protective concrete masonry in place outside of waterproofing, per cubic yard.	....	1,200	....
8.	For rubble stone masonry in place, per cubic yard	....	900	....
9.	For brick masonry, in place, per cubic yard	....	1,300	....
10.	For hollow terra cotta brick masonry, in place, per cubic yard.................	....	1,700	....
11.	For grout of Portland cement, per barrel of Portland cement used..............	....	1,000	....
13.	For timber foundations, placed and fastened, per thousand feet B. M...........	....	2M	....
14.	For broken stone or gravel, in place, other than that used in concrete, per cubic yard	....	3,700	....
15.	For waterproofing, treated woven fabric, laid with pitch or asphaltum, in place, as follows:			
	(a) For 1-ply, per square yard..........	....	9,900	....
	(b) For 2-ply, per square yard..........	....	100	....
	(c) For 3-ply, per square yard..........	....	1,320	....
	(d) For 4-ply, per square yard..........	....	100	....
	(e) For 5-ply, per square yard..........	....	100	....
	(f) For 6-ply, per square yard..........	....	100	....
16.	For waterproofing, brick laid in asphalt mastic, in place, per cubic yard........	....	1,550	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
17.	For vitrified or cast-iron drain pipe, in place, as follows:			
	(a) For 12-inch vitrified pipe, per lineal foot	....	100	....
	(b) For 10-inch vitrified pipe, per lineal foot	....	100	....
	(c) For 8-inch vitrified pipe, per lineal foot	....	3,330	....
	(d) For 6-inch vitrified pipe, per lineal foot	....	200	....
	(e) For 4-inch vitrified pipe, per lineal foot	....	100	....
	(f) For 8-inch cast-iron pipe, per lineal foot	....	....	....
	(g) For 6-inch cast-iron pipe, per lineal foot	....	100	....
	(h) For 4-inch cast-iron pipe, per lineal foot	....	4,420	....
18.	For tunnel ducts, in place, as required by Section 305 of the specifications, per duct foot	....	437,000	....
19.	For riveted steel, painted and erected, per ton of two thousand pounds............	....	1,940	....
20.	For steel beams and shapes with connections, painted and erected, per ton of two thousand pounds..................	....	1,750	....
21.	For steel rods and bars built in concrete, per ton of two thousand pounds........	....	1,250	....
24.	For cast-iron columns erected and painted, per ton of two thousand pounds........	....	90	....
25.	For miscellaneous iron castings, other than tunnel lining, such as manhole heads and covers, gratings, etc.; but not including castings for sewer work or pipes; in place, per ton of two thousand pounds..	....	16	....
26.	For wire mesh, in place, per pound.......	....	6,030	....
27.	For one and one-half-inch (1½-inch) galvanized iron pipe hand rail, in place, including expansion bolts, etc., per lineal foot	....	10,140	....
28.	For steel gratings for ventilation, in place, including frames, etc., per square foot..	....	6,200	....
29.	For vault lights, in place, per square foot..	....	900	....
30.	For street surface restored:			
	(a) Sidewalks including curbs and all structures and growths therein and thereon, per square yard................	....	6,950	....
	(b) For temporary repavement and maintenance of roadways, per square yard..	....	15,470	....
31.	For park surface restored (all classes), per square yard	....	1,350	....
32.	For wrought-iron or fibre electric conduits, in place in stations, as follows:			
	(a) For three-fourths-inch (¾-inch) wrought-iron, per lineal foot..........	....	4,500	....
	(b) For one and one-half-inch (1½-inch) wrought-iron, per lineal foot..........	....	570	....
	(c) For two-inch (2-inch) wrought-iron, per lineal foot........................	....	310	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	(d) For two-inch (2-inch) fibre, per lineal foot	....	2,200	....
33.	For cast-iron outlet boxes in place in stations, each	....	242	....
34.	For six-inch (6-inch) cast-iron pipe and fittings, including specials ("extra heavy"), in place in stations, per lineal foot	....	25	....
	SEWERS—ITEMS 37 TO 74.			
	Vitrified and Cast-iron Pipe—Items 37 *to* 43.			
38.	For 15-inch vitrified pipe sewer, per lineal foot	....	2,134	....
39.	For 18-inch vitrified pipe sewer, per lineal foot	....	170	....
	Egg-Shaped Brick or Concrete Sewers—Items 44 *to* 51.			
45.	For 3 foot 6 inch by 2 foot 4 inch, per lineal foot	....	1,978	....
48	For 4 foot 3 inch by 2 foot 10 inch, per lineal foot	....	228	....
	SURFACE AND SUBSURFACE STRUCTURES—*Items* 75 *and* 76.			
75	For street surface railroads, including the support, reconstruction, rebuilding, etc., where necessary (but not including permanent masonry supports, if required and added, and not including additional vaults, if required and constructed in excess of the number existing), as follows:			
	(a) For electric railroads, per lineal foot of single track.......................	....	4,800	....
	(b) For horse railroads, per lineal foot of single track	....	150	....
	PIPES IN STREETS—ITEMS 77 TO 126.			
	For Work and Material as Called for by Section 71 *of the Specifications.*			
	Water and Gas Pipes—Items 77 *to* 108.			
	Water Pipes—Items 77 *to* 88.			
	For water pipes in place, as follows:			
78.	For 4-inch water pipe, per lineal foot....	....	100	....
79.	For 6-inch water pipe, per lineal foot....	....	530	....
82.	For 12-inch water pipe, per lineal foot....	....	1,560	....
87.	For 36-inch water pipe, per lineal foot....	....	2,300	....
	Gas Pipes—Items 89 *to* 99.			
	For gas pipes in place, as follows:			
90.	For 4-inch gas pipe, per lineal foot......	....	130	....
91.	For 6-inch gas pipe, per lineal foot......	....	1,800	....
92.	For 8-inch gas pipe, per lineal foot......	....	1,070	....
94.	For 12-inch gas pipe, per lineal foot......	....	270	....
	New Cast-iron Hub and Spigot Water and Gas Pipe—Items 100 *and* 101.			
100.	For new cast-iron hub and spigot straight pipe delivered on the work, per ton of two thousand pounds..................	....	130	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
101.	For new cast-iron hub and spigot pipe, special castings, delivered on the work, per ton of two thousand pounds........	....	40	....
	High Pressure Fire System Pipes, Standard Spigot and Grooves—Items 102 to 106.			
	For high pressure fire system pipe in place, as follows:			
102.	For 8-inch high pressure fire system water pipe, per lineal foot....................	....	100	....
103.	For 12-inch high pressure fire system water pipe, per lineal foot..............	....	90	....
104.	For 16-inch high pressure fire system water pipe, per lineal foot....................	....	120	....
	New Cast-iron Spigot and Groove Pipe for High Pressure Fire System—Items 107 and 108.			
107.	For new cast-iron spigot and groove straight pipe delivered on the work, per ton of two thousand pounds............	....	12	....
108.	For new cast-iron spigot and groove pipe, special castings, delivered on the work, per ton of two thousand pounds........	....	4	....
	DUCTS IN STREETS.			
	Electric Ducts and Conduits in Streets.			
	(Other than tunnel ducts and street railroad ducts which are provided for in Items 18 and 75-a).			
127.	For electric ducts and conduits in place, as provided in Section 71-a of the specifications, per duct foot................	....	49,600	....

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of three hundred thousand dollars ($300,000) in the form hereto annexed with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No. .... on the .... floor of the building No. .... in the Borough of .... in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City damages by it sustained by reason of such failure of

the undersigned as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

	(Other than tunnel ducts and street railroad ducts which are provided for in Items 18 and 75-a).			
127.	For electric ducts and conduits in place, as provided in Section 71-a of the specifications, per duct foot................	....	86,000	....

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of three hundred thousand dollars ($300,000) in the form hereto annexed with the following named Sureties, viz.:..

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No...............on the...................floor of the building No........................in the Borough of.............................. in the City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated, the ...., 1910.

Affidavit of Verification.

State of New York, City and County of New York, ss.:

............................., being duly sworn, says: I am†.................. the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this ...... day of ...., 1910.

ROUTE 5, SECTION 6, 26TH STREET TO 40TH STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 6.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of Invitation to Contractors. Copy of Form of Contract. Copy of Form of Bond.

To the Public Service Commission for the First District:

1. The undersigned‡..
.... do .. hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 6 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of ...."; if a corporation, say, "the (President or other officer duly authorized) of the.......................Company."

‡The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D., etc." (giving the names of all the partners).

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard....................	....	73,000	....
2.	For earth excavation, below mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard	....	500	....
2a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard	....	37,000	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard......	....	116,200	....
3a.	For rock excavation for sewers and pipes, including the disposal of it, etc., per cubic yard	....	27,000	....
4.	For underpinning buildings, including all incidental work and material, per lineal front foot of building underpinned, as follows:			
	(a) For buildings less than seven stories in height, per front foot................	....	340	....
	(b) For buildings from seven to twelve stories in height, per front foot........	....	30	....
	(c) For buildings over twelve stories in height, per front foot	....	....	....
5.	For tunnel excavation (except tunneling sewers), including disposal of material, timbering, etc., per cubic yard	....	85,000	....
5a.	For tunnel excavation for sewers and pipes, including the disposal of material, timber, etc., per cubic yard	....	2,810	....
6.	For concrete masonry, in place, per cubic yard	....	42,300	....
7.	For protective concrete masonry in place outside of waterproofing, per cubic yard	....	370	....
8.	For rubble stone masonry in place, per cubic yard	....	1,700	....
9.	For brick masonry, in place, per cubic yard	....	1,610	....
10.	For hollow terra cotta brick masonry, in place, per cubic yard	....	880	....
11.	For grout of Portland cement, per barrel of Portland cement used............	....	2,500	....
13.	For timber foundations, placed and fastened, per thousand ft. B. M........	....	2M	....
14.	For broken stone or gravel, in place, other than that used in concrete, per cubic yard	....	3,100	....
15.	For waterproofing, treated woven fabric, laid with pitch or asphaltum, in place, as follows:			
	(a) For 1-ply, per square yard...........	....	4,810	....
	(b) For 2-ply, per square yard...........	....	100	....
	(c) For 3-ply, per square yard...........	....	6,300	....
	(d) For 4-ply, per square yard...........	....	100	....
	(e) For 5-ply, per square yard...........	....	100	....
	(f) For 6-ply, per square yard...........	....	100	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
16.	For waterproofing, brick laid in asphalt mastic, in place, per cubic yard.........	....	650	....
17.	For vitrified or cast iron drain pipe, in place, as follows:			
	(a) For 12-inch vitrified pipe, per lineal foot	....	100	....
	(b) For 10-inch vitrified pipe, per lineal foot	....	100	....
	(c) For 8-inch vitrified pipe, per lineal foot	....	5,100	....
	(d) For 6-inch vitrified pipe, per lineal foot	....	200	....
	(e) For 4-inch vitrified pipe, per lineal foot	....	100	....
	(f) For 8-inch cast-iron pipe, per lineal foot	....	....	....
	(g) For 6-inch cast-iron pipe, per lineal foot	....	100	....
	(h) For 4-inch cast-iron pipe, per lineal foot	....	8,200	....
18.	For tunnel ducts, in place, as required by section 305 of the specifications, per duct foot	....	555,000	....
19.	For riveted steel, painted and erected, per ton of two thousand pounds............	....	1,770	....
20.	For steel beams and shapes with connections, painted and erected, per ton of two thousand pounds	....	2,710	....
21.	For steel rods and bars built in concrete, per ton of two thousand pounds........	....	610	....
24.	For cast iron columns erected and painted, per ton of two thousand pounds........	....	60	....
25.	For miscellaneous iron castings, other than tunnel lining, such as manhole heads and covers, gratings, etc.; but not including castings for sewer work or pipes; in place, per ton of two thousand pounds..	....	15	....
26.	For wire mesh, in place, per pound......	....	8,200	....
27.	For one and one-half inch (1½-inch) galvanized iron pipe hand rail, in place, including expansion bolts, etc., per lineal foot	....	12,900	....
28.	For steel gratings for ventilation, in place, including frames, etc., per square foot..	....	10,100	....
29.	For vault lights, in place, per square foot	....	6,400	....
30.	For street surface restored:			
	(a) Sidewalks including curbs and all structures and growths therein and thereon, per square yard	....	3,170	....
	(b) For temporary repavement and maintenance of roadways, per square yard..	....	19,630	....
32.	For wrought-iron or fibre electric conduits, in place in stations, as follows:			
	(a) For three-fourths inch (¾-inch) wrought-iron, per lineal foot..........	....	12,000	....
	(b) For one and one-half inch (1½-inch) wrought-iron, per lineal foot..........	....	900	....
	(c) For two-inch (2-inch) wrought-iron, per lineal foot	....	460	....
	(d) For two-inch (2-inch) fibre, per lineal foot	....	4,400	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
33.	For cast-iron outlet boxes in place in stations, each	....	640	....
34.	For six-inch (6-inch) cast-iron pipe and fittings, including specials ("extra heavy"), in place in stations, per lineal foot	....	60	....
	SEWERS—ITEMS 37 TO 74.			
	Vitrified and Cast Iron Pipe—Items 37 to 43.			
38.	For 15-inch vitrified pipe sewer, per lineal foot	....	720	....
39.	For 18-inch vitrified pipe sewer, per lineal foot	....	1,055	....
42.	For cast-iron sewer pipe (straight pipe) in place in the work, per ton of two thousand pounds	....	9	....
	Egg-Shaped Brick or Concrete Sewers—Items 44 to 51.			
45.	For 3 feet 6 inches by 2 feet 4 inches, per lineal foot	....	390	....
47.	For 4 feet 0 inch by 2 feet 8 inches, per lineal foot	....	†(60)	....
	Circular Sewers—Brick or Concrete or Reinforced Concrete—Items 52 to 66.			
57.	For 5 feet 6 inches per lineal foot	....	1,080	....
58.	For 5 feet 6 inches in tunnel, per lineal foot	....	1,280	....
60.	For 6 feet 0 inch per lineal foot	....	1,160	....
64.	For 8 feet 0 inch per lineal foot	....	420	....
66.	For 9 feet 6 inches per lineal foot	....	1,935	....
	Sewers of Special Forms—Items 67 to 72.			
71.	For triple section, per lineal foot	....	102	....
72.	For 4 feet 0 inch wooden barrel, per lineal foot	....	336	....
	SURFACE AND SUBSURFACE STRUCTURES—ITEMS 75 AND 76.			
75.	For street surface railroads, including the support, reconstruction, rebuilding, etc., where necessary (but not including permanent masonry supports, if required and added, and not including additional vaults, if required and constructed in excess of the number existing), as follows:			
	(a) For electric railroads, per lineal foot of single track	....	5,800	....
	(b) For horse railroads, per lineal foot of single track	....	270	....
	PIPES IN STREETS—ITEMS 77 TO 126.			
	For Work and Material as Called for by Section 71 of the Specifications.			
	Water and Gas Pipes—Items 77 to 108.			
	Water Pipes—Items 77 to 88.			
	For water pipes in place, as follows:			
78.	For 4-inch water pipe, per lineal foot	....	100	....
79.	For 6-inch water pipe, per lineal foot	....	1,230	....

†Included in Railroad construction under section 424 of the specifications.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	Gas Pipes—Items 89 *to* 99.			
	For gas pipes in place, as follows:			
90.	For 4-inch gas pipe, per lineal foot.......	....	160	....
91.	For 6-inch gas pipe, per lineal foot.......	....	830	....
92.	For 8-inch gas pipe, per lineal foot......	....	880	....
94.	For 12-inch gas pipe, per lineal foot......	....	1,000	....
95.	For 16-inch gas pipe, per lineal foot......	....	110	....
96.	For 20-inch gas pipe, per lineal foot......	....	230	....
	New Cast-Iron Hub and Spigot Water and Gas Pipe—Items 100 *and* 101.			
100.	For new cast-iron hub and spigot straight pipe delivered on the work, per ton of two thousand pounds	....	27	....
101.	For new cast-iron hub and spigot pipe, special castings, delivered on the work, per ton of two thousand pounds........	....	7	....
	Air Pipes—Items 121 *to* 124.			
	For air pipe in place, as follows:			
122.	For 8-inch air pipe, per lineal foot........	....	250	....
	DUCTS IN STREETS.			
	Electric Ducts and Conduits in Streets.			
	(Other than tunnel ducts and street railroad ducts which are provided for in Items 18 and 75a.)			
127.	For electric ducts and conduits in place, as provided in Section 71a of the specifications, per duct foot	....	103,000	....

(2) If this proposal is accepted, the undersigned will, within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of three hundred and fifty thousand dollars ($350,000) in the form hereto annexed, with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No. .... on the ...... floor of the building No. .... in the Borough of .... in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said con-

tract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated, the ...., 1910.

Affidavit of Verification.

	Mail Tubes—Items 125 *and* 126.			
125.	For 8-inch mail tube in place, per lineal foot	....	1,900	....
126.	For new 8-inch mail tube, delivered on the work, per ton of two thousand pounds..	....	10	....
	DUCTS IN STREETS			
	Electric Ducts and Conduits in Streets.			
	(Other than tunnel ducts and street railroad ducts which are provided for in Items 18 and 75-a).			
127.	For electric ducts and conduits in place, as provided in Section 71a of the specifications, per duct foot.................	....	106,000	....

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of three hundred and fifty thousand dollars ($350,000) in the form hereto annexed with the following named Sureties, viz.:

....
....
....
....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No. .... on the .... floor of the building No. .... in the Borough of......................... in the City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any

longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially desposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated the ...., 1910.

Affidavit of Verification.

State of New York, City and County of New York, ss.:

....................................being duly sworn, says: I am†............ the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this .... day of ...., 1910.

ROUTE 5, SECTION 8, 53D STREET TO 67TH STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 8.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of invitation to Contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned‡.. .... do.. hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 8 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids, and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons, strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of ...."; if a corporation, say " (President or other officer duly authorized) of the .... Company."

‡The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A, B. C, D. etc." (giving the names of all the partners).

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard........................	....	172,700	....
2a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard	....	24,000	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard..........	....	54,000	....
3a.	For rock excavation for sewers and pipes, including the disposal of it, etc., per cubic yard............................	....	2,200	....
4.	For underpinning buildings, including all incidental work and material, per lineal front foot of building underpinned as follows:			
	(a) For buildings less than seven stories in height, per front foot................	....	1,743	....
	(b) For buildings from seven to twelve stories in height, per front foot........	....	....	....
	(c) For buildings over twelve stories in height, per front foot..................	....	....	....
5.	For tunnel excavation, including disposal of material, timbering, etc., per cubic yard	....	78,900	....
6.	For concrete masonry, in place, per cubic yard	....	45,100	....
7.	For protective concrete masonry in place outside of waterproofing, per cubic yard.	....	430	....
8.	For rubble stone masonry in place, per cubic yard	....	3,750	....
9.	For brick masonry, in place, per cubic yard.	....	3,480	....
10.	For hollow terra cotta brick masonry, in place, per cubic yard...................	....	470	....
11.	For grout of Portland cement, per barrel of Portland cement used................	....	2,000	....
14.	For broken stone or gravel, in place, other than that used in concrete, per cubic yard	....	2,400	....
15.	For waterproofing, treated woven fabric, laid with pitch or asphaltum, in place, as follows:			
	(a) For 1-ply, per square yard..........	....	3,050	....
	(b) For 2-ply, per square yard..........	....	100	....
	(c) For 3-ply, per square yard..........	....	7,600	....
	(d) For 4-ply, per square yard..........	....	100	....
	(e) For 5-ply, per square yard..........	....	100	....
	(f) For 6-ply, per square yard..........	....	100	....
16.	For waterproofing, brick laid in asphalt mastic, in place, per cubic yard..........	....	430	....
17.	For vitrified or cast-iron drain pipe, in place, as follows:			
	(a) For 12-inch vitrified pipe, per lineal foot	....	100	....
	(b) For 10-inch vitrified pipe, per lineal foot	....	100	....
	(c) For 8-inch vitrified pipe, per lineal foot	....	7,100	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	(d) For 6-inch vitrified pipe, per lineal foot	....	200	....
	(e) For 4-inch vitrified pipe, per lineal foot	....	100	....
	(f) For 8-inch cast-iron pipe, per lineal foot	....	....	....
	(g) For 6-inch cast-iron pipe, per lineal foot	....	100	....
	(h) For 4-inch cast-iron pipe, per lineal foot	....	11,170	....
18.	For tunnel ducts, in place, as required by Section 305 of the specifications, per duct foot	....	569,000	....
19.	For riveted steel, painted and erected, per ton of two thousand pounds	....	1,417	....
20.	For steel beams and shapes with connections, painted and erected, per ton of two thousand pounds	....	760	....
21.	For steel rods and bars built in concrete per ton of two thousand pounds	....	1,305	....
25.	For miscellaneous iron castings, other than tunnel lining, such as manhole heads and covers, gratings, etc., but not including castings for sewer work or pipes; in place, per ton of two thousand pounds	....	5	....
26.	For wire mesh, in place, per pound	....	1,370	....
27.	For one and one half-inch (1½ inch) galvanized iron pipe hand rail, in place, including expansion bolts, etc., per lineal foot	....	12,758	....
28.	For steel gratings for ventilation, in place, including frames, etc., per square foot	....	8,560	....
29.	For vault lights, in place, per square foot.	....	5,600	....
30.	For street surface restored:			
	(a) Sidewalks, including curbs and all structures and growths therein and thereon, per square yard	....	8,710	....
	(b) For temporary repavement and maintenance of roadways, per square yard	....	17,190	....
32.	For wrought iron or fibre electric conduits, in place, in stations, as follows:			
	(a) For three-fourths inch (¾-inch) wrought-iron, per lineal foot	....	7,865	....
	(b) For one and one-half inch (1½-inch) wrought-iron, per lineal foot	....	706	....
	(c) For two-inch (2-inch) wrought-iron, per lineal foot	....	380	....
	(d) For two-inch (2-inch) fibre, per lineal foot	....	2,200	....
33.	For cast-iron outlet boxes in place, in stations, each	....	494	....
34.	For six-inch (6-inch) cast-iron pipe and fittings, including specials ("extra heavy"), in place in stations, per lineal foot	....	90	....
	SEWERS—ITEMS 37 TO 74.			
	Vitrified and Cast Iron Pipe—Items 37 to 43.			
38.	For 15-inch vitrified pipe sewer, per lineal foot	....	1,596	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
39.	For 18-inch vitrified pipe sewer, per lineal foot	....	1,758	....
	Egg-Shaped Brick or Concrete Sewers—Items 44 *to* 51.			
45.	For 3 feet 6 inches by 2 feet 4 inches per lineal foot	....	1,863	....

	Air Pipes—Items 121 to 124.			
	For air pipe in place, as follows:			
122.	For 8-inch air pipe, per linear foot......	....	410	....
124.	For new 8-inch air pipe, delivered on the work, per linear foot..................	....	100	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	DUCTS IN STREETS. *Electric Ducts and Conduits in Streets.* (Other than tunnel ducts and street railroad ducts, which are provided for in Items 18 and 75-a.)			
127.	For electric ducts and conduits in place, as provided in Section 71-a of the specifications, per duct foot.................	....	170,000	....

(2) If this proposal is accepted, the undersigned will, within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York, pursuant to the terms of the said contract, a bond in the sum of three hundred thousand dollars ($300,000), in the form hereto annexed, with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No.........., on the...... floor of the building No............. in the Borough of.............., in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that the Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then, if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission, to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated the.........................., 1910.

*Here insert the names and addresses of all persons interested with the bidder If there are no such persons strike out the word "except."

Affidavit of Verification.

State of New York, City and County of New York, ss.:

...., being duly sworn, says: I am†

....

the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this..................day of.................., 1910.

ROUTE 5, SECTION 10, 79TH STREET TO 93D STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad

(Route 5, Section 10.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of invitation to Contractors Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned‡..

....do..

hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 10 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard...................... ..	....	44,700	....
2a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard...........................	....	2,500	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard................	....	150,100	....
3a.	For rock excavation for sewers and pipes, including the disposal of it, etc., per cubic yard	....	700	....

127.	For electric ducts and conduits in place, as provided in Section 71a of the specifications, per duct foot	....	63,000	....

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of four hundred thousand dollars ($400,000) in the form hereto annexed with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No......., on the........floor of the building No............, in the Borough of..........., in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of twelve thousand five hundred dollars ($12,500). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within

such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated the................................, 1910.

Affidavit of Verification.

State of New York, City and County of New York, ss.:

.... being duly sworn, says: I am†.................. the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this..........day of.........., 1910.

ROUTE 5, SECTION 14, 129TH STREET TO MOTT AVENUE, TYPE H.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 14.)

Notice.—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of Invitation to Contractors. Copy of Form of Contract. Copy of Form of Bond.

To the Public Service Commission for the First District:

1. The undersigned‡ .... do .. hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 14 of Route 5, in accordance with the type of tunnel construction designated "H" and to

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid, and at the same time will deliver to the Comptroller of The City of New York, pursuant to the terms of the said contract, a bond in the sum of five hundred thousand dollars ($500,000) in the form hereto annexed with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room.........on the...........floor of the building.................in the Borough of..................in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of fifteen thousand dollars ($15,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted, and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Affidavit of Verification

State of New York, City and County of New York, ss.:

.... being duly sworn, says: I am†..

the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this............day of................, 1910.

ROUTE 5, SECTION 15, MOTT AVENUE TO 157TH STREET AND TO ALEXANDER AVENUE.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 15.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of Invitation to Contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned‡..

do... hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 15 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids, and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final, and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

Schedule of Unit Prices.

SECTION 10. FROM EAST 79TH STREET, UNDER LEXINGTON AVENUE TO EAST 93D STREET. CONTRACTOR, THE BRADLEY CONTRACTING COMPANY. AMOUNT, $3,253,072.80.

State of New York, Public Service Commission for the First District, Tribune Building, 154 Nassau Street, New York, July 5, 1911.

To the Board of Estimate and Apportionment of The City of New York:

The Public Service Commission for the First District herewith transmits to you for your consent, as required by law, a proposed contract between The City of New York and Bradley Contracting Company for the construction at the public expense of Section 10 of Route 5, being that portion of the proposed Lexington Avenue Rapid Transit Railroad which extends under Lexington avenue from East 79th street to East 93d street, in the Borough of Manhattan.

The Public Service Commission for the First District further requests your honorable Board to consent to the said contract herewith transmittted and to prescribe a limit to the amount of bonds available to meet the requirements of the said contract to wit, the sum of three million two hundred and fifty-three thousand and seventy-two dollars and eighty cents ($3,253,072.80); and also to direct the Comptroller of The City of New York to issue the bonds of said City at such a rate of interest as the Commissioners of the Sinking Fund of said City may prescribe for the purpose of providing the necessary means for construction at the public expense of the said portion of such railroad.

And the Public Service Commission for the First District does hereby, pursuant to section 45 of the Greater New York Charter, make request for the authorization of such corporate stock for the full amount sufficient to pay the entire estimated expense of executing such contract, to wit, the sum of three million two hundred and fifty-three thousand seventy-two dollars and eighty cents ($3,253,072.80).

In witness whereof, the Public Service Commission for the First District has

caused its official seal to be hereto affixed and attested by its Secretary and these presents to be signed by its Chairman this 5th day of July, 1911.

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of.."; if a corporation, say, "the (President or other officer duly authorized) of the..Company."

PUBLIC SERVICE COMMISSION FOR THE FIRST DISTRICT, by W. R. WILLCOX, Chairman. [SEAL]

Attest: TRAVIS H. WHITNEY, Secretary.

Route 5, *Section* 10.

After consideration of the bids on Section 10 of Route 5, the following resolution was duly moved and seconded:

Resolved, That this Commission hereby accepts the proposal of Bradley Contracting Company, dated October 27, 1910, for the construction of Section 10 of Route 5, being that portion of the proposed Lexington Avenue Rapid Transit Railroad which extends under Lexington avenue from East 79th street to East 93d street, in the Borough of Manhattan, the aggregate of the unit prices in the proposal amounting to three million two hundred and fifty-three thousand and seventy-two dollars and eighty cents ($3,253,072.80).

Resolved, That the Chairman and the Secretary be and they hereby are authorized on behalf of the Commission to execute a contract in the form attached to the said proposal and to deliver the same if and when consented to by the Board of Estimate and Apportionment and upon compliance by the said Bradley Contracting Company with the requirements of the invitation to bidders attached to the said proposal.

Resolved, That the Chairman and Secretary be and they hereby are authorized and directed to request the Board of Estimate and Apportionment to consent to the said contract and to prescribe a limit to the amount of bonds available to meet the requirements of the said contract, to wit, the sum of three million two hundred and fifty-three thousand and seventy-two dollars and eighty cents ($3,253,072.80); and also to request the said Board of Estimate and Apportionment to direct the Comptroller of The City of New York to issue the bonds of said City at such rate of interest as the Board of Commissioners of the Sinking Fund of said City may prescribe for the purpose of providing the necessary means for construction at the public expense of the said portion of such railroad; and also to make request for the authorization of bonds for the full amount sufficient to pay the entire estimated expense of executing such contract, to wit, the sum of three million two hundred and fifty-three thousand and seventy-two dollars and eighty cents ($3,253,072.80).

Resolved, That the Secretary give notice to the said Bradley Contracting Company that its proposal has been accepted and the contract awarded to it by this Commission, subject to its being consented to by the Board of Estimate and Apportionment, as required by law.

Resolved, That it be referred to Counsel to the Commission to inquire into the sufficiency of the sureties proposed to be given by the said Bradley Contracting Company and in case the sureties named in the proposal of the said Bradley Contracting Company, or any of them, are not approved by the Commission, then to inquire into the sufficiency of any other or substitute sureties and in behalf of the Commission to do any such act as may be necessary and incidental to the furnishing of a proper bond.

Ayes—Commissioners Willcox, McCarroll, Maltbie, Eustis, Cram.

Nays—None.

Carried.

State of New York, County of New York, ss.:

I, Travis H. Whitney, Secretary of the Public Service Commission for the First District, do hereby certify that I have compared the above with the original adopted by said Commission on July 5, 1911, and that it is a correct transcript therefrom and of the whole of the original.

In testimony whereof, I have hereunto subscribed my hand and affixed the seal of the Commission this 5th day of July, 1911.

TRAVIS H. WHITNEY, Secretary.

[SEAL]

INVITATION TO CONTRACTORS.

Parts of Lexington Avenue Route.

The City of New York, acting by the Public Service Commission for the First District (hereinafter called "the Commission") invites proposals to construct portions of a proposed rapid transit railroad in the Boroughs of Manhattan and The Bronx in The City of New York. Proposals may be submitted separately for any one or more of the separate sections of which such railroad consists as hereinafter stated.

The points within the City between which the said several parts are to run and the route or routes to be followed are briefly as follows:

Lexington Avenue Route.

(Route No. 5.)

Section 1 begins under Battery Park and extends thence under Battery place, Greenwich street, Trinity place and Church street to a point about 80 feet north of the centre line of Dey street; with a station in Battery Park, a station at Rector street and a station at Cortlandt and Dey streets.

Section 2 begins at the end of Section 1 and extends thence under Church street, private property, Vesey street, private property, and Broadway to a point under Broadway about 110 feet north of the centre line of Walker street; with a station at Murray and Warren streets.

Section 2-A begins at the end of Section 2 and extends thence under Broadway to a point about on the northerly building line of Howard street. This section includes the Canal street station and also the portion of the Canal street subway lying thereunder.

Section 3 begins at the end of Section 2-A and extends thence under Broadway to a point about midway between Houston and Bleecker streets; with a station at Prince street.

Section 4 begins at the end of Section 3 and extends thence under Broadway, private property and the several cross streets to a point under private property at the southerly line of East 14th street and Irving place; with a station at Astor place and East 8th street.

Section 5 begins at the end of Section 4 and extends thence under Irving place, Gramercy Park and Lexington avenue to a point about 140 feet north of the centre line of East 26th street; with a station at East 14th and East 15th streets and a station at East 23d street.

Section 6 begins at the end of Section 5 and extends thence under Lexington avenue to about the centre line of East 40th street; with a station at East 27th and East 28th streets and a station at East 34th street.

Section 7 begins at the end of Section 6 and extends thence under Lexington avenue to a point about 50 feet north of the centre line of East 53d street; with a station at East 42d and 43d streets and a station at East 51st street.

Section 8 begins at the end of Section 7 and extends thence under Lexington avenue to a point about 50 feet north of the centre line of East 67th street; with a station at East 58th and East 59th streets.

Section 9 begins at the end of Section 8 and extends thence under Lexington avenue to a point about 70 feet south of the centre line of East 79th street; with a station at East 68th and East 69th streets and a station at East 77th street.

Section 10 begins at the end of Section 9 and extends thence under Lexington avenue to a point about 50 feet south of the centre line of East 93d street; with a station at East 86th street.

Section 11 begins at the end of Section 10 and extends thence under Lexington avenue to a point about 70 feet south of the centre line of East 106th street; with a station at East 96th street and a station at East 102d and East 103d streets.

Section 12 begins at the end of Section 11 and extends thence under Lexington avenue to a point about 115 feet south of the centre line of East 118th street; with a station at East 110th and East 111th streets and a station at East 116th street.

Section 13 begins at the end of Section 12 and extends thence under Lexington avenue to a point about 120 feet south of the centre line of East 129th street; with a station at East 125th street.

Section 14 begins at the end of Section 13 and extends thence under Lexington avenue, private property and the Harlem River to a point in private property in the Borough of The Bronx, thence under private property and Park avenue to East 135th street. Here the line divides into two branches. The west branch begins at about the centre line of East 135th street and extends thence under private property to a point in private property a distance of about 655 feet from the centre line of East 135th street and about 50 feet west of the centre line of Mott avenue. The east branch extends under Park avenue and partly under private property to about the intersection of the easterly line of Mott avenue with the westerly line of Park avenue.

Section 15. This section consists of two branches. The west branch begins at the end of the west branch of Section 14 and extends thence under East 138th street, private property and Mott avenue, Franz Sigel Park, private property and the several cross streets to a point in private property on the easterly side of River avenue about 120 feet south of the south line of East 157th street; with a station at East 138th street and East 149th street. (The portion of this section north of East 151st street is part of the River Avenue Route adopted by the Commission

on the 16th day of June, 1908.) The east branch begins at the end of the east branch of Section 14 and extends thence under Park avenue, private property, Canal Street West and East 138th street to a point in East 138th street about 150 feet easterly of the centre line of Alexander avenue, with a station between 3d and Alexander avenues.

The general plan of construction calls for a subsurface railroad having two tracks between Battery Park and Chambers street in Manhattan, and four tracks from Chambers street, in Manhattan, to 135th street and Park avenue, in the Bronx, with the branches in The Bronx having in the main three tracks each. Turnouts, cross-overs, connections, sidings, loops, etc., will be constructed, all of which are more particularly indicated on the contract drawings.

For Section 14 two plans, designated Type H and Type K, respectively, have been prepared. The bidders for such section may submit a proposal for either or both of such types. After a comparison of the bids the Commission will determine which of such plans shall be adopted.

Bidders for the several sections will not be required to do the station finish work, nor to provide or lay tracks, ties or ballast.

The work of construction under the contract shall include the construction of all necessary sewers and connections, along the route of the railroad; also the necessary support, maintenance, readjustment and reconstruction of vaults adjacent to buildings, pipes, tubes, conduits, subways or other subsurface structures; the support and care, including underpinning where necessary, of all buildings, monuments, surface, subsurface and elevated railroads and other structures, etc., affected by or interfered with during the construction of the work; also the restoration of the sidewalks and the temporary paving and maintenance of roadways.

The method of construction will be partly by trench excavation (under cover, unless otherwise specified in the form of contract or permitted by the Commission), and partly by tunnel, as set forth in the forms of contract.

Bidders must examine the form of contract, specifications, maps and plans; must visit the location of the work and inform themselves of the present conditions along the line thereof and make their own estimates of the facilities and difficulties attending the execution of the proposed work.

A fuller description of the work to be done is set forth, and other requirements, provisions, details and specifications are stated, in the printed form of contract and in the contract drawings therein referred to. Printed copies of the forms of contract, bond and contractor's proposal, may be had on application at the office of the Commission, 154 Nassau street, Borough of Manhattan, City of New York. The contract drawings may be inspected at the same office, and copies thereof may be purchased by prospective bidders by payment of five dollars ($5) for the contract drawings for each section. The printed form of contract and the contract drawings are to be deemed a part of this invitation.

The Commission is informed by the Department of Docks and Ferries that docks and bulkheads along the East River may be available for dumping purposes. Information in regard thereto may be obtained by any intending bidder upon inquiry at the office of the Commission.

Partial payments to the Contractor will be made monthly as the work proceeds, as provided in the form of contract.

The Contractor for any section or sections will be required to complete the work as soon as practicable and within the time hereinafter prescribed for such completion.

Sealed bids or proposals will be received at the office of the Commission at 154 Nassau street, Borough of Manhattan, City of New York, until the 27th day of October, 1910, at twelve (12) o'clock noon, at which time, or at a later date to be fixed by the Commission, the proposals will be publicly opened.

Proposals must be in the form prescribed by the Commission, copies of which may be obtained at the office of the Commission.

A statement, based upon the estimate of the Engineer, of the quantities of the various classes of the work and of the nature and extent as near as practicable of the work required for each section, is to be found in the schedules forming a part of the form of Contractor's Proposal. The quantities given in such schedules are approximate only, being given as a basis for the uniform comparison of bids and no claim is to be made against the City on account of any excess or deficiency, absolute or relative, in the same, except as provided in the specifications and form of contract.

All proposals must, when submitted, be enclosed in a sealed envelope endorsed: "*Proposal for Constructing Rapid Transit Railroad—Route* 5, *Section* —*," and must be delivered to the Commission or its Secretary; and in the presence of the person submitting the proposal, it will be deposited in a sealed box in which all proposals will be deposited. No proposal will be received or deposited unless accompanied by a separate certified check for each section bid upon, drawn upon a national or state bank or trust company having its principal office in The City of New York, satisfactory to the Commission and payable to the order of the Comptroller of The City of New York for the amount herein specified for the section for which a proposal is made. Such check must not be enclosed in the envelope containing the proposal.

The Unit Prices must not be improperly balanced, and any bid which the Commission considers detrimental to the City's interests may be rejected.

No proposal, after it shall have been deposited with the Commission, will be allowed to be withdrawn for any reason whatever.

The award of the contract or contracts will be made by the Commission as soon as practicable after the opening of the proposals.

Bidders whose proposals are otherwise satisfactory, in case the sureties named by them are not approved by the Commission, may substitute in their proposals the names of other sureties approved by the Commission, but such substitution must be made within five days after notice of disapproval, unless this period is extended by the Commission.

A bidder whose proposal shall be accepted shall, in person or by duly authorized representative, attend at the said office of the Commission within ten days after the delivery of a notice by the Commission that his proposal is accepted and that the contract is consented to by the Board of Estimate and Apportionment, and such bidder shall then deliver a contract in the form referred to, duly executed and with its execution duly proved.

At the time of the delivery of the contract, the Contractor will be required to furnish security to the City by giving a bond for the amount hereinafter stated. The Contractor's bond must be in the form annexed to the form of contract.

In addition and as further security to the City, ten (10) per cent. of the amount certified from time to time to be due to the Contractor will be retained until the work is fully completed and accepted.

Schedule Indicating Time Allowed for Completion, the Amount of Bond and the Amount of Certified Check for Each of the Several Sections.

Route 5.	Time for Completion, Months.	Amount of Bond.	Amount of Certified Check.
Section 1	42	$500,000 00	$15,000 00
Section 2	42	600,000 00	15,000 00
Section 2A	42	250,000 00	10,000 00
Section 3	42	300,000 00	10,000 00
Section 4	36	300,000 00	10,000 00
Section 5	42	300,000 00	10,000 00
Section 6	42	350,000 00	10,000 00
Section 7	42	350,000 00	10,000 00
Section 8	42	300,000 00	10,000 00
Section 9	42	300,000 00	10,000 00
Section 10	42	300,000 00	10,000 00
Section 11	42	300,000 00	10,000 00
Section 12	42	400,000 00	12,500 00
Section 13	42	400,000 00	12,500 00
Section 14	42	500,000 00	15,000 00
Section 15	42	500,000 00	15,000 00

In case of failure or neglect to execute and deliver the contract or to execute and deliver the required bond, such bidder will, at the option of the Commission, be deemed either to have made the contract or to have abandoned the contract. In the latter case, the Commission will give notice thereof to such defaulting bidder, and the Commission may thereupon proceed to make another contract with such, if any, of the original bidders, as, in the opinion of the Commission, it will be to the best interests of the City to contract with, or may by new advertisement invite further

proposals. The defaulting bidder shall thereupon be liable to the City for all loss and damage by it sustained, including the excess, if any, of the amount it shall pay any other Contractor over the amount of the bid of such defaulting bidder.

---

*To be filled in with the Section number for which the proposal is made.

If the Commission shall give notice to any bidder that his or its proposal is accepted and that the contract is consented to by the Board of Estimate and Apportionment, and if the bidder shall fail within ten days thereafter or within such further period, if any, as may be prescribed by the Commission, to execute and deliver the contract and to execute and deliver the bond with sureties, then this Invitation to Contractors and proposal accepted as aforesaid shall be a contract binding the bidder to pay to the City the damage by it sustained by reason of such failure, and in such case the bidder shall, by the terms of the proposal, absolutely assign to the City the ownership of the check accompanying his or its proposal as a payment on account of such damages.

All such deposits made by bidders whose proposals shall not be accepted by the Commission will be returned to the person or persons making the same within five days after the contract shall be executed and delivered. The deposit of the successful bidder will be returned when the contract is executed and its provisions as to security are complied with.

The right to reject any and all bids is reserved.

New York, September 1, 1910.

PUBLIC SERVICE COMMISSION FOR THE FIRST DISTRICT, by WILLIAM R. WILLCOX, Chairman; TRAVIS H. WHITNEY, Secretary.

RAPID TRANSIT RAILROAD.

Contract, Route 5, Section 10.

Agreement, made this............day of................., 1910, between The City of New York, hereinafter called the City, acting by the Public Service Commission for the First District, hereinafter called the Commission, party of the first part, and Bradley Contracting Company of.......... hereinafter called the Contractor, party of the second part.

Whereas, The Commission in behalf of the City by due advertisement, pursuant to law, has invited contractors to submit to the Commission proposals for making this contract; and

Whereas, The Contractor has thereupon duly submitted to the Commission a proposal, which has been accepted; and

Whereas, The Board of Estimate and Apportionment of The City of New York has consented to this contract;

Now, therefore, in consideration of the mutual covenants and agreements hereinafter contained, and under the authority of chapter 4 of the Laws of 1891, entitled, "An Act to provide for Rapid Transit Railways in Cities of over One Million Inhabitants," and of the various acts amending the same, the parties do hereby, the City for itself and its successors and the Contractor for itself, its successors and assigns, agree each with the other as follows:

I.—GENERAL PROVISIONS AND DEFINITIONS.

Outline of Contract.

Article 1. The Contractor agrees to construct the part hereinafter described of a Rapid Transit Railroad, with its appurtenances. The City agrees to pay to the Contractor the sums of money hereinafter mentioned at the times and in the manner and upon the terms and conditions hereinafter set forth.

Brief Description of Works.

Article 2. The Railroad to be constructed under this contract forms a part of a certain route adopted by the Board of Rapid Transit Railroad Commissioners for The City of New York on May 12, 1905, and which, as modified, is known as the Lexington Avenue Route—or Route No. 5. The part to be constructed under this contract consists of

Section 10—79th Street to 93d Street.

Beginning at a point about 70 feet south of the centre line of 79th street, thence under Lexington avenue to a point about 50 feet south of the centre line of 93d street; with a station at East 86th street.

The precise location of the tracks, and the dimensions and other characteristics of the railroad are more fully stated in the specifications forming a part of this contract, and in the detailed drawings and plans hereinafter mentioned.

Statutes Incorporated Herein.

Article 3. This contract is made pursuant to the Rapid Transit Act, which is to be deemed a part hereof as if it were incorporated herein.

Marginal Notes, etc.

Article 4. Titles, headings, running headlines and marginal notes are printed hereon merely for convenience and shall not be deemed to be any part of this contract for any purpose whatever.

Definitions of Words.

Article 5. The following words and expressions used in this contract shall, except where by the context it is clear that another meaning is intended, be construed as follows:

"City."

(1) The word "City" to mean The City of New York, and any other corporation or division of government to which the ownership, rights, powers and privileges of The City of New York, under the Rapid Transit Act, shall hereafter come, belong or appertain.

"Commission."

(2) The word "Commission" to mean the Public Service Commission for the First District, and any other board, body, commission, official or officials, to which or to whom the powers now belonging to the said Commission in respect to the location, construction, equipment, maintenance and operation of Rapid Transit Railroads under the provisions of the Rapid Transit Act shall, by virtue of any act or acts, hereafter pass or be held to appertain.

"Contractor."

(3) The word "Contractor" to mean the party of the second part to this contract, and its successors, and any and every person or corporation who or which shall at any time be liable in the place or for the party of the second part to perform any obligations under this contract assumed by the said party of the second part. For convenience the Contractor is hereinafter referred to as if the Contractor were an individual. The word "he" shall, as the sense may require, include "it," "she" and "they;" the word "him" shall include "her," "it" and "them;" and the word "his" shall include "its," "her" and "their."

"Comptroller."

(4) The word "Comptroller" to mean the Comptroller of The City of New York, and the officer or board to whom or to which his powers now existing under the Rapid Transit Act shall come to appertain.

"Engineer."

(5) The word "Engineer" to mean the Chief Engineer of the Commission or his duly authorized representative and any successor or successors duly appointed or any deputy or substitute for him who shall be appointed by the Commission or by its authority.

"Rapid Transit Act."

(6) The words "Rapid Transit Act" to mean chapter 4 of the Laws of 1891 as amended by chapters 102 and 556 of the Laws of 1892, chapters 528 and 752 of the Laws of 1894, chapter 519 of the Laws of 1895, chapter 729 of the Laws of 1896, chapter 616 of the Laws of 1900, chapter 587 of the Laws of 1901, chapters 533, 542, 544 and 584 of the Laws of 1902, chapters 562 and 564 of the Laws of 1904, chapters 599 and 631 of the Laws of 1905, chapters 472, 606 and 607 of the Laws of 1906, chapter 429 of the Laws of 1907, chapter 498 of the Laws of 1909, and chapters 205, 504, 505 and 506 of the Laws of 1910, or as heretofore otherwise amended.

"Railroad."

(7) The word "Railroad" to mean the part which the Contractor agrees by this contract to build, together with the station or stations to be built in conjunction therewith, and all appurtenances thereto which are to be constructed or provided by the Contractor.

"The Works."

(8) The words "the Works" to mean all of the matters and things herein agreed to be furnished or done by or on the part of the Contractor.

"New York."

(9) The words "New York" to mean The City of New York according to its boundaries at the date of this contract.

"Daily Newspaper."

(10) The words "daily newspaper" to mean any paper regularly published in New York on every day or every day except Sundays and holidays.

"Notice." "Direction."

(11) The word "notice" to mean a written notice. The word "direction" to mean a written direction.

Wherever in the specifications or upon the drawings the words "directed," "required," "permitted," "ordered," "designated," "prescribed" or words of like import are used, it shall be understood that the direction, requirement, permission, order, designation or prescription of the Engineer is intended, and similarly the words "approved," "acceptable," "satisfactory" or words of like import shall mean approved by or acceptable or satisfactory to the Engineer.

Legal Address of Contractor. Address May be Changed. Service Upon Contractor Personally.

Article 6. The address given in the bid or proposal, upon which this contract is founded, is hereby designated as the place where all notices, directions and other communications to the Contractor shall be certified, mailed or delivered. The delivering at the above-named place or depositing in a post-paid wrapper directed to the above place, in any post office box regularly maintained by the Post Office Department, of any notice, letter or other communication to the Contractor, shall be deemed sufficient service thereof upon the Contractor. Such address may be changed at any time by an instrument in writing executed and acknowledged by the Contractor and delivered to the Commission. Nothing herein contained shall be deemed to preclude or render inoperative the service of any notice, direction or other communication upon the Contractor personally.

Contractor Responsible for Acts of Subcontractor's Employees.

Article 7. If the Contractor shall cause any part of this contract to be performed by a subcontractor, the provisions of this contract shall apply to such subcontractor and his officers, agents and employees in all respects, as if he and they were employees of the Contractor; and the Contractor shall not be in any manner thereby discharged from his obligations and liabilities hereunder, but shall be liable hereunder for all acts and negligence of the subcontractor, his officers, agents and employees as if they were employees of the Contractor. The employees of the subcontractor shall be subject to the same provisions hereof as employees of the Contractor; and the work or materials furnished by the subcontractor shall be subject to the provisions hereof, as if furnished directly by the Contractor.

Commission May Disapprove Subcontractors.

Article 8. The Contractor, before making any subcontract of the work, shall state in writing to the Commission the name of the proposed subcontractor, the portion of the work which such subcontractor is to do or the materials which such subcontractor is to furnish, the place of business of such subcontractor and such other information as the Commission may require. The Commission shall have the right to require the Contractor not to award any subcontract to a person, firm or corporation disapproved by the Commission.

II.—Work to be Done, Price, Etc.

Work to be Done.

Article 9. The Contractor shall do all the work and furnish all the materials, plants, tools and appliances necessary or proper for performing and completing the work of constructing the railroad in the manner and within the time hereinafter specified. He shall complete the railroad and do all the work and furnish all labor and materials in and about the construction of the railroad to the satisfaction of the Commission and in accordance with this contract and the specifications and drawings herein mentioned at the prices herein agreed upon and fixed therefor; provided, however, the said contract drawings may from time to time be altered or modified as hereinafter provided:

Construction Includes Sewer and Other Incidentals.

Article 10. In order to construct the railroad it will be necessary to take up and relay the sidewalk pavement or other surface material, and to lay and maintain a temporary pavement in the roadway, to protect, support and maintain during construction all buildings and other structures, including their foundations, and all elevated and surface and subsurface railroads, water mains, gas pipes, electric subways, poles and wires, pneumatic tubes, steam pipes, vaults, including vaults of abutting property, and other surface, subsurface and overhead structures, together with their necessary connections, as the same may be met with along the route; to build sewers both along the route and other streets; to make or remake the necessary manholes, catch basins

and other sewer connections therewith; to move, alter, readjust or rebuild water mains, gas pipes, electric subways, pneumatic tubes, steam pipes, vaults, including vaults of abutting property, and other subsurface structures, together with their necessary connections; and to do all such additional and incidental work as may be necessary for the completion of the railroad and the reconstruction and restoration of the street pavements or other surfaces (except as herein provided in respect of temporary pavements for roadways), adjacent to the route of the railroad and which may have been directly or indirectly disturbed or injured by the Contractor in the progress of the work of construction, to as useful and good a condition as existed before construction shall have been begun. All such work of every description, including underpinning wherever necessary, of all buildings or structures of whatsoever nature, monuments, elevated railroads and surface and subsurface railroads affected by or interfered with during the construction of the railroad, is part of the work which is included in this contract and which the Contractor agrees to perform for the prices herein agreed upon.

Prices.

Article 11. The City will pay and the Contractor shall receive in full compensation for furnishing the necessary plant and all the materials and labor, and for performing and completing all the work which is necessary or proper to be furnished or performed in order to complete the railroad (including all incidental work) and also for all loss or damage arising out of the nature of the work aforesaid, or from the action of the elements or from any unforeseen obstruction or difficulty encountered in the prosecution of the work, and for all risks of any description connected with the work, and for all expenses incurred by or in consequence of the suspension or discontinuance of the work as herein specified, the following prices, to wit:

Schedule of Unit Prices.

Item 1. For earth excavation above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., the sum of three dollars and fifty cents ($3.50) per cubic yard.

Item 2-A. For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., the sum of five dollars ($5.00) per cubic yard.

Item 3. For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., the sum of five dollars ($5) per cubic yard.

Item 3-A. For rock excavation for sewers and pipes, including the disposal of it, etc., the sum of six dollars ($6) per cubic yard.

Item 4. For underpinning buildings, including all incidental work and material, as follows:

(a) For buildings less than seven (7) stories in height the sum of one hundred and fifty dollars ($150) per linear front foot of building underpinned.

(b) For buildings from seven (7) to twelve (12) stories in height the sum of two hundred dollars ($200) per linear front foot of building underpinned.

Item 5. For tunnel excavation (except tunneling for sewers), including the disposal of material, timbering, etc., the sum of nine dollars ($9) per cubic yard.

Item 6. For concrete masonry, in place, the sum of ten dollars ($10) per cubic yard.

Item 7. For protective concrete masonry, in place, outside of waterproofing, the sum of eight dollars ($8) per cubic yard.

Item 8. For rubble stone masonry, in place, the sum of eight dollars ($8) per cubic yard.

Item 9. For brick masonry, in place, the sum of fifteen dollars ($15) per cubic yard.

Item 10. For hollow terra cotta brick masonry, in place, the sum of fifteen dollars ($15) per cubic yard.

Item 11. For grout of Portland cement, the sum of four dollars and fifty cents ($4.50) per barrel of Portland cement used.

Item 14. For broken stone or gravel, in place, other than that used in concrete, the sum of two dollars and fifty cents ($2.50) per cubic yard.

Item 15. For waterproofing, treated woven fabric, laid with pitch or asphaltum, in place, as follows:

(a) For one-ply, the sum of seventy-five cents ($0.75) per square yard.

(b) For two-ply, the sum of one dollar ($1) per square yard.

(c) For three-ply, the sum of one dollar and fifty cents ($1.50) per square yard.

(d) For four-ply, the sum of one dollar and seventy-five cents ($1.75) per square yard.

(e) For five-ply, the sum of two dollars ($2) per square yard.

(f) For six-ply, the sum of two dollars and fifty cents ($2.50) per square yard.

Item 16. For waterproofing, brick laid in asphalt mastic, in place, the sum of thirty dollars ($30) per cubic yard.

Item 17. For vitrified or cast iron drain pipe, in place, as follows:

(a) For twelve (12) inch vitrified pipe, the sum of one dollar and seventy-five cents ($1.75) per linear foot.

(b) For ten (10) inch vitrified pipe, the sum of one dollar and fifty cents ($1.50) per linear foot.

(c) For eight (8) inch vitrified pipe, the sum of one dollar and twenty-five cents ($1.25) per linear foot.

(d) For six (6) inch vitrified pipe, the sum of one dollar ($1) per linear foot.

(e) For four (4) inch vitrified pipe, the sum of seventy-five cents ($0.75) per linear foot.

(g) For six (6) inch cast iron pipe, the sum of one dollar and fifty cents ($1.50) per linear foot.

(h) For four (4) inch cast iron pipe, the sum of one dollar ($1) per linear foot.

Item 18. For tunnel ducts in place as required by section 305 of the specifications, the sum of fifteen cents ($0.15) per duct foot.

Item 19—For riveted steel, painted and erected, the sum of ninety dollars ($90) per ton of two thousand pounds.

Item 20. For steel beams and shapes with connections, painted and erected, the sum of eighty dollars ($80) per ton of two thousand pounds.

Item 21. For steel rods and bars built in concrete, the sum of sixty-five dollars ($65) per ton of two thousand pounds.

Item 25. For miscellaneous iron castings, other than tunnel lining, such as manhole heads and covers, gratings, etc., but not including castings for sewer work or pipes, in place, the sum of seventy-five dollars ($75) per ton of two thousand pounds.

Item 26. For wire mesh, in place, the sum of ten cents ($0.10) per pound.

Item 27. For one and one-half (1½) inch galvanized iron pipe hand-rail, in place, including expansion bolts, etc., the sum of one dollar and twenty-five cents ($1.25) per linear foot.

Item 28. For steel gratings, for ventilation, in place, including frames, etc., the sum of two dollars and fifty cents ($2.50) per square foot.

Item 29. For vault lights, in place, the sum of two dollars ($2) per square foot.

Item 30. For street surface restored:

(a) For street surface, except roadways, the sum of three dollars ($3) per square yard.

(b) For temporary restoration and maintenance of roadways, the sum of three dollars ($3) per square yard.

Item 32. For wrought-iron or fibre electric conduits, in place, in stations as follows:

(a) For three-fourths (¾) inch wrought-iron conduits, the sum of thirty cents ($0.30) per linear foot.

(b) For one and one-half (1½) inch wrought-iron conduits the sum of forty-five cents ($0.45) per linear foot.

(c) For two (2) inch wrought-iron conduits the sum of sixty cents ($0.60) per linear foot.

(d) For two (2) inch fibre conduits the sum of fifteen cents ($0.15) per linear foot.

Item 33. For cast-iron outlet boxes, in place, in stations, the sum of one dollar ($1) each.

Item 34. For six (6) inch cast-iron pipe and fittings including specials "extra heavy" in place, in stations, the sum of two dollars and fifty cents ($2.50) per linear foot.

SEWERS—ITEMS 37 TO 74.

Vitrified and Cast-iron Pipe—Items 37 *to* 43.

Item 38. For fifteen (15) inch vitrified pipe sewer, the sum of six dollars ($6) per linear foot.

Item 42. For cast-iron sewer pipe (straight pipe) in place in the work, the sum of fifty dollars ($50) per ton of two thousand pounds.

Egg-shaped Brick or Concrete Sewers—Items 44 *to* 51.

Item 45. For 3 feet 6 inches by 2 feet 4 inches, the sum of fifteen ($15.00) dollars per linear foot.

SURFACE AND SUBSURFACE STRUCTURES—ITEMS 75 AND 76.

Item 75. For street surface railroads, including the support, reconstruction, rebuilding, etc., where necessary (but not including permanent masonry supports, if required and added, and not including additional vaults, if required and constructed, in excess of the number existing), as follows:

(a) For electric railroads, the sum of eighteen dollars ($18) per linear foot of single track.

PIPES IN STREETS—ITEMS 77 TO 126.

For Work and Material as Called for by Section 71 *of the Specifications.*

Water and Gas Pipes—Items 77 *to* 108.

Water Pipes—Items 77 *to* 88.

For water pipes in place, as follows:

Item 78. For 4-inch water pipe, the sum of one dollar and twenty-five cents ($1.25) per linear foot.

Item 79. For 6-inch water pipe, the sum of one dollar and fifty cents ($1.50) per linear foot.

Item 82. For 12-inch water pipe, the sum of two dollars ($2) per linear foot.

Gas Pipes—Items 89 *to* 99.

For gas pipes in place, as follows:

Item 90. For 4-inch gas pipe, the sum of one dollar ($1) per linear foot.

Item 91. For 6-inch gas pipe, the sum of one dollar and twenty-five cents ($1.25) per linear foot.

Item 92. For 8-inch gas pipe, the sum of one dollar and fifty cents ($1.50) per linear foot.

Item 94. For 12-inch gas pipe, the sum of two dollars ($2) per linear foot.

Item 96. For 20-inch gas pipe, the sum of two dollars and fifty cents ($2.50) per linear foot.

New Cast-Iron Hub and Spigot Water and Gas Pipe.

Items 100 *and* 101.

Item 100. For new cast-iron hub and spigot straight pipe delivered on the work, the sum of forty dollars ($40) per ton of 2,000 pounds.

Item 101. For new cast-iron hub and spigot pipe, special castings, delivered on the work the sum of seventy dollars ($70) per ton of two thousand pounds.

Air Pipes—Items 121 *to* 124.

For air pipe in place, as follows:

Item 121. For 6-inch air pipe, the sum of one dollar and fifty cents ($1.50) per linear foot.

DUCTS IN STREETS.

Electric Ducts and Conduits in Streets.

(Other than tunnel ducts and street railroad ducts which are provided for in Items 18 and 75-a.)

Item 127. For electric ducts and conduits in place, as provided in section 71-a of the Specifications, the sum of twenty-five cents ($0.25) per duct foot.

Work Not Susceptible of Classification.

Article 12. In case any work or materials shall be required to be done or furnished in or about the works—whether specified herein or indicated on the plans or not—which are not susceptible of classification under the Schedule of Unit Prices, the Contractor shall and will if ordered by the Engineer do and perform such work and furnish such materials at and for the actual and necessary net cost in money to the Contractor for labor and for material, where new material is used, and in addition thereto ten per centum (10%) of such net cost for the use of tools and plant, superintendence and all other expenses incidental to the performance of such work and the furnishing of such material, and the Contractor shall have no further claim in excess of the above, but this method of payment shall not apply to the performance of any work or the furnishing of any material which in part or in whole is susceptible of classification under such schedule, which work or material shall be paid for in part or in whole, as the case may be, at the unit price given in such schedule, except as otherwise herein expressly provided.

In case any work or material shall be required to be done or furnished under the provisions of this article, for cost plus ten per centum (10%), the Contractor shall at the end of each day during the progress thereof furnish to the Engineer daily time slips showing the name and number of each workman employed thereon, the number of hours employed thereon, the character of work he is doing and the wages paid or to be paid to him and also a daily memorandum of the material delivered on the work showing the amount and character of such material, from whom purchased and the amount paid or to be paid therefor. If required, the Contractor shall produce any books, vouchers, records or memorandum showing the work and materials actually paid for and the actual prices therefor.

Quantities Approximate Only.

Article 13. It is expressly understood and agreed that the quantities of the various classes of work to be done and materials to be furnished under this contract, specified in the Contractor's Proposal, are approximate and only for the purpose of comparing, on a uniform basis, the bids offered for the works under this contract; and neither the City, nor the Commission, nor any member of the Commission, is to be held responsible that any of the said estimated quantities shall, by reason of inaccuracies, or changes in the works, be found even approximately correct in the construction of the works; and the Contractor shall make no claim for anticipated profit, or for loss of profit, because of a difference between the quantities of the various classes of work actually done or materials actually delivered, and the estimated quantities stated in the Contractor's Proposal.

Right of Commission to Amplify Plans.

Article 14. The Commission shall have the right, during the progress of the work, to amplify the plans, to add explanatory specifications and to furnish additional specifications and drawings.

Plans May be Modified.

Article 15. The Commission further reserves the right to change the location and to alter, in any way it may deem necessary for the public interest, the drawings aforesaid, in part or altogether, at any time during the progress of the work, without constituting grounds for any claim by the Contractor for payment or allowance for damages

or extra service other than is provided for items of the different classes of construction shown in the schedule, or where not susceptible of classification, then as otherwise provided herein.

Contractor Bound to Complete in Best Manner.

Article 16. The Contractor shall complete the entire work in accordance with the specifications and contract drawings and according to the other provisions of this contract and within the times specified in this contract, in the most workmanlike manner and with the highest regard to the safety of life and property and according to the lines, levels and directions given by the Engineer, for the prices herein agreed upon.

Best Materials, Machinery, Tools, etc., to be Used.

Article 17. The Contractor shall furnish of the best description all materials, machinery, implements, tools and labor necessary to construct and put in complete working order all work covered by the specifications, contract drawings and provisions of this contract, including all additional specifications, drawings and details issued or required as herein provided for the prices hereinbefore agreed upon.

Contractor Has Examined Location, Plans, etc.

Article 18. The Contractor hereby represents that prior to the execution of this contract he has examined in detail on the ground the location mentioned herein and indicated on the plans, and that he has fully examined the plans and has read each and every clause and section of this contract and the specifications and has had full opportunity to consider the same and make necessary investigations relating thereto; and he agrees that he will not make any claim for, or have any right to, damages or an extension of time for completion of the works, or any other concession, because of any misinterpretation or misunderstanding of this contract or the specifications or of the plans, or because of any lack of information.

No Acceptance to Obviate the Necessity for Sound Work, etc.

Article 19. No acceptance of any part of the works or of materials therefor shall relieve the Contractor of his obligation to furnish sound material and perform sound work, whether with respect to such part or to any part of the works.

Inspection.

Article 20. The Commission contemplates, and the Contractor hereby approves, the most thorough and minute inspection by the Commission and its Engineer, and by their representatives or subordinates of all work and materials and of the manufacture or preparation of such materials from the beginning of construction to the final completion of the works. It is the intention of the Commission that its Engineer shall draw the attention of the Contractor to all errors or variations from the requirements of this contract or other defects in workmanship or materials. But it is expressly agreed that no omission on the part of the Commission or its Engineer or any officer, member or subordinate of the Commission to point out such errors, variations or defects shall give the Contractor any right or claim against the City or shall in any way relieve the Contractor from his obligations according to the terms of this contract.

Contractor to Afford Facilities for Inspection.

Article 21. The Contractor shall at all times give to the Commission and its members, to the Engineer and his assistants and subordinates, and any person designated by the Commission or its Chairman, all facilities, whether necessary or convenient, for inspecting the materials to be furnished and the work to be done under this contract. The members of the Commission, the Engineer and all employees of the Commission bearing his authorization or the authorization of the Commission or its Chairman, shall be admitted at any time summarily and without delay to any part of the works or to inspection of materials at any place or stage of their manufacture, preparation, shipment or delivery.

Engineer to be Furnished Facilities.

Article 22. The Engineer shall be furnished with every reasonable facility for ascertaining whether the work is in accordance with the requirements and intention of this contract, even to the extent of uncovering or taking down portions of finished work. Should the work thus exposed or examined prove satisfactory, the uncovering or taking down and the replacing of the covering or the making good of the parts removed shall be paid for at the contract prices for the class of work done; but should the work exposed or examined prove unsatisfactory, such uncovering, taking down, replacing and making good shall be at the expense of the Contractor.

Inspection Not to Relieve Contractor of Obligations.

Article 23. The inspection of the work shall not relieve the Contractor of any of his obligations to fulfill his contract as herein prescribed, and defective work shall be made good and unsuitable materials will be rejected, nothwithstanding that such work and materials have been previously overlooked by the Engineer and accepted or estimated for payment. If the work, or any part thereof, shall be found defective before the final acceptance of the whole work, the Contractor shall forthwith make good such defect, in a manner satisfactory to the Engineer, and if any material brought upon the ground for use in the work, or selected for the same, shall be condemned by the Engineer as unsuitable or not in conformity with the specifications, the Contractor shall forthwith remove such materials.

Engineer's Determination to be Final and Conclusive Upon Contractor.

Article 24. To prevent disputes and litigations, the Engineer shall in all cases determine the amount, quality, acceptability and fitness of the several kinds of work and materials which are to be paid for under this contract; shall determine all questions in relation to the works and the construction thereof, and shall in all cases determine every question which may arise relative to the fulfillment of this contract on the part of the Contractor. His determination and estimate shall be final and conclusive upon the Contractor, and in case any question shall arise between the parties hereto, touching this contract, such determination and estimate shall be a condition precedent to the right of the Contractor to receive any money under this contract.

Engineer to Explain.

Article 25. The Engineer shall make all necessary explanations as to the meaning and intention of the specifications, shall give all orders and directions contemplated therein or thereby and in every case in which a difficult or unforeseen condition shall arise in the performance of the work required by this contract.

Other Contractors.

During the progress of the work it will be necessary for other contractors and persons to do work in or about the construction or equipment of the railroad. The Contractor shall afford such other contractors or persons such facilities as the Engineer may require.

Differences Between Contractor and Other Contractors.

Any differences or conflicts which may arise between the Contractor and other contractors of the Commission in regard to their work shall be adjusted and determined by the Engineer.

Substitute for Chief Engineer.

Article 26. Any engineer substituted by the Commission in place of the Chief Engineer during his absence, illness or inability or when the Commission shall so determine, shall, during his official connection, have all the power and authority of the Chief Engineer, and in all respects be recognized as such Chief Engineer.

III.—Specifications.

Specifications and Drawings Subject to Requirement of Railroad of Highest Class. Where Text of Contract Doubtful, Best Materials and Workmanship Required.

Section 1. The specifications and contract drawings hereinafter mentioned and taken in connection with the other provisions of this contract. are intended by the Commission to be full and comprehensive, and to show all the work required to be done. But in a work of this magnitude it is impossible either in advance to show all details, or precisely to forecast all exigencies The specifications and contract drawings are to be taken, therefore, as indicating the amount of work, its nature and the method of construction so far as the same are now distinctly apprehended. The Railroad is intended to be constructed for actual use and operation as an interurban railroad of the highest class, adapted to the necessities of the people of New York, in the best manner, according to the best rules and usages of railroad construction, and in the event of any doubt as to the meaning of any portion or portions of the specifications or contract drawings, or of the text of the contract, the same shall be interpreted as calling for the best construction, both as to materials and workmanship, capable of being supplied or applied under the then existing local conditions. All the clauses of the specifications, and all the parts of the contract drawings, are, therefore, to be understood, construed and interpreted as intending to produce the results hereinbefore stated.

To Construct in Accordance With Specifications.

Section 2. The Contractor shall construct and complete the Railroad strictly in accordance with the requirements of these specifications; if, in the specifications or contract, any detail or other matter or thing requisite be not mentioned, nevertheless the same is deemed to be included and the Contractor hereby undertakes to do the same as part of the work hereunder, at the unit prices for each class of work where applicable or as provided in Article XII. of the contract.

Maps and Drawings.

Section 3. The contract plans referred to in the contract and specifications bear date June 15, 1910, are each countersigned by the Engineer, are stamped with the seal of the Commission, bear the general title:

For Section 10, *Route* 5.

Drawings as follows:

General Notes; Map and Profile; Nos. A12; B23, B24, B101, B102; C1 to C12, inclusive, C1010, C1011, C1014, C1015, C1016, C401, C1032.

Plans and Contract Drawings.

Section 4. The sections and dimensions shown on the contract drawings are typical sections and dimensions which should be applicable to the greater part of the work. Where, however, changes are deemed necessary they may be ordered under Article XV. of the contract and the Engineer shall issue such plans and specifications as may be necessary.

Supplementary Drawings.

Section 5. In addition to the contract drawings already mentioned, the Commission has had prepared a set of maps and plans, bearing the same seal and general title as the contract drawings, but designated as supplementary drawings. These supplementary drawings exhibit certain information which the Commission has received from its Engineer of the nature of the soil underlying portions of the route, the nature and position of elevated and surface railways, water mains, gas and other pipes, sewers, electric subways, manholes, hydrants, catch basins and other surface and subsurface structures.

Supplementary Drawings May be Examined.

Section 6. These supplementary drawings, for each section of the work, can be seen at the office of the Engineer, also samples of material taken in connection with test borings. They are exhibited to the Contractor without any guarantee on the part of the Commission as to their completeness or correctness. The Contractor may have copies (blue prints) of these drawings for one or more of the sections, for such aid, if any, as may be derived from them, on the payment of the cost of printing.

In Case of Difficulties Not Indicated on Supplementary Drawings.

Section 7. If, upon opening the streets, by tunneling or otherwise, difficulties of any nature be encountered which are not indicated or suggested by the supplementary drawings, or by the samples of the test borings, or if additional surface or subsurface structures or obstructions be discovered or found of different size or in different positions or of different nature from those shown on the supplementary drawings, or if in any way such supplementary drawings be found erroneous, the Contractor shall take every necessary or proper precaution to overcome the unforeseen difficulty, and is to support, maintain, protect, remove, adjust or readjust, as the case may be, the additional or different surface or subsurface structures according to the direction of the Engineer, and as provided in this contract and these specifications.

Specifications Not Exclusive.

Section 8. It is expressly understood that the specifications do not include all requirements, but are requirements in addition to those heretofore or elsewhere given or provided in this contract. The specifications and other provisions of this contract, and the contract drawings, are intended to be explanatory of each other. Should, however, any discrepancy appear or any misunderstanding arise as to the import of anything contained in either, the explanation of the Engineer shall be final and conclusive.

Section 9. These specifications arer grouped in subdivisions as follows:

		PAGE
1.	Description of the Work	76
2.	General Clauses	77
3.	Manner of Prosecution and Maintenance of Traffic	88
4.	Street Railroad Tracks, Mains and Other Surface or Subsurface Structures	96
5.	Excavation	102
6.	Tunneling	112
7.	Backfiling	120
8.	Piling and Timbering	121
9.	Cement	123
10.	Bortar	127
11.	Masonry	128
12.	Concrete	130
13.	Brick Masonry	137
14.	Stone Masonry	139
15.	Waterproofing	140
16.	Steel and Iron	145
17.	Painting	157
18.	Ducts and Conduits	160
19.	Drains and Pumps	167
20.	Sewers	171
21.	Requirements for Pipes	197
22.	Street Surface and Park Surface Restored	206
23.	Vault Lights, Gratings and Hand-rails	209

1—Brief Description of the Work.

General Nature.

Section 10. The Rapid Transit Railroad which is hereinbefore described is to be an underground railroad or subway, the general details of construction and the location of the various tracks, junctions, grades, etc., being indicated more particularly on the contract drawings.

Stations to be Constructed.

Section 11. Stations are to be constructed at such places as are indicated on the plans, but station finish work is not included in the work to be done under this contract. Station construction must, however, be kept so advanced that station finish contractors can complete their work coincidently with the completion of the Railroad.

Surface and Subsurface Structures.

Section 12. In addition to the construction of the Railroad, it will be necessary to do various incidental work which is generally referred to in Article X hereof.

Ventilating Chambers and Gratings.

Section 13. In order to provide for a frequent renewal of air in the Railroad, chambers for the installation of necessary ventilating devices shall be built at the sides of the Railroad and in connection therewith. These chambers shall be generally of the form and dimensions as shown on the plans, varying somewhat with the requirements of local conditions. They will be so arranged that the air will discharge through gratings placed generally in the sidewalks in the roofs of the chambers. If, owing to local conditions, it becomes necessary to lead the air to gratings or other outlets away from the chambers, suitable air-ways, ducts or flues shall be constructed.

The chambers will be built at the places and as indicated on the plans.

Section 14. Other openings with gratings will be built at or over the stations, for the purpose of admitting air to the Railroad.

Section 15. The chambers will be provided with suitable doors or openings, and with ladders reaching to the street for use as exits in case of emergency.

2—General Clauses.

Prevention of Water Percolation.

Section 16. It is the very essence of these specifications to secure a railroad structure underground which shall be free from the percolation of ground or outside water. The mixing and placing of the concrete and the placing and protection of the waterproofing shall be with this end in view.

Best Quality of Work.

Section 17. All materials and workmanship must be of the best class in every respect, and the Engineer is to be the sole judge of their quality and efficiency.

Rapidity and Safety.

Section 18. All the work shall be prosecuted in the manner, according to local conditions, best calculated to promote rapidity in construction, to secure safety to life and property and to reduce to the minimum any interference with abutting property and the public travel. Decking of the streets, paving, or other surface work affecting, or affected by, street traffic shall be prosecuted during such hours as will reduce such interference to a minimum. Night work shall be conducted, in accordance with the directions of the Engineer, so that annoyances to occupants of abutting property shall be reduced to a minimum, and the Engineer may, if in his judgment conditions so require, direct that night work be omitted.

Contract Section Part of System.

Section 19. The contract section embraced in this contract is one of a number of contract sections forming part of an extensive rapid transit railroad system, which the interests of the City imperatively require should be completed and put in operation without delay. If the Contractor shall fail so to prosecute his work that, in the judgment of the Engineer, it shall not be reasonablly probable that the work will be completed within the time limited, the Contractor, if directed by the Commission, shall increase the number of shifts and the number of men in each shift as may be necessary to insure the completion of the work within the time required by this contract, or within the shortest possible time thereafter.

Emergencies.

Section 20. In case of emergencies involving danger to life or property, continuous work with an increased force may be ordered by the Engineer for such time as may be necessary.

Permits.

Section 21. No work shall be begun until the Commission shall issue to the Contractor a permit authorizing him to proceed. No permits for excavation will be issued until the Contractor has given satisfactory assurance to the Engineer that the material needed for construction has been acquired and is available. Such permits are to be in such form and to cover such portions of the work as the Commission shall prescribe.

When to be Filed with Borough President.

Section 22. Before any opening is made in the surface of a street. a copy of the permit issued by the Commission shall have been filed with the Borough President not less than five days, unless the Engineer shall expressly direct work to begin within a less period.

Notice Regarding Commencement of Work.

Section 23. Before commencing work on any part of the route, whether on the Railroad or on the sewers lying off the line of the Railroad, the Contractor shall give notice in writing to the Engineer at least one (1) week in advance of his intention to commence such operations; and before commencing manufacture, or resuming manufacture, if the same has been suspended, of any article called for by these specifications, notice shall be given to the Engineer in writing at least one (1) week in advance, with the name and address of the maker and the amount and description of the material to be manufactured.

Shafts and Dumping Platforms.

Section 24. Plans showing the proposed location, and proposed methods of construction, of shafts, dumping platforms, etc., shall be submitted to the Engineer and receive his approval before permits will be granted for such plant and appliances to be constructed and put in operation.

Ordinances and Regulations.

Section 25. In all operations connected with the Works, all ordinances of the City, and of the Board of Health. so far as they may be valid and operative with respect thereto, and all laws of this State which are now applicable to and control or limit in any way the actions of those engaged in the work or affecting the materials belonging to them, shall be respected and strictly complied with, and the Contractor shall further strictly comply with all applicable Federal, State and Municipal regulations regarding the transportation in and around the City and Harbor of materials used in, or in connection with, the work.

Requirements of Borough President, etc., to be Observed.

Section 26. Whenever the construction of the Works under the provisions of this contract shall interfere with, disturb or endanger any sewer, water pipe, gas pipe, or other duly authorized subsurface structure, the work of construction at such points shall be conducted in accordance with the reasonable requirements of the Borough President or the Commissioner of Water Supply, Gas and Electricity or other officer or local authority having the care of and the jurisdiction or control over such subsurface structures so interfered with, disturbed or endangered.

Building and Water Permits; Shut-offs for Water Pipes, etc.

Section 27. The Contractor shall procure all permits necessary or requisite for the underpinning of buildings and the reconstruction thereof; he shall, at his own cost, provide for the water supply necessary for his work and he shall bear the cost of the service of inspectors required by any municipal department or other public authority in or about the execution of the work other than the inspectors or the employees of the Commission. He shall bear the expense absolutely necessary in the bagging of gas pipes where it is necessary to cut off the supply of same and of the shutting off and restoration of the flow in water mains where such work applies to the maintenance and support thereof as provided in section 70 of the specifications.

Storage on Cross Streets.

Section 29. No material of any nature shall be stored along the streets occupied by the Railroad in Manhattan or on 138th street, in The Bronx. On cross streets adjacent to the work, only such material may be stored as may be necessary, in case of an emergency, to sheet or to support the excavation; or a reasonable amount of such structural material as may be absolutely necessary to avoid delay in construction may be stored; such material must not be allowed to accumulate, but must be replenished from day to day. The amount to be so allowed shall be determined by the Engineer.

Material Stored.

Section 30. Excavated sand, gravel or stone that in the judgment of the Engineer is suitable for use in mortar, concrete, or masonry, also structural and other material to be used in the work, may be stored in such locations and for such periods as are approved by the Engineer.

Approval of Engineer Revocable.

Section 31. In any case material may only be so stored with the approval of the Engineer, revocable at any time; and if so ordered, such material shall be removed immediately on receipt of the order, or within a period of time to be therein stated.

Access to Fire Hydrants.

Section 32. Wherever the work is being carried on, free access must be given to every fire hydrant and fire alarm box, and when required hydrants shall be extended by suitable tube or piping to an accessible point as approved by the Engineer, and to the satisfaction of the Chief of the Fire Department. Materials must not be piled at any time or place within ten (10) feet of any fire hydrant or fire alarm box; and where materials are unavoidably piled or placed in the vicinity of a fire hydrant or fire alarm box, and to such height as to obscure a sight of the same, the position of such hydrant or fire alarm box shall be indicated by suitable signals, both day and night.

Work to be Cleared.

Section 33. At his own expense and as directed from time to time by the Engineer, the Contractor is to clear the work, streets and all public places occupied by him of all refuse and rubbish that may accumulate from any source whatever and leave them in a neat condition.

Assistance to be Rendered to Owners of Buildings.

Section 34. Where access to any adjacent property is temporary cut off, owing to the occupancy of the street by the Contractor, he must, at his own cost. tender every assistance to the owner or occupant in handling such materials of any description, including all material to be removed by the Department of Street Cleaning, that has to be taken to or removed from such property; such material shall be taken to or from the nearest accessible point that in the opinion of the Engineer is convenient for handling.

Waste Material.

Section 35. Waste material of any character will under no conditions be permitted to remain on the streets, but must immediately on its becoming unfit for use in the work be carted away and disposed of by the Contractor as hereinbefore provided; nor shall such materials be allowed to accumulate in the trenches.

Conveniences for Men.

Section 36. Necessary conveniences, properly secluded from public observation, shall be constructed and maintained by the Contractor at his own expense, wherever needed for the use of the Contractor's employees, to the satisfaction of the Engineer and the sanitary authorities.

Fences.

Section 37. Wherever necessary the Contractor shall erect and maintain at his own expense fences for the protection of adjoining property and of the adjoining public places.

Advertisements Forbidden.

Section 38. The using of fences and buildings during construction for advertising purposes, other than the name and address of the Contractor, is forbidden; all temporary buildings and fences erected by the Contractor shall be neat in appearance and shall be painted as directed by the Engineer.

Barricades.

Section 39. Barricades and bridges shall be erected by the Contractor at his own cost, for the protection of the work or use of the public; they shall be substantial in character and neat in appearance.

Detailed Drawings.

Section 40. The Engineer will prepare and furnish to the Contractor, from time to time as required, drawings and plans amplifying such details of the contract drawings as may be necessary, and drawings and plans necessary to show the adjustment and reconstruction of all surface and subsurface structures wherever the reconstruction of the same is necessitated by the construction of the railroad. These plans must be strictly followed, unless local conditions should develop, during construction, suggesting changes, when, with the approval of the Engineer, such changes may be permitted.

Working and Shop Drawings.

Section 41. The Contractor shall make all working or shop drawings which may be required in addition to the contract drawings, or in addition to such other drawings as the Commission may issue in amplification of such contract drawings, as explained above. All working or shop drawings shall be submitted in duplicate to the Engineer for his approval, which approval shall be indicated by his countersigning one set of such working or shop drawings and returning the same to the Contractor. Should the working or shop drawings be not approved by the Engineer, then the Engineer shall return one set of such working or shop drawings, with the necessary corrections and changes indicated thereon; and the Contractor must make such corrections and changes, and again submit plans in duplicate for the approval of the Engineer; and no work called for by said working or shop drawings shall be done until the approval of the Engineer be obtained, which must be given or refused within ten (10) working days after delivery to him at his office of such plans in duplicate.

Lines and Grades.

Section 42. During the progress of the work the Commission will give, through the Engineer, to the Contractor, suitable points, marks or benches, indicating the line and grade of the Railroad and of the sewers; such points or bench marks to be established at such intervals as the Engineer deems necessary for the Contractor to be able to perform his work. The principal lines and grades are to be given by the Engineer, who may change them from time to time as may be authorized and directed by the Commission. The stakes and marks given by the Engineer shall be carefully preserved by the Contractor, who shall give to the Engineer all necessary assistance and facilities for establishing benches and plugs for making measurements.

Notice, How Given.

Section 43. When the Contractor is absent from any part of the work where it may be necessary to give instructions, orders will be given by the Engineer to, and shall be received and promptly obeyed by, the superintendent or overseer of the Contractor, who may have charge of the particular work in relation to which the orders are given, and a confirmation in writing of such orders will be given to the Contractor by the Engineer if so requested.

Imperfect Work.

Section 44. Any imperfect construction which may be discovered before the final acceptance of the work, shall be corrected immediately on the requirement of the Engineer and at the Contractor's expense, notwithstanding that it may have been overlooked by the proper inspector.

Damaged Work to be Replaced.

Section 45. All work of whatever kind which during its progress and before its final acceptance shall become damaged from any cause, so much of it as may be objectionable shall be broken up or removed and be replaced by good and sound work at the Contractor's expense.

Condemned Materials to be Removed.

Section 46. If any material brought on the ground for use in the work or selected for the same shall be condemned by the Engineer as unsuitable or not in conformity with the specifications, the Contractor shall forthwith remove such materials as may be directed by the Engineer.

Competent Men.

Section 47. The Contractor shall employ only competent, skillful and faithful men to do the work. Whenever the Engineer shall notify the Contractor in writing that in his opinion any man on the work is incompetent, unfaithful or disorderly, such man shall be discharged from the work and shall not again be employed on it.

3—MANNER OF PROSECUTION AND MAINTENANCE OF TRAFFIC.

Access to Buildings, etc.

Section 48. No building shall, without the consent of the occupant, and after notice to the Engineer, be deprived of means of access thereto; and, where streets are open suitable bridges shall be built and maintained, at the Contractor's expense, to permit owners and occupants to reach their premises. Where necessary, proper and easy means for passengers to reach or leave street cars shall be maintained.

Wharves and Docks.

Section 50. For that portion of the route adjoining wharves and docks the work must be so prosecuted as to permit free access to neighboring wharves and docks.

Contiguous Contract Sections.

Section 50-a. On the division line of contiguous contract sections, the Engineer will decide any matters in the details of construction within a limit of ten feet on either side of the line where the work of contractors may be in conflict, and direct which of the contractors shall complete the details of construction within such limits.

Other Portions of the Route.

Section 51. Generally the Contractor will be permitted to conduct its work in the most expeditious manner possible, having due regard for the safety of persons and property and facilities for traffic and under such instructions as the Engineer may give from time to time.

Facilities for Travel.

Section 52. All necessary facilities are to be furnished by the Contractor for the benefit of street travel, both in longitudinal and cross streets.

Decking of Streets and Sidewalks.

Section 53. In order to provide the minimum interference with traffic and the minimum inconvenience to abutting property owners, during the construction of the Railroad, on all parts of the work when the excavation is in trench the streets and sidewalks shall, except as hereinafter specifically provided, be substantially decked or covered over, and every precaution must be taken to keep traffic free from interruption.

Street Intersections.

Section 61. The street intersections, except in cases where open trench excavation without cover is permitted, shall be kept at all times open for traffic for their full width. The street intersections in cases where open trench excavation without cover is permitted must be kept at all times open to traffic for at least one-half the width of the cross roadway, except that cross roadways in which surface railroads are located shall be kept at all times open to traffic for their full width.

Where portions of a street intersection are opened the same shall be substantially and neatly bridged for foot traffic. In all cases the Contractor shall at all times keep all the street crossings on the lines of the sidewalks in a clean and neat condition, bridging gutters and low places where water might collect.

Close Observance of Above Requirements.

Section 62. The Commission will insist upon the close observance of the above requirements, and no departure therefrom will be allowed, excepting upon the written permission of the Commission.

Openings for Ventilation.

Section 63. Wherever the excavations are decked, where gas pipes are maintained in service or where gases are liable to accumulate, suitable openings shall be provided for proper ventilation, or the Contractor may maintain services by temporary mains above the street decking.

Temporary Pipes, etc.

Section 64. Temporary pipes, if laid above the street or sidewalk surfaces, shall be neatly and substantially placed, and in a manner to cause the minimum of inconvenience to the abutting property owners and to the public.

In General.

Section 65. In general, work will, as provided herein, be carried on under covered roadways. In exceptional cases, however, where rock is within a few feet of the street or sidewalk surface, it may be impracticable to operate drills while the street is covered, until a sufficient depth of excavation has been obtained. In such cases such latitude will be allowed the Contractor as may prove absolutely necessary for the execution of its contract, and as the Engineer with the approval of the Commission may deem advisable, after a thorough understanding of the exact conditions and necessities has been determined.

4—Street Railroad Tracks, Mains and Other Surface or Subsurface Structures.

Notice to be Given.

Section 66. Notice is to be given by the Contractor to all companies and the proper City officials, owning or having charge of surface or subsurface structures along any part of the work. of his intention to commence operations along such part of the route, at least one (1) week in advance, and the Contractor shall file with the Engineer at the same time a copy of said notice; and he shall co-operate with the proper officers or officials in charge of such structures and shall furnish them with all reasonable facilities to inspect the methods of caring for their property.

Plans Furnished.

Section 67. In the rearrangement of subsurface structures requiring removal and relaying or reconstruction due to interference with the railroad structure a tentative plan will be made by the Engineer, which will be submitted to the parties interested; if any reasonable changes are then requested by any of the said parties within ten days after the submission of the tentative plan, such changes will then be made, if, in the judgment of the Engineer they will best conserve the interest of all parties concerned; a further plan will then be made which, on the approval of the Engineer, will be final.

Reconstruction or Relaying, etc.

Section 68. Whenever it becomes necessary to cut, move, change, or reconstruct any surface or subsurface structures, or connections therewith, such work shall be done according to the reasonable satisfaction of the owners of such pipes or other structures.

Reasonable Dispatch.

Section 69. All work of reconstruction or alteration shall be done with reasonable dispatch, and facilities are to be provided so that said work will interfere as little as possible with the practical working and use of such structures.

Maintenance, Support, etc.

Section 70. The Contractor shall at all times, by suitable bridging or other supports, maintain and support in an entirely safe condition for the usual service and to the reasonable satisfaction of the owners, all surface and subsurface structures encountered during the prosecution of his work. All surface and subsurface structures and surfaces of whatever character along the line of the work shall be protected from injury, but should any injury occur the Contractor shall fully restore such surface or subsurface structures or surfaces to as good a condition as existed before the injury was done. All the above, including also all changes of surface or subsurface structures made by the Contractor for his own convenience in executing his work, shall be done at the Contractor's own expense and included in the prices stipulated in the schedule for excavation except as otherwise herein specifically provided.

Necessary Permanent Changes of Pipes.

Section 71. Changes of water, gas, steam or other pipes made necessary because of physical interference with the railroad structure, and requiring the removal, relaying or reconstruction of such pipes and their appurtenances in other than the original position, will be paid for at the prices stipulated in Schedule Items 77 to 99, Items 102 to 106, Items 109 to 114, Items 121 and 122, and Item 125. These prices are per linear foot of pipe laid including all work, labor and material incidental to such laying, excepting that:

(1) If new pipes have to be provided and are ordered by the Engineer, such new pipes will be paid for in addition to the price paid for laying, etc., at the prices stipulated in Schedule Items 100 and 101, Items 107 and 108, Items 115 to 120, Items 123 and 124, and Item 126, which prices are to cover the cost of the new pipes delivered on the work.

(2) If the pipes in their new locations are outside of the ordered net lines for excavation for the railroad structure, necessitating additional excavation and restora-

tion of street surface, such excavation will be paid for at the prices stipulated in Schedule Items 2-A and 3-A (which prices shall include all the matters referred to in Section 107), and for restoration of street surface, Item 30-A and B, but only to the net lines ordered by the Engineer for excavation for such pipe work.

Necessary Permanent Changes of Electric Conduits and Ducts.

Section 71-a. Changes of electric conduits or ducts and their appurtenances found in the streets (other than street railway ducts, payment for which is provided for in Schedule Item 75-A), made necessary because of physical interference with the railroad structure, and requiring the removal, relaying or reconstruction in other than the original position, will be paid for at the price stipulated in Schedule Item 127. The price per duct foot as provided in Schedule Item 127 is to include the cost of all ducts in place; of all manholes, vaults, service boxes and their appurtenances; of drawing cables and providing new cables where necessary; of the proper restoration of all services that may be affected by the changes in the duct lines; of such excavation and restoration of street surface as may be necessitated by the changes in the duct lines, and all other work and material incidental to and necessary for the completed duct lines.

Surface and Elevated Railroads.

Section 72. The Contractor shall maintain and support, in a manner that will cause the minimum interference with traffic, all surface, subsurface and elevated railroads along the line of or crossing the line of the work.

Surface Railroads.

Section 73. The Contractor shall maintain and support, both temporarily and permanently, in a safe condition all street surface railroads (including steam railroads), including ducts, cables and all other appurtenances of such railroads; he shall rebuild either in their original or in new locations all parts of such surface railroads, including ducts, cables and all other appurtenances of such railroads, whose reconstruction or rebuilding may be necessitated by the construction of the work. Payment therefor will be at the rates specified in the Schedule for electric railroad, Item 75-A, or for horse railroad, Item 75-B, which prices will include the cost of all work incidental thereto. Where permanent masonry supports are required and added, and where additional vaults in excess of the number existing are required and constructed to give equivalent facilities, they will be paid for at the prices given in the Schedule for the several classes of work or material applicable thereto.

Elevated Railroads.

Section 74. The Contractor shall maintain and support both temporarily and permanently in a safe condition all elevated railroad structures. Payment therefor will be at the rate specified in Schedule Item 76, which price will include the cost of all incidental work, including the reconstruction and building where necessary of all column foundations and parts of column foundations lying without the net lines of the subway structure.

Subsurface Railroads.

Section 75. The Contractor shall support and maintain both temporarily and permanently in a safe condition all subsurface railroads and their appurtenances. Payment therefor shall be deemed included in the prices for excavation, Schedule Items 1, 2 and 3.

Facilities to be Given to Make Extensions.

Section 76. In the event of the owners or the City desiring to make any alteration or extension to their structures, or do any work to or in connection with surface or subsurface structures owned by them or it, at the time the work under this contract is in progress, the Contractor shall give said owners or the City all reasonable opportunity to perform such work; provided such work or alteration for the benefit solely of the owners of subsurface structures does not cause the Contractor any serious loss or delay, as shall be determined by the Commission.

Parks and Parkways, Trees, etc.

Section 77. In any park or parkway, or where any grass plots or trees exist along any street occupied by the Contractor, proper precautions must be taken to protect from injury all such trees or grass plots. For every tree removed, injured or destroyed, the Contractor shall set out a new thrifty tree of the same kind as the tree removed, injured or destroyed, and not less than fifteen (15) feet in height and not less than three and one-half (3½) inches in diameter measured two feet above the surface of the ground, and in such position as the Commissioner of Parks shall indicate. All roads, cross-paths, grass plots, shrubbery and other plants

removed or affected by the construction of the railroad, shall be restored as soon as possible to as good a condition as existed before the commencement of the work.

Replanting Under Direction of Park Commissioner.

Section 78. In replanting trees and the replanting of grass plots the Contractor must be governed by the reasonable requirements of the Commissioner of Parks or by other authorities specially charged with the care of these trees or grass plots, and the nature and depth of the soil to be placed therein must be approved by such authorities and by the Commission.

Payments, How Made.

Section 79. Payment for all work covered by Sections 77 and 78 shall be included in the prices paid for Park or Street Surface Restored, Schedule Items 31 or 30.

5—EXCAVATION.

Width of Excavation.

Section 80. Special care must be taken to avoid damage wherever excavation under cover is being done or where open excavation is permitted. The width of such excavation shall not exceed the width actually necessary, in the opinion of the Engineer, for the proper prosecution of the work. All excavations shall be of such width, in addition to that of the railroad, as shall be necessary in the opinion of the Engineer for the proper and expeditious progress of the work, and to permit the laying and readjusting of all sewers, mains, subways and other subsurface structures encountered along the route and contiguous to the railroad.

Depth of Trenches.

Section 81. Trenches shall be excavated to such depth, both in soft ground and in rock, as may be necessary to permit the laying of such concrete bed or special foundation as may be deemed necessary by the Engineer.

Sides to be Secured.

Section 82. The sides of the excavations shall be secured against slips by suitable sheet piling or sheeting, held in place by braces, shores or walling timbers, special precautions being taken where there is additional pressure, due to the presence of buildings or other structures. Where a movement of the ground might cause the settlement of an adjacent building, the sheeting must be started, if near the building, before the elevation of the bottom of the foundation of the building is reached; if away from the building, at such depth of the excavation as the Engineer may permit; and the excavation must not be made in advance of or below the bottom of the sheeting.

Filling Back of Sheeting.

Section 83. Sheeting shall be driven wherever possible, but when it is placed against the sides of the excavation, the spaces or voids back of the sheeting must be immediately and carefully filled with suitable material to prevent as far as possible the natural ground back of the sheeting from moving.

Buildings Underpinned.

Section 84. To secure adjacent ground or the buildings thereon, or to prevent bringing an unusual pressure on the structure when completed, the Contractor shall secure the sides of the excavation by suitable timbering, and shall safely and permanently underpin adjacent buildings. As part of this obligation the Contractor shall use such methods of construction or underpinning, pneumatic or otherwise, as special conditions may require and the Engineer shall approve.

Payment For.

Section 86. Where underpinning of a building is necessary and the work is done as provided in Section 84, payment will be made to the Contractor as, and at the price, provided in Schedule Item 4. The classification as to the number of stories has reference to the number of stories above the surface of the street.

Sheeting.

Section 87. No payment shall be made to the Contractor for sheeting left in the ground or in the work, unless the Engineer shall in writing require it to be left in, in which case payment shall be made to the Contractor for the sheeting so left in as measured by the Engineer, and at one-half the current market price for new material of the same grade, character and dimensions, and without any allowance or payment for placing the same or the expense thereof. This section applies only to the sheeting in trench work.

Timber for Temporary Purposes.

Section 88. All timber used for sheeting, shoring, bracing, decking or other temporary purposes, shall be sound and free from any defects that may impair its strength. It shall be provided, placed and removed at the Contractor's own cost and expense. The top or wearing surface of all decking used for carriageways shall be of hard yellow pine, sound, straight and free from all shakes, and large loose knots. All sheeting and timber used temporarily shall be put in place by skilled mechanics, keyed tight by wedges where necessary, and so arranged as to be withdrawn readily without endangering the adjoining soil.

Vaults of Abutting Property.

Section 89. The cost of the removal, where necessary, of all walls or other parts of vaults of abutting property along the line of the railroad that are within the ordered net lines of excavation is to be included in earth excavation as provided in Section 102, but the restoration of all such walls or other parts of vaults within the ordered net lines of excavation will be paid for at the unit prices specified in the Schedule applicable to the several classes of work and material involved in such restoration.

The above is not to be construed, however, as applicable to any work beyond the ordered net lines of excavation, which shall be at the Contractor's own cost and expense.

Vaults Disturbed.

Section 90. Wherever vaults are broken through or otherwise disturbed, the Contractor shall, at his own cost and expense, erect a temporary partition on or about the building line, or as directed, that will afford proper protection to the owner or occupant of the adjoining premises.

Rock.

Section 91. Ledge rock in place, and boulders within the ordered line of excavation requiring blasting, will be considered as rock excavation.

Preparations for Rock Measurement.

Section 92. Whenever rock is encountered in the trench, it shall be stripped of earth in sections of not less than 20 feet; and the engineer in charge shall be duly notified, in order that he may measure or cross-section the same.

Blasting.

Section 93. Whenever rock or material requiring blasting is encountered in any trench or tunnel, all necessary precautions must be exercised by the Contractor, as required by the ordinances of the City relative to blasting. Explosives shall be used only of such character and strength as may be permitted by the Commission, and the right is reserved for the Engineer to direct that in special cases ordinary blasting powder only, in small charges, shall be used. Blasting shall not be done between the hours of 11 p. m. and 7 a. m. without the express permission of the Engineer, and under such restrictions as he may impose.

Storage of Explosives.

Section 94. No larger quantity of explosives shall be kept on the line of the work than will be actually required for the twelve (12) hours of work next ensuing, and it shall be kept under lock, the key to which is to be only in the hands of the foreman or other equally trustworthy person. The amount of explosives kept in any one place shall not exceed the limit permitted by any ordinance of the City, or as may be determined by the Commission. Caps and exploders shall not be kept in the same place with dynamite and other explosives. During freezing weather, special precautions shall be taken as to the care and manipulation of dynamite.

Near Pipes and Mains.

Section 95. Whenever any pipe or main is encountered in or alongside of the trench, right is reserved to direct that all rock within five (5) feet of the same shall be removed by means other than blasting.

General Precautions in Blasting.

Section 96. In rock excavation in the trenches for the railroad the work must be so regulated as to avoid, as far as possible, shattering the rock beyond the established line for excavation.

Blasting.

Section 97. Generally the central portion of the excavation must, when directed by the Engineer, be kept some distance in advance of the excavation near the sides,

and if the rock, owing to its general character and structure, has a tendency to break large, or the strike and dip of the stratification indicate a liability to slip or slide into the excavation, the Contractor must place the drill holes at close intervals on the established lines for excavation, in order to avoid excessive excavation and to preserve the established lines thereof.

Pumping.

Section 98. Whenever water is encountered in trenches, the same shall be removed by bailing or pumping, great care being taken when pumping that the surrounding particles of soil be not disturbed or removed. If necessary to prevent such disturbance, the pumping must be done by a series of driven wells whose points are protected by fine wire cloths, the rate of flow at each well being made so slow as not to remove the particles of soil; or the pumping must be done by other means approved by the Engineer. The delivery from all pumps shall be conducted into the adjacent sewers, and the delivery pipes shall be so arranged as to be readily inspected at all times to ascertain if the water is free from particles of soil.

Carts to be Tight.

Section 99. All carts, buckets or other vehicles used by the Contractor for the removal of material, shall be tight and so arranged and so loaded as not to spill over. Whenever a cart, bucket or other vehicle so used is leaky or unsuitable, it shall be immediately withdrawn from the work on notification by the Engineer, or his duly qualified assistant, in charge of that portion of the work.

Removed Expeditiously.

Section 100. Excavated material shall be removed expeditiously and disposed of, in any place selected by the Contractor, subject to the ordinances and regulations of the City authorities governing the disposal of such material, and the regulations of the United States Government as to the disposal or dumping of material in and about or near the Harbor of New York.

When Excavated Material May be Taken by the City.

Section 101. If at any time during the course of construction the City shall desire for City purposes any part of the material excavated, and the cost of such disposal shall not exceed the cost to the Contractor of the method in which he is then disposing of it, the Commission may order such material dumped or turned over to the City at a point designated without cost to the City.

Earth Excavation, Definition of.

Section 102. Earth excavation includes the excavation of all materials of whatever nature encountered in the trenches, excepting ledge rock in place and boulders requiring blasting.

Excavation in Trenches, How Measured.

Section 103. The net outside width of the railroad structure, as ordered and indicated on the plans, and the depth, also as ordered and as indicated on the plans, will govern as to width and depth in the measurements for payment for excavation. No deduction from the volume of excavation determined as above, will be made on account of basements or cellars in property acquired by the City for the construction of the railroad or on account of vault space or of spaces occupied by pipes and other subsurface structures.

No Allowance Outside of Ordered Net Lines.

Section 104. There will be no measurement or allowance made nor money paid for excavation outside (below or wider than) the net measurement lines as above indicated, or in rock excavation, for irregularities of surface; and no allowance shall be made for any excess excavation caused by slips or slides. It is understood and agreed that for all such matters the Contractor has estimated and allowed in the unit prices of the schedule.

Change of Street Grade.

Section 105. Where the contract drawings indicate that the grade of any street is to be raised the Contractor shall fill in the street to the changed grade as required and such work shall be measured and paid for at the price stipulated for earth excavation, Schedule Item 1.

Payment for Excavation.

Section 106. Excavation shall be paid for at the price or prices given in Schedule Items 1 and 2 for excavation in earth and Item 3 for excavation in rock.

Prices for Excavation to Include.

Section 107. The prices herein stipulated for excavation, Schedule Items 1, 2 and 3, are to include the cost of the disposal of the materials excavated, of backfilling, of all decking and bridging, of all sheeting and bracing, and of maintaining and supporting of trenches during and after excavation, of all pumping or bailing, and of the maintenance, support, etc., of all surface and subsurface structures of whatever nature, payment for the maintenance and support of which is not herein elsewhere specifically provided for.

6—TUNNELING.

How Lined.

Section 108. All tunnels shall be lined with steel or cast iron and concrete, or with concrete or brick masonry.

Where tunnels are lined with concrete or brick work without metal tubes, proper provisions shall be made for keeping the tunnels dry by the use of drains, and by other methods as elsewhere provided.

Packing.

Section 109. The space between the extrados of the arch or back of the sidewalls and the rock or other materials of excavation, shall be filled with concrete to a height of two feet above the spring line of the arch—above this concrete the space shall be filled with dry masonry packing. Similarly in the tunnel floor, if concrete is used, all loose muck shall, if directed by the Engineer, be removed to the solid rock and the space filled in with concrete up to the bottom line of the section ordered by the Engineer for tunnel excavation and concrete. All such concrete or other packing, being outside of the net section line for excavation as ordered by the Engineer, shall be at the sole expense of the Contractor.

Grout.

Section 110. After the tunnel lining and packing is in place, if required by the Engineer, a grout, consisting of one (1) part fine, clean and sharp sand and one (1) part Portland cement, shall be pumped in under pressure, from time to time behind the masonry, so as to completely fill all the voids. Where tunnels are made by the use of a shield, similar grout shall be pumped in to completely fill the space left by the tail piece of the shield as soon as the shield is moved forward.

Payment for Grout.

Section 111. Where grout is ordered and used, it shall be paid for at the price herein provided, Schedule Item 11.

Lines for Excavation.

Section 112. The tunnel, at any place, is to be excavated to the line of the cross-section ordered by the Engineer for that place.

No Payment for Excavation Beyond Ordered Lines.

Section 113. All loose or shaky rock, whose fall or settlement might, in the judgment of the Engineer, produce an unequal or concentrated pressure on the masonry, shall be removed, and the space refilled with such class of masonry as the Engineer may require and as provided in Section 109, but no payment will be made for any excavation outside of the cross-section of the tunnel excavation ordered by the Engineer, as provided in Section 112.

Blasting.

Section 114. Drilling and blasting must be conducted with all possible care and in such a manner as not to shatter the roof and sides outside of the section lines, as ordered by the Engineer, nor endanger adjoining property.

Drains.

Section 115. All seams carrying water shall be carefully drained, as specified under the clauses relating to drainage.

Precautions Against Settlement.

Section 116. The Contractor must take every precaution, and such precautions as the Engineer may direct, by suitable shields, timbering, lagging or other supports, to prevent any settlement or movement of surrounding ground. Such timber as cannot be drawn without endangering the work or the ground above, shall be left in place and thoroughly surrounded by masonry and grouted.

Timbering.

Section 117. Timbering shall be used wherever necessary to support the materials or to secure the safety of the work or workmen. It will be at the sole expense of the Contractor and included in the contract price for tunnel excavation, Schedule Item 5. Wherever practicable it shall be removed before the concrete lining or concrete or other packing is placed.

Compressed Air.

Section 118. If for the work under the Harlem River and for the approaches thereto or elsewhere on the work a method is adopted requiring the use of compressed air, a plant must be provided of sufficient capacity to insure at all times and under all conditions an ample supply of air to prosecute the work with safety and dispatch, and proper air locks shall be built with safety locks, in addition to provide for the escape of workmen at time of accident.

Methods to be Approved.

Section 119. All methods of tunneling shall be subject to the approval of the Engineer, and be changed from time to time, if, in his judgment, the local conditions so require, and during construction approved methods of ventilation and lighting shall be used.

Tunneling, Payment For.

Section 120. The price per cubic yard, stipulated herein, Schedule Item 5, for tunnel excavation, is to cover all expense due to the presence of quicksand or other soft material, rotten rock, boulders, etc.; the cost of all pumping and bailing; of all timbering, and removal of same; of removing all excavated material; of all ventilation and lighting; and of all other work incident to the excavation of the tunnel. Any expense that may arise from loose or shaky rock or from falls or cave-ins, or from any unexpected obstacles, shall be borne by the Contractor. In earth sections the tunnel excavation must be large enough to permit building the masonry to the full required thickness, clear of such timbering and lagging as it may be necessary to build in. As a fair provision for such contingencies, it is assumed that the excavation will extend an average distance of one (1) foot outside the net line in the roof and sides and six (6) inches below the net line in the floor, and measurements for payment in tunnel excavation in earth will be made to those lines. It is distinctly understood, however, that no such allowances or any other allowance in tunnel excavation will be made in connection with timbering in tunnel excavation in rock.

Chambers, Drains, etc.

Section 121. Excavations for chambers, for skewbacks of arches, for sump holes, drains or for any other purpose in the tunnel, are to be measured according to the lines of the cross-sections determined by the Engineer, and paid for by the cubic yard as tunnel excavation.

Additional Enlargement.

Section 122. If after the excavation has been made of a certain size by direction of the Engineer, he is of opinion that the nature of the rock or other material is such that the form and dimensions of the masonry for which said excavation was intended must be increased, he may order an enlargement of the excavation for the purpose of building masonry of greater thickness, and the Contractor is to make such enlargement, which is to be measured according to the lines given by the Engineer, and paid for at the price per cubic yard stipulated in the schedule for tunnel excavation.

7—BACKFILLING.

Quality of Material. How Placed.

Section 128. The trenches at the sides of and over the top of the subway and wherever backfilling is necessary, shall be backfilled with sand, gravel or other good clean earth, free from perishable material and from stones exceeding six (6) inches in diameter, and not containing in any place a proportion of stone of or below that size exceeding one (1) part of stone to five (5) parts of earth. The filling shall be compacted by flooding with water or, in cases where flooding with water is not practicable it shall be compacted by ramming in layers, not exceeding six inches in depth.

Subsurface Structures. Frozen Material Not Permitted.

Section 129. Whenever pipes, sewers or other subsurface structures are met with, the filling must be carefully packed, rammed and tamped under such subsurface structures, using special tools for the purpose. No filling of trenches with frozen earth will in any case be permitted, nor will any filling be permitted over frozen material.

Sheeting Removed.

Section 130. As fast as the work of filling permits, sheeting and other timber supporting the sides of the excavation shall be carefully withdrawn, or shall be left in place, as may be directed by the Engineer, and the spaces left by the removal of such material carefully back-filled.

How Paid For.

Section 131. The cost of backfilling is to be included in the prices paid for earth and rock excavation, Schedule Items 1, 2, 2-A, 3 and 3-A.

8—PILING AND TIMBERING.

Piles.

Section 132. If in the judgment of the Engineer the ground is of such a character as to require piling, the Contractor shall drive such piles as the Engineer directs. The piles shall be of good sound pine or spruce, straight and free from shakes; they shall be not less than twelve (12) inches in diameter at the butt end, or less than six (6) inches in diameter at the point, and shall be driven to the satisfaction of the Engineer and by means of a steam hammer driver if so required by him. If necessary the points of the piles shall be protected by proper shoes, and the butts by rings or caps. Piles shall not be spliced unless permitted by the Engineer, and then in such manner as he directs. Piles shall be carefully cut off to the grade given by the Engineer.

Piles Driven in Required Location.

Section 133. Piles shall be driven in the position and manner and to the depth ordered; if driven in a wrong position or injured in any way by driving they must be withdrawn and replaced by others. After being driven they shall be cut off to a true plane for proper adjustment with capping timber or masonry.

Payment for Timber Piles.

Section 134. The price herein stipulated to be paid, per linear foot of timber piles, Schedule Item 12, is to cover the cost of furnishing, driving and preparing the piles ready for the capping timbers or masonry, and the portion cut off and removed will not be included in the length measured for payment. No test piles, guide piles, or piles other than those that are a part of the finished foundation and are included within the net width of the finished foundation will be paid for.

Concrete Piles.

Section 135. If in the judgment of the Engineer special conditions so require, piles of reinforced concrete of an approved form of construction shall be used.

Payment for Piles Other Than Timber Piles.

Section 136. Payment for piles other than timber piles will be as provided in Article XII. of the contract.

Grillage.

Section 137. Timber grillage foundations shall be built if so directed by the Engineer.

Foundation Timber.

Section 138. All foundation timber shall be of pine or spruce, or other timber permitted by the Engineer, sound and free from shakes. It shall be of such dimensions, and laid in such manner, as the special plans to be issued shall require, and held in place by spikes or good seasoned oak or locust treenails.

Foundation Timber, Measurement and Payment.

Section 139. No wastage is to be allowed for, and the estimate of the quantities of foundation timber used will be based on the amount ordered by the Engineer and placed according to his direction. Payment for foundation timber will be as provided in Schedule Item 13.

9—CEMENT.

Portland Cement.

Section 140. All cement used in the work shall be true Portland cement, by which is meant the finely pulverized product, resulting from the calcination to incipient fusion of a properly proportioned intimate mixture of argillaceous and calcareous earths or rocks, to which no addition greater than three (3) per cent. has been made subsequent to calcination.

Brand to be Approved.

Section 141. Before any cement is furnished, the brand shall receive the approval of the Engineer. Cement, to be acceptable, shall be of a well-known brand which has been in successful use for large engineering works in America for at least five (5) years, and which has an established reputation for uniform character. Preference will be given to cements which, by their records, show a tendency to maintain high strength of mortar with increased age.

Inspection.

Section 142. Cement shall be subject to inspection at the place of manufacture or on the work, and to such tests as may be ordered by the Engineer. The Engineer or his representatives shall have access at all times and places to inspect the methods of manufacture, storage and protection, and shall have liberty to inspect the daily laboratory records of tests and analyses at the cement works.

Tests.

Section 143. In general, tests will conform to the methods recommended by the Committee on Uniform Tests of Cement of the American Society of Civil Engineers. Unless otherwise directed, samples will be taken at the place of manufacture by a representative of the Engineer, and sent to the Commission's laboratory, where the tests will be made. If required, tests will be made on the individual samples, without intermixing.

Specific Gravity and Color.

Section 144. The cement shall have a specific gravity of not less than 3.10 nor more than 3.25 after being thoroughly dried at a temperature of 212 degrees Fahr. The color shall be uniform, bluish gray, free from yellow or brown particles.

Chemical Analysis.

Section 145. Chemical analyses of cement made from time to time shall show a reasonably uniform composition. Cement shall not contain more than 1.75 per cent. of sulphuric anhydride (SO_3) nor more than 4 per cent. of magnesia (MgO).

Fineness.

Section 146. The fineness of the cement shall be such that it shall leave by weight a residue of not more than eight (8) per cent. on a No. 100, and not more than twenty-five (25) per cent. on a No. 200 sieve; the wires of the sieves being respectively 0.0045 inch and 0.0024 inch in diameter.

Time of Setting.

Section 147. It shall not develop initial set in less than thirty (30) minutes unless a more quickly-setting cement is specifically required, and shall develop hard set in not less than one (1) hour nor more than ten (10) hours.

Soundness.

Section 148. Pats of neat cement, after remaining one (1) day in moist air, shall be kept in air or water of normal temperature for at least twenty-eight (28) days, or shall be exposed to an atmosphere of steam, above boiling water, in a loosely closed vessel for at least five (5) hours; and the separate parts under any of these conditions, shall remain hard without any indications of checking, cracking, distortion, disintegration or blotching.

Tensile Strength.

Section 149. Neat cement briquettes shall have at the end of one (1) day in moist air a breaking strength, per square inch of sectional area, of not less than one hundred and fifty (150) pounds; at the end of seven (7) days—one (1) day in air, six (6) days in water—of not less than five hundred (500) pounds; and at the end of twenty-eight (28) days—one (1) day in air, twenty-seven (27) days in water—of not less than six hundred (600) pounds. The strength at twenty-eight (28) days shall not be less than that at seven (7) days.

Mortar Briquettes.

Mortar briquettes, composed of one (1) part of cement and three (3) parts of standard Ottawa sand, by weight, shall have at the end of seven (7) days—one (1) day in air, six (6) days in water—a breaking strength, per square inch of sectional area, of not less than two hundred (200) pounds; and at the end of twenty-eight (28) days—one (1) day in air, twenty-seven (27) days in water—of not less than three hundred (300) pounds. The strength at twenty-eight (28) days shall show an increase of not less than fifty (50) pounds over the strength at seven (7) days.

Long-time Tests.

Section 150. Tests will be made from time to time extending over longer periods than twenty-eight (28) days. If such tests show a tendency to unsoundness or unusual reduction in strength with increased age, the Engineer shall have the right to prohibit further use of that brand and to require that another brand be substituted.

Storage During Tests.

Section 151. All cement shall be held in storage to allow ample time for tests to be made before the cement is required for use in the work.

How Contained.

Section 152. Cement shall be packed and delivered in canvas sacks or other strong, well-made packages, plainly marked with the manufacturer's brand, and sealed in an approved manner. The weights of such packages shall be uniform.

Methods of Storing.

Section 153. The Contractor shall at all times keep in store on the work, or at some point convenient thereto, an abundant supply of cement, so as to guard against possible shortage. It shall be stored in a weather-tight building, with a tight floor a proper distance above the ground, and with sufficient floor space to admit of storing each lot of cement, of not more than two hundred (200) barrels, or its equivalent, separately, so as to facilitate identification of each individual lot in case of necessity for further tests or rejection. Cement that has become partially set or otherwise damaged shall not be used.

10—Mortar.

Cement and Sand. Mixing.

Section 154. All mortar shall be prepared from accepted cement and clean, sharp sand, approved by the Engineer. These ingredients shall be thoroughly mixed dry in the proportions as specified below; water shall then be added, so as to produce a stiff paste. Water used in mortar, grout or concrete must be clean, fresh water, no salt water being permitted. The mortar shall be freshly mixed for the work on hand, in proper boxes made for that purpose, and no mortar shall be used that has stood beyond such limit of time as may be determined by the Engineer.

How Measured.

Section 155. For purposes of mixture, three hundred and seventy-five (375) pounds of Portland cement shall be estimated at three and one-half (3½) cubic feet of volume. The proportional parts of sand and stone or gravel shall be by volume as cast into the measuring box. The proportions for brick and stone masonry shall be one (1) part cement to two (2) parts sand; for pointing, one (1) part cement and one (1) part sand; for concrete masonry, as specified under the head of concrete; and for other classes of work, as directed by the Engineer; for grout, one (1) part of cement to one (1) part of fine sand.

11—Masonry.

Laid in Portland Cement.

Section 156. All masonry, except as otherwise specified, shall be laid in Portland cement mortar, and shall be built of the forms and dimensions shown on the plans, or as directed by the Engineer from time to time; and the system of joining or bonding ordered by the Engineer shall be strictly followed.

Water Not to Interfere With.

Section 157. Care must be taken that no water shall interfere with the proper laying of masonry in any of its parts.

Freezing Weather.

Section 158. During freezing weather such masonry only shall be built whose construction, in the judgment of the Engineer, can not be postponed, except at the cost of delaying the work. The Contractor shall provide such appliances as are necessary for heating the water and the materials used in the masonry according to the specific instructions of the Engineer.

Protected in Freezing Weather.

Section 159. During freezing weather all masonry shall be protected by a suitable covering of salt hay, canvas, tarpaulin or by such material or in such ways as may be necessary to insure it against freezing.

Hot Weather.

Section 160. During hot weather all masonry, especially concrete, shall be kept wet by sprinkling and properly covered until it has become thoroughly set and hardened.

Pointing.

Section 161. Unless otherwise permitted, every joint that is to be pointed shall be raked out, within two days after being laid, to a depth of at least two inches.

Section 162. Pointing of the face joints of masonry shall be thoroughly made with cement mortar mixed in the proportion of one (1) part of cement to one (1) part of sand, except where otherwise specially provided.

Section 163. No pointing shall be done in freezing weather, and masonry laid between December 1 and April 1 shall not be pointed until permitted by the Engineer.

Defective Masonry.

Section 164. Any masonry which is found to be defective from any cause whatsoever, before the final completion and acceptance of the work, must be removed and properly rebuilt, or if damaged during such time must be properly repaired.

Stone Cleaned.

Section 165. All stone before being laid shall be thoroughly cleaned and washed if so directed by the Engineer.

12—CONCRETE.

How Composed.

Section 166. The concrete shall be composed of gravel or broken stone, or a mixture of both, free from all dust and dirt, and mixed together with the proportion of mortar specified below.

Sand.

Section 167. Sand for concrete shall be of the kind herein specified for mortar.

Stone.

Section 168. Stone for concrete shall be sound, clean gravel, or sound, hard, broken limestone, or trap rock, or a mixture of such gravel and broken stone may be used.

Sizes of Stone.

Section 169. Broken stone or gravel for concrete shall be graded from fine to coarse, and that which is all of one size, or practically so, shall not be used. It shall be screened or washed so as to remove all dust, and it shall contain no pieces that will pass through a hole three-eighths (3/8) inch in diameter, and no pieces that will not pass through a hole one and one-half (1½) inches in diameter. Broken stone or gravel for concrete, graded as above, but between three-eighths (3/8) and three-fourths (3/4) inch in diameter, may be required and used in special parts of the work.

Rubble Concrete.

Section 170. In concrete, where the thickness is thirty (30) inches or more, if permitted by the Engineer, the Contractor may embed in the same pieces of sound stone whose greatest diameter does not exceed twelve (12) inches and whose least diameter or thickness is not less than three-quarters (3/4) of the greatest diameter. These stones shall be set by hand in the concrete as the layers are being rammed, and so placed that each stone is completely and perfectly embedded. No two (2) stones shall be within six (6) inches of each other and no stones within four (4) inches of an exposed face, nor shall any such stone be placed nearer than six (6) inches to any metal built in the concrete for reinforcing the same.

Proportions.

Section 171. The proportions of cement, sand and stone (or gravel) used in making concrete shall be as follows:

Section 172. Concrete in floor, sidewalls and roof one (1) part of cement, two (2) parts of sand and four (4) parts of stone. Concrete for tube tunnels under the Harlem River will be as indicated on the plans.

Section 173. Protective concrete outside of waterproofing lines on sides and roof, one (1) part of cement, four (4) parts of sand and eight (8) parts of stone.

Mixing by Machine.

Section 174. Whenever practicable, concrete shall be machine mixed. A rotary machine of a pattern approved by the Engineer, and mixing only one batch at a time, shall be used.

Mixing by Hand.

Section 175. When concrete is mixed by hand the stone or gravel shall be spread on a platform in a bed about six (6) inches thick, and shall be thoroughly wet. Sand shall be spread on a platform and the requisite portion of cement spread on the sand. After thoroughly mixing the latter, the dry mixture thus formed shall be spread evenly over the bed of stone wet, as above, and the whole turned over until thoroughly mixed, but not less than two (2) turnings on the mixing board shall be allowed in any case, water being added as necessary. Care shall be taken to keep the bed of concrete wet and avoid piling.

How Laid.

Section 176. Concrete shall be placed immediately after mixing in layers of such thickness as may be directed by the Engineer, and shall be thoroughly compacted throughout the mass by ramming or spading, special tamping bars or tools being used as approved by the Engineer. The amount of water used in making the concrete shall be as approved by the Engineer. If a small amount of water has been used in mixing, ramming shall be continued until the water flushes to the surface; as a rule, however, concrete shall be placed wet.

Made Smooth to Receive Waterproofing.

Section 177. Concrete to which waterproofing is to be applied shall be made smooth at the time of laying and shall be carefully protected from injury by barricades or otherwise, if necessary, until thoroughly set.

Time for Hardening.

Section 178. Concrete shall be allowed to set for twelve (12) hours, or more, if so directed, before any work shall be laid upon it; and no walking over or working upon it shall be allowed while it is setting. Concrete shall not be flooded with water before being thoroughly set.

Rock Surface to be Cleaned.

Section 179. Before laying concrete on rock surfaces the latter shall be swept clean of all debris and dirt, and when laid on earth the earth shall be rammed as directed before placing the concrete.

Surface Rough for Bonding.

Section 180. Wherever a section of concrete is necessarily left unfinished, leaving a surface which will be hard set before additional concrete is laid, the surface shall be left rough to form a bond with the new work; and if deemed necessary by the Engineer, the points shall be reinforced with steel bars or dowls, to be furnished by the Contractor.

Joints Cleaned.

Section 181. In all cases of joints of old with new work the old surfaces shall be thoroughly cleaned and wet, and a coating of mortar or cement shall be applied, if required, before placing the concrete.

Forms.

Section 182. Suitable forms shall be provided by the Contractor to support the concrete while being placed in the walls or roofs. These forms shall be immediately replaced by new ones as soon as they commence to lose their proper shape. Before being used they shall be carefully cleaned of cement and dirt in order to provide a perfectly smooth face to the exposed surface of the concrete. The forms shall be made of wood, kept carefully planed; or made of metal sufficiently thick to retain their shape without the use of wood.

Section 183. No forms made of wood, and covered with iron will be permitted.

Section 184. The forms, if made of wood, shall be made of boards with tight joints, tongued and grooved, if required by the Engineer.

Precautions in Placing.

Section 185. Every precaution shall be taken in placing or assembling the forms to do so in such a manner that when removed, after the concrete has been placed, the faces of the concrete that are to remain exposed shall present a smooth and even surface.

Forms, How Set. Forms Removed. Surface Irregularities Corrected. Defective Work Replaced.

Section 186. The forms shall be set true to line, firmly secured, and be so tight as not to allow water in the mortar to escape; they shall be thoroughly wet before

placing the concrete and shall be removed as soon after the concrete has been placed as in the judgment of the Engineer may be done with safety to the work. Immediately on the removal thereof the faces that will remain exposed shall be carefully examined and any irregularities of the surface corrected; projections shall be removed and voids filled with mortar. If, however, the voids are such as to indicate an excessive loss of mortar, portions of the concrete shall be cut out to the fullness of such defects and the space refilled with a rich concrete or mortar in such proportions and in such manner as the Engineer may direct.

Reinforcement Steel.

Section 187. Where reinforcement steel or wire mesh is used, efficient means shall be provided to maintain it in the exact position it is to occupy in the completed work, and to prevent it from becoming dislodged, or moved in any manner, when concrete is placed.

Surfaces Not to be Painted.

Section 188. The exposed faces of the concrete, excepting within station limits, shall be left with the natural cement finish; therefore, immediately following the removal of the forms, followed by the removal of the projections and the filling of voids, as provided above, these entire surfaces shall be rubbed down in such a manner, approved by the Engineer, as will leave a smooth and even surface, the object in view being to obtain a generally smooth finished surface with uniformity in color.

Impervious to Water.

Section 189. It is intended to obtain concrete impervious to water; the concrete shall be mixed and deposited with this end in view, and on the roof of the Railroad, if waterproofing is not used, the top surface of the concrete shall be carefully troweled as may be directed in order to add to its imperviousness.

Concrete, How Measured and Paid For.

Section 190. Concrete masonry shall be measured in place in the work to the prescribed net lines ordered by the Engineer and shall be paid for at the prices in Schedule Items 6 and 7; which prices are to include the cost of all scaffolding, centres, forms, etc., and removing the same, and all work incidental thereto.

Backing or Filling Concrete, Not Paid For.

Section 191. No concrete backing or filling outside of the ordered net lines of excavation will be paid for.

(For Concrete in Sewers, see Sewers.)

13—Brick Masonry.

Quality.

Section 192. Bricks for masonry shall be of the best quality common bricks, burned hard entirely through, regular and uniform in shape and size and of compact texture.

Hollow Terra Cotta Blocks.

Section 193. Hollow terra cotta blocks or bricks may be required in station work, on the outside of walls of the structure or at such other places as the Engineer may direct. They shall be of the best porous terra cotta as approved by the Engineer, and shall be laid in such manner as hereinafter specified or as the Engineer may direct.

How Laid.

Section 194. All brick masonry shall be laid in mortar of the quality above described, except that in exposed locations coloring matter may be added, if required by the Engineer. The bricks shall be laid to line with joints in the face work (except in stations) not exceeding one-quarter (¼) of an inch in the beds, and three-eighths (⅜) of an inch on ends; the bricks to be thoroughly wet before laying and to be completely embedded in mortar under the bottom and on the sides and ends at one operation, care being taken to have every joint full of mortar.

All exterior surfaces shall be smooth and regular.

Cleaned.

Section 195. The inside faces of all arches and other exposed parts shall have all the mortar scraped off and washed clean immediately after the centres have been struck, and shall be pointed and left in neat condition.

No "Bats" or Culls.

Section 196. All bricks of whatever nature shall be carefully culled and, if necessary, gauged before laying, at the expense of the Contractor. No "bats" shall be used except in large masses of brickwork, where a moderate proportion, to be determined by the Engineer, may be used, but nothing smaller than half bricks.

Racked or Toothed.

Section 197. All unfinished work shall be racked or toothed, as directed by the Engineer, and before new work is joined to it the faces of the brick in the old work must be scraped entirely clean, scrubbed with a stiff brush and be well moistened.

Special Bricks.

Section 198. Where necessary to make a neat joint in connection with steel framework, or at corners, curves, or other similar places, special bricks of proper shape shall be furnished and used. All centres and forms shall be made to fit the curves of the work; they shall be put up and removed in a manner satisfactory to the Engineer.

Measurements and Payments.

Section 199. Brick masonry shall be measured to the lines indicated and shown on the plans and as ordered by the Engineer and shall be paid for as herein stipulated in Schedule Item 9, for common brick masonry, and Item 10 for hollow terra cotta brick or tile masonry; these prices are to include the cost of all scaffolding, forms, centres, etc., and the removal of the same, of all plastering and pointing, and of all other work incidental thereto.

14—STONE MASONRY.

Rubble Stone Masonry, Where Used.

Section 200. Rubble stone masonry will be used for supporting the street railroads over the roof of the Railroad where permanent supports are required, or at such other places as the Engineer may require.

How Laid.

Section 201. Rubble stone masonry shall be made of sound, clean stone of suitable size, quality and shape for the work in hand and shall be laid in mortar mixed in the proportion of one (1) part of cement to three (3) parts of sand. All beds and joints shall be well filled with mortar and the work must be thoroughly bonded.

Measurements and Payments.

Section 202. Rubble stone masonry shall be measured in place in the work and to the lines ordered by the Engineer, and it shall be paid for as herein stipulated under Schedule Item 8.

Other Masonry.

Section 203. In case, during the progress of the work, stone masonry of a different class than that specified above shall become necessary and shall be required by the Engineer, the same shall be constructed according to specifications applicable to the best work of such class, and it shall be paid for as provided in Article 12 of the contract.

15—WATERPROOFING.

General Limits of Waterproofing.

Section 204. In general, waterproofing of the structure will be limited to the roof and sidewalls at the stations, and to those surfaces near ground water or mean high water if ground water level is found for any reason to be below mean high water. At other places free drainage shall be provided by pipe drains, hollow tile or broken stone.

Protecting Masonry.

Section 205. The protecting masonry shall be hollow terra cotta blocks, common brick or concrete, laid and paid for as herein elsewhere provided, and shall not be less than four inches in thickness.

Laid Against Sheeting.

Section 206. In places where permanent sheeting is placed at the waterproofing line, the waterproofing, if permitted by the Engineer, may be applied against the sheeting.

Surfaces to be Made Smooth.

Section 207. All surfaces to which waterproofing is to be applied shall be made as smooth as possible; on these surfaces there shall be spread either hot melted pitch or asphaltum in a thick layer of uniform thickness; on this layer of pitch or asphaltum shall be laid a treated woven fabric of such material as may be approved by the Engineer; this process shall be repeated until such number of layers as may be required by the Engineer have been placed and a final coat of pitch or asphaltum shall then be applied.

Definition of Term "Ply."

Section 208. The term "ply" as used in these specifications shall mean a layer of treated woven fabric, both sides of which shall be coated with pitch or asphaltum at the time of laying.

Number of "Ply."

Section 209. The number of plies of waterproofing on the sides at stations shall in no case be less than three (3), except as hereinafter provided where brick laid in asphalt mastic is used.

Brick in Asphalt Mastic.

Section 210. Over the roof of the structure within station limits and over the tracks passing through the stations within said limits, also on the sides and bottom of the structure below a line of two (2) feet above ground water, or if ground water is below mean high water level, then two (2) feet above mean high water, one (1) ply of waterproofing, as described above, shall be used with one or more layers of brick laid in asphalt mastic; the number of layers of bricks to be determined by the Engineer.

In any case where brick laid in asphalt mastic is not used, the number of plies shall be as local conditions require and as directed by the Engineer.

Quality of Brick.

Section 211. The quality of brick shall be the same as provided in the specifications under the head of Brick Masonry. The brick shall be properly dried and shall be heated before laying.

Measurements and Payments.

Section 212. Brick in asphalt mastic will be measured in place to the lines ordered by the Engineer, and will be paid for at the price herein stipulated, Schedule Item 16.

Section 213. Six (6) plies of waterproofing may be substituted for brick in asphalt mastic, if approved by the Engineer, and will be paid for as provided for fabric waterproofing.

Asphalt Mastic.

Section 214. Asphalt mastic shall contain one-third (1-3) pure bitumen, the other ingredients to be sand and lime dust or cement, in proportions governed by local requirements and weather conditions.

Leaks Stopped.

Section 215. Any masonry that is found to leak at any time prior to the completion of the work and final acceptance thereof by the Commission shall be cut out and the leak stopped, at the sole expense of the Contractor.

Quality of Pitch.

Section 216. Pitch shall consist of either coal-tar or natural asphalt as the Engineer shall elect; it must be delivered on the work in packages that are plainly marked with the manufacturer's brand, and indicating the grade and quality of the material.

Coal-tar Pitch.

Section 217. The coal-tar pitch shall be straight-run pitch containing not less than twenty-five (25) per centum and not more than thirty-two (32) per centum of free carbon, which will soften at approximately 70° F., and melt at 100° F., being a grade in which distillate oils distilled therefrom shall have a specific gravity of 1.05.

Quality of Asphalt.

Section 218. The asphalt used shall be the best grade of Bermudez, lake or other natural asphalt, subject to the approval of the Engineer, and shall comply with the following requirements:

The asphalt shall contain in its refined state not less than ninety-five (95) per cent. of natural bitumen soluble in rectified carbon bisulphide or in chloroform. The remaining ingredients shall be such as not to exert an injurious effect on the work. Not less than two-thirds (2-3) of the total bitumen shall be soluble in petroleum

naphtha of seventy (70) degrees Baume or in acetone. The asphalt shall not lose more than four (4) per cent. of its weight when maintained for ten (10) hours at a temperature of three hundred (300) degrees Fahrenheit.

Woven Fabric for Waterproofing.

Section 219. The fabric to be used shall be a woven fabric which shall have been treated with pitch or asphaltum before being brought on the work. The fabric and the material used in its treatment shall be approved by the Engineer.

Concrete to Be Dry.

Section 220. All concrete shall be dry before waterproofing is attached. If, in the judgment of the Engineer, it is impracticable to have the concrete dry, then there shall be first laid a layer of the treated fabric, on the upper surface of which is to be spread the first layer of pitch or asphaltum; the said layer of fabric shall then be counted as one of the required plies.

Each layer of pitch or asphaltum fluxed as directed by the Engineer must completely and entirely cover the surface on which it is spread without cracks or blowholes.

Fabric for Waterproofing to Be Carefully Laid.

Section 221. The fabric must be rolled out into the pitch or asphaltum while the latter is still hot, and pressed against it so as to insure its being completely stuck over its entire surface, great care being taken that all joints are well broken by overlapping, and that the ends of the rolls of the bottom layers are carried up on the inside of the layers on the sides, and those of the roof down on the outside of the layers on the sides so as to secure a full lap of at least one (1) foot. Especial care must be taken with this detail.

Section 222. When the finishing layer of concrete is laid over or next to the waterproofing material, care must be taken not to break, tear or injure in any way the outer surface of the pitch or asphaltum.

Skilled Labor to Be Employed.

Section 223. None but competent men, especially skilled in work of this kind, shall be employed to lay the waterproofing.

Measurements and Payments.

Section 224. Measurements will be made on the basis of actual area covered by the number of plies ordered, no account being taken of laps, and the waterproofing will be paid for as herein stipulated, Schedule Item 15.

16—STEEL AND IRON.

Open Hearth Process.

Section 225. Steel shall be made in open hearth furnace.

Chemical and Physical Properties.

Section 226. The chemical and physical properties of finished material shall conform to the following limits:

Properties	Structural Steel.	Carbon Rivet Steel.	Steel Castings.
Phos. (Max.)	.04%	.04%	.05%
Sulph. "	.05%	.04%	.05%
Mn. "	.60%	.60%	.80%
Si. "	.10%	.10%	.35%
Ult. Str.	60000±4000	50000±4000	65000± (Min.)
Yield Point	55% Ult.	55% Ult.	35000± (Min.)
Elongation	$\frac{1500000}{\text{Ult. Str.}}$	$\frac{1500000}{\text{Ult. Str.}}$	20% in 2"
Fracture	Silky.	Silky.	Fine granular.
Cold Bend	180° flat.	180° flat.	120° (d.=3+.)

Yield Point.

Section 227. The yield point shall be that strain, beyond which the elongation ceases to be proportional to the weight imposed, and may be indicated by drop of beam. The speed of testing shall be governed by the inspector.

Finish.

Section 228. Sufficient discard shall be made to insure sound material free from piping or excessive segregation. The material shall be finished straight and smooth, and shall be free from all seams or other defects. Any imperfection which may develop during the progress of the work will be sufficient cause for rejection.

Steel Castings.

Section 229. Steel castings shall be true to pattern and free from injurious imperfections.

Standard Test Pieces.

Section 230. The tensile strength, yield point and ductility of the material shall be determined from a standard test piece of not more than two (2) inches in width, and about one-half (½) square inch in sectional area, cut from a full sized bar, with sides turned or planed parallel so as to give a uniform minimum section for at least nine (9) inches. Whenever practicable the two sides of the test piece shall be left as they come from the rolls, but the finish on opposite sides shall be alike in this respect.

Specimens for Bending.

Section 231. Specimens for bending shall be cut from the material as rolled.

Rivet Rods.

Section 232. Rivet rods shall be tested as rolled.

Steel Castings.

Section 233. For steel castings the test piece shall be turned to a uniform minimum section of one-half (½) inch diameter, for a length of at least two and one-half (2½) inches. Specimens for bending shall be one (1) inch by one-half (½) inch in section.

Ductility Elongation.

Section 234. In determining the ductility, the elongation shall be measured after breaking on an original length as specified, in which length shall occur the curve of reduction each side of the point of fracture.

Where Taken From.

Section 235. For rollers the specimens shall be cut from the finished bar so that the centre of the specimen shall be one inch from the outside of the bar.

Section 236. For steel castings the specimens shall be cut from coupons cast on some portion of a casting from each melt, and shall be annealed with the casting before it is cut off.

Treatment of Test Specimens.

Section 237. The material from which test specimens are cut shall receive the same treatment as the material which it represents in the finished structure.

Number of Tests.

Section 238. At least one tensile and one bending test shall be made from each melt of steel as rolled. In case steel differing three-eighths (⅜) inch or more in thickness is rolled from one melt, a test shall be made from the thickest and from the thinnest material rolled.

Variation in Weight.

Section 239. A variation in weight of any piece of steel of two and one-half (2½) per centum from that specified, shall be sufficient cause for rejection, except in case of sheared plates exceeding one hundred (100) inches in width, where the variation may be five (5) per centum.

Material Marked.

Section 240. Each finished piece of steel shall be marked with the melt number, excepting that bars for reinforcing concrete shall be bundled and the melt number stamped on a metal tag attached to each bundle.

WROUGHT IRON.

Double Rolled.

Section 241. All wrought iron shall be double rolled, and no scrap used in its manufacture. It shall be thoroughly welded in rolling, shall be tough, ductile, and fibrous, and shall be finished straight and smooth. It shall be uniform in quality and free from surface defects.

Method of Testing.

Section 242. The methods specified for testing rolled steel shall apply generally to wrought iron. It shall show by the standard test piece an ultimate strength of fifty thousand (50,000) lbs. per square inch, and a yield point of twenty-six thousand (26,000) lbs. per square inch. It shall bend one hundred and thirty-five (135) degrees with inner radius not to exceed twice the thickness of the piece tested. When nicked and bent the fracture shall show at least ninety (90) per centum fibrous.

Cast Iron.

True to Pattern.

Section 243. All castings shall be true to pattern, out of wind and free from injurious imperfections. They shall be of a good quality of tough gray iron made by the cupola process. Sample test pieces, cylindrical in shape, one and one-quarter (1¼) inches in diameter, and fifteen (15) inches long, cast under the same circumstances as those which attended the casting of the full-sized piece, shall sustain at the centre, when resting upon two dull knife edges twelve (12) inches apart, a load of three thousand (3,000) lbs. with a deflection of at least one-tenth (1/10) of an inch before rupture.

Workmanship.

Quality.

Section 244. All workmanship shall be first class. All parts exposed to view shall be neatly finished. All nuts on the finished structure shall be hexagonal.

Rods Deformed Sections.

Section 245. Rods and bars to be used for reinforcing concrete shall be deformed as approved by the Engineer; plain bars will not be used.

Bent Rods and Bars.

Section 246. Bent rods and bars and other bent material shall be bent hot and annealed, except that obtuse bends in material less than one square inch section may be made cold when permitted by the Engineer. The bending shall be done before the material is delivered on the work. Except in special cases, all bends shall be made uniformly to template.

Material Straightened in Shop.

Section 247. All material shall be straightened in the shop before being worked in any way.

Holes Accurately Spaced.

Section 248. All holes shall be accurately spaced and punched. Unfair holes shall be reamed to exact match; drifting to enlarge the holes will not be allowed. Poor matching of holes will be cause for rejection.

Size of Punch.

Section 249. In punching, the diameter of the punch shall not exceed by more than one-sixteenth (1/16) of an inch, the diameter of the rivet to be used, and the diameter of the die shall be as small as may be required to punch a clean hole. When the materials to be sub-punched and reamed, a punch of diameter three-sixteenths (3/16) of an inch smaller than specified above shall be used, and all reaming shall be done after the material is assembled, with twist drills of one-sixteenth (1/16) of an inch greater diameter than the rivet to be used.

Sub-punching and Drilling.

Section 250. All material over seven-eighths (⅞) of an inch thick shall be drilled from the solid. Material over five-eighths (⅝) of an inch and not exceeding seven-eighths (⅞) of an inch in thickness shall be sub-punched and reamed. All other material may be direct punched.

Sheared Edges.

Section 251. Sheared edges of material exceeding five-eighths (⅝) of an inch in thickness, to be used in main members shall be planed at least one-eighth (⅛) of an inch.

Burrs Removed.

Section 252. All burrs shall be removed, and the members shall have all parts firmly drawn together with bolts before reaming or riveting is commenced.

Riveting.

Section 253. Rivets when driven shall completely fill the holes, and shall be machine driven wherever possible. They shall have full concentric heads or they shall

be countersunk when so required. Rivet heads shall not be flattened to less than half the diameter of the rivet on the line of the shank unless countersunk.

Use of Bolts.

Section 254. Generally the use of bolts instead of rivets will not be permitted, but when used in special cases the holes shall be reamed parallel, and the bolts turned to a driving fit.

Templates.

Section 255. All holes for field rivets, excepting those in connections of lateral and sway bracing, shall be sub-punched and accurately drilled to an iron template, or reamed and match marked while the connecting parts are temporarily assembled in the shop. In case of splices of upper chords or other compression members, the abutting members shall be brought to a forcible contact.

Finished Members.

Section 256. Finished members shall be true and free from kinks, twists, or open joints. Ends of floor beams and stringers shall be finished square and true.

Rods Upset.

Section 257. Rods and bars which are to receive a thread shall be properly upset. Where threads are cut on steel, they shall be properly filleted.

Annealing.

Section 258. Steel, except in minor details, which has been partially heated, shall be properly annealed. All steel castings shall be annealed.

Abutting Surfaces Faced.

Section 259. All abutting surfaces, except flanges of plate girders, shall be neatly planed or faced perpendicular to the direction of the strain, so as to insure even bearings.

Stiffeners.

Section 260. Stiffeners of plate girders shall fit neatly against the flange angles. Web splice plates and fillers under stiffeners shall be cut to fit within one-eighth (⅛) of an inch of flange angles.

Pins and Rollers.

Section 261. Pins and rollers shall be turned accurately to a gauge, and shall be of full size throughout. All pin-holes shall be bored truly and at right angles to the axes of the members to be connected, and shall fit the pins with a play not exceeding one thirty-second (1/32) of an inch.

Bed Plates Planed.

Section 262. Bed plates shall be planed. The bottom of the shoes shall be planed exactly parallel to the centre line unless otherwise shown. The cutting of the planing tool shall be in the direction of expansion.

Details Boxed.

Section 263. Nuts, bolts, rivets and other details shall be boxed.

Weight Marked.

Section 264. The weight of every piece and box shall be plainly marked upon it.

Inspection.

Section 265. Free access and information shall be given by the Contractor for a thorough inspection of material and workmanship, with proper office facilities.

Mill Orders in Triplicate.

Section 266. The Engineer shall be furnished copies in triplicate of all mill orders, and no material shall be rolled nor work done before the Engineer has been notified so that he may arrange for the Inspector.

Contractor Responsible.

Section 267. The Inspector shall make detailed reports of his inspection to the Engineer and may notify the Contractor of any defects in the material or workmanship, but all acceptances made by him shall be considered temporary, and his inspection shall in no way relieve the Contractor of full responsibility for the character and accuracy of the work until its completion and final acceptance by the Engineer.

Errors in Plans.

Section 268. The Contractor shall be responsible for all errors which can be discovered by checking or examining the plans.

Chemical Analysis.

Section 269. Chemical determination of the percentage of carbon, phosphorus, sulphur and manganese shall be made by the manufacturer from a test ingot, so taken, during the casting of each melt of steel, as to fairly represent the melt. Two copies of such analysis shall be furnished to the Engineer or his Inspector.

Check Analysis.

Section 270. Check analysis shall be made, at the discretion of the Engineer, of the finished material, on drillings from pieces selected by the Inspector from parts suspected of being most highly segregated. These analyses shall not show a variation above the ladle analysis of more than twenty-five (25) per centum for phosphorus, nor more than fifty (50) per centum for sulphur. The analyses shall be made by a chemist designated by the Engineer.

Contractor to Make Tests.

Section 271. The Contractor shall furnish, without extra charge, such standard test pieces as may be necessary to determine the uniform quality of the material and also the use of a reliable testing machine, with necessary labor for testing.

Inspector's Office.

Section 272. The Contractor shall furnish for the use of the Inspector a suitably equipped office at the mills and at the shops.

Loading and Shipping.

Section 273. All parts shall be carefully loaded and protected from injuries during transportation by such means as will be satisfactory to the Inspector. After delivery of materials at the work the Contractor will be required to store the same on skids at least twelve (12) inches above the ground and to keep the same in good condition. Any piece showing injurious effects of rough handling at any stage until the final acceptance of the work may be rejected.

Payments for Steel and Cast Iron.

Section 274. The prices to be paid for steel and cast iron are as herein provided in Schedule Items 19, 20, 21, 22, 23 and 24. These prices include the cost of material delivered and erected in the work, with the exception of Item 23, the placing of which is provided for in Item 22. These prices are to include also the cost of all necessary cleaning and painting (where painting is required) and of all other incidental work. The quantity of metal to be paid for shall be the number of pounds actually placed in accordance with the drawings or orders.

Miscellaneous Castings.

Section 275. For other castings, not included in the above and not including castings for sewer work or pipes, payment will be made as provided in Schedule Item 25.

Wire Mesh.

Section 276. Wire mesh, of a character and weight to be approved by the Engineer, is to be furnished and placed around the lower flanges of the roof girders, and at other places as may be required, in order to hold the concrete in place.

Wire Mesh, Payment For.

Section 277. Wire mesh, wherever used, will be paid for as stipulated in Schedule Item 26, which price is to include the material in place and all work necessary and incidental thereto.

17—PAINTING.

Section 278. All metal work, excepting as otherwise herein provided, shall be painted with three coats of paint, including the shop coat, of kind and quality approved by the Engineer. Lead or carbon paint will generally be required.

Shop Coat.

Section 279. All iron shall be scraped free from scale, and receive one coat of red lead paint as herein specified before leaving the shops. All surfaces which come

in contact or are enclosed shall be painted before being assembled. All turned or faced surfaces shall receive a coat of white lead and tallow before leaving the shops.

Quality of Red Lead.

Section 280. The red lead shall be strictly pure, and shall contain at least 80 per cent. of "true lead" ($Pb_3 O_4$). The color shall be a clean, pure tint. The red lead shall be of the fineness that when washed with water through a No. 19 silk bolting cloth, not more than 1 per cent. shall be left on the screen.

Quality of Linseed Oil.

Section 281. The linseed oil must be absolutely pure, fully aged and ripened, well settled oil. It shall be perfectly clear on receipt, and after heating to 212° Fahr. on a current of hydrogen, shall not show a deposit of foots nor a loss of over 0.4 per cent. for raw oil, nor over 0.2 per cent. for boiled oil. The specific gravity at 60° Fahr. for raw oil shall be between 0.932 and 0.937, and for boiled oil between 0.936 and 0.940.

Original Packages.

Section 282. All material shall be delivered, inspected and sampled in original packages.

Proportions in Mixture.

Section 283. Red lead paint shall be mixed in the proportion of 500 pounds of red lead to 5½ gallons of boiled linseed oil, and 11 gallons of raw linseed oil.

Damaged Shop Coat to be Renewed.

Section 284. Where the shop coat has become damaged before or after erection, through any cause whatever, it shall be renewed with the same kind of paint as originally used, such renewal to be considered only as a part of the original shop coat. If the Engineer so directs, on members or parts of members buried in concrete the shop coat will be omitted.

Structural Steel and Rods.

Section 285. Structural steel and rods to be embedded in concrete shall be protected from the weather before being put in place, and shall be cleaned and scales removed but not painted before being incased in the concrete.

Second Coat Carbon Paint.

Section 286. The second coat of paint shall be a carbon paint approved by the Engineer. It shall be applied after erection, but not until the metal has been cleaned from dirt or other objectionable matter that may be found thereon.

Metal to be Cleaned After Erection.

Section 287. After erection the metal shall be thoroughly cleaned of all dirt, rust or scales by stiff wire brushes or sand blasts, as directed, and afterward dusted and thoroughly and evenly painted as described above. No paint shall be applied until the cleaning has been passed upon by an Inspector.

Section 288. Between stations the exposed members shall be given a third coat, which shall be a carbon paint of a color and quality approved by the Engineer.

Third Coat, When Applied.

Section 289. The third or finishing coat shall be applied to all exposed surfaces of the metal after its erection, and after a completion of the masonry or other work; it shall be applied at such time after such completion and before the final acceptance of the work as in the judgment of the Engineer may be advisable. The several field coats shall be sufficiently tinted to be distinctive.

Surfaces in Contact.

Section 290. Surfaces of exposed members inaccessible after erecting, shall be cleaned and painted before erecting.

Recesses, etc.

Section 291. All recesses that might contain water, or through which water could enter, must be filled with thick paint or a waterproof cement of ground skins before receiving final painting.

Section 292. All surfaces so close together as to prevent the insertion of a brush, must be painted thoroughly by using a piece of cloth, if necessary.

Rainy or Freezing Weather.

Section 293. No painting in rainy or freezing weather or on wet surfaces will be permitted.

Payments.

Section 294. Payment for painting is included in the prices for steel and iron.

18—DUCTS AND CONDUITS.

Vitrified Ducts—Quality and Size.

Section 295. The ducts to contain cables for transmitting electricity shall be manufactured of the best clay, thoroughly mixed, burnt and vitrified, sound in all respects, straight and free from soft spots, stones, cracks or blisters liable to impair their strength or durability; in lengths generally of from eighteen (18) to thirty-six (36) inches, shorter lengths shall only be used as directed; generally in four-way form with circular holes, the least diameter to be three and one-half (3½) inches; one, two or three-way ducts shall be used in special cases as determined by the Engineer. The interior surface of the holes to be smooth and clear of warts, tits, pits or blisters, which may tend to injure the electric cable in pulling the same through the duct. The ends to be cut smooth and at right angles to the axis of the duct and beveled on inside for three-quarters (¾) of an inch.

Thickness of Ducts.

Section 296. The outside walls and webs of four-way ducts to be three-quarters (¾) of an inch thick; the outside dimensions of ducts to be not less than nine and one-quarter (9¼) nor more than ten (10) inches, and constructed square on outer lines; the dimensions of single, two-way or three-way ducts shall be consistent with the above.

Ends Combed.

Section 297. The ends of ducts to be combed with two (2) sets of three (3) combings each, each combing to have a width of one-quarter (¼) of an inch and a depth of one-sixteenth (1/16) of an inch.

Glaze.

Section 298. The inside and outside of ducts to be thoroughly glazed in the most approved manner with good salt glaze.

Inspection.

Section 299. All ducts to be subject to inspection, both at the place of manufacture and on the work. All rejected ducts to be promptly removed by the Contractor at his expense.

How Laid.

Section 300. The ducts shall be laid in beds of cement mortar about one-quarter (¼) of an inch in thickness, with broken joints and with full bearing. Two (2) strips of thick unbleached muslin six (6) inches wide, and coated with neat cement mortar, shall be used to wrap each joint, the ends of the wrap to lap six (6) inches. The muslin shall be not less than 56 by 60 count, weight not less than four (4) ounces to the yard and width thirty-six (36) inches. In laying the ducts care must be taken to close abutting joints so that practically the end of ducts shall be in contact on all sides. Where ducts are laid on curves, the wraps must be doubled if required, to protect the openings between the ends of the ducts on the outer line of the duct and to exclude all mortar from duct openings.

Mandrels.

Section 301. The ducts shall be laid with a linked mandrel of the length and diameter to be prescribed, the same accurately fitting the duct openings, the mandrel to be left in each duct until the next succeeding duct is laid.

Dowel Pins.

Section 302. The ducts shall be laid with dowel pins, at least two pins on the opposite sides horizontally.

Laid to Line.

Section 303. The ducts shall be so laid that the centre of the holes shall be true to line and grade.

To be Rodded.

Section 304. After the ducts are laid, and sufficient time is given to allow the mortar in beds to partially set, they shall be rodded; all mortar or other foreign matter must be cleaned from the duct openings, leaving a clear and smooth opening.

If obstructions are found in rodding the ducts which cannot be removed by cleaners, so as to give a clear and smooth opening of three and one-half (3½) inches in all duct openings, the ducts shall be removed and relaid; all ducts, during construction and after being rodded, shall be plugged with suitable plugs, to be furnished by the Contractor. If wooden plugs are used they shall be immersed in water for at least eight (8) hours before being put in place.

Measurement and Payment for Vitrified Ducts.

Section 305. Tunnel ducts shall be paid for per duct foot in place at the price herein stipulated for tunnel ducts, Schedule Item 18, which price shall include the cost of furnishing, laying, rodding and all the material and work incidental thereto. The tunnel ducts to be provided under Schedule Item 18, shall include only those intended solely for the purpose of the operation of the Railroad.

Duct Manholes.

Section 306. Duct manholes shall be built at the sides of the railroad in connection therewith and as indicated on the plans. These manholes shall be generally at intervals of about three hundred feet, and shall be on either or both sides of the Railroad, as necessary, in accordance with the location of the duct lines. They may vary in form as may be necessary to accommodate the work to local conditions.

Duct Manholes at Stations.

Section 307. Duct manholes will be built at the ends of the stations to provide for the passage of the ducts under the station platforms, and if found necessary on account of the lengths of stations, additional manholes will be constructed under the platforms.

Section 308. At manholes the ducts will be laid to conform to the special conditions.

Section 309. In all work where iron pipe or fibre conduits are installed for a part of their length in the structure and for another part as open construction, the ends of such runs shall be carried outside of said structure as open construction and shall terminate in outlet or junction boxes located by the Engineer.

Section 310. The iron pipe or fibre conduits required by section 309 will be built mainly in the walls, roofs or other parts of the stations; portions, however, of the runs will be left exposed, to be covered later by the station finish work.

Quality of Iron Pipe Conduit.

Section 311. All iron conduit used for any purpose in connection with the work herein shall be of the best grade (Galvaduct or equal), standard weight wrought iron or steel piping, protected inside and out by a coat of zinc or enamel. It shall be delivered to the work in bundles of full length pipes, each length marked with the trade-mark of the manufacturer. It shall bend cold 90 degrees about a radius equal to ten diameters without signs of flaw or fracture in either pipe or enamel.

Installation.

Section 312. All conduit shall be carefully cleaned before and after erection, and all ends shall be reamed free from burrs, and inside surfaces shall be free from all imperfections liable to injure the cable.

Joints Watertight.

Section 313. All joints shall be made with standard couplings, well treated with red lead, and screwed up to make a watertight job.

Fibre Conduits, Quality, Laying, etc.

Section 314. All fibre conduit shall be made of impregnated fibre equal to that manufactured by the Fibre Conduit Company of Orangeburg, New York.

It shall be of uniform thickness, having walls of not less than one-quarter (¼) inch and true cylindrical holes not less than two (2) inches in diameter. Lengths shall be not less than five (5) feet, and all ends shall be finished.

All joints shall be made by suitable finished sleeves fitting closely over the ends of the conduit and made watertight by making up with an approved bituminous compound.

After laying, all ducts shall provide a clear, true opening, free from obstructions and imperfections in any way injurious to the wires to be installed. All ducts shall be rodded and cleaned with an approved mandrel not less than one and three-quarter (1¾) inches in diameter and eighteen (18) inches long.

Built in Concrete, etc.

Section 315. Conduits built into concrete or other parts of the structure shall be properly protected and supported, so that the same shall not be injured by the building operations.

Not Built in Concrete.

Section 316. Conduit not built into the structure shall be supported by approved pipe straps located not more than eight feet apart, or in any other manner designated by the Engineer, and they shall be kept boxed or otherwise suitably protected from injury.

Bends and Offsets.

Section 317. Bends and offsets may be made in the field if proper tools are used, but in no case shall deformed, split or crushed conduit be erected. Not more than two right angle bends shall be made between any two outlet boxes without special approval of the Engineer.

Measurement and Payment.

Section 318. Measurements for the above iron pipe or fibre conduits shall be per linear foot of single conduit placed in the work—in accordance with the requirements—and payment for the same shall be as herein stipulated in Schedule Item 32.

Outlet and Pull Boxes and Payment for Same.

Section 319. All outlet and pull boxes shall be made of cast iron, with openings threaded for the conduit ends, and conduits shall be screwed into these openings and made up with red lead to effect a watertight joint. Covers shall be of cast iron and watertight, and no other boxes or covers shall be used except under special permission of the Engineer. The price for each cast iron outlet box furnished and placed in the work shall be as herein stipulated in Schedule Item 33.

19—Drains and Pumps.

Railroad to be Drained.

Section 320. Every part of the Railroad, the stations and appurtenances connected therewith, must be arranged so far as possible that any water finding access thereto will be led away automatically to the City sewers.

Section 321. Where the Railroad is on an inclined gradient, and is constructed in dry, porous soil, the floor of the Railroad may be depended on to act as a conduit. At the bottom of the inclined gradient connections must be made with a sewer or with subdrains lying beneath the Railroad and draining into the sewers.

Subdrains.

Section 322. Along such parts of the work where the soil is not porous, or where the floor of the Railroad cannot, in the judgment of the Engineer, be used as a conduit, there shall be laid, beneath the rail level and on a continuous descending gradient, drain pipes of vitrified salt-glazed stoneware, of the quality described in these specifications for sewer pipe. These drain pipes shall be of such diameter not exceeding fifteen (15) inches, as the Engineer may direct, and there shall be one (1) such drain for each two (2) tracks. Each drain shall be laid in the concrete or directly in the soil with tight or open joints, as directed, and in such manner and in such position as, in the opinion of the Engineer, local circumstances require.

Connections and Cross Drains.

Section 323. Where drain pipes connect with the City sewers, the junction shall be protected by suitable traps, and back-pressure valves or gate valves where necessary, to prevent back rush of water or gas from the sewers. Connections with the Railroad shall be as necessity demands and all as directed by the Engineer. Cross drains to connect with the main drains will be placed at such places and in such manner as the Engineer shall direct; also vertical drains at the sides of the Railroad. These drains shall be of vitrified pipe or of cast iron. as directed.

Broken Stone for Drainage.

Section 324. On the roof of the Railroad and at other points as may be directed or indicated on the plans, broken stone shall be placed for the purposes of drainage.

Sumps.

Section 325. At the low points of the grade of the Railroad where the same passes below the bottom of adjacent sewers there shall be constructed sumps connected with the subdrains or the floor of the Railroad. Such sumps must be watertight, with a capacity of not less than eight hundred (800) gallons each.

Pumps for Tunnel Drainage.

Section 326. Adjacent to each sump a suitable enclosure shall be provided in which two pumps shall be installed, each of which shall have ample capacity to remove all the water entering the sump at that point under ordinary conditions. These pumps shall each have a separate source of power, and shall be arranged to operate antomatically. Under this contract the Contractor will only furnish the pump or pumps required and set them in place as directed, including the necessary pipe and drainage connections between the sumps and sewers.

The pumps shall be of the capacity required by the Engineer.

Capacity.

Section 327. If in the opinion of the Engineer the service requires it, each of these pumps shall be able to remove from the sump eight hundred gallons per minute.

Delivery to Sewers, etc.

Section 328. The delivery of such pumps shall be into the City sewers, and all piping, valves, etc., in connection therewith, shall be installed as a part of this contract.

Payment for Drains, Broken Stone, Pumps, etc.

Section 329. All drains shall be measured in place and the actual net length as laid for each class of drain will be paid for as herein provided in Schedule Item 17. The prices therein provided for each class of pipe will include providing and laying the pipe and all specials of any nature whatsoever such as bends, tees, wyes, handholes, etc., and all materials necessary for jointing the same. Where back-pressure valves or gate valves are required the cost of setting the same will be included in the above, but the Contractor will be paid in addition the actual net cost of such valves plus ten (10) per cent.

Section 330. For broken stone for drainage, furnished and placed, Section 324, payment will be made as provided in Schedule Item 14.

Section 331. For pumps, Section 326, the Contractor will be paid as provided in Article XII. of the contract, not including, however, the pipe connections with sumps and sewers which pipe will be paid for as hereinbefore provided in Schedule Item 17.

Soil Pipes for Stations.

Section 332. It will be necessary to lay soil pipes in the floors and walls of the stations. These pipes are to be cast iron, "extra heavy." They will be placed in positions as shown on the plans and will be paid for as provided in Schedule Item 34.

20—SEWERS.

In Accordance With Plans and Specifications.

Section 333. All sewers and appurtenances shall be built of the materials, of the sizes and dimensions, on the lines and grades, at the depths, with the connections, and in the manner called for by these specifications and shown on the drawings.

Change of Location.

Section 334. If in the opinion of the Engineer, it is impracticable during the progress of the work to construct any sewers, manholes, or other appurtenances, according to the contract drawings, owing to the presence of unknown subsurface structures or other contingencies, the Contractor shall construct such sewers, manholes or appurtenances in the location given by and according to the directions of the Engineer.

General Clauses Apply.

Section 335. The general clauses in this contract relating to excavation, both in open trench and tunnel, backfilling, cement, mortar, masonry, waterproofing, piling, timber work of all kinds, care of streets and public places, maintenance of surface and subsurface structures, protection of persons and property, repaving or restoring of the surface of the street or other public places, responsibility of the Contractor, authority of the Engineer to examine and condemn materials, and the power of the Commission and the Engineer in all or any other respects to enforce this contract, apply to the construction and reconstruction of sewers, water mains or pavements, unless specifically amended or exempted, both along the route occupied by the Railroad and elsewhere.

No Claims for Damages.

Section 336. Should postponement or delay be occasioned by the precedence of paving or other contracts, which may be either let or executed by the Borough President, Commissioner of Water Supply, Gas and Electricity, or other heads of

departments, either before or after the execution of this contract, on the line of the work, no claims for damages therefor shall be made or allowed; nor shall any claim for damages be made or allowed in consequence of the street or the adjoining sewers not being in the condition contemplated by the parties at the time of making the contract, except that if the Contractor shall be delayed in the performance of his work by reason of the street or the adjoining sewers not being in such condition, an allowance of time may be given for the completion of the work as elsewhere provided in this contract.

Size of Trenches.

Section 337. The trenches for sewers and basin culverts both in earth and in rock, in streets along the route of the Railroad, shall have vertical sides and shall be not less than six inches wider than the greatest external width of the sewer or its foundation on the side farthest away from the subway; and in other streets the trenches shall have vertical sides, and shall be not less than six inches wider on each side than the greatest external diameter of the sewer, but shall be not less than three feet in width. They shall be excavated to the depth and to the form of the sewer or its foundation.

Limit of Trench Opening.

Section 338. Not more than one hundred (100) feet of trench in sewers off the line of the railroad shall be opened at any one time in advance of the sewer already completed, unless by permission of the Engineer, and for a distance specified.

Excavation Completed in Advance.

Section 339. The excavation of trenches shall be fully completed a sufficient distance in advance of the laying of the sewer, and the exposed end of the sewer shall in all cases be fully protected.

Trenches for Manholes and Receiving Basins.

Section 340. Where the foundation for a manhole or a receiving basin extends beyond the line of such manhole or receiving basin, the minimum excavation required in earth shall be to the lines of the smallest rectangle, enclosing the full dimensions of the exterior of the foundation, and shall have vertical sides to the surface, but it shall, in all cases, be not less than six inches larger than the greatest external dimension of the manhole or receiving basin. In rock excavation, the trench shall be six inches larger than the greatest external dimension of the manhole or receiving basin, or its foundation, and shall have vertical sides to the surface.

Foundations.

Section 341. Where the ground does not afford a sufficiently solid foundation, the trench shall be excavated to such increased depth as the Engineer may deem necessary, and this extra depth, and all other irregularities in the bottom of the trench, shall be filled up to the required level and form, with such material, and in such manner, as the Engineer shall direct. If so directed, piles shall be driven and a timber or reinforced concrete foundation shall be constructed, as elsewhere provided in these specifications, to support the sewer.

Inspection of Grades.

Section 342. When the trench is properly prepared, and before laying any sewer, the Contractor shall notify the Engineer, who will, thereupon, cause the grades for the sewer to be tested, and if correct the sewer shall then be laid in the presence of a duly authorized inspector, and no construction work shall be done in his absence.

Trenches to be Kept Free from Water.

Section 343. The trenches shall be kept entirely free from water while the foundation and the masonry are being constructed or the sewer laid. In no case shall water be allowed to flow over the invert or foundation or through the sewer until the mortar is thoroughly set.

Tunneling.

Section 344. When tunneling for sewers shall be deemed advisable, it shall be done in a manner approved by the Engineer.

Gutter and Passageway to be Kept Open.

Section 345. At all times, gutters shall be kept open for surface drainage, and the streets and sidewalks shall be kept clear and free for the passage of carts, wagons, carriages and street or steam railroad cars or pedestrians, and as otherwise provided in these specifications.

Crosswalk, Sidewalk and Roadway to be Kept Clear.

Section 346. Where any crosswalk or roadway is cut by the trench, it shall be temporarily replaced by a timber bridge with side railings, according to the direction and approval of the Engineer. The work shall at all times be conducted so as to cause as little inconvenience as practicable to the public.

Disposition of Paving Material.

Section 347. All curb, gutter, flagging, paving and macadam stones, necessary to be removed, which in the judgment of the Engineer are suitable to be used again, shall be stored in such places as the Engineer shall direct, or shall be removed as provided in these specifications; in all cases a passageway on the sidewalks and in the roadway shall be preserved free from needless obstructions.

Flow of Sewers to be Maintained.

Section 348. The Contractor shall provide for the flow of all sewers, drains and watercourses, interrupted during the progress of the work, and shall restore and make good all connections, and shall immediately cart away all offensive matter, in such manner and with such precautions as the Engineer may direct. All temporary house connections shall be made by closed iron pipes, with suitable provision for preventing leakage at joints. Wooden troughs for such connections will not be permitted.

Brick.

Section 349. In the construction of brick masonry none but the best quality of common brick burned hard entirely through, regular and uniform in shape and size and of compact texture, shall be used. They shall be culled as they are brought on the ground, and bats and bricks of improper quality are to be removed from the work. A limited number of bats may be used in manholes and closures, and in the outer ring of the sewers where more than two rings of bricks are required.

How Laid.

Section 350. The bricks shall be properly wet immediately before laying. Every brick is required to be laid in a full joint of mortar, made as described in these specifications, on its bed, end and side, at one operation. In no case is mortar to be slushed or grouted in afterward. The bricks shall be neatly and truly laid, every second course to line, and the points to be carefully struck on the inside.

Racked Back or Toothed.

Section 351. All brick work, as it progresses, shall be racked back in courses, and in no case will it be allowed to be toothed, unless by special permission from the Engineer.

Back or Stone Inverts.

Section 352. All inverts, or bottom curves, shall be formed from profiles accurately made according to the dimensions of the sewer, and correctly set according to the grades furnished. The masonry shall be allowed to set for twenty-four (24) hours before the arch is turned. Vitrified brick or granite paving blocks shall be used for the inner ring of the invert when required by the Engineer, and whenever so used they must be thoroughly jointed, so as to be watertight along the inner surface of the sewer. The last course of the invert masonry below the springing line shall be laid as headers.

Brick Arches.

Section 353. The arches or upper curves shall be formed on strong centres of correct form, according to the sizes and shapes required, and keyed with stretchers in full joints of mortar. The extrados of the arch shall be plastered with mortar one inch thick, mixed in the proportion of one part of cement to two parts of sand. The centres shall not be removed or withdrawn in less than thirty-six hours, or until the work is thoroughly set, and until the filling in of the arch is properly put into place to a depth which is at least one foot above the crown of the arch. The centres in all cases shall be struck and not drawn, so as not to crack or injure the work. Should any crack or settlement appear in the arch after the centres are removed, so much of the work as the Engineer may require shall be taken down immediately and replaced.

Spurs.

Section 354. Vitrified or iron sewer pipes or spurs, equal in every respect to those described elsewhere in these specifications, and of a size required by the Engineer, but not less than six inches interior diameter with hubs moulded for house connections, and of sufficient length to project at least four inches beyond the exterior of the

sewer, shall be built into the walls of brick sewers and at such an angle as indicated on the plan, or as the Engineer may direct.

How Built In.

Section 355. Spurs shall be built in wherever similar house connections exist in the present sewer which is to be reconstructed under this contract, but in no case shall the distance be more than twenty feet between spurs. In the case of the construction of new sewers where no sewers existed previously, except sewers under public parks or those crossing intersecting streets, they shall be built opposite each house, and where there are no houses, they shall be not more than fifteen feet apart on each side of the sewer or at such frequent intervals as local conditions may require. They shall be set so that their inner ends shall be flush with the inner face of the sewer, at such height in the walls as the Engineer may direct, and each pipe shall be sealed on the outside with an approved earthenware cover set in mortar.

Iron Chair Spurs.

Section 356. Where the sewers to be built under this contract will be at a depth greater than thirteen feet below the established grade of the street (or below the surface of the street where final grades have not been established), cast iron chair spurs, of the design shown on the drawings, not less than six inches in diameter and of the weight of extra heavy soil pipe, shall be used unless otherwise ordered by the Engineer. Where house drains are to be connected to these spurs, extra heavy soil pipe and fittings shall be used for the riser between the spur and the house drain. Where the spurs are provided for future connections, risers of extra heavy soil pipe shall be placed in each spur and shall be brought to a point thirteen feet below the established grade of the street, the end of which shall be sealed with an approved cover laid in cement mortar. The joints of this pipe shall be packed, leaded and caulked in accordance with these specifications for laying water mains.

Under Station Platforms.

Section 357. Wherever the sewer passes under a station platform or other structure, extra heavy soil pipe shall be laid from the spur to the outside of such station or other structure, brought up to a point thirteen feet below the established grade of the street, caulked and sealed, as provided above. All pipes passing under such structures shall be laid in concrete.

Concrete Sewers, Form, Dimensions and Materials.

Section 358. If, during the construction of the sewers, it is deemed advisable to interchange concrete and brick, the Contractor may, with the approval of the Engineer, build such sewers of either kind and quality herein specified.

Steel Bars Used if Ordered.

Section 359. Concrete sewers shall be reinforced with steel bars, if so indicated on the plans or directed by the Engineer.

Profiles and Inverted Centres for Inverts.

Section 360. Proper profiles for the concrete inverts shall be set up at the required distances, and the concrete for the bottom and invert of the sewer shall be deposited in place and rammed and worked down to the required shape. The concrete for the bottom and invert, if so directed, shall be placed in alternate lengths extending between every other pair of profiles, so that opportunity may be given to properly work the concrete in place.

Invert to be Protected.

Section 361. The concrete of the invert shall be protected during the progress of the work with planking, or by such other suitable methods as the Engineer shall direct and for so long a time as he may require.

Forms, Moulds, etc.

Section 362. Suitable forms or moulds, of the size and design to be approved by the Engineer, shall be provided by the Contractor to support the concrete of the side walls and roof while the same is being rammed into the permanent work.

Defective Work.

Section 363. If any voids, or irregular or defective work is discovered upon removing the forms or moulds, such voids or work shall be cut out and filled with a rich concrete or mortar mixed in such proportions and of such materials as provided elsewhere in these specifications.

Joints.

Section 364. No joints between different sections of the walls of a sewer shall, in any case, be a straight line, but shall always be stepped or toothed, so as to give a broken joint in the manner to be approved by the Engineer.

Spur Pipes, Branches, etc.

Section 365. In so far as they will be applicable to sewers constructed of concrete, the provisions and requirements for spurs, branches, etc., in brick sewers shall be understood to govern in such construction.

Vitrified Pipe Sewers—Quality of Pipe.

Section 366. Pipe sewers shall be built of vitrified, salt glazed stoneware pipe, with or without hub, as the Engineer may direct. The pipe shall be of the best quality, thoroughly and perfectly burnt, without warps, cracks or imperfections, well and smoothly glazed over the entire inner and outer surfaces and perfect in shape. The pipe shall be subject to all tests ordered in conformity with any requirements of the Bureau of Sewers, at any time previous to its being used.

Thickness.

Section 367. The size of the pipes shall be designated by their interior diameters. Each pipe shall be a true cylinder, and of even thickness throughout, according to the following schedule:

6-inch pipes shall be not less than ⅝ of an inch thick.
8-inch pipes shall be not less than ¾ of an inch thick.
10-inch pipes shall be not less than ⅞ of an inch thick.
12-inch pipes shall be not less than 1 inch thick.
15-inch pipes shall be not less than 1¼ inches thick.
18-inch pipes shall be not less than 1½ inches thick.
24-inch pipes shall be not less than 2 inches thick.
30-inch pipes shall be not less than 2½ inches thick.

Lengths.

Section 368. No pipe shall be less than 2 feet in length, and pipes of 12 inches, 15 inches and 18 inches in diameter shall be not less than 3 feet in length.

Curved and Split Pipes.

Section 369. When required, curved pipes shall be furnished and laid, curved to such a radius as may be required or as indicated on the plan of the work. No curved pipe shall exceed 3 feet in length. Split pipes shall be used when found necessary.

Hub and Spigot Pipe.

Section 370. In case the Engineer shall order hub and spigot pipe to be used, the hub shall have a depth of at least three (3) inches from its face to the shoulder of the pipe on which it is moulded, and shall have an interior diameter not less than one (1) nor more than two (2) inches greater than the exterior diameter of the pipe which is to be fitted into it.

Straight Pipe With Collars.

Section 371. In case the Engineer shall order pipe without hubs to be used, it shall be fitted with a collar of the same thickness as the pipe and not less than five inches wide. Each collar must have an internal diameter of not less than one-half inch nor more than one and one-half inches greater than the external diameter of the pipe to which it is to be fitted.

Spur Pipes.

Section 372. Pipes having spurs not less than six inches in diameter with hubs moulded thereon for house connections shall be furnished and laid at such points as indicated on the plan or as directed by the Engineer, and when not immediately used, they shall be sealed on the outside with approved vitrified earthenware covers set in mortar.

Risers.

Section 373. The provisions for risers on brick sewers shall also apply to pipe sewers. .

Bends.

Section 374. Bends, siphons and special pipes shall be furnished and laid of the size and forms shown on the plans of the work, or as required.

Pipe Sewers, How Laid.

Section 375. All pipes shall be laid in concrete cradles of the required form and dimensions. The first layer of concrete shall be four inches thick, for the full width of the cradle, and after being thoroughly tamped shall be allowed to set for a period of not less than twenty-four hours. Upon the bed thus prepared, the pipe shall be laid true according to the lines and grades furnished. The ends of the pipes shall abut against each other and in such manner that there shall be no shoulder or unevenness of any kind along the bottom half of the sewer on the inside. Unless otherwise ordered, not less than fifteen feet of pipe shall be laid at any one time, in any one length of trench. The remainder of the concrete shall then be put in place and shall be exposed for at least twenty-four hours for inspection, as required for the bottom course.

Jointing Hub and Spigot Pipes.

Section 376. When hub and spigot pipes are used, the lower half of each hub shall be plastered on the inside with a layer of cement mortar mixed in the proportion of one part of cement to one part of sand and of sufficient thickness to bring the inner surface of the abutting pipes flush and even with the established flow line. After the pipes are fitted, the space between the inside of the upper half of each hub and the outside of the entering pipe shall be filled with cement mortar mixed as above specified, and the outside of the joint shall be thoroughly sealed with the same kind of mortar and the joints carefully wiped inside and outside.

Jointing Pipes Without Hubs.

Section 377. When pipe without hubs is used, a collar or ring shall be used at joints and shall lap equally the ends of each abutting pipe. Such collar or ring shall consist of not more than three pieces, the largest of which shall be placed at the bottom.

Spaces Between Pipes Uniform.

Section 378. The space between the ring and the pipes shall be as uniform as possible and shall be thoroughly filled with cement mortar mixed in the proportions specified for hub and spigot pipe. The joints shall be carefully wiped and pointed inside and outside and all mortar that may be left on the inside shall be removed and the inside of the pipe left clean and smooth throughout.

Iron Pipe Sewers.

Section 379. Sewers of iron pipe, of quality and laid in the manner described elsewhere in these specifications for the laying of water mains, shall be laid wherever indicated on the plans or at such places as the Engineer shall direct.

Special Castings.

Section 380. Wherever such pipes are laid under station platforms or through vaults, they shall, when required by the Engineer, be provided with special castings for manholes, which shall be fitted with a cover bolted on so as to make an airtight joint, according to the plans to be furnished by the Engineer.

Ventilators.

Section 381. Whenever, in the opinion of the Engineer, it becomes necessary to provide ventilation for sewers under station platforms or other structures, iron pipe shall be laid from the sewer to the surface of the street and fitted with proper gratings according to the plans to be furnished by the Engineer.

Connections.

Section 382. All existing sewers, culverts, drains and house connections intercepted by the proposed sewers, culverts or receiving basins shall be connected with the new work by proper curves and grades and in such manner as the Engineer shall direct; and all drains, basins or culverts rendered unnecessary or becoming disused by the work herein contemplated shall be filled in and made solid with good wholesome earth in the manner directed. Provision shall also be made for the connection of future sewers or basins by constructing brick spurs or inserting vitrified pipe at the points indicated on the contract drawings and at other points as the Engineer may direct. These connections shall be closed with bulkheads not less than eight inches in thickness and of the quality specified for brick masonry.

Fresh Work to be Protected.

Section 383. All fresh work shall be carefully protected from injury in every way. No wheeling or walking will be allowed on it and any portion injured must be relaid by the Contractor; no walking or working over the pipes after they are laid,

except as may be necessary in tamping the earth and refilling, will be allowed until there is at least two and one-half feet of earth over them.

Pipes to be Kept Clean.

Section 384. The interior of pipe sewers shall be carefully freed from all dirt, cement and superfluous material of every description as the work progresses, for which purpose a disc, mould or plate, attached to a rod sufficiently long to pass two joints from the end of the pipe last laid, shall be continuously worked through.

Exposed Ends of Pipes to be Protected.

Section 385. The exposed ends of pipe sewers shall, in all cases, be protected with a board or other stopper carefully fitted to the pipe, to prevent earth or other substances from washing in, and in no case shall brick or stone be used for that purpose.

Manholes.

Section 386. The masonry of manholes shall be carried up so that the top of the iron head when set shall be at the level of the established grade of the street at that point or to such height as the Engineer may direct, and from templates correctly made and set at top and bottom, between which not less than eight lines shall be drawn. Where manholes are not built to the established grade of the street, they shall be covered, when necessary, by selected bluestone slabs eight inches in thickness, to support the manhole heads. All joints shall be neatly struck and pointed on the inside. Each manhole shall be plastered thoroughly on the outside with cement mortar one inch in thickness, mixed in the proportion of one part of cement to two parts of sand.

Foundations.

Section 387. The foundations for manholes shall be of concrete or masonry of the kind indicated on the plans and shall be not less than twelve inches below the invert elevation of the sewer, except as otherwise indicated on the plan. When foundation additional to that indicated on the plan is required, it shall be built as directed by the Engineer.

Section 388. Sewer pipes shall be built in and trimmed, when necessary, so as to be flush with the inner face of the manhole, and an arch, laid in cement mortar, shall be turned over the pipe.

Vitrified Bricks or Granite Blocks.

Section 389. The invert shall be built of vitrified brick, granite blocks or concrete masonry, as indicated on the contract drawings.

Use of Bats.

Section 390. A reasonable number of bats not smaller than half bricks may be used in the construction of manholes or receiving basins, provided all interstices are thoroughly filled with mortar.

Steps.

Section 391. Standard steps of good quality of galvanized wrought iron, of the size, length and shape required for steps, shall be built into the interior sides of all manholes at a distance apart of not more than fifteen (15) inches vertically and they shall be so arranged that the lowest step shall be not more than two feet above the bench at the bottom of the manholes nor more than two feet above the invert of the sewer where there is no bench. Each manhole head shall be cast with a wrought iron step on the inside, when directed by the Engineer.

Bluestone.

Section 392. Hammer-dressed bluestone shall be furnished and laid of the form and thickness required as indicated on the plans or as otherwise directed.

Manhole Head and Cover.

Section 393. A cast iron manhole head and cover of the quality specified for cast iron, and except in special cases, of the pattern adopted by the President of the Borough in which the work is located, and in dimensions, weight and all other respects satisfactory to the Engineer shall be fitted on a bed of mortar to each of the above described manholes. Manhole heads and covers which do not conform to these specifications shall be at once removed from the work.

Perforations.

Section 394. Covers to be used on manholes in the street shall be perforated. Those used on sidewalk manholes shall be tight-fitting, without perforations.

Weights.

Section 395. Each manhole head and cover shall have its weight distinctly marked upon it with oil paint. The following shall be allowed as the minimum and maximum weights:

Street manhole head, 475 to 500 pounds.
Street manhole cover, 135 to 150 pounds.
Sidewalk manhole head, 300 to 310 pounds.
Sidewalk manhole cover, 100 to 110 pounds.

Noiseless Heads and Covers.

Section 396. When the pavement of the street is asphalt on wooden block, the manhole shall be fitted with a noiseless head and cover, to be approved by the Engineer, where new heads and covers are necessary.

Sealed Manhole Heads and Covers.

Section 397. All manholes in station platforms, vaults or other structures shall be provided with sealed manhole heads and covers according to the design indicated on the plans.

Emergency Manholes.

Section 398. Where a sewer crosses under the subway, emergency manholes shall be provided when directed by the Engineer and according to plans to be furnished by him.

Manholes to be Completed.

Section 399. Manholes shall in all cases be fully and completely built and fitted with their covers as the work progresses, and the sewers shall not be laid beyond or in advance of any uncompleted manhole.

Receiving Basins.

Section 400. Receiving basins shall be built as located on the plans or as the Engineer shall direct and in accordance with the plans to be furnished. Each portion of the basin shall be built of the size and materials designated on said drawings and shall be thoroughly plastered, both inside and outside, with cement mortar in the proportion of one part of cement to two parts of sand.

Foundations.

Section 401. The foundations for receiving basins shall be of concrete or masonry of the kind indicated on the plans and shall extend not less than twelve inches below the finished floor of the basin, except as otherwise indicated on the plans. When additional foundation is required, it shall be built as directed by the Engineer.

Stone Flooring.

Section 402. The flooring shall be of hammer-dressed North River bluestone flagging, not less than three inches thick, in not more than two pieces, and shall be well set in a full bed of mortar and rammed into place. The floor may be finished with cement mortar mixed in the proportion of one part of cement to one part of sand if so directed by the Engineer. The mortar shall be spread, while fresh, upon the concrete base and before the latter shall have reached its first set; it shall be in such quantity that after thorough manipulation it shall be one inch in thickness.

Head Stone and Gutter Stone.

Section 403. Where head stone and gutter stone are required they shall be of sound, durable granite of the dimensions indicated on the plan, hammer dressed to an even surface and cut to the satisfaction of the Engineer. Cast iron basin heads and gutter pieces of the design indicated on the plans shall be set instead of the above when required.

Cast-Iron Cover.

Section 404. A cast-iron cover of approved pattern weighing not less than eighty nor more than ninety-five pounds shall be fitted to the opening in the head stone.

Grate Bar.

Section 405. A grate bar made according to the plan shall be fastened solidly into the said head stone in the manner indicated.

Cast-Iron Trap.

Section 406. A cast-iron trap of the form and dimensions indicated on the plan free from imperfections, and properly coated with coal pitch varnish shall be furnished and built into place as directed by the Engineer.

Joints.

Section 407. The joints shall be tightly fitted with an oakum gasket or with cement mortar if so desired.

Iron Steps.

Section 408. Galvanized iron steps of the same design required for manholes shall be built into the walls.

Culvert Pipes.

Section 409. The culvert pipe for connections with sewers shall be 12-inch vitrified pipe unless otherwise indicated on the plan, and of the kind and quality previously described, and shall be laid, in all cases, in a concrete cradle of the form and dimensions required for pipe sewers in accordance with the directions of the Engineer. In case it becomes necessary to connect any basin already built, with the work to be constructed, so much of such culverts as in the opinion of the Engineer may be necessary shall be taken up and rebuilt or relaid with vitrified pipe, or brick as the case may be, in the manner described above and reconnected in a straight line from the basin to the sewer.

Flush Tanks.

Section 410. Automatic flush tanks of a type approved by the Engineer shall be built where indicated on the plans or where directed by the Engineer.

Waterproofing.

Section 411. Whenever, in the opinion of the Engineer, it is necessary to waterproof a sewer, chamber or receiving basin, or their appurtenances, it shall be done as indicated on the plans or as directed by the Engineer and in the manner described elsewhere in these specifications.

Mortar.

Section 412. All masonry shall be laid in Portland cement mortar of the quality described in these specifications. It shall be mixed in the proportion of one (1) part of cement to two (2) parts of sand, excepting as otherwise specially provided.

Concrete.

Section 413. All concrete for sewers shall be made in the proportions of one (1) part of cement to two and one-half (2½) parts of sand and four and one-half (4½) parts of stone of the quality described in these specifications.

Paving.

Section 414. On the completion of each section of one hundred feet of sewer, the sidewalks and roadways shall be restored as provided under the heading of "Street Surface and Park Surface Restored."

Permits for Connections.

Section 415. The Commissioner of Public Works shall have the right to connect any sewer or sewers with the sewers herein described or to grant permits to any person or persons to make connections therewith at any time before it is finally completed, and the Contractor shall not interfere with or place obstructions in the way of such person or persons as may be employed in building such new sewer or sewers or in making such connections. This is not to be construed, however, as permitting the introduction of storm water or sewerage into any sewer being constructed under this contract before its final completion.

Thoroughly Cleaned.

Section 416. During the progress of the work, and until the entire completion and final acceptance thereof, the sewers, drains, basins, culverts and connections shall be kept thoroughly cleaned throughout, and left clean, and the drainage of any old sewer that may be taken up or intercepted shall be provided for and taken care of by the Contractor, all at his own expense.

Payment for Sewers.

Section 417. Payment for sewers will be per lineal foot of sewer complete as herein provided in Schedule Items 37 to 74, both inclusive, except as hereinafter specifically provided. The price for each class of sewer is to include each and every item applicable thereto as herein given in Sections 333 to 416 of these specifications and as otherwise provided in the contract and as indicated on the plans; excepting as is hereinafter specially provided.

Excavations.

Section 418. In addition to the price per lineal foot for completed sewer, as above provided, excavation will be paid for at the prices herein stipulated in Schedule Items 2-A and 3-A (which prices shall include all the matters referred to in Section 107), on the basis of size of trench stipulated in Sections 337 and 340, excepting where the sewer is built by tunneling, in which case tunnel excavation will be paid for at the price herein stipulated in Schedule Item 5-A (which prices shall include all the matters referred to in Sections 117 and 120), on the basis of the net ordered lines of the sewer. Payment for street surface restored shall be as provided in Schedule Items 30-A or B.

Steel Beams and Reinforcing Rods.

Section 419. Where steel beams or reinforcing rods are required and ordered, such beams and rods will be paid for in addition to the price bid for the sewer and at the prices herein stipulated for furnishing and placing such material and all work incidental thereto, in Schedule Item 20 or 21.

Automatic Flush Tanks.

Section 420. Where automatic flush tanks are built as provided in Section 410 of the specifications they will be paid for as herein provided in Article XII of the contract.

Waterproofing.

Section 421. Where waterproofing is required and placed in accordance with Section 411 of the specifications it will be paid for at the prices herein stipulated for waterproofing, Schedule Item 15 or 16.

Siphons.

Section 422. Where inverted siphons passing under the subway structure are called for and built, they shall be considered as part of the regular subway construction from outside to outside of the sewer chambers or between points of departure from standard sewer construction, such limits being indicated on the plans; and payment for such siphons will be made in accordance with the various classes of work or material as are applicable thereto in the Schedule and at the prices therein stipulated for such items.

Cast-Iron Pipe Sewers, etc.

Section 424. All cast-iron pipe sewers wherever built, and the parts, within the limits of the Railroad, or as indicated on the plans, of all other sewers crossing over or under the Railroad, will be paid for in accordance with the various classes of work or material applicable thereto in the Schedule and at the prices stipulated therein for such classes of work or material.

House and Drainage Connections.

Section 425. The cost of the maintenance, support or construction of all house or other drainage connections made necessary by construction under Sections 422 and 424 will be included in the prices for the several classes of work and material entering into such construction.

21—REQUIREMENTS FOR PIPES.

Generally.

Section 426. Whenever it is necessary to relay any water main, all new material required for the same shall be of the quality and laid in the manner specified below, and subject to the various clauses of these specifications applicable thereto.

Pipes to be Cylinders.

Section 427. The pipes shall be circular cylinders, with the inner and outer surfaces concentric, and of the full interior diameter required.

Hubs and Spigots.

Section 428. The hub or socket and the spigot end shall be shaped in exact conformity with the standards of the Department of Water Supply, to be furnished by the Commission, and will be tested by circular gauges.

Section 429. The seat or shoulder of the socket and the end of the spigot shall be straight and even, and at right angles to the axis of the pipe, so as to make a smooth, tight joint. Special care will be required in making the sockets and spigots

to conform to the drawings and all pipes will be rigorously inspected at these points. No pipe will be received whose eccentricity at either the spigot or socket ends, exceeds one-eighth (⅛) of an inch, or whose dimensions differ by more than one-eighth (⅛) of an inch from those required.

Section 430. The pipes shall be designated by dimensions of the interior diameter

Section 431. Bands, lugs, buttons, or ribs shall, if required, be cast on the pipes, of such forms and dimensions as the Engineer may direct.

Length of Pipe.

Section 432. The straight pipe shall be twelve (12) feet long, exclusive of hub; other pipe as may be directed.

Section 433. All straight pipes shall be straight in the direction of the axis of the cylinder.

Thickness and Weights.

Section 434. The thickness of the pipes, branches and special castings shall correspond with the standards of the Department of Water Supply. The weight for straight pipe shall be approximately as follows:

60-inch pipes,	12,835 pounds each.
48-inch pipes,	8,270 pounds each.
42-inch pipes,	6,860 pounds each.
36-inch pipes,	5,305 pounds each.
30-inch pipes,	3,940 pounds each.
24-inch pipes,	2,660 pounds each.
20-inch pipes,	2,005 pounds each.
16-inch pipes,	1,475 pounds each.
12-inch pipes,	1,015 pounds each.
8-inch pipes,	580 pounds each.
6-inch pipes,	415 pounds each.

High Pressure Fire System.

Section 435. For high-pressure fire system standard spigots and grooves—The weights for straight pipes, with lugs, shall be approximately as follows, in pounds per length:

	Of 3 ft.	Of 4 ft.	Of 6 ft.	Of 12 ft.
8-inch	355	420	550	935
12-inch	615	745	1,000	1,765
16-inch	1,005	1,215	1,635	2,905
20-inch	1,475	1,795	2,425	4,320
24-inch	2,105	2,585	3,535	6,385

All requirements as to weights, laying, tests, etc., shall be in strict accordance with the standard requirements of the Department of Water Supply, Gas and Electricity.

Section 436. The thickness of the metal of the pipes and special castings will be tested by calipers after the castings have been freed from sand and cleaned.

Variations in Thickness.

Section 437. No pipe will be received when the thickness of metal is less by more than one-twelfth (1-12) of an inch than the thickness required by the standards.

Underweight.

Section 438. No straight pipe or casting will be received which weighs less than the weights above mentioned by more than five (5) per cent., for pipes 16 inches or less in diameter, or more than four (4) per cent. for pipes more than 16 inches in diameter. No special casting will be received which weighs less than the standard weight by more than ten (10) per cent. for pipes 12 inches or less in diameter, and eight (8) per cent. for larger pipes.

Straight Pipe Cast Vertically.

Section 439. All straight pipes shall be cast vertically, and all pipes 12 inches or more in diameter shall be cast with the hub end down.

Section 440. All the castings shall be made in such molding sand or loam as will leave the surface clean and smooth.

Castings, How Marked.

Section 441. All the castings shall have the year in which they are cast, the running number of the castings of the same size and form, the letters D. W. S., and

the initials or name of the Contractor, and of the foundry where cast, cast on the outer side in raised letters of not less than two (2) inches in length and one-eighth (⅛) of an inch in relief, in such manner as the Engineer may designate; and in case any pipe shall be condemned, the letters D. W. S. shall be erased by the Contractor.

Quality of Cast Iron.

Section 442. The metal of which the castings are to be cast (which shall be remelted in a cupola or air-furnace) shall be pig-iron, made without any admixture of cinder-iron, or other inferior metal, and shall be of such character as to make a pipe strong, tough and of an even grain, entirely free from uncombined carbon when seen under the microscope, and such as will bear, satisfactorily, drilling and cutting, and shall have a tensile strength of at least sixteen thousand (16,000) pounds to the square inch.

Section 443. The castings shall be free from scoria, sand holes, air bubbles, and other defects and imperfections.

Castings to be Clean.

Section 444. The castings shall be perfectly cleaned and no lumps shall be left on the inner surface of the barrels or sockets, or on the outer surface of the spigot end. The castings shall be subject to hammer inspection. Iron-wire brushes shall be used, as well as softer brushes, to remove the loose dust. No acid or other liquid shall be used in cleaning the castings.

Pipes to be Coated.

Section 445. Every pipe, branch and special casting shall be carefully coated inside and out with coal pitch and oil. Every casting shall likewise be entirely free from rust when the coating is applied. If the casting cannot be dipped immediately after being cleaned, the surface shall be oiled with linseed oil, to preserve it until it is ready to be dipped. No casting shall be dipped after rust has set in.

Pitch.

Section 446. The coal-tar pitch shall be made from coal tar distilled until the naphtha is entirely removed and the material mixed with linseed oil so as to make a smooth, tough and tenacious coating. Pitch which becomes hard and brittle when cold will not answer for this use.

Section 447. Pitch of the proper quality having been obtained, it shall be carefully heated in a suitable vessel to a temperature of three hundred (300) degrees Fahrenheit, and shall be maintained at not less than this temperature during the time of dipping. The material will thicken and deteriorate after a number of pipes have been dipped; fresh pitch shall, therefore, be frequently added, and occasionally the vessel shall be entirely emptied of its old contents and refilled with fresh pitch.

Section 448. Every casting shall attain a temperature of three hundred (300) degrees Fahrenheit, before being removed from the vessel of hot pitch. It shall then be slowly removed and laid on skids to drip.

To be Inspected Before Dipping.

Section 449. No casting shall be dipped until the authorized inspector has examined it as to cleaning and rust, and subjected it thoroughly to the hammer test. It may then be dipped, after which it will be passed to the hydraulic press to meet the required water test. The proper coating shall be tough and tenacious when cold on the pipes, and not brittle or with any tendency to scale off.

Tests.

Section 450. The castings must be capable of sustaining a pressure, in the hydraulic press, of three hundred (300) pounds to a square inch, and any casting which shows any defect by leaking, sweating or otherwise, will be rejected. This test shall be made at the foundry, and at the expense of the Contractor.

Weighed and Marked.

Section 451. The castings shall be weighed, and the weight distinctly marked on the castings in white paint. The Contractor shall provide at the foundry where the pipes and castings are to be manufactured proper sealed scales and weights for weighing the castings, which shall be done at the expense of the Contractor, under the supervision of the Inspector.

Blocking and Wedges.

Section 452. Each pipe over eight (8) inches inside diameter, unless otherwise ordered, shall be placed on two (2) blocks and four (4) wedges of hemlock timber, the wedges to rest on the blocks and the pipe on the wedges.

Timber for Blocking.

Section 453. The blocks and wedges shall be of sound hemlock timber; 48 and 36-inch pipe shall be laid on blocks 4 feet long, 12 inches wide and 6 inches thick, with wedges 18 inches long, 6 inches wide, 4 inches thick on one end and ½ inch thick on the other; 30 and 24-inch pipe on blocks 3 feet long, 10 inches wide and 5 inches thick, with wedges 15 inches long, 5 inches wide and 3½ inches thick on one end and ½ inch thick on the other end; 12 and 20-inch pipe on blocks 2 feet long, 8 inches wide and 4 inches thick with wedges 12 inches long, 4 inches wide, 3 inches thick on one end and ½ inch thick on the other.

Joints.

Section 454. The spigot end of the pipe shall be inserted into the hub to within from one-fourth (¼) to one-eighth (⅛) of an inch of the full depth of the hub, and the space around the pipe shall be equalized so as to give as nearly as possible an equal space for the packing. The space between the pipe and the hub shall be packed with clean, sound jute packing yarn, free from tar, far enough to leave the proper space for lead. The remaining space shall then be filled by running it full of lead to a depth of four (4) inches, with a bead outside of the face of the hub large enough to allow for caulking, so that when the joint is properly caulked the lead will be flush with the hub of the pipe. After the joint shall have been run with lead, it shall be caulked by means of proper tools, so as to make a watertight joint

Lead.

Section 455. The lead to be used shall be of the best quality of pure, soft lead. and in every respect suitable for the purpose.

Notice of Interruption to be Given.

Section 456. In case it becomes necessary to cut any connection with any other main, house or hydrant, or in any way to interfere with the continuous and normal flow of water, due notice shall be sent at least forty-eight (48) hours in advance to the Engineer and to the Commissioner of Water Supply, and the Contractor shall, if so ordered, make a temporary by-pass or other arrangement to preserve the flow of water while breaking connections.

Connections Interfered With.

Section 457. All connections cut, interfered with or injured shall be restored under the directions of the Engineer, without delay and in accordance with the rules and regulations of the Department of Water Supply governing such matters, to a suitable condition as good as existed before commencing work.

Stopcocks, etc.

Section 458. Stopcocks, boxes, branches, curved pipe, and other specials according to the standards of the Department of Water Supply shall be set where necessary.

Section 459. For gas pipes, steam pipes, air pipes, mail tubes and any other pipes not herein enumerated, the standard weights and all other requirements shall be in accordance with the standard specifications and requirements of the several owners of such structures.

22—Street Surface and Park Surface Restored.

Pavement to be Restored.

Section 460. As soon as the structure in any excavation or trench made within a street shall be completed and the trench backfilled, a temporary pavement shall be laid and maintained in a condition satisfactory to the Engineer; and after the earth shall have become, in the opinion of the Engineer, sufficiently settled, the Contractor shall proceed to restore the surface to a condition similar to, and equally as good as, that existing previous to the commencement of construction; except that the Contractor will not be required to permanently restore the pavement of roadways between curb lines, but shall provide a temporary roadway pavement as follows:

Temporary Roadway Pavement.

Section 461. Upon the backfill, placed and compacted as provided under the clauses relating to backfilling, shall be placed a layer of sand, about an inch and

a half in thickness, on which shall be laid a pavement of granite blocks carefully laid and rammed to the required finished grade of the street surface. The end and side joints shall be thoroughly filled with sand, and shall not exceed ¾ of an inch in thickness. The granite blocks required for this temporary pavement, if found in or under the original pavement, shall be stored at a suitable place until required for use. In case granite blocks are not found in or under the original pavement, they may be obtained by the Contractor, free of cost, from the Bureau of Highways at the corporation yards.

The Contractor shall maintain the temporary roadway pavement thus laid for a period not exceeding six months from the time of its completion in any one block or street intersection. During this period the Contractor shall, without requiring previous notice, readjust or relay any portion of the pavement wherever and whenever a straight edge 3 feet long, laid in any direction, shows a depression of more than ¾ inch.

All the requirements as to street surface restored, including temporary roadway pavements, shall apply to the trenches for sewers, pipes or other subsurface structures along or off the line of the Railroad. Within the limits of private property to be taken by the City for the extension of Irving Place, these requirements will not apply.

Other Sidewalks May be Laid.

Section 462. Nothing contained in these specifications shall be understood or construed as prohibiting the Contractor from making any arrangement with any property owner to lay another style of sidewalk, or other surface covering within curb lines, in place of the sidewalk or other surface covering taken up; in which case the Contractor shall file with the Commission a copy of his contract with such property owner, duly acknowledged in writing by both parties.

In case any property owner desires to lay a sidewalk, or other surface covering within curb lines, affected by this contract, different from the one removed, and shall notify the Commission in writing that he has failed to make satisfactory arrangements for such work with the Contractor, then the Commission, in its discretion, may direct the Contractor to finish and dress off the filling over his work to such grade as the Engineer may select, and further direct him to remove from the area to be restored all material of whatever nature not required to be relaid, and to permit another contractor to lay such sidewalk or other surface covering; in which case the liability of the Contractor under this contract shall cease, as far as that part of his work is concerned, whenever the Engineer shall report to the Commission that the instructions of the Commission have been complied with, exactly the same as if the Contractor had fully completed the restoration as hereinbefore provided.

Payment for Street Surface Restored.

Section 463. Payment for street surface restored will be made as provided in Schedule Item 30-A or B, which prices shall include the cost of restoring all curbs, manhole heads and covers, gratings, vault lights, etc., that formed a part of the original street surface.

Measurements.

Section 464. The measurement for payment for street surface restored will be to the net line of ordered excavation.

Outside of Net Lines.

Section 465. All other pavement outside of the net lines of ordered excavation, either along or off the line of the Railroad, that may have become damaged, directly or indirectly, as the result of the Contractor's operations, shall be restored by the Contractor at his own cost and expense to a condition similar to and equally good as that existing previous to the commencement of construction.

Parks and Parkways.

Section 466. All parks and parkways including trees, shrubbery, etc., as elsewhere provided in this contract and the specifications, are to be restored to the satisfaction of the Department of Parks.

Measurement.

Section 467. Measurements for park surface restored are to be to the net lines of ordered excavation.

Payment For.

Section 468. Payment for park surface restored will be made at the price provided in Schedule Item 31.

Outside of Net Lines.

Section 469. Any damage done outside of the net lines of ordered excavation in connection with the construction of the work to park surfaces or growths, under the jurisdiction of the Department of Parks, shall be restored to the satisfaction of the said Department, and at the Contractor's own cost and expense.

23—VAULT LIGHTS, GRATINGS AND HAND-RAILS.

Vault Lights.

Section 470. The roofs of the stations, where under sidewalks, parks or parkways, shall, to as great an extent as possible, consist of vault light construction. These lights shall be made with lenses, not exceeding three (3) inches in diameter, of strong glass set in cement; they shall be provided with non-slipping treads, buttons or other devices all of design approved by the Engineer; and shall be of sufficient strength to carry, when supported in a manner similar to that in which they are to be permanently set, an equally distributed load of at least five hundred (500) pounds per square foot without signs of failure, deformation or permanent set, when such test load is removed. The right is reserved to test at least one (1) frame or panel in every ten (10), as selected by the Engineer. Should the one selected fail, another will be selected by the Engineer; and if that fail, then the whole lot may be rejected. The vault lights must be set in place with cement, lead or other means to be absolutely waterproof. Any tests required shall be at the Contractor's expense.

Measurement and Payment.

Section 471. The area for payment for vault lights shall be to lines not exceeding one (1) foot outside of the inner faces of the supporting walls, and the price paid will be as provided in Schedule Item 29, which price shall include all material and work incidental to the completed vault lights in place.

Steel Gratings.

Section 472. Steel gratings shall be provided and placed over fan and other ventilating chambers, over stations and station approaches, at places shown on the plans, or at other places if required by the Engineer. They will be constructed as shown on the detailed plans for gratings.

Measurement and Payment.

Section 473. Gratings will be measured to the lines as constructed and payment therefor will be made as herein provided in Schedule Item 28, which price shall include the grating in place in the work, all frames and framing, and all incidental work.

Galvanized Iron Pipe Hand-Rails.

Section 474. Galvanized iron pipe hand-rails will be placed in the Railroad over the benches containing the ducts. They shall be securely fastened to the wall of the tunnel by means of expansion bolts, and as shown on the contract drawings. Measurements for payment will be per lineal foot of hand-rail in place in the work, complete, and at the price as stipulated in Schedule Item 27.

IV.—SECURITY TO BE FURNISHED BY CONTRACTOR.

Security by Contractor. Contractor's Bond.

Article 27. Simultaneously with the execution of this contract the Contractor shall give security for the performance of his obligation by filing with the Comptroller a bond in the form annexed hereto, entitled, "Form of Bond," executed by the Contractor and by two or more sureties to be corporations or persons approved by the Commission in the sum specified in the Invitation to Contractors for the Section embraced in this contract. In case any of the sureties upon the bond shall become insolvent or unable in the opinion of the Commission to pay promptly the amount of such bond to the extent to which such surety might be liable, then the Contractor within ten days after notice by the Commission to the Contractor shall, by supplemental bond or otherwise, substitute another and sufficient surety to be approved by the Commission in place of the surety so insolvent or unable. If the Contractor shall fail, within such ten days or such further time as the Commission may grant, to substitute another and sufficient surety, then the contractor shall, for all the purposes of this contract be deemed to be in default in the performance of his obligations hereunder and upon the said bond, and the Commission may terminate the contract or may bring any proper suit or proceeding against the Contractor and the sureties, or either of them, or may require to be deducted from any moneys then in, or thereafter coming into, the hands of the City and due to the Contractor

the amount for which the surety insolvent or unable as aforesaid shall have justified on the bond; and the moneys so deducted shall be held by the Comptroller as collateral security for the performance of the condition of the bond.

V.—PAYMENTS TO CONTRACTOR.

Partial Payments.

Article 28. In order to assist the Contractor to prosecute the work advantageously, the Engineer shall, from time to time, as the work progresses, but not oftener than once a month, make in writing an estimate, such as in his opinion shall be just and fair, of the amount and value of the work done and materials incorporated in the work by the Contractor according to the terms of this contract (but it is understood that in making such estimates the Engineer shall not necessarily be governed by the unit prices contained in the Contractor's proposal), provided, however, that estimates may at any time be withheld or reduced, if, in the opinion of the Engineer, the work is not proceeding in accordance with the contract. The first such estimate shall be of the amount and value of the work done and materials incorporated in the work since the Contractor commenced the performance of this contract on his part. Every subsequent estimate except the final estimate shall be of the amount and value of the work done and materials incorporated in the work since the last preceding estimate was made, provided, however, that no such estimate shall be required to be made when, in the judgment of the Engineer, the total value of the work done and materials incorporated in the work since the last preceding estimate amounts to less than ten thousand dollars ($10,000). The Engineer shall further include accepted structural iron and steel delivered on the site of the work, but not incorporated in the work, at the rate of forty dollars ($40) per ton of two thousand pounds. But the quantity of such structural iron and steel included in any partial estimate shall not exceed the quantity of such material, as determined by the Engineer, required for the ensuing six months, and any material included in a partial estimate which may subsequently become unsatisfactory, shall be deducted from succeeding partial estimates. No materials not incorporated in the work, excepting such structural iron and steel, and none of the Contractor's plant shall be included in partial estimates.

Not by Strict Measurement.

Article 29. Such estimates shall not be required to be made by strict measurement, but they may be made by measurement or by estimation, or partly by one method and partly by the other, and it shall be sufficient if they are approximate only.

Vouchers.

Article 30. Upon each such estimate being made and certified in writing to the Commission, the Commission shall forthwith prepare and certify a voucher for ninety per cent. of the amount stated in such estimate or certificate to be the value of the work done and materials furnished, and the City shall within thirty (30) days after the date of the certification of such voucher by the Commission pay the same; provided, however, that the City may at all times reserve and retain from said partial payments, or any of them, in addition to the ten per cent. above mentioned to be retained and reserved, any sum or all sums which by the terms hereof, or of any law of the State of New York passed prior to the date hereof, it is or may be authorized to reserve or retain.

Final Estimate.

Article 31. Whenever, in the opinion of the Engineer, the Contractor shall have completely performed this contract on his part, the Engineer shall so certify, in writing, to the Commission, and in his certificate shall state, from actual measurements, the whole amount of work done by the Contractor, and also the value of such work under and according to the terms of this contract. On the expiration of ninety (90) days after the acceptance by the Commission of the work herein agreed to be done by the Contractor, and the filing of a certificate of the completion and acceptance of the work in the office of the Comptroller, signed by the Engineer and the Commission, the City shall pay to the Contractor the amount remaining after deducting from the amount or value stated in the last-mentioned certificate, all such sums as shall theretofore have been paid to the Contractor under any of the provisions of this contract, and also any sum or all such sums of money as by the terms hereof the City is or may be authorized to reserve or retain; provided, that nothing herein contained shall be construed to affect the right, hereby reserved, of the Commission to reject the whole or any portion of the aforesaid work, should the said certificate be found, or known to be, inconsistent with the terms of this contract, or otherwise improperly given. All prior certificates upon which partial payments may have been

made, being merely estimates, shall be subject to correction in the final certificate, which final certificate may be made without notice thereof to the Contractor, or of the measurements upon which it is based.

Interest in Case of Delayed Payments.

Article 32. If the payment of the amount due the Contractor on any voucher shall be delayed beyond the time stipulated in Article 30, in the case of partial payment, or Article 31, in the case of final payment, the City shall pay the Contractor interest on such amount at the rate of four and one-half (4½) per cent. per annum for the period of such delay; it being understood that such payments of interest, if any, are to be in lieu of any claim of the Contractor for alleged damages for breach of contract or otherwise in case of delayed payments. The term for which interest shall be paid shall be reckoned, in the case of a partial payment from the thirtieth day after the certification of such voucher by the Commission, and in the case of a final payment from the ninetieth day after the acceptance of the work by the Commission, to the date of payment of the voucher. The date of payment of a voucher shall be considered the day on which the voucher is ready for payment as evidenced by the records of the Department of Finance. If interest shall become due on any partial payment the amount thereof, as determined by the Commission, shall be added to a succeeding payment. If interest shall become due on a final payment it shall be paid on a supplementary voucher prepared by the Commission and forwarded to the Comptroller for payment in the usual manner.

No Estoppel.

Article 33. The City shall not, nor shall any Department or officer thereof, be precluded or estopped by any return or certificate made or given by the Commission, any Engineer, or other officer, agent or appointee thereof under any provision of this contract, from at any time either before or after the final completion and acceptance of the work and payment therefor pursuant to any such return or certificate, showing the true and correct amount, quality and character of the work done and materials furnished by the Contractor or any other person under this agreement, or from showing at any time that any such return or certificate is untrue and incorrect or improperly made in any particular, or that the work and materials, or any part thereof, do not in fact conform to the specifications; and the City shall not be precluded or estopped, notwithstanding any such return or certificate and payment in accordance therewith, from demanding and recovering from the Contractor such damages as it may sustain by reason of his failure to comply with this contract or the specifications.

No Waiver.

Article 34. Neither the acceptance of the Commission or its Engineer, or any of its employees, nor any order, measurement or certificate by the Engineer, nor any order by the Commission for payment of money, nor any payment for, nor acceptance of the whole or any part of the work by the Engineer or the Commission, nor any extension of time, nor any possession taken by the Commission, or its employees, shall operate as a waiver of any portion of this contract or of any power herein reserved to the Commission, or any right to damages herein provided; nor shall any waiver of any breach of this contract be held to be a waiver of any other or subsequent breach.

Final Payment to Terminate Liability of City.

Article 35. The acceptance by the Contractor of the last payment aforesaid shall be and shall operate as a release to the City, from all claim and liability to the Contractor for anything done or furnished for, or relating to, the work, or for any act or neglect of the Commission, the City or of any person relating to or affecting the work, except only the claim against the City for the remainder, if any there be, of the amounts kept or retained as provided in this contract.

Contractor's Claims for Damage. Statements of Damage to be Filed With Engineer.

Article 36. If the Contractor shall claim compensation for any damage sustained by reason of the acts of the Commission, or its agents, he shall, within ten days after the sustaining of such damage, make a written statement of the nature of the damage sustained to the Engineer. On or before the fifteenth day of the month succeeding that in which any such damage shall have been sustained, the Contractor shall file with the Engineer an itemized statement of the details and amount of such damage, and, unless such statement shall be made as thus required, his claim for compensation may be forfeited and invalidated, and he shall not be entitled to payment on account of any such damage.

Lien Law.

Article 37. If at any time before or within thirty days after the whole work agreed herein to be performed and all the labor and material herein agreed to be delivered have been performed or delivered or completed and accepted by the City any person or persons claiming to have performed any labor or furnished any material toward the performance or completion of this contract shall file with the Commission and with the Comptroller of the City any such notice as is described in the Lien Law, the City shall retain until the discharge thereof from moneys under its control so much of such moneys as shall be sufficient to satisfy and discharge the amount in such notice claimed to be due, together with the costs of any action or actions brought to enforce such lien created by the filing of such notice.

VI.—Contractor's Liability for Injuries to Persons or Property.

Contractor Approves Plans as Involving No Damage.

Article 38. The Contractor expressly admits and covenants to and with the City that the plans and specifications and other provisions of this contract, if the work be done without fault or negligence on the part of the Contractor, do not involve any danger to the foundations, walls or other parts of adjacent buildings or structures or to navigation; and the Contractor will at his own expense make good any damage that shall, in the course of construction, be done to any such foundations, walls or other parts of adjacent buildings or structures or to navigation. The liability of the Contractor under this covenant is absolute and is not dependent upon any question of negligence on his part, or on the part of his agents, servants or employees and the neglect of the Engineer to direct the Contractor to take any particular precautions or to refrain from doing any particular thing, shall not excuse the Contractor in case of any such damage. Where the work is required to be done by tunneling the same admission and covenant shall also apply to the foundations, walls and other parts of buildings and to any railroad track or structure, subway, street, conduit, pipe, sewer or other structure or surface over the tunnel. But this admission and covenant shall not apply to the foundations, walls or other parts of buildings or any part thereof acquired by the City and which the Engineer may determine should be razed.

Traffic to be Maintained.

Article 39. The Contractor shall, during the performance of the work, safely maintain the traffic on streets, avenues, highways, parks, waters or other public places as provided in the specifications, and shall take all necessary precautions to place proper guards for the prevention of accidents and put up and keep at night suitable and sufficient lights.

Indemnification for Accidents, etc.

Article 40. The Contractor shall be solely responsible for all physical injuries to persons or property occurring on account of and during the performance of the work hereunder, and shall indemnify and save harmless the City from liability upon any and all claims for damages on account of such injuries to persons or property, and from all costs and expenses in suits which may be brought against the City for such injuries to person or property; it being distinctly understood, stipulated and agreed that the Contractor shall be solely responsible and liable for and shall fully protect and indemnify the City against all claims for damages to persons or property occasioned by or resulting from blasting or other methods or processes in the work of construction whether such damages be attributable to negligence of the Contractor or his employees or otherwise.

Money Due the Contractor or May be Retained to Meet Claims.

Article 41. In case any claim shall be made by any person or corporation against the Contractor or the City for loss or damage to person or property as aforesaid, the amount of such claim or so much thereof as the Commission shall deem reasonable, shall, upon the requirement and in the discretion of the Commission, be retained by the Comptroller out of any moneys thereafter growing due to the Contractor hereunder (in addition to the other sums hereinbefore authorized to be so retained), as security for the payment of such claim or claims. If and when the liability of the City or the Contractor on such claim or claims shall have been established by a judgment of a court of competent jurisdiction, or shall have been admitted by the Contractor to be valid, the said claim or claims shall be paid from the amount so retained and the balance, if any, paid to the Contractor. Should there be any unsatisfied claims for injuries to persons or property at the time when the final estimate for the work is made and returned, the Engineer shall have the right to retain out of said final estimate a sum in his judgment sufficient to protect the City in regard

to all unsatisfied claims as aforesaid and in case the amount thus retained should be insufficient to pay the amount adjudicated to be due upon such claim the City may sue for and recover from the Contractor the amount or balance as a debt from the Contractor to the City. The Engineer may further, if in his judgment such a course is necessary, at the time of making the final estimate, and as a condition to making the same, require the Contractor to continue his bond or any part thereof, for a time not exceeding the time when such claims would be barred under the existing Statute of Limitations, as security against any claims then unsatisfied or not presented.

Examinations of Abutting Property.

Article 42. In order to safeguard the owners or tenants of abutting property and at the same time prevent unjust or fraudulent claims against the Contractor or the City in respect thereto, the Engineer shall cause a detailed examination of all adjacent or abutting property to be made before construction is begun. The owner, or tenant of each parcel or his or their duly authorized representative, shall be invited by a notice in writing delivered to a person apparently in charge of the premises, to be present, and the Contractor, or his duly authorized representative, shall attend and with the Engineer shall make such detailed examination. A complete record of the existing conditions of each parcel shall be made in triplicate, signed by the Engineer and the Contractor, and, one copy shall be delivered to the owner, one to the Contractor and one shall be retained by the Commission. At such times as the Engineer may direct, and upon the completion of the work, or upon notice to the Engineer by the owner or tenant that physical injury has occurred, further examination shall be made and the findings recorded and filed as above.

Damage to Works During Construction.

Article 43. All risk of loss or damage to the works, or to any part thereof, or to any of the materials, tools, implements or other things used in doing the work, prior to final completion, is assumed and shall be borne by the Contractor, and any such loss or damage shall be made good by the Contractor at his own cost, and the construction shall be carried forward by him in accordance with this contract, without additional cost to the City by reason of such loss or damage.

VII.—CITY TO SECURE CONTRACTOR AGAINST INTERFERENCE BY INJUNCTIONS, TO ACQUIRE REAL ESTATE, ETC.

City's Assurances to Contractor of Right to Construct.

Article 44. The City hereby stipulates and covenants to and with the Contractor that the City will secure and assure to the Contractor so long as the Contractor shall perform the stipulations of this contract, the right to construct the railroad as prescribed in this contract free of all right, claim or other interference, whether by injunction, suit for damages or otherwise, on the part of any owners, abutting owner, or other person; but not including any interference, legal or otherwise, by patentees or persons claiming to be patentees of tools, methods or appliances.

Claims for Infringement of Patents.

Article 45. The Contractor shall hold himself responsible for any claims made against the City for any infringement of patents by the use of patented articles in the performance and completion of the work, or of any process connected with the work agreed to be performed under this contract, or of any materials used upon the said work; and shall save harmless and indemnify the City for all costs, expenses and damages which the City shall be obliged to pay by reason of any infringement of patents used in the performance and completion of the work.

Acquisition of Real Estate.

Article 46. The City will acquire all such real estate and rights of way or other rights, terms, franchises, easements and privileges therein which, in the opinion of the Commission, it shall be necessary to acquire or extinguish for the purpose of constructing the works free of interference or right of interference; provided, however, that this covenant shall not apply to or include any damages for physical injuries to property referred to in chapter 6 hereof, whether or not compensation for such damages be awarded in a condemnation proceeding. If compensation for any such damages shall be included in an award in condemnation proceedings the Contractor shall, upon demand, promptly reimburse the City for any payments made by it for such purposes.

VIII.—TIME FOR COMPLETION, DAMAGES FOR DELAY, ETC.

Commencement and Completion of Work.

Article 47. Time is of the essence of this contract. The Contractor shall begin actual work within sixty (60) days after the execution of this contract. The entire work covered by this contract shall be completed in all respects within forty-two (42) months from the date of the delivery of this contract.

Price to be Reduced for Delay.

Article 48. In the event of delay in completion of the works beyond the period herein prescribed, or beyond the period to which such time may be extended by resolution of the Commission for good cause shown, the City shall—whether the working force be increased as provided in the specifications or not—be paid damages for such delay. Inasmuch as the amount of such damages will be extremely difficult to ascertain, especially in view of the fact that the railroad herein contracted for is only a part of a complete system, the remainder of which is to be constructed under other contracts, it is hereby expressly agreed that damages shall be liquidated and paid by reducing the price to be paid the Contractor as follows: From the amounts which shall become payable to the Contractor after the expiration of the periods above limited (but not including the retained percentages from amounts theretofore certified to be due) there shall be deducted and retained by the City the following percentages: From the amount due for the first month after the expiration of such periods one (1) per centum thereof; from the amount due for the second month after the expiration of such periods two (2) per centum thereof; from the amount due for the third month after the expiration of such periods three (3) per centum thereof; from the amount due for the fourth month after the expiration of such periods four (4) per centum thereof; similarly from any amounts which may subsequently become due there shall be deducted a percentage, the rate of which shall equal the number of months which may have elapsed between the expiration of the periods above limited and the time when such payments shall become due. These amounts shall be deducted and retained by the City and are hereby agreed upon and determined as the measure of liquidated damages (and not as a penalty) to the City. But in case the Contractor shall be delayed by reason of any labor strike not caused or instituted or provoked by the Contractor, or by any subcontractor, agent or representative of the Contractor (which fact the Contractor shall prove to the satisfaction of the Commission), or in case the Contractor shall be delayed by any injunction or by any interference of public authority, and in case the Contractor cannot, notwithstanding such injunction or interference, with reasonable diligence make up for the delay so occasioned by speedier work when the Contractor shall not be so interfered with, then the said date for completion shall be extended by resolution of the Commission to a date later than the expiration of the said period by the amount of the time of such delay.

Commission May Intervene in Case of Injunction.

Article 49. But no injunction, strike or interference of public authority shall be ground for such extension, except if and from the time when the Contractor shall give the Commission notice of the injunction or other cause of delay, with copies of the injunction or other orders and of the papers upon which the same shall have been granted. The Commission and the City or either shall be accorded the right to intervene or become a party to any suit or proceeding in which any such injunction shall be obtained, and to move to dissolve the same or otherwise, as the Commission or City may deem proper. If necessary the Corporation Counsel or the Counsel of the Commission or both shall be authorized by the Contractor to appear, for that purpose, as counsel or attorneys for him.

Article 50. The time stipulated within which to complete the works is based upon the quantities of the various items entering into the work as stated in the form of proposal, which are given solely for the purpose of classifying bids. In case these quantities are exceeded or diminished then an extension or diminution of the term of this contract shall be made. It is, however, understood and agreed that in case an increase in any one item is balanced or offset by diminution of other items, no change in the term shall be made, and in any event the Engineer shall determine the amount of extension or diminution of time in respect of the relative increase or reduction in the quantities involved in the final completion.

Suspension of Work and Additional Time for Performance.

Article 51. The Commission reserves the right of temporarily suspending the execution of the whole or any part of the work herein contracted to be done, if it shall deem it for the interest of the City so to do, without compensation to the Contractor

for such suspension, other than extending the time for completing the work as much as it may have been delayed by such suspension.

Time for Completion to be Extended in Case of Delay in Acquiring Real Estate.

Article 52. In case the Contractor shall at any time give notice to the Commission that any real estate is necessary under this contract for any of the purposes specified above, which notice shall give a brief description of such real estate, the Commission shall (if it finds that such exists) begin and conduct with diligence, proceedings to acquire the real estate described; and in case the Commission shall fail to put the Contractor in possession of such real estate within three (3) months from the date of the delivery of such notice the Commission shall allow the Contractor so much additional time wherein to perform and complete this contract on his part as the Engineer shall certify in writing to be just, but no allowance by way of damages shall be made for such delay.

Extensions Not Cumulative.

Article 53. It is expressly understood, however, that the periods of extension referred to herein shall not be cumulative, but only the single period of delay giving the greatest extension shall be taken into consideration.

Permission to Complete Contract Not a Waiver.

Article 54. The permitting of the Contractor to go on and finish the work, or any part of it, after the time fixed for its completion, or after the date to which the time for completion may have been extended, or the making of partial payments to the Contractor after any such periods, shall in no wise operate as a waiver on the part of the City of any of its rights under this contract.

IX.—Remedies in Case of Contractor's Default.

Article 55. If the work to be done under this contract shall be abandoned by the Contractor, or if this contract shall be assigned, or the work sublet by him, otherwise than as herein specified, or if at any time the Engineer shall be of the opinion, and shall so certify in writing to the Commission that the performance of the contract is unnecessarily or unreasonably delayed, or that the Contractor is wilfully violating any of the provisions or covenants of this contract, or of the specifications, or is executing the same in bad faith or not in accordance with the terms thereof, or if the work be not fully completed within the time named in this contract for its completion, or within the time to which the completion of the contract may be extended by the Commission, the Commission may

(1) Notify the Contractor, by a written notice, to discontinue all work, or any part thereof, under this contract, and thereupon the Contractor shall discontinue the work, or such part thereof, and the Commission shall thereupon have the right to contract for the completion of the works in the manner prescribed by law, or to place such and so many persons as it may deem advisable, by contract or otherwise, to work, and complete the work herein described, or such part thereof, to take possession of and use any or all of the materials, plant, tools, equipment, supplies and property of every kind provided by the Contractor for the purpose of his work, and to procure other materials for the completion of the same, and to charge the expense of said labor and materials to the Contractor. The expense so charged shall be deducted and paid by the City out of such moneys as may be due or may at any time thereafter grow due to the Contractor under and by virtue of this contract, or any part thereof. And in case such expense shall exceed the amount which would have been payable under the contract if the same had been completed by the Contractor, he shall pay the amount of such excess to the City; and in case such expense shall be less than the amount which would have been payable under this contract if the same had been completed by the Contractor, he shall forfeit all claim to the difference; and when any particular part of the work is being carried on by the Commission, by contract or otherwise, under the provisions of this article of the contract, the Contractor shall continue the remainder of the work in conformity with the terms of this contract, and in such manner as in nowise to hinder or interfere with the persons or workmen employed, as above provided, by the Commission, by contract or otherwise, to do any part of the work, or to complete the same under the provisions of this article of the contract. And

Or Proceed Upon Bond.

(2) The City may also proceed as to the Commission shall seem proper upon the bond. And

Or May Bring Suit.

(3) The City may also bring any suit or proceeding for specific performance or for injunction or to recover damages or to obtain any relief or for any purpose proper under this contract.

X.—MISCELLANEOUS PROVISIONS.

Changes in the Contract.

Article 56. No correction or change in this contract shall be made except by written instrument duly authorized by the Commission and consented to by the Contractor and by the sureties upon his bond; but this provision shall not limit or affect the right to prescribe variations whether of construction or location of route as in this contract elsewhere provided.

Members of Commission Not Liable.

Article 57. No claim shall be made by the Contractor against any member of the Commission personally by reason of this contract or of any of its articles or provisions.

Contractor Not to Assign, Sublet, Etc.

Article 58. The Contractor shall not assign, transfer, convey, sublet or otherwise dispose of this contract or his right, title or interest in or to the same or any part thereof without the previous consent in writing of the Commission, and he shall not assign by power of attorney or otherwise any of the moneys to become due and payable under this contract unless by and with the like consent. If the Contractor shall without such previous written consent assign, transfer, convey, sublet or otherwise dispose of this contract or of his right, title or interest therein or any of the moneys to become due under this contract, to any other person, company or corporation, this contract may at the option of the Commission be revoked and annulled and the City shall thereupon be relieved and discharged from any and all liability and obligations growing out of the same to the Contractor and to his assignee or transferee; and no right under this contract or to any money to become due hereunder shall be asserted against the City in law or in equity by reason of any so-called assignment of this contract or any part thereof or of any moneys to grow due hereunder unless authorized as aforesaid by the written consent of the Commission; provided that nothing herein contained shall be construed to hinder, prevent or affect an assignment by the Contractor for the benefit of his creditors made pursuant to the statutes of the State of New York.

Provisions in Case Commission Ceases.

Article 59. In case the Commission shall cease to exist the Legislature may provide what public officer or officers shall exercise the powers and duties of the Commission under and by virtue of this contract; and in default of such provision, such powers and duties shall be deemed to be vested in the Mayor of the City. In case any officer or officers other than the Commission shall hereafter have the powers of the Commission or any of them, then the provisions of this contract shall be applicable to such officer or officers to the extent to which the powers of the Commission shall appertain to such officer or officers, and any official act or determination of such officer or officers or of this Commission shall be sufficient hereunder, anything herein to the contrary notwithstanding, if the same be done or had by lawful vote or resolution or in such manner as the Legislature may from time to time prescribe.

Labor Law.

Article 60. The Contractor agrees to comply with the provisions of the Labor Law, including section 3 thereof as re-enacted by chapter 36 of the Laws of 1909. The Contractor further agrees and stipulates that no laborer, workman or mechanic in the employ of the Contractor, subcontractor or other person doing or contracting to do the whole or a part of the work contemplated by this contract, shall be permitted or required to work more than eight hours in any one calendar day, except in cases of extraordinary emergency, caused by fire, flood or danger to life or property; and further, that the wages to be paid for a legal day's work as hereinbefore defined to all classes of such laborers, workmen or mechanics upon the work contemplated by this contract or upon any material to be used upon or in connection therewith, shall not be less than the prevailing rate for a day's work in the same trade or occupation in the Borough of the City, where the work hereby contemplated, about or in connection with which such labor is performed, is in its final or completed form to be situated, erected or used; and that each such laborer, workman or mechanic employed by the Contractor or by any subcontractor or other person on, about or upon the work contemplated by this contract, shall receive such wages herein provided for. This contract shall be void

and of no effect, unless the Contractor shall comply with the provisions of this section. In obedience to the requirements of section 14 of the Labor Law, it is further provided that if the provisions of the said section 14 are not complied with, this contract shall be void.

All Necessary Legal Provisions Deemed Inserted Herein.

Article 61. It is the intent and understanding of the parties to this agreement that each and every provision of law required to be inserted in this contract should be and is inserted herein. Furthermore, it is hereby stipulated that every such provision is to be deemed to be inserted herein; and if, through mistake or otherwise, any such provision is not inserted or is not inserted in correct form, then the contract shall forthwith, upon the application of either party, be amended by such insertion so as to comply strictly with the law, and without prejudice to the rights of either party hereunder.

Provision in Case of Unlawful Provision.

Article 62. If this contract contains any unlawful provision not an essential part of the general structure of the contract and which shall not appear to have been a controlling or very material inducement to the making thereof the same shall be deemed of no effect and shall, upon the application of either party, be struck from the contract without affecting the binding force of the contract as it shall remain after omitting such provision.

In witness whereof, this contract has been executed for The City of New York by the Public Service Commission for the First District under and by resolution duly adopted by the Commission and the seal of the Commission has been hereto affixed and attested by its Secretary and these presents have been signed by its Chairman; and the Contractor has caused its corporate seal to be hereto affixed and these presents to be executed by its proper officers the day and year first above written.

PUBLIC SERVICE COMMISSION FOR THE FIRST DISTRICT.

By...................., Chairman.

Attest:

...................., Secretary.

State of New York, County of New York, ss.:

On the .... day of ...., 1910, before me personally appeared William R. Willcox and Travis H. Whitney, to me known and known to me to be the said William R. Willcox, the Chairman, and the said Travis H. Whitney, the Secretary of the Public Service Commission for the First District; and the said William R. Willcox and Travis H. Whitney being by me duly sworn, did depose and say, each for himself and not the one for the other, the said William R. Willcox, that he resides in the Borough of Manhattan, in the City, County and State of New York, that he is the Chairman of the said Commission and that he subscribed his name to the foregoing contract by virtue of the authority thereof; and the said Travis H. Whitney, that he resides in the Borough of Brooklyn, in the County of Kings, City and State of New York, that he is the Secretary of the said Commission and that he subscribed his name thereto by like authority; and both the said William R. Willcox and Travis H. Whitney that they know the seal of the said Commission and that the same was affixed to the foregoing instrument by the authority of the said Commission and of a resolution duly adopted by the same.

State of New York, County of New York, ss.:

On this .... day of ...., 1910, before me personally came .... to me known and known to me to be the individual.. described in and who executed the foregoing instrument, and ..he.. duly acknowledged to me that ..he.. executed the same.

State of New York, County of New York, ss.:

On this .... day of ...., 1910, before me personally appeared ...., to me known, who, being by me first duly sworn, did depose and say: That he resided in ...., in the State of........; that he is .... of ...., the corporation described in and which executed the foregoing instrument; that he knew the corporate seal of said company; that one of the seals affixed to said contract was such corporate seal, and that it was affixed thereto by order of the Board of Directors of said Company, and that he signed his name thereto by like authority.

FORM OF CONTRACTOR'S BOND.

Route 5, Section No. 10.

Know All Men by These Presents, That .... of ...., hereinafter called the Contractor, and .... and ...., hereinafter called the Sureties, are

held and firmly bound unto The City of New York, hereinafter called the City, in the sum of .... dollars ($........), lawful money of the United States of America, to be paid to the City, for which payment well and truly to be made the Contractor and the Sureties do hereby bind themselves and their, and each of their, executors, administrators, successors and assigns firmly by these presents, as follows: The Contractor to be so held and bound for the full amount of the said sum of .... dollars ($........), and each of the said Sureties to be so held and bound only for a portion of said sum as follows:

The said ....
for the sum of...... ....dollars ($........); the said ....
for the sum of..........................dollars ($........); the said ....
for the sum of..........................dollars ($........); the said ....
for the sum of..........................dollars ($........).

In Witness Whereof, The Contractor and the Sureties have hereunto set their hands and seals and such of them as are corporations have caused their respective seals to be hereto affixed and these presents to be attested by the proper officers, this .... day of ...., 1910.

Whereas, The City by the Public Service Commission for the First District (hereinafter called the Commission) is about to enter into a contract with the Contractor bearing even date herewith for the construction of that portion of a Rapid Transit Railroad known as Section 10 of Route 5, in............, and extending from .... street to .... street, in the Borough of ...., in The City of New York, more particularly described in the said contract; and

Whereas, The City is about to enter into such contract with the Contractor upon the condition, and not otherwise, that this bond shall be given to the City, and upon the faith thereof, now therefore.

The condition of the foregoing obligation is such that if the Contractor shall fully perform the said contract, then this obligation shall be null and void, but else it shall remain in full force and virtue.

It is expressly agreed, between the City and the Sureties (and it is upon such agreement that the City accepts this bond) that the Sureties will and do waive any and every notice of default on the part of the Contractor; that they will and do permit the City to extend the time of the Contractor to make any payment or do any act; that no omission on the part of the City to give any notice of extension of time granted by or on behalf of the City shall be availed of by the Sureties or any of them as a defense upon this Bond; that the Sureties shall not set up or have any defense upon this bond by reason of any alteration of the said contract unless such alteration shall be represented by a formal written instrument duly executed between the City and the Contractor which shall have been duly authorized by a vote of the Commission; and that in case of such alteration, however made, the same shall be a defense to the Sureties only to the extent of the actual injury or damage caused to the Sureties by said alteration.*

ROUTE 5, SECTION 1, BATTERY PARK TO DEY STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 1.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of invitation to contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned†...

.... do.. hereby, in pursuance of the invitation to contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form

annexed hereto with The City of New York for the construction of section 1 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

---

*The execution of the bond must be duly proved before delivery in the form essential to proof to entitle a deed to record in the State of New York. Full affidavits of justification of sureties must be added.

†The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard........................	....	160,000	....

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York, pursuant to the terms of the said contract, a bond in the sum of five hundred thousand dollars ($500,000) in the form hereto annexed with the following named sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room .... on the ...... floor of the building .... in the Borough of ...., in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of fifteen thousand dollars ($15,000). If the Commission shall notify the undersigned that this contractor's proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the invitation to contractors and this contractor's proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said invitation to contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this proposal shall not be ac-

cepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this proposal.

(6) There are no persons interested with the undersigned in this proposal, except*

(7) This proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District, is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated the ...., 1910.

Affidavit of Verification.

State of New York, City and County of New York, ss.:

...., being duly sworn, says: I am† the proposing contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this .... day of ...., 1910.

ROUTE 5, SECTION 2, DEY STREET TO WALKER STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 2.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of invitation to contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned‡.. do.. hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 2 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of ...."; if a corporation, say, "the (President or other officer duly authorized) of the........ .... Company."

‡The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York, pursuant to the terms of the said contract, a bond in the sum of six hundred thousand dollars ($600,000), in the form hereto annexed with the following named sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room ...., on the ... floor of the building ...., in the Borough

of ...., in the City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of fifteen thousand dollars ($15,000). If the Commission shall notify the undersigned that this Contractor's proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this proposal.

(6) There are no persons interested with the undersigned in this proposal except*

(7) This proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the Contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Sworn to before me this .... day of ...., 1910.

ROUTE 5, SECTION 2-A, WALKER STREET TO HOWARD STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 2-A.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of invitation to Contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned‡..

.... do.. hereby, in pursuance of the Invitation to Contractors, a copy of which is attached

hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 2-A of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of ...."; if a corporation, say "the (President or other officer duly authorized) of the .... Company."

‡The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard....................	....	28,070	....
2.	For earth excavation, below mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard....................	....	59,370	....

If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard	....	172,000	....
2.	For earth excavation, below mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard	....	40,500	....
2-a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard	....	10,400	....
4.	For underpinning buildings, including all incidental work and material, per lineal front foot of building underpinned as follows:			
	(a) For buildings less than seven stories in height, per front foot	....	3,700	....
	(b) For buildings from seven to twelve stories in height, per front foot	....	1,700	....
	(c) For buildings over twelve stories in height, per front foot	....	....	....
6.	For concrete masonry, in place, per cubic yard	....	42,300	....
7.	For protective concrete masonry in place outside of waterproofing, per cubic yard.	....	2,200	....
8.	For rubble stone masonry in place, per cubic yard	....	2,300	....
9.	For brick masonry, in place, per cubic yard	....	50	....
10.	For hollow terra cotta brick masonry, in place, per cubic yard	....	1,230	....
12.	For timber piles, in place, and prepared, per lineal foot	....	1,000	....
13.	For timber foundations, placed and fastened, per thousand feet B. M.	....	2M	....
14.	For broken stone or gravel, in place, other than that used in concrete, per cubic yard	....	2,800	....
15.	For waterproofing treated woven fabric, laid with pitch or asphaltum, in place, as follows:			
	(a) For 1-ply, per square yard	....	16,900	....
	(b) For 2-ply, per square yard	....	100	....
	(c) For 3-ply, per square yard	....	3,700	....
	(d) For 4-ply, per square yard	....	100	....
	(e) For 5-ply, per square yard	....	100	....
	(f) For 6-ply, per square yard	....	100	....
16.	For waterproofing, brick laid in asphalt mastic, in place, per cubic yard	....	3,060	....
17.	For vitrified or cast-iron drain pipe, in place, as follows:			
	(a) For 12-inch vitrified pipe, per lineal foot	....	100	....
	(b) For 10-inch vitrified pipe, per lineal foot	....	100	....
	(c) For 8-inch vitrified pipe, per lineal foot	....	1,460	....
	(d) For 6-inch vitrified pipe, per lineal foot	....	200	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	(e) For 4-inch vitrified pipe, per lineal foot	....	100	....
	(f) For 8-inch cast-iron pipe, per lineal foot	....	....	....
	(g) For 6-inch cast-iron pipe, per lineal foot	....	100	....
	(h) For 4-inch cast-iron pipe, per lineal foot	....	1,170	....
18.	For tunnel ducts, in place, as required by Section 305 of the specifications, per duct foot	....	207,400	....
19.	For riveted steel, painted and erected, per ton of two thousand pounds	....	2,560	....
20.	For steel beams and shapes with connections painted and erected, per ton of two thousand pounds	....	780	....
21.	For steel rods and bars built in concrete, per ton of two thousand pounds	....	1,530	....
24.	For cast-iron columns erected and painted, per ton of two thousand pounds	....	10	....
25.	For miscellaneous iron castings, other than tunnel lining, such as manhole heads and covers, gratings, etc.; but not including castings for sewer work or pipes; in place, per ton of two thousand pounds	....	12	....
26.	For wire mesh, in place, per pound	....	6,400	....
27.	For one and one-half-inch (1½-inch) galvanized iron pipe hand rail, in place, including expansion bolts, etc., per lineal foot	....	3,520	....
28.	For steel gratings for ventilation, in place, including frames, etc., per square foot	....	8,200	....
29.	For vault lights, in place, per square foot	....	5,000	....
30.	For street surface restored:			
	(a) Sidewalks including curbs and all structures and growths therein or thereon, per square yard	....	9,390	....
	(b) For temporary repavement and maintenance of roadways, per square yard	....	14,240	....
32.	For wrought-iron or fibre electric conduits, in place in stations, as follows:			
	(a) For three-fourths inch (¾-inch) wrought-iron, per lineal foot	....	7,600	....
	(b) For one and one-half inch (1½ inch) wrought-iron, per lineal foot	....	1,000	....
	(c) For two-inch (2-inch) wrought-iron, per lineal foot	....	520	....
	(d) For two-inch (2-inch) fibre, per lineal foot	....	....	....
33.	For cast-iron outlet boxes in place in stations, each	....	440	....
34.	For six-inch (6-inch) cast-iron pipe and fittings, including specials ("extra heavy"), in place in stations, per lineal foot	....	160	....
	SEWERS—ITEMS 37 TO 74.			
	Vitrified and Cast-iron Pipe—Items 37 to 43.			
38.	For 15-inch vitrified pipe sewer, per lineal foot	....	1,272	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
39.	For 18-inch vitrified pipe sewer, per lineal foot	....	543	....
42.	For cast-iron sewer pipe (straight pipe) in place in the work, per ton of two thousand pounds	....	283	....
	Egg-shaped Brick or Concrete Sewers—Items 44 *to* 51.			
45.	For 3 foot 6 inch by 2 foot 4 inch, per lineal foot	....	*554	....
48.	For 4 foot 3 inch by 2 foot 10 inch, per lineal foot	....	484	....
	Circular Sewers—Brick or Concrete or Reinforced Concrete—Items 52 *to* 66.			
53.	For 4 foot 0 inch, per lineal foot	....	1,145	....
54.	For 4 foot 3 inch, per lineal foot	....	*284	....
	SURFACE AND SUBSURFACE STRUCTURES. ITEMS 75 AND 76.			
75.	For street surface railroads, including the support, reconstruction, rebuilding, etc., where necessary (but not including permanent masonry supports, if required and added, and not including additional vaults, if required and constructed in excess of the number existing), as follows:			
	(a) For electric railroads, per lineal foot of single track	....	5,470	....
	(b) For horse railroads, per lineal foot of single track	....	720	....
	PIPES IN STREETS—ITEMS *77 to* 126.			
	For Work and Material as Called for by Section 71 *of the Specifications.*			
	Water and Gas Pipes—Items 77 *to* 108.			
	Water Pipes—Items 77 to 88.			
	For water pipes in place, as follows:			
78.	For 4-inch water pipe, per lineal foot	....	100	....
82.	For 12-inch water pipe, per lineal foot	....	600	....
86.	For 30-inch water pipe, per lineal foot	....	800	....
	New Cast-iron Hub and Spigot Water and Gas Pipe—Items 100 *and* 101.			
100.	For new cast-iron hub and spigot straight pipe delivered on the work, per ton of two thousand pounds	....	32	....
101.	For new cast-iron hub and spigot pipe, special castings, delivered on the work, per ton of two thousand pounds	....	8	....
	High Pressure Fire System Pipes, Standard Spigot and Grooves—Items 102 *to* 106.			
	For high pressure fire system pipe in place, as follows:			
102.	For 8-inch high pressure fire system water pipe, per lineal foot	....	100	....

*Balance remaining after deducting portion of sewer included in Railroad construction under section 424 of the specifications.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of three hundred thousand dollars ($300,000) in the form hereto annexed with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No. .... on the .... floor of the building No. .... in the Borough of .... in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate

as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Affidavit of Verification.

State of New York, City and County of New York, ss.:

.... being duly sworn, says: I am†..

the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this .... day of ...., 1910.

ROUTE 5, SECTION 4, BLEECKER STREET TO 14TH STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 4.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of Invitation to Contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned‡...
.... do..
hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 4 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids, and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of.."; if a corporation, say "the (President or other officer duly authorized) of the........ .... Company."

‡The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of ...."; if a corporation, say "the (President or other officer duly authorized) of the........ .... Company."

‡The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

tities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard	....	106,000	....
2a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard	....	17,500	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard	....	21,800	....
3a.	For rock excavation for sewers and pipes, including the disposal of it, etc., per cubic yard	....	3,800	....
4.	For underpinning buildings, including all incidental work and material, per lineal front foot of building underpinned, as follows:			
	(a) For buildings, less than seven stories in height, per front foot	....	400	....
	(b) For buildings from seven to twelve stories in height, per front foot	....	....	....
	(c) For buildings over twelve stories in height, per front foot	....	....	....
5.	For tunnel excavation, including disposal of material, timbering, etc., per cubic yard	....	75,300	....
6.	For concrete masonry, in place, per cubic yard	....	37,800	....
7.	For protective concrete masonry in place, outside of waterproofing, per cubic yard.	....	620	....
8.	For rubble stone masonry in place, per cubic yard	....	350	....
9.	For brick masonry, in place, per cubic yard.	....	3,100	....
10.	For hollow terra cotta brick masonry, in place, per cubic yard	....	1,400	....
11.	For grout of Portland cement, per barrel of Portland cement used	....	2,000	....
13.	For timber foundations, placed and fastened, per thousand feet B. M	....	2M	....
14.	For broken stone or gravel, in place, other than that used in concrete, per cubic yard	....	3,500	....
15.	For waterproofing, treated woven fabric, laid with pitch or asphaltum, in place, as follows:			
	(a) For 1-ply, per square yard	....	5,900	....
	(b) For 2-ply, per square yard	....	100	....
	(c) For 3-ply, per square yard	....	5,600	....
	(d) For 4-ply, per square yard	....	100	....
	(e) For 5-ply, per square yard	....	100	....
	(f) For 6-ply, per square yard	....	100	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
16.	For waterproofing, brick laid in asphalt mastic, in place, per cubic yard.........	....	770	....
17.	For vitrified or cast-iron drain pipe, in place, as follows:			
	(a) For 12-inch vitrified pipe, per lineal foot	....	100	....
	(b) For 10-inch vitrified pipe, per lineal foot	....	100	....
	(c) For 8-inch vitrified pipe, per lineal foot	....	6,600	....
	(d) For 6-inch vitrified pipe, per lineal foot	....	200	....
	(e) For 4-inch vitrified pipe, per lineal foot	....	100	....
	(f) For 8-inch cast-iron pipe, per lineal foot	....	....	....
	(g) For 6-inch cast-iron pipe, per lineal foot	....	100	....
	(h) For 4-inch cast-iron pipe, per lineal foot	....	9,000	....
18.	For tunnel ducts, in place, as required by Section 305 of the specifications, per duct foot	....	525,000	....
19.	For riveted steel, painted and erected, per ton of two thousand pounds...........	....	270	....
20.	For steel beams and shapes with connections, painted and erected, per ton of two thousand pounds	....	650	....
21.	For steel rods and bars built in concrete, per ton of two thousand pounds........	....	1,150	....
24.	For cast-iron columns erected and painted, per ton of two thousand pounds........	....	130	....
25.	For miscellaneous iron castings, other than tunnel lining, such as manhole heads and covers, gratings, etc.; but not including castings for sewer work or pipes, in place, per ton of two thousand pounds	....	15	....
26.	For wire mesh, in place, per pound.......	....	1,400	....
27.	For one and one-half inch (1½ inch) galvanized iron pipe hand rail, in place, including expansion bolts, etc., per lineal foot	....	11,100	....
28.	For steel gratings, for ventilation, in place, including frames, etc., per square foot..	....	8,300	....
29.	For vault lights, in place, per square foot.	....	5,500	....
30.	For street surface restored:			
	(a) Sidewalks, including curbs and all structures and growths therein and thereon, per square yard................	....	5,950	....
	(b) For temporary repavement and maintenance of roadways, per square yard..	....	14,050	....
31.	For park surface restored (all classes), per square yard.......	....	1,000	....
32.	For wrought-iron or fibre electric conduits, in place in stations, as follows:			
	(a) For three-fourths inch (¾ inch) wrought iron, per lineal foot..........	....	15,000	....
	(b) For one and one-half inch (1½ inch) wrought-iron per lineal foot............	....	450	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	(c) For two inch (2 inch) wrought-iron, per lineal foot........................	....	230	....
	(d) For two inch (2 inch) fibre, per lineal foot	....	4,000	....
33.	For cast-iron outlet boxes in place in station, each	....	640	....
34.	For six-inch (6-inch) cast-iron pipe and fittings, including specials ("extra heavy"), in place in stations, per lineal foot	....	40	....
	SEWERS—ITEMS 37 TO 74.			
	Vitrified and Cast-Iron Pipe—Items 37 *to* 43.			
38.	For 15-inch vitrified pipe sewer, per lineal foot	....	1,738	....
39.	For 18-inch vitrified pipe sewer, per lineal foot	....	280	....
42.	For cast-iron sewer pipe (straight pipe) in place in the work, per ton of two thousand pounds	....	4	....
	Egg-Shaped Brick or Concrete Sewers—Items 44 *to* 51.			
45.	For 3 foot 6 inch by 2 foot 4 inch, per lineal foot	....	1,465	....
47.	For 4 foot by 2 foot 8 inch, per lineal foot	....	248	....
48.	For 4 foot 3 inch by 2 foot 10 inch, per lineal foot	....	240	....
49.	For 4 foot 6 inch by 3 foot, per lineal foot	....	242	....
50.	For 4 feet 9 inches by 3 feet 2 inches per lineal foot	....	246	....
	Circular Sewers—Brick or Concrete or Reinforced Concrete—Items 52 *to* 66.			
52.	For 3 feet 9 inches, per lineal foot........	....	264	....
60.	For 6 feet 0 inch, per lineal foot........	....	1,250	....
	SURFACE AND SUBSURFACE STRUCTURES—ITEMS 75 AND 76.			
75.	For street surface railroads, including the support, reconstruction, rebuilding, etc., where necessary (but not including permanent masonry supports, if required and added, and not including additional vaults, if required and constructed in excess of the number existing), as follows:			
	(a) For electric railroads, per lineal foot of single track.......................	....	2,300	....
	(b) For horse railroads, per lineal foot of single track	....	200	....
	PIPES IN STREETS—ITEMS 77 TO 126.			
	For Work and Material as Called for by Section 71 *of the Specifications.*			
	Water and Gas Pipes—Items 77 *to* 108.			
	Water Pipes—Items 77 *to* 88.			
	For water pipes in place, as follows:			
78.	For 4-inch water pipe, per lineal foot....	....	100	....
79.	For 6-inch water pipe, per lineal foot....	....	1,800	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	Gas Pipes—Items 89 to 99.			
	For gas pipes in place, as follows:			
90.	For 4-inch gas pipe, per lineal foot......	....	460	....
91.	For 6-inch gas pipe, per lineal foot......	....	1,490	....
92.	For 8-inch gas pipe, per lineal foot......	....	720	....
94.	For 12-inch gas pipe, per lineal foot......	....	580	....
	New Cast-iron Hub and Spigot Water and Gas Pipe—Items 100 and 101.			
100.	For new cast-iron hub and spigot straight pipe delivered on the work, per ton of two thousand pounds.................	....	20	....
101.	For new cast-iron hub and spigot pipe, special castings, delivered on the work, per ton of two thousand pounds.......	....	5	....
	DUCTS IN STREETS.			
	Electric Ducts and Conduits in Streets.			
	(Other than tunnel ducts and street railroad ducts which are provided for in Items 18 and 75-a).			
127.	For electric ducts and conduits in place, as provided in Section 71-a of the specifications, per duct foot...............	....	86,000	....

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of three hundred thousand dollars ($300,000) in the form hereto annexed with the following named Sureties, viz.:...

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No...............on the...................floor of the building No........................in the Borough of............................... in the City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated, the ...., 1910.

Affidavit of Verification.

State of New York, City and County of New York, ss.:

.............................., being duly sworn, says: I am†.................. the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this ...... day of ...., 1910.

ROUTE 5, SECTION 6, 26TH STREET TO 40TH STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 6.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of Invitation to Contractors. Copy of Form of Contract. Copy of Form of Bond.

To the Public Service Commission for the First District:

1. The undersigned‡.. do .. hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 6 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

101.	For new cast-iron hub and spigot pipe, special castings, delivered on the work, per ton of two thousand pounds........	....	7	....
	Air Pipes—Items 121 *to* 124.			
	For air pipe in place, as follows:			
122.	For 8-inch air pipe, per lineal foot........	....	250	....
	DUCTS IN STREETS.			
	Electric Ducts and Conduits in Streets.			
	(Other than tunnel ducts and street railroad ducts which are provided for in Items 18 and 75a.)			
127.	For electric ducts and conduits in place, as provided in Section 71a of the specifications, per duct foot	....	103,000	....

(2) If this proposal is accepted, the undersigned will, within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of three hundred and fifty thousand dollars ($350,000) in the form hereto annexed, with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No. .... on the ...... floor of the building No. .... in the Borough of .... in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said con-

tract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated, the ...., 1910.

Affidavit of Verification.

State of New York, City and County of New York, ss.:

............................., being duly sworn, says: I am†.................. the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this ...... day of ...., 1910.

ROUTE 5, SECTION 7, 40TH STREET TO 53D STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 7.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of Invitation to Contractors, copy of form of contract, copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned‡.. .... do .. hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 7 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of ...."; if a corporation, say, "the (President or other officer duly authorized) of the........................Company."

‡The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard	....	125,600	....
2a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard	....	6,300	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard	....	221,000	....
3a.	For rock excavation, for sewers and pipes, including the disposal of it, etc., per cubic yard	....	5,800	....
4.	For underpinning buildings, including all incidental work and material, per lineal front foot of building underpinned, as follows:			
	(a) For buildings less than seven stories in height, per front foot	....	1,284	....
	(b) For buildings from seven to twelve stories in height, per front foot	....	145	....
	(c) For buildings over twelve stories in height, per front foot	....	....	....
5.	For tunnel excavation (except tunneling for sewers), including disposal of material, timbering, etc., per cubic yard	....	17,700	....
5a.	For tunnel excavation for sewers and pipes, including the disposal of material, timber, etc., per cubic yard	....	565	....
6.	For concrete masonry, in place, per cubic yard	....	54,200	....
7.	For protective concrete masonry in place outside of waterproofing, per cubic yard.	....	1,240	....
8.	For rubble stone masonry in place, per cubic yard	....	3,200	....
9.	For brick masonry, in place, per cubic yard.	....	800	....
10.	For hollow terra cotta brick masonry, in place, per cubic yard	....	230	....
11.	For grout of Portland cement, per barrel of Portland cement used	....	500	....
14.	For broken stone or gravel, in place, other than that used in concrete, per cubic yard	....	2,250	....
15.	For waterproofing, treated woven fabric, laid with pitch or asphaltum, in place, as follows:			
	(a) For 1-ply, per square yard	....	5,535	....
	(b) For 2-ply, per square yard	....	100	....
	(c) For 3-ply, per square yard	....	10,840	....
	(d) For 4-ply, per square yard	....	100	....
	(e) For 5-ply, per square yard	....	100	....
	(f) For 6-ply, per square yard	....	100	....
16.	For waterproofing, brick laid in asphalt mastic, in place, per cubic yard	....	1,020	....
17.	For vitrified or cast-iron drain pipe, in place, as follows:			
	(a) For 12-inch vitrified pipe, per lineal foot	....	100	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	(b) For 10-inch vitrified pipe, per lineal foot	....	100	....
	(c) For 8-inch vitrified pipe, per lineal foot	....	6,500	....
	(d) For 6-inch vitrified pipe, per lineal foot	....	200	....
	(e) For 4-inch vitrified pipe, per lineal foot	....	100	....
	(f) For 8-inch cast-iron pipe, per lineal foot	....	....	....
	(g) For 6-inch cast-iron pipe, per lineal foot	....	100	....
	(h) For 4-inch cast-iron pipe, per lineal foot	....	8,570	....
18.	For tunnel ducts, in place, as required by section 305 of the specifications, per duct foot	....	609,000	....
19.	For riveted steel, painted and erected, per ton of two thousand pounds............	....	4,390	....
20.	For steel beams and shapes with connections, painted and erected, per ton of two thousand pounds	....	3,650	....
21.	For steel rods and bars built in concrete, per ton of two thousand pounds.........	....	380	....
24.	For cast-iron columns erected and painted, per ton of two thousand pounds.........	....	52	....
25.	For miscellaneous iron castings, other than tunnel lining, such as manhole heads and covers, gratings, etc.; but not including castings for sewer work or pipes; in place, per ton of two thousand pounds...	....	18	....
26.	For wire mesh, in place, per pound........	....	5,900	....
27.	For one and one half inch (1½-inch.) galvanized iron pipe hand rail, in place, including expansion bolts, etc., per lineal foot	....	9,783	....
28.	For steel gratings for ventilation, in place, including frames, etc., per square foot...	....	10,100	....
29.	For vault lights, in place, per square foot..	....	8,150	....
30.	For street surface restored:			
	(a) Sidewalks including curbs and all structures and growths therein and thereon, per square yard................	....	9,970	....
	(b) For temporary repavement and maintenance of roadways, per square yard...	....	15,430	....
32.	For wrought-iron or fibre electric conduits, in place, in stations, as follows:			
	(a) For three-fourths inch (¾-inch) wrought-iron, per lineal foot..........	....	23,100	....
	(b) For one and one-half inch (1½-inch) wrought-iron, per lineal foot..........	....	1,070	....
	(c) For two-inch (2-inch) wrought-iron per lineal foot........................	....	575	....
	(d) For two-inch (2-inch) fibre, per lineal foot	....	6,610	....
33.	For cast-iron outlet boxes in place in stations, each	....	994	....
34.	For six-inch (6-inch) cast-iron pipe and fittings, including specials ("extra heavy"), in place in stations, per lineal foot	....	440	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	SEWERS—ITEMS 37 TO 74.			
	Vitrified and Cast Iron Pipe—Items 37 to 43.			
38.	For 15-inch vitrified pipe sewer, per lineal foot	....	2,887	....
39.	For 18-inch vitrified pipe sewer, per lineal foot	....	830	....
	Egg-Shaped Brick or Concrete Sewers—Items 44 to 51.			
45.	For 3 feet 6 inches by 2 feet 4 inches, per lineal foot	....	1,044	....
47.	For 4 feet 0 inches x 2 feet 8 inches per lineal foot	....	806	....
	Circular Sewers—Brick or Concrete or Reinforced Concrete—Items 52 to 66.			
53.	For 4 feet 0 inches per lineal foot	....	300	....
58.	For 5 feet 6 inches, in tunnel, per lineal foot	....	257	....
	SURFACE AND SUBSURFACE STRUCTURES—ITEMS 75 AND 76.			
75.	For street surface railroads, including the support, reconstruction, rebuilding, etc., where necessary (but not including permanent masonry supports, if required and added, and not including additional vaults, if required and constructed in excess of the number existing), as follows:			
	(a) For electric railroads, per lineal foot of single track	....	7,192	....
	(b) For horse railroads, per lineal foot of single track	....	....	....
76.	For the temporary and permanent support and maintenance of elevated railroad structures, and all work incidental thereto, per column	....	4	....
	PIPES IN STREETS—ITEMS 77 TO 126.			
	For Work and Material as Called for by Section 71 of the Specifications.			
	Water and Gas Pipes—Items 77 to 108.			
	Water Pipes—Items 77 to 88.			
	For water pipes in place, as follows:			
78.	For 4-inch water pipe, per lineal foot	....	100	....
79.	For 6-inch water pipe, per lineal foot	....	800	....
82.	For 12-inch water pipe, per lineal foot	....	340	....
84.	For 20-inch water pipe, per lineal foot	....	700	....
86.	For 30-inch water pipe, per lineal foot	....	140	....
	Gas Pipes—Items 89 to 99.			
	For gas pipes in place, as follows:			
90.	For 4-inch gas pipe, per lineal foot	....	360	....
91.	For 6-inch gas pipe, per lineal foot	....	200	....
92.	For 8-inch gas pipe, per lineal foot	....	540	....
94.	For 12-inch gas pipe, per lineal foot	....	270	....
95.	For 16-inch gas pipe, per lineal foot	....	470	....
96.	For 20-inch gas pipe, per lineal foot	....	180	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	New Cast-iron Hub and Spigot Water and Gas Pipe—Items 100 *and* 101.			
100.	For new cast-iron hub and spigot straight pipe delivered on the work, per ton of two thousand pounds	....	40	....
101.	For new cast-iron hub and spigot pipe, special castings, delivered on the work, per ton of two thousand pounds........	....	10	....
	Air Pipes—Items 121 *to* 124.			
	For air pipe in place, as follows:			
121.	For 6-inch air pipe, per lineal foot........	....	130	....
122.	For 8-inch air pipe, per lineal foot........	....	500	....
123.	For new 6-inch air pipe, delivered on the work, per lineal foot..................	....	30	....
124.	For new 8-inch air pipe delivered on the work, per lineal foot.................	....	100	....
	Mail Tubes—Items 125 *and* 126.			
125.	For 8-inch mail tube in place, per lineal foot	....	1,900	....
126.	For new 8-inch mail tube, delivered on the work, per ton of two thousand pounds..	....	10	....
	DUCTS IN STREETS			
	Electric Ducts and Conduits in Streets.			
	(Other than tunnel ducts and street railroad ducts which are provided for in Items 18 and 75-a).			
127.	For electric ducts and conduits in place, as provided in Section 71a of the specifications, per duct foot.................	....	106,000	....

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of three hundred and fifty thousand dollars ($350,000) in the form hereto annexed with the following named Sureties, viz.:

....
....
....
....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No. .... on the .... floor of the building No. .... in the Borough of.......................... in the City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any

longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially desposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated the ...., 1910.

Affidavit of Verification.

State of New York, City and County of New York, ss.:

......................................being duly sworn, says: I am†............ the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this .... day of ...., 1910.

ROUTE 5, SECTION 8, 53D STREET TO 67TH STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 8.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of invitation to Contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned‡.. do.. hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 8 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids, and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons, strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of ...."; if a corporation, say " (President or other officer duly authorized) of the .... Company."

‡The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A, B. C, D. etc." (giving the names of all the partners).

Schedule of Unit Prices.

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No. .... on the .... floor of the building No. .... in the Borough of .... in the City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated the ...., 1910.

Affidavit of Verification.

State of New York, City and County of New York, ss.:

.............................., being duly sworn, says: I am† .... the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this .... day of ...., 1910.

ROUTE 5, SECTION 9, 67TH STREET TO 79TH STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.
(Route 5, Section 9.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of invitation to Contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned‡.. do .. hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 9 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard	....	101,100	....
2a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard	....	18,000	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard..........	....	48,400	....
3a.	For rock excavation for sewers and pipes, including the disposal of it, etc., per cubic yard	....	500	....

---

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of ...."; if a corporation, say "the (President or other officer duly authorized) of the .... Company."

‡The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
4.	For underpinning buildings, including all incidental work and material, per lineal front foot of building underpinned, as follows:

(2) If this proposal is accepted, the undersigned will, within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York, pursuant to the terms of the said contract, a bond in the sum of three hundred thousand dollars ($300,000), in the form hereto annexed, with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No.........., on the...... floor of the building No............. in the Borough of.............., in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that the Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then, if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission, to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

127.	For electric ducts and conduits in place, as provided in Section 71a of the specifications, per duct foot....................	....	19,000	....

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pur-

suant to the terms of the said contract a bond in the sum of three hundred thousand dollars ($300,000) in the form hereto annexed with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No..........................on the......................... floor of the building No...in the Borough of ....in the City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of the City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

ROUTE 5, SECTION 11, 93RD STREET TO 106TH STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 11.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of Invitation to Contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned†..

.... do.. hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with the City of New York for the construction of Section 11 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1..	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard......................	....	52,100	....
2.	For earth excavation, below mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard......................	....	22,700	....
2-a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard......................	....	3,600	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard..........	....	81,300	....
3-a.	For rock excavation, for sewers and pipes, including the disposal of it, etc., per cubic yard	....	1,900	....
4.	For underpinning buildings, including all incidental work and material, per lineal front foot of building underpinned as follows:			
	(a) For buildings less than seven stories in height, per front foot..............	....	2,300	....
	(b) For buildings from seven to twelve stories in height, per front foot........	....	....	....

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of four hundred thousand dollars ($400,000) in the form hereto annexed with the following named Sureties, viz.:

....
....
....
....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No..................on the...............floor in the building No....................in the Borough of........................in the City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of twelve thousand five hundred dollars ($12,500). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of the contract, or in the supplies, work or business to which it relates. or in any portion of the profits thereof.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 13.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of Invitation to Contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned†...
.... do..

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

‡If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of..."; if a corporation, say "the (President or other officer duly authorized) of the.......... ....Company."

†The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 13 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard....................	....	79,320	....
2.	For earth excavation, below mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard....................	....	51,360	....
2-a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard......................	....	2,400	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard......	....	207,460	....
3-a.	For rock excavation for sewers and pipes, including the disposal of it, etc., per cubic yard	....	260	....
4.	For underpinning buildings, including all incidental work and material, per lineal front foot of building underpinned as follows:			
	(a) For buildings less than seven stories in height, per front foot..............	....	3,300	....
	(b) For buildings from seven to twelve stories in height, per front foot........	....	95	....
	(c) For buildings over twelve stories in height, per front foot..................	....	....	....
6.	For concrete masonry, in place, per cubic yard	....	50,215	....
7.	For protective concrete masonry in place outside of waterproofing, per cubic yard.	....	3,570	....
8.	For rubble stone masonry in place, per cubic yard	....	1,200	....
9.	For brick masonry, in place, per cubic yard	....	100	....
10.	For hollow terra cotta brick masonry, in place, per cubic yard	....	450	....
12.	For timber piles, in place, and prepared, per lineal foot	....	1,000	....
13.	For timber foundations, placed and fastened, per thousand feet B. M........	....	2M	....
14.	For broken stone or gravel, in place, other than that used in concrete, per cubic yard	....	2,800	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
15.	For waterproofing, treated woven fabric, laid with pitch or asphaltum, in place, as follows:			
	(a) For 1-ply, per square yard..........	....	27,360	....
	(b) For 2-ply, per square yard..........	....	100	....
	(c) For 3-ply, per square yard..........	....	3,190	....
	(d) For 4-ply, per square yard..........	....	100	....
	(e) For 5-ply, per square yard..........	....	100	....
	(f) For 6-ply, per square yard..........	....	590	....
16.	For waterproofing, brick laid in asphalt mastic, in place, per cubic yard........	....	4,660	....
17.	For vitrified or cast-iron drain pipe, in place, as follows:			
	(a) For 12-inch vitrified pipe, per lineal foot	....	1,102	....
	(b) For 10-inch vitrified pipe, per lineal foot	....	100	....
	(c) For 8-inch vitrified pipe, per lineal foot	....	3,060	....
	(d) For 6-inch vitrified pipe, per lineal foot	....	200	....
	(e) For 4-inch vitrified pipe, per lineal foot	....	100	....
	(f) For 8-inch cast-iron pipe, per lineal foot	....	....	....
	(g) For 6-inch cast-iron pipe, per lineal foot	....	100	....
	(h) For 4-inch cast-iron pipe, per lineal foot	....	6,790	....
18.	For tunnel ducts, in place, as required by Section 305 of the specifications, per duct foot	....	291,770	....
19.	For riveted steel, painted and erected, per ton of two thousand pounds........	....	5,585	....
20.	For steel beams and shapes with connections, painted and erected, per ton of two thousand pounds	....	3,905	....
21.	For steel rods and bars built in concrete, per ton of two thousand pounds.......	....	90	....
25.	For miscellaneous iron castings, other than tunnel lining, such as manhole heads and covers, gratings, etc., but not including castings for sewer work or pipes; in place, per ton of two thousand pounds..	....	12	....
26.	For wire mesh, in place, per pound......	....	21,320	....
27.	For one and one-half-inch (1½-inch) galvanized iron pipe hand rail, in place, including expansion bolts, etc., per lineal foot	....	6,260	....
28.	For steel gratings for ventilation, in place, including frames, etc., per square foot..	....	5,220	....
29.	For vault lights, in place, per square foot	....	3,960	....
30.	For street surface restored:			
	(a) Sidewalks including curbs and all structures and growths therein and thereon, per square yard..............	....	8,940	....
	(b) For temporary repavement and maintenance of roadways, per square yard..	....	14,730	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
32.	For wrought-iron or fibre electric conduits, in place, in stations, as follows:			
	(a) For three-fourths inch (¾-inch) wrought-iron, per lineal foot	....	4,770	....
	(b) For one and one-half-inch (1½-inch) wrought-iron, per lineal foot	....	820	....
	(c) For two-inch (2-inch) wrought-iron, per lineal foot	....	410	....
	(d) For two-inch (2-inch) fibre, per lineal foot	....	4,320	....
33.	For cast-iron outlet boxes in place in stations, each	....	480	....
34.	For six-inch (6-inch) cast-iron pipe and fittings, including specials ("extra heavy"), in place in stations, per lineal foot	....	245	....
	SEWERS—ITEMS 37 TO 74.			
	Vitrified and Cast Iron Pipe—Items 37 *to* 43.

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room.........on the...........floor of the building No...........in the Borough of..................in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of fifteen thousand dollars ($15,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted, and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated the............................, 1910.

Affidavit of Verification.

ROUTE 5, SECTION 14, 129TH STREET TO MOTT AVENUE, TYPE K.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5. Section 14.)

Notice—Sums of money must be written in words and also in figures, except in schedules. There must remain annexed hereto: Copy of Invitation to Contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned* ....
do... hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 14 of Route 5, in accordance with the type of tunnel construction designated "K," and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

Type K—Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	TUNNEL TUBES.			
†36.	For tube tunnel under Harlem River as per type "K," per lineal foot of four-track tube complete	....	1,080	....
	APPROACHES.			
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard........................	....	49,510	....
2.	For earth excavation, below mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard........................	....	156,100	....
2a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard........................	....	1,565	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard.......	....	27,620	....
4.	For underpinning buildings, including all incidental work and material, per lineal front foot of building underpinned as follows:			
	(a) For buildings less than seven stories in height, per front foot..................	....	850	....

---

*The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

†See note under Item 12 of Approaches.

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid, and at the same time will deliver to the Comptroller of The City of New York, pursuant to the terms of said contract, a bond in the sum of five hundred thousand dollars ($500,000) in the form hereto annexed with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No........, on the........floor of the building No.............in the Borough of................, in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of fifteen thousand dollars ($15,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted, and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said con-

tract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Affidavit of Verification.

State of New York, City and County of New York, ss.:

....being duly sworn, says: I am†... the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this...........day of............, 1910.

SECTION 11—FROM EAST 93D STREET, UNDER LEXINGTON AVENUE TO EAST 106TH STREET. CONTRACTOR: THE BRADLEY CONTRACTING COMPANY. AMOUNT, $3,132,195.05.

State of New York, Public Service Commission for the First District, Tribune Building, 154 Nassau Street, New York, July 5, 1911.

To the Board of Estimate and Apportionment of The City of New York:

The Public Service Commission for the First District herewith transmits to you for your consent, as required by law, a proposed contract between The City of New York and Bradley Contracting Company for the construction at the public expense of Section 11 of Route 5, being that portion of the proposed Lexington Avenue Rapid Transit Railroad which extends under Lexington avenue, from East 93d street to East 106th street, in the Borough of Manhattan.

The Public Service Commission for the First District further requests your honorable Board to consent to the said contract herewith transmitted and to prescribe a limit to the amount of bonds available to meet the requirements of the said contract, to wit, the sum of three million one hundred and thirty-two thousand one hundred and ninety-five dollars and five cents ($3,132,195.05); and also to direct the Comptroller of The City of New York to issue bonds of said City at such a rate of interest as the Commissioners of the Sinking Fund of said City may prescribe for the purpose of providing the necessary means for construction at the public expense of the said portion of such railroad.

And the Public Service Commission for the First District does hereby, pursuant to section 45 of the Greater New York Charter, make request for the authorization of such corporate stock for the full amount sufficient to pay the entire estimated expense of executing such contract, to wit, the sum of three million one hundred and thirty-two thousand one hundred and ninety-five dollars and five cents ($3,132,195.05).

In witness whereof the Public Service Commission for the First District has

caused its official seal to be hereto affixed and attested by its Secretary and these presents to be signed by its Chairman this 5th day of July, 1911.

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of....................................."; if a corporation, say, "the (President or other officer duly authorized) of the...Company."

PUBLIC SERVICE COMMISSION FOR THE FIRST DISTRICT, by W. R. Willcox, Chairman. [SEAL]

Attest: Travis H. Whitney, Secretary.

Route 5, *Section* 11.

After consideration of the bids on Section 11 of Route 5, the following resolution was duly moved and seconded:

Resolved, That this Commission hereby accepts the proposal of Bradley Contracting Company, dated October 27, 1910, for the construction of Section 11 of Route 5, being that portion of the proposed Lexington Avenue Rapid Transit Railroad which extends under Lexington avenue, from East 93d street to East 106th street, in the Borough of Manhattan, the aggregate of the unit price in the proposal amounting to three million one hundred and thirty-two thousand one hundred and ninety-five dollars and five cents ($3,132,195.05).

Resolved, That the Chairman and the Secretary be and they hereby are authorized on behalf of the Commission to execute a contract in the form attached to the said proposal and to deliver the same if and when consented to by the Board of Estimate and Apportionment and upon compliance by the said Bradley Contracting Company with the requirements of the Invitation to Bidders attached to the said proposal.

Resolved, That the Chairman and Secretary be and they hereby are authorized and directed to request the Board of Estimate and Apportionment to consent to the said contract and to prescribe a limit to the amount of bonds available to meet the requirements of the said contract, to wit, the sum of three million one hundred and thirty-two thousand one hundred and ninety-five dollars and five cents ($3,132,195.05); and also to request the said Board of Estimate and Apportionment to direct the Comptroller of The City of New York to issue the bonds of said City at such rate of interest as the Board of Commissioners of the Sinking Fund of said City may prescribe for the purpose of providing the necessary means for construction at the public expense of the said portion of such railroad; and also to make request for the authorization of bonds for the full amount sufficient to pay the entire estimated expense of executing such contract, to wit, the sum of three million one hundred and thirty-two thousand one hundred and ninety-five dollars and five cents ($3,132,195.05).

Resolved, That the Secretary give notice to the said Bradley Contracting Company that its proposal has been accepted and the contract awarded to it by this Commission, subject to its being consented to by the Board of Estimate and Apportionment as required by law.

Resolved, That it be referred to Counsel by the Commission to inquire into the sufficiency of the sureties proposed to be given by the said Bradley Contracting Company and in case the sureties named in the proposal of the said Bradley Contracting Company or any of them are not approved by the Commission, then to inquire into the sufficiency of any other or substitute sureties and in behalf of the Commission to do any such act as may be necessary and incidental to the furnishing of a proper bond.

Ayes—Commissioners Willcox, McCarroll, Maltbie, Eustis, Cram.

Nays—None.

Carried.

State of New York, County of New York, ss.:

I, Travis H. Whitney, Secretary of the Public Service Commission for the First District, do hereby certify, that I have compared the above with the original adopted by said Commission on July 5, 1911, and that it is a correct transcript therefrom and of the whole of the original.

In testimony whereof, I have hereunto subscribed my hand and affixed the seal of the Commission, this 5th day of July, 1911.

[SEAL] TRAVIS H. WHITNEY, Secretary.

Invitation to Contractors.

Parts of Lexington Avenue Route.

The City of New York, acting by the Public Service Commission for the First District (hereinafter called "the Commission") invites proposals to construct portions of a proposed rapid transit railroad in the Boroughs of Manhattan and The Bronx in The City of New York. Proposals may be submitted separately for any one or more of the separate sections of which such railroad consists as hereinafter stated.

The points within the City between which the said several parts are to run and the route or routes to be followed are briefly as follows:

Lexington Avenue Route.

(Route No. 5.)

Section 1 begins under Battery Park and extends thence under Battery place, Greenwich street, Trinity place and Church street to a point about 80 feet north of the centre line of Dey street; with a station in Battery Park, a station at Rector street and a station at Cortlandt and Dey streets.

Section 2 begins at the end of Section 1 and extends thence under Church street, private property, Vesey street, private property, and Broadway to a point under Broadway about 110 feet north of the centre line of Walker street; with a station at Murray and Warren streets.

Section 2-A begins at the end of Section 2 and extends thence under Broadway to a point about on the northerly building line of Howard street. This section includes the Canal street station and also the portion of the Canal street subway lying thereunder.

Section 3 begins at the end of Section 2-A and extends thence under Broadway to a point about midway between Houston and Bleecker streets; with a station at Prince street.

Section 4 begins at the end of Section 3 and extends thence under Broadway, private property and the several cross streets to a point under private property at the southerly line of East 14th street and Irving place; with a station at Astor place and East 8th street.

Section 5 begins at the end of Section 4 and extends thence under Irving place, Gramercy Park and Lexington avenue to a point about 140 feet north of the centre line of East 26th street; with a station at East 14th and East 15th streets and a station at East 23d street.

Section 6 begins at the end of Section 5 and extends thence under Lexington avenue to about the centre line of East 40th street; with a station at East 27th and East 28th streets and a station at East 34th street.

Section 7 begins at the end of Section 6 and extends thence under Lexington avenue to a point about 50 feet north of the centre line of East 53d street; with a station at East 42d and 43d streets and a station at East 51st street.

Section 8 begins at the end of Section 7 and extends thence under Lexington avenue to a point about 50 feet north of the centre line of East 67th street; with a station at East 58th and East 59th streets.

Section 9 begins at the end of Section 8 and extends thence under Lexington avenue to a point about 70 feet south of the centre line of East 79th street; with a station at East 68th and East 69th streets and a station at East 77th street.

Section 10 begins at the end of Section 9 and extends thence under Lexington avenue to a point about 50 feet south of the centre line of East 93d street; with a station at East 86th street.

Section 11 begins at the end of Section 10 and extends thence under Lexington avenue to a point about 70 feet south of the centre line of East 106th street; with a station at East 96th street and a station at East 102d and East 103d streets.

Section 12 begins at the end of Section 11 and extends thence under Lexington avenue to a point about 115 feet south of the centre line of East 118th street; with a station at East 110th and East 111th streets and a station at East 116th street.

Section 13 begins at the end of Section 12 and extends thence under Lexington avenue to a point about 120 feet south of the centre line of East 129th street; with a station at East 125th street.

Section 14 begins at the end of Section 13 and extends thence under Lexington avenue, private property and the Harlem River to a point in private property in the Borough of The Bronx, thence under private property and Park avenue to East 135th street. Here the line divides into two branches. The west branch begins at about the centre line of East 135th street and extends thence under private property to a point in private property a distance of about 655 feet from the centre line of East 135th street and about 50 feet west of the centre line of Mott avenue. The east branch extends under Park avenue and partly under private property to about the intersection of the easterly line of Mott avenue with the westerly line of Park avenue.

Section 15. This section consists of two branches. The west branch begins at the end of the west branch of Section 14 and extends thence under East 138th street, private property and Mott avenue, Franz Sigel Park, private property and the several cross streets to a point in private property on the easterly side of River avenue about 120 feet south of the south line of East 157th street; with a station at East 138th street and East 149th street. (The portion of this section north of East 151st street is part of the River Avenue Route adopted by the Commission

on the 16th day of June, 1908.) The east branch begins at the end of the east branch of Section 14 and extends thence under Park avenue, private property, Canal Street West and East 138th street to a point in East 138th street about 150 feet easterly of the centre line of Alexander avenue, with a station between 3d and Alexander avenues.

The general plan of construction calls for a subsurface railroad having two tracks between Battery Park and Chambers street in Manhattan, and four tracks from Chambers street, in Manhattan, to 135th street and Park avenue, in the Bronx, with the branches in The Bronx having in the main three tracks each. Turnouts, cross-overs, connections, sidings, loops, etc., will be constructed, all of which are more particularly indicated on the contract drawings.

For Section 14 two plans, designated Type H and Type K, respectively, have been prepared. The bidders for such section may submit a proposal for either or both of such types. After a comparison of the bids the Commission will determine which of such plans shall be adopted.

Bidders for the several sections will not be required to do the station finish work, nor to provide or lay tracks, ties or ballast.

The work of construction under the contract shall include the construction of all necessary sewers and connections, along the route of the railroad; also the necessary support, maintenance, readjustment and reconstruction of vaults adjacent to buildings, pipes, tubes, conduits, subways or other subsurface structures; the support and care, including underpinning where necessary, of all buildings, monuments, surface, subsurface and elevated railroads and other structures, etc., affected by or interfered with during the construction of the work; also the restoration of the sidewalks and the temporary paving and maintenance of roadways.

The method of construction will be partly by trench excavation (under cover, unless otherwise specified in the form of contract or permitted by the Commission), and partly by tunnel, as set forth in the forms of contract.

Bidders must examine the form of contract, specifications, maps and plans; must visit the location of the work and inform themselves of the present conditions along the line thereof and make their own estimates of the facilities and difficulties attending the execution of the proposed work.

A fuller description of the work to be done is set forth, and other requirements, provisions, details and specifications are stated, in the printed form of contract and in the contract drawings therein referred to. Printed copies of the forms of contract, bond and contractor's proposal, may be had on application at the office of the Commission, 154 Nassau street, Borough of Manhattan, City of New York. The contract drawings may be inspected at the same office, and copies thereof may be purchased by prospective bidders by payment of five dollars ($5) for the contract drawings for each section. The printed form of contract and the contract drawings are to be deemed a part of this invitation.

The Commission is informed by the Department of Docks and Ferries that docks and bulkheads along the East River may be available for dumping purposes. Information in regard thereto may be obtained by any intending bidder upon inquiry at the office of the Commission.

Partial payments to the Contractor will be made monthly as the work proceeds, as provided in the form of contract.

The Contractor for any section or sections will be required to complete the work as soon as practicable and within the time hereinafter prescribed for such completion.

Sealed bids or proposals will be received at the office of the Commission at 154 Nassau street, Borough of Manhattan, City of New York, until the 27th day of October, 1910, at twelve (12) o'clock noon, at which time, or at a later date to be fixed by the Commission, the proposals will be publicly opened.

Proposals must be in the form prescribed by the Commission, copies of which may be obtained at the office of the Commission.

A statement, based upon the estimate of the Engineer, of the quantities of the various classes of the work and of the nature and extent as near as practicable of the work required for each section, is to be found in the schedules forming a part of the form of Contractor's Proposal. The quantities given in such schedules are approximate only, being given as a basis for the uniform comparison of bids and no claim is to be made against the City on account of any excess or deficiency, absolute or relative, in the same, except as provided in the specifications and form of contract.

All proposals must, when submitted, be enclosed in a sealed envelope endorsed: "*Proposal for Constructing Rapid Transit Railroad—Route* 5, *Section* —*," and must be delivered to the Commission or its Secretary; and in the presence of the person submitting the proposal, it will be deposited in a sealed box in which all proposals will be deposited. No proposal will be received or deposited unless accompanied by a separate certified check for each section bid upon, drawn upon a national or state bank or trust company having its principal office in The City of New York, satisfactory to the Commission and payable to the order of the Comptroller of The City of New York for the amount herein specified for the section for which a proposal is made. Such check must not be enclosed in the envelope containing the proposal.

The Unit Prices must not be improperly balanced, and any bid which the Commission considers detrimental to the City's interests may be rejected.

No proposal, after it shall have been deposited with the Commission, will be allowed to be withdrawn for any reason whatever.

The award of the contract or contracts will be made by the Commission as soon as practicable after the opening of the proposals.

Bidders whose proposals are otherwise satisfactory, in case the sureties named by them are not approved by the Commission, may substitute in their proposals the names of other sureties approved by the Commission, but such substitution must be made within five days after notice of disapproval, unless this period is extended by the Commission.

A bidder whose proposal shall be accepted shall, in person or by duly authorized representative, attend at the said office of the Commission within ten days after the delivery of a notice by the Commission that his proposal is accepted and that the contract is consented to by the Board of Estimate and Apportionment, and such bidder shall then deliver a contract in the form referred to, duly executed and with its execution duly proved.

At the time of the delivery of the contract, the Contractor will be required to furnish security to the City by giving a bond for the amount hereinafter stated. The Contractor's bond must be in the form annexed to the form of contract.

In addition and as further security to the City, ten (10) per cent. of the amount certified from time to time to be due to the Contractor will be retained until the work is fully completed and accepted.

Schedule Indicating Time Allowed for Completion, the Amount of Bond and the Amount of Certified Check for Each of the Several Sections.

Route 5.	Time for Completion, Months.	Amount of Bond.	Amount of Certified Check.
Section 1	42	$500,000 00	$15,000 00
Section 2	42	600,000 00	15,000 00
Section 2A	42	250,000 00	10,000 00
Section 3	42	300,000 00	10,000 00
Section 4	36	300,000 00	10,000 00
Section 5	42	300,000 00	10,000 00
Section 6	42	350,000 00	10,000 00
Section 7	42	350,000 00	10,000 00
Section 8	42	300,000 00	10,000 00
Section 9	42	300,000 00	10,000 00
Section 10	42	300,000 00	10,000 00
Section 11	42	300,000 00	10,000 00
Section 12	42	400,000 00	12,500 00
Section 13	42	400,000 00	12,500 00
Section 14	42	500,000 00	15,000 00
Section 15	42	500,000 00	15,000 00

In case of failure or neglect to execute and deliver the contract or to execute and deliver the required bond, such bidder will, at the option of the Commission, be deemed either to have made the contract or to have abandoned the contract. In the latter case, the Commission will give notice thereof to such defaulting bidder, and the Commission may thereupon proceed to make another contract with such, if any, of the original bidders, as, in the opinion of the Commission, it will be to the best interests of the City to contract with, or may by new advertisement invite further

proposals. The defaulting bidder shall thereupon be liable to the City for all loss and damage by it sustained, including the excess, if any, of the amount it shall pay any other Contractor over the amount of the bid of such defaulting bidder.

---

*To be filled in with the Section number for which the proposal is made.

If the Commission shall give notice to any bidder that his or its proposal is accepted and that the contract is consented to by the Board of Estimate and Apportionment, and if the bidder shall fail within ten days thereafter or within such further period, if any, as may be prescribed by the Commission, to execute and deliver the contract and to execute and deliver the bond with sureties, then this Invitation to Contractors and proposal accepted as aforesaid shall be a contract binding the bidder to pay to the City the damage by it sustained by reason of such failure, and in such case the bidder shall, by the terms of the proposal, absolutely assign to the City the ownership of the check accompanying his or its proposal as a payment on account of such damages.

All such deposits made by bidders whose proposals shall not be accepted by the Commission will be returned to the person or persons making the same within five days after the contract shall be executed and delivered. The deposit of the successful bidder will be returned when the contract is executed and its provisions as to security are complied with.

The right to reject any and all bids is reserved.

New York, September 1, 1910.

PUBLIC SERVICE COMMISSION FOR THE FIRST DISTRICT, by WILLIAM R. WILLCOX, Chairman; TRAVIS H. WHITNEY, Secretary.

RAPID TRANSIT RAILROAD.

Contract, Route 5, Section 11.

Agreement, made this............day of..............., 1910, between The City of New York, hereinafter called the City, acting by the Public Service Commission for the First District, hereinafter called the Commission, party of the first part, and Bradley Contracting Company of.......... hereinafter called the Contractor, party of the second part.

Whereas, The Commission in behalf of the City by due advertisement, pursuant to law, has invited contractors to submit to the Commission proposals for making this contract; and

Whereas, The Contractor has thereupon duly submitted to the Commission a proposal, which has been accepted; and

Whereas, The Board of Estimate and Apportionment of The City of New York has consented to this contract;

Now, therefore, in consideration of the mutual covenants and agreements hereinafter contained, and under the authority of chapter 4 of the Laws of 1891, entitled, "An Act to provide for Rapid Transit Railways in Cities of over One Million Inhabitants," and of the various acts amending the same, the parties do hereby, the City for itself and its successors and the Contractor for itself, its successors and assigns, agree each with the other as follows:

I.—GENERAL PROVISIONS AND DEFINITIONS.

Outline of Contract.

Article 1. The Contractor agrees to construct the part hereinafter described of a Rapid Transit Railroad, with its appurtenances. The City agrees to pay to the Contractor the sums of money hereinafter mentioned at the times and in the manner and upon the terms and conditions hereinafter set forth.

Brief Description of Works.

Article 2. The Railroad to be constructed under this contract forms a part of a certain route adopted by the Board of Rapid Transit Railroad Commissioners for The City of New York on May 12, 1905, and which, as modified, is known as the Lexington Avenue Route—or Route No. 5. The part to be constructed under this contract consists of

Section 11—93d Street to 106th Street.

11. Beginning at a point about 50 feet south of the centre line of 93d street, thence under Lexington avenue to a point about 70 feet south of the centre line of 106th street; with stations at East 96th and at East 102d and East 103d streets.

The precise location of the tracks, and the dimensions and other characteristics of the railroad are more fully stated in the specifications forming a part of this contract, and in the detailed drawings and plans hereinafter mentioned.

Statutes Incorporated Herein.

Article 3. This contract is made pursuant to the Rapid Transit Act, which is to be deemed a part hereof as if it were incorporated herein.

Marginal Notes, etc.

Article 4. Titles, headings, running headlines and marginal notes are printed hereon merely for convenience and shall not be deemed to be any part of this contract for any purpose whatever.

Definitions of Words.

Article 5. The following words and expressions used in this contract shall, except where by the context it is clear that another meaning is intended, be construed as follows:

"City."

(1) The word "City" to mean The City of New York, and any other corporation or division of government to which the ownership, rights, powers and privileges of The City of New York, under the Rapid Transit Act, shall hereafter come, belong or appertain.

"Commission."

(2) The word "Commission" to mean the Public Service Commission for the First District, and any other board, body, commission, official or officials, to which or to whom the powers now belonging to the said Commission in respect to the location, construction, equipment, maintenance and operation of Rapid Transit Railroads under the provisions of the Rapid Transit Act shall, by virtue of any act or acts, hereafter pass or be held to appertain.

"Contractor."

(3) The word "Contractor" to mean the party of the second part to this contract, and its successors, and any and every person or corporation who or which shall at any time be liable in the place or for the party of the second part to perform any obligations under this contract assumed by the said party of the second part. For convenience the Contractor is hereinafter referred to as if the Contractor were an individual. The word "he" shall, as the sense may require, include "it," "she" and "they;" the word "him" shall include "her," "it" and "them;" and the word "his" shall include "its," "her" and "their."

"Comptroller."

(4) The word "Comptroller" to mean the Comptroller of The City of New York, and the officer or board to whom or to which his powers now existing under the Rapid Transit Act shall come to appertain.

"Engineer."

(5) The word "Engineer" to mean the Chief Engineer of the Commission or his duly authorized representative and any successor or successors duly appointed or any deputy or substitute for him who shall be appointed by the Commission or by its authority.

"Rapid Transit Act."

(6) The words "Rapid Transit Act" to mean chapter 4 of the Laws of 1891 as amended by chapters 102 and 556 of the Laws of 1892, chapters 528 and 752 of the Laws of 1894, chapter 519 of the Laws of 1895, chapter 729 of the Laws of 1896, chapter 616 of the Laws of 1900, chapter 587 of the Laws of 1901, chapters 533, 542, 544 and 584 of the Laws of 1902, chapters 562 and 564 of the Laws of 1904, chapters 599 and 631 of the Laws of 1905, chapters 472, 606 and 607 of the Laws of 1906, chapter 429 of the Laws of 1907, chapter 498 of the Laws of 1909, and chapters 205, 504, 505 and 506 of the Laws of 1910, or as heretofore otherwise amended.

"Railroad."

(7) The word "Railroad" to mean the part which the Contractor agrees by this contract to build, together with the station or stations to be built in conjunction therewith, and all appurtenances thereto which are to be constructed or provided by the Contractor.

"The Works."

(8) The words "the Works" to mean all of the matters and things herein agreed to be furnished or done by or on the part of the Contractor.

"New York."

(9) The words "New York" to mean The City of New York according to its boundaries at the date of this contract.

"Daily Newspaper."

(10) The words "daily newspaper" to mean any paper regularly published in New York on every day or every day except Sundays and holidays.

"Notice." "Direction."

(11) The word "notice" to mean a written notice. The word "direction" to mean a written direction.

Wherever in the specifications or upon the drawings the words "directed," "required," "permitted," "ordered," "designated," "prescribed" or words of like import are used, it shall be understood that the direction, requirement, permission, order, designation or prescription of the Engineer is intended, and similarly the words "approved," "acceptable," "satisfactory" or words of like import shall mean approved by or acceptable or satisfactory to the Engineer.

Legal Address of Contractor. Address May be Changed. Service Upon Contractor Personally.

Article 6. The address given in the bid or proposal, upon which this contract is founded, is hereby designated as the place where all notices, directions and other communications to the Contractor shall be certified, mailed or delivered. The delivering at the above-named place or depositing in a post-paid wrapper directed to the above place, in any post office box regularly maintained by the Post Office Department, of any notice, letter or other communication to the Contractor, shall be deemed sufficient service thereof upon the Contractor. Such address may be changed at any time by an instrument in writing executed and acknowledged by the Contractor and delivered to the Commission. Nothing herein contained shall be deemed to preclude or render inoperative the service of any notice, direction or other communication upon the Contractor personally.

Contractor Responsible for Acts of Subcontractor's Employees.

Article 7. If the Contractor shall cause any part of this contract to be performed by a subcontractor, the provisions of this contract shall apply to such subcontractor and his officers, agents and employees in all respects, as if he and they were employees of the Contractor; and the Contractor shall not be in any manner thereby discharged from his obligations and liabilities hereunder, but shall be liable hereunder for all acts and negligence of the subcontractor, his officers, agents and employees as if they were employees of the Contractor. The employees of the subcontractor shall be subject to the same provisions hereof as employees of the Contractor; and the work or materials furnished by the subcontractor shall be subject to the provisions hereof, as if furnished directly by the Contractor.

Commission May Disapprove Subcontractors.

Article 8. The Contractor, before making any subcontract of the work, shall state in writing to the Commission the name of the proposed subcontractor, the portion of the work which such subcontractor is to do or the materials which such subcontractor is to furnish, the place of business of such subcontractor and such other information as the Commission may require. The Commission shall have the right to require the Contractor not to award any subcontract to a person, firm or corporation disapproved by the Commission.

II.—WORK TO BE DONE, PRICE, ETC.

Work to be Done.

Article 9. The Contractor shall do all the work and furnish all the materials, plants, tools and appliances necessary or proper for performing and completing the work of constructing the railroad in the manner and within the time hereinafter specified. He shall complete the railroad and do all the work and furnish all labor and materials in and about the construction of the railroad to the satisfaction of the Commission and in accordance with this contract and the specifications and drawings herein mentioned at the prices herein agreed upon and fixed therefor; provided, however, the said contract drawings may from time to time be altered or modified as hereinafter provided.

Construction Includes Sewer and Other Incidentals.

Article 10. In order to construct the railroad it will be necessary to take up and relay the sidewalk pavement or other surface material, and to lay and maintain a temporary pavement in the roadway, to protect, support and maintain during construction all buildings and other structures, including their foundations, and all elevated and surface and subsurface railroads, water mains, gas pipes, electric subways, poles and wires, pneumatic tubes, steam pipes, vaults, including vaults of abutting property, and other surface, subsurface and overhead structures, together with their necessary connections, as the same may be met with along the route; to build sewers both along the route and other streets; to make or remake the necessary manholes, catch basins

and other sewer connections therewith; to move, alter, readjust or rebuild water mains, gas pipes, electric subways, pneumatic tubes, steam pipes, vaults, including vaults of abutting property, and other subsurface structures, together with their necessary connections; and to do all such additional and incidental work as may be necessary for the completion of the railroad and the reconstruction and restoration of the street pavements or other surfaces (except as herein provided in respect of temporary pavements for roadways), adjacent to the route of the railroad and which may have been directly or indirectly disturbed or injured by the Contractor in the progress of the work of construction, to as useful and good a condition as existed before construction shall have been begun. All such work of every description, including underpinning wherever necessary, of all buildings or structures of whatsoever nature, monuments, elevated railroads and surface and subsurface railroads affected by or interfered with during the construction of the railroad, is part of the work which is included in this contract and which the Contractor agrees to perform for the prices herein agreed upon.

Prices.

Article 11. The City will pay and the Contractor shall receive in full compensation for furnishing the necessary plant and all the materials and labor, and for performing and completing all the work which is necessary or proper to be furnished or performed in order to complete the railroad (including all incidental work) and also for all loss or damage arising out of the nature of the work aforesaid, or from the action of the elements or from any unforeseen obstruction or difficulty encountered in the prosecution of the work, and for all risks of any description connected with the work, and for all expenses incurred by or in consequence of the suspension or discontinuance of the work as herein specified, the following prices, to wit:

Schedule of Unit Prices.

Item 1. For earth excavation above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., the sum of three dollars and fifty cents ($3.50) per cubic yard.

Item 2. For earth excavation below mean high water (except excavation for sewers and pipes), including the disposal of it, etc., the sum of nine dollars ($9) per cubic yard.

Item 3. For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., the sum of five dollars ($5) per cubic yard.

Item 3-A. For rock excavation for sewers and pipes, including the disposal of it, etc., the sum of six dollars ($6) per cubic yard.

Item 4. For underpinning buildings, including all incidental work and material, as follows:

(a) For buildings less than seven (7) stories in height the sum of one hundred and fifty dollars ($150) per linear front foot of building underpinned.

(b) For buildings from seven (7) to twelve (12) stories in height the sum of two hundred dollars ($200) per linear front foot of building underpinned.

Item 5. For tunnel excavation (except tunneling for sewers), including the disposal of material, timbering, etc., the sum of nine dollars ($9) per cubic yard.

Item 6. For concrete masonry, in place, the sum of ten dollars ($10) per cubic yard.

Item 7. For protective concrete masonry, in place, outside of waterproofing, the sum of eight dollars ($8) per cubic yard.

Item 8. For rubble stone masonry, in place, the sum of eight dollars ($8) per cubic yard.

Item 9. For brick masonry, in place, the sum of fifteen dollars ($15) per cubic yard.

Item 10. For hollow terra cotta brick masonry, in place, the sum of fifteen dollars ($15) per cubic yard.

Item 11. For grout of Portland cement, the sum of four dollars and fifty cents ($4.50) per barrel of Portland cement used.

Item 12. For timber piles, in place and prepared, the sum of one dollar and twenty-five cents ($1.25) per lineal foot.

Item 13. For timber foundations, placed and fastened, the sum of seventy-five dollars ($75) per thousand feet, board measure.

Item 14. For broken stone or gravel, in place, other than that used in concrete, the sum of two dollars and fifty cents ($2.50) per cubic yard.

Item 15. For waterproofing, treated woven fabric, laid with pitch or asphaltum, in place, as follows:

(a) For one-ply, the sum of seventy-five cents ($0.75) per square yard.

(b) For two-ply, the sum of one dollar ($1) per square yard.

(c) For three-ply, the sum of one dollar and fifty cents ($1.50) per square yard.

(d) For four-ply, the sum of one dollar and seventy-five cents ($1.75) per square yard.

(e) For five-ply, the sum of two dollars ($2) per square yard.

(f) For six-ply, the sum of two dollars and fifty cents ($2.50) per square yard.

Item 16. For waterproofing, brick laid in asphalt mastic, in place, the sum of thirty dollars ($30) per cubic yard.

Item 17. For vitrified or cast iron drain pipe, in place, as follows:

(a) For twelve (12) inch vitrified pipe, the sum of one dollar and seventy-five cents ($1.75) per linear foot.

(b) For ten (10) inch vitrified pipe, the sum of one dollar and fifty cents ($1.50) per linear foot.

(c) For eight (8) inch vitrified pipe, the sum of one dollar and twenty-five cents ($1.25) per linear foot.

(d) For six (6) inch vitrified pipe, the sum of one dollar ($1) per linear foot.

(e) For four (4) inch vitrified pipe, the sum of seventy-five cents ($0.75) per linear foot.

(g) For six (6) inch cast iron pipe, the sum of one dollar and fifty cents ($1.50) per linear foot.

(h) For four (4) inch cast iron pipe, the sum of one dollar ($1) per linear foot.

Item 18. For tunnel ducts in place as required by section 305 of the specifications, the sum of fifteen cents ($0.15) per duct foot.

Item 19—For riveted steel, painted and erected, the sum of ninety dollars ($90) per ton of two thousand pounds.

Item 20. For steel beams and shapes with connections, painted and erected, the sum of eighty dollars ($80) per ton of two thousand pounds.

Item 21. For steel rods and bars built in concrete, the sum of sixty-five dollars ($65) per ton of two thousand pounds.

Item 25. For miscellaneous iron castings, other than tunnel lining, such as manhole heads and covers, gratings, etc., but not including castings for sewer work or pipes, in place, the sum of seventy-five dollars ($75) per ton of two thousand pounds.

Item 26. For wire mesh, in place, the sum of ten cents ($0.10) per pound.

Item 27. For one and one-half (1½) inch galvanized iron pipe hand-rail, in place, including expansion bolts, etc., the sum of one dollar and twenty-five cents ($1.25) per linear foot.

Item 28. For steel gratings, for ventilation, in place, including frames, etc., the sum of two dollars and fifty cents ($2.50) per square foot.

Item 29. For vault lights, in place, the sum of two dollars ($2) per square foot.

Item 30. For street surface restored:

(a) For street surface, except roadways, the sum of three dollars ($3) per square yard.

(b) For temporary restoration and maintenance of roadways, the sum of three dollars ($3) per square yard.

Item 32. For wrought-iron or fibre electric conduits, in place, in stations as follows:

(a) For three-fourths (¾) inch wrought-iron conduits, the sum of thirty cents ($0.30) per linear foot.

(b) For one and one-half (1½) inch wrought-iron conduits the sum of forty-five cents ($0.45) per linear foot.

(c) For two (2) inch wrought-iron conduits the sum of sixty cents ($0.60) per linear foot.

(d) For two (2) inch fibre conduits the sum of fifteen cents ($0.15) per linear foot.

Item 33. For cast-iron outlet boxes, in place, in stations, the sum of one dollar ($1) each.

Item 34. For six (6) inch cast-iron pipe and fittings including specials "extra heavy" in place, in stations, the sum of two dollars and fifty cents ($2.50) per linear foot.

SEWERS—ITEMS 37 TO 74.

Vitrified and Cast-iron Pipe—Items 37 *to* 43.

Item 38. For fifteen (15) inch vitrified pipe sewer, the sum of six dollars ($6) per linear foot.

Item 42. For cast-iron sewer pipe (straight pipe) in place in the work, the sum of fifty dollars ($50) per ton of two thousand pounds.

Egg-shaped Brick or Concrete Sewers—Items 44 *to* 51.

Item 45. For 3 feet 6 inches by 2 feet 4 inches, the sum of fifteen ($15.00) dollars per linear foot.

Item 46. For 3 feet 9 inches by 2 feet 6 inches, the sum of fifteen dollars ($15) per lineal foot.

SURFACE AND SUBSURFACE STRUCTURES—ITEMS 75 AND 76.

Item 75. For street surface railroads, including the support, reconstruction, rebuilding, etc., where necessary (but not including permanent masonry supports, if required and added, and not including additional vaults, if required and constructed, in excess of the number existing), as follows:

(a) For electric railroads, the sum of eighteen dollars ($18) per linear foot of single track.

(b) For horse railroads, the sum of five dollars ($5) per lineal foot of single track.

PIPES IN STREETS—ITEMS 77 TO 126.

For Work and Material as Called for by Section 71 *of the Specifications.*

Water and Gas Pipes—Items 77 *to* 108.

Water Pipes—Items 77 *to* 88.

For water pipes in place, as follows:

Item 78. For 4-inch water pipe, the sum of one dollar and twenty-five cents ($1.25) per linear foot.

Item 79. For 6-inch water pipe, the sum of one dollar and fifty cents ($1.50) per linear foot.

Item 82. For 12-inch water pipe, the sum of two dollars ($2) per linear foot.

Item 88. For 48-inch water pipe, the sum of five dollars ($5) per lineal foot.

Gas Pipes—Items 89 *to* 99.

For gas pipes in place, as follows:

Item 90. For 4-inch gas pipe, the sum of one dollar ($1) per linear foot.

Item 91. For 6-inch gas pipe, the sum of one dollar and twenty-five cents ($1.25) per linear foot.

Item 92. For 8-inch gas pipe, the sum of one dollar and fifty cents ($1.50) per linear foot.

New Cast-Iron Hub and Spigot Water and Gas Pipe.

Items 100 *and* 101.

Item 100. For new cast-iron hub and spigot straight pipe delivered on the work, the sum of forty dollars ($40) per ton of 2,000 pounds.

Item 101. For new cast-iron hub and spigot pipe, special castings, delivered on the work the sum of seventy dollars ($70) per ton of two thousand pounds.

DUCTS IN STREETS.

Electric Ducts and Conduits in Streets.

(Other than tunnel ducts and street railroad ducts which are provided for in Items 18 and 75-a.)

Item 127. For electric ducts and conduits in place, as provided in section 71-a of the Specifications, the sum of twenty-five cents ($0.25) per duct foot.

Work Not Susceptible of Classification.

Article 12. In case any work or materials shall be required to be done or furnished in or about the works—whether specified herein or indicated on the plans or not—which are not susceptible of classification under the Schedule of Unit Prices, the Contractor shall and will if ordered by the Engineer do and perform such work and furnish such materials at and for the actual and necessary net cost in money to the Contractor for labor and for material, where new material is used, and in addition thereto ten per centum (10%) of such net cost for the use of tools and plant, superintendence and all other expenses incidental to the performance of such work and the furnishing of such material, and the Contractor shall have no further claim in excess of the above, but this method of payment shall not apply to the performance of any work or the furnishing of any material which in part or in whole is susceptible of classification under such schedule, which work or material shall be paid for in part or in whole, as the case may be, at the unit price given in such schedule, except as otherwise herein expressly provided.

In case any work or material shall be required to be done or furnished under the provisions of this article, for cost plus ten per centum (10%), the Contractor shall at the end of each day during the progress thereof furnish to the Engineer daily time slips showing the name and number of each workman employed thereon, the number of hours employed thereon, the character of work he is doing and the wages paid or to be paid to him and also a daily memorandum of the material delivered on the work showing the amount and character of such material, from whom purchased and the amount paid or to be paid therefor. If required, the Contractor shall produce any books, vouchers, records or memorandum showing the work and materials actually paid for and the actual prices therefor.

Quantities Approximate Only.

Article 13. It is expressly understood and agreed that the quantities of the various classes of work to be done and materials to be furnished under this contract, specified in the Contractor's Proposal, are approximate and only for the purpose of comparing, on a uniform basis, the bids offered for the works under this contract; and neither the City, nor the Commission, nor any member of the Commission, is to be held responsible that any of the said estimated quantities shall, by reason of inaccuracies, or changes in the works, be found even approximately correct in the construction of the works; and the Contractor shall make no claim for anticipated profit, or for loss of profit, because of a difference between the quantities of the various classes of work actually done or materials actually delivered, and the estimated quantities stated in the Contractor's Proposal.

Right of Commission to Amplify Plans.

Article 14. The Commission shall have the right, during the progress of the work, to amplify the plans, to add explanatory specifications and to furnish additional specifications and drawings.

Plans May be Modified.

Article 15. The Commission further reserves the right to change the location and to alter, in any way it may deem necessary for the public interest, the drawings aforesaid, in part or altogether, at any time during the progress of the work, without constituting grounds for any claim by the Contractor for payment or allowance for damages

or extra service other than is provided for items of the different classes of construction shown in the schedule, or where not susceptible of classification, then as otherwise provided herein.

Contractor Bound to Complete in Best Manner.

Article 16. The Contractor shall complete the entire work in accordance with the specifications and contract drawings and according to the other provisions of this contract and within the times specified in this contract, in the most workmanlike manner and with the highest regard to the safety of life and property and according to the lines, levels and directions given by the Engineer, for the prices herein agreed upon.

Best Materials, Machinery, Tools, etc., to be Used.

Article 17. The Contractor shall furnish of the best description all materials, machinery, implements, tools and labor necessary to construct and put in complete working order all work covered by the specifications, contract drawings and provisions of this contract, including all additional specifications, drawings and details issued or required as herein provided for the prices hereinbefore agreed upon.

Contractor Has Examined Location, Plans, etc.

Article 18. The Contractor hereby represents that prior to the execution of this contract he has examined in detail on the ground the location mentioned herein and indicated on the plans, and that he has fully examined the plans and has read each and every clause and section of this contract and the specifications and has had full opportunity to consider the same and make necessary investigations relating thereto; and he agrees that he will not make any claim for, or have any right to, damages or an extension of time for completion of the works, or any other concession, because of any misinterpretation or misunderstanding of this contract or the specifications or of the plans, or because of any lack of information.

No Acceptance to Obviate the Necessity for Sound Work, etc.

Article 19. No acceptance of any part of the works or of materials therefor shall relieve the Contractor of his obligation to furnish sound material and perform sound work, whether with respect to such part or to any part of the works.

Inspection.

Article 20. The Commission contemplates, and the Contractor hereby approves, the most thorough and minute inspection by the Commission and its Engineer, and by their representatives or subordinates of all work and materials and of the manufacture or preparation of such materials from the beginning of construction to the final completion of the works. It is the intention of the Commission that its Engineer shall draw the attention of the Contractor to all errors or variations from the requirements of this contract or other defects in workmanship or materials. But it is expressly agreed that no omission on the part of the Commission or its Engineer or any officer, member or subordinate of the Commission to point out such errors, variations or defects shall give the Contractor any right or claim against the City or shall in any way relieve the Contractor from his obligations according to the terms of this contract.

Contractor to Afford Facilities for Inspection.

Article 21. The Contractor shall at all times give to the Commission and its members, to the Engineer and his assistants and subordinates, and any person designated by the Commission or its Chairman, all facilities, whether necessary or convenient, for inspecting the materials to be furnished and the work to be done under this contract. The members of the Commission, the Engineer and all employees of the Commission bearing his authorization or the authorization of the Commission or its Chairman, shall be admitted at any time summarily and without delay to any part of the works or to inspection of materials at any place or stage of their manufacture, preparation, shipment or delivery.

Engineer to be Furnished Facilities.

Article 22. The Engineer shall be furnished with every reasonable facility for ascertaining whether the work is in accordance with the requirements and intention of this contract, even to the extent of uncovering or taking down portions of finished work. Should the work thus exposed or examined prove satisfactory; the uncovering or taking down and the replacing of the covering or the making good of the parts removed shall be paid for at the contract prices for the class of work done; but should the work exposed or examined prove unsatisfactory, such uncovering, taking down, replacing and making good shall be at the expense of the Contractor.

Inspection Not to Relieve Contractor of Obligations.

Article 23. The inspection of the work shall not relieve the Contractor of any of his obligations to fulfill his contract as herein prescribed, and defective work shall be made good and unsuitable materials will be rejected, nothwithstanding that such work and materials have been previously overlooked by the Engineer and accepted or estimated for payment. If the work, or any part thereof, shall be found defective before the final acceptance of the whole work, the Contractor shall forthwith make good such defect, in a manner satisfactory to the Engineer, and if any material brought upon the ground for use in the work, or selected for the same, shall be condemned by the Engineer as unsuitable or not in conformity with the specifications, the Contractor shall forthwith remove such materials.

Engineer's Determination to be Final and Conclusive Upon Contractor.

Article 24. To prevent disputes and litigations, the Engineer shall in all cases determine the amount, quality, acceptability and fitness of the several kinds of work and materials which are to be paid for under this contract; shall determine all questions in relation to the works and the construction thereof, and shall in all cases determine every question which may arise relative to the fulfillment of this contract on the part of the Contractor. His determination and estimate shall be final and conclusive upon the Contractor, and in case any question shall arise between the parties hereto, touching this contract, such determination and estimate shall be a condition precedent to the right of the Contractor to receive any money under this contract.

Engineer to Explain.

Article 25. The Engineer shall make all necessary explanations as to the meaning and intention of the specifications, shall give all orders and directions contemplated therein or thereby and in every case in which a difficult or unforeseen condition shall arise in the performance of the work required by this contract.

Other Contractors.

During the progress of the work it will be necessary for other contractors and persons to do work in or about the construction or equipment of the railroad. The Contractor shall afford such other contractors or persons such facilities as the Engineer may require.

Differences Between Contractor and Other Contractors.

Any differences or conflicts which may arise between the Contractor and other contractors of the Commission in regard to their work shall be adjusted and determined by the Engineer.

Substitute for Chief Engineer.

Article 26. Any engineer substituted by the Commission in place of the Chief Engineer during his absence, illness or inability or when the Commission shall so determine, shall, during his official connection, have all the power and authority of the Chief Engineer, and in all respects be recognized as such Chief Engineer.

III.—Specifications.

Specifications and Drawings Subject to Requirement of Railroad of Highest Class.
Where Text of Contract Doubtful, Best Materials and Workmanship Required.

Section 1. The specifications and contract drawings hereinafter mentioned and taken in connection with the other provisions of this contract. are intended by the Commission to be full and comprehensive, and to show all the work required to be done. But in a work of this magnitude it is impossible either in advance to show all details, or precisely to forecast all exigencies The specifications and contract drawings are to be taken, therefore, as indicating the amount of work, its nature and the method of construction so far as the same are now distinctly apprehended. The Railroad is intended to be constructed for actual use and operation as an interurban railroad of the highest class, adapted to the necessities of the people of New York, in the best manner, according to the best rules and usages of railroad construction, and in the event of any doubt as to the meaning of any portion or portions of the specifications or contract drawings, or of the text of the contract, the same shall be interpreted as calling for the best construction, both as to materials and workmanship, capable of being supplied or applied under the then existing local conditions. All the clauses of the specifications, and all the parts of the contract drawings, are, therefore, to be understood, construed and interpreted as intending to produce the results hereinbefore stated.

To Construct in Accordance With Specifications.

Section 2. The Contractor shall construct and complete the Railroad strictly in accordance with the requirements of these specifications; if, in the specifications or contract, any detail or other matter or thing requisite be not mentioned, nevertheless the same is deemed to be included and the Contractor hereby undertakes to do the same as part of the work hereunder, at the unit prices for each class of work where applicable or as provided in Article XII. of the contract.

Maps and Drawings.

Section 3. The contract plans referred to in the contract and specifications bear date June 15, 1910, are each countersigned by the Engineer, are stamped with the seal of the Commission, bear the general title:

Route No. 5.

Contract Drawing No. ....

and are designated or numbered as follows:

General Notes; Map and Profile; Nos. A13, B25, B26, B101, B102, C1 to C19, inclusive, C1010, C1015, C401, C1032.

Plans and Contract Drawings.

Section 4. The sections and dimensions shown on the contract drawings are typical sections and dimensions which should be applicable to the greater part of the work. Where, however, changes are deemed necessary they may be ordered under Article XV. of the contract and the Engineer shall issue such plans and specifications as may be necessary.

Supplementary Drawings.

Section 5. In addition to the contract drawings already mentioned, the Commission has had prepared a set of maps and plans, bearing the same seal and general title as the contract drawings, but designated as supplementary drawings. These supplementary drawings exhibit certain information which the Commission has received from its Engineer of the nature of the soil underlying portions of the route, the nature and position of elevated and surface railways, water mains, gas and other pipes, sewers, electric subways, manholes, hydrants, catch basins and other surface and subsurface structures.

Supplementary Drawings May be Examined.

Section 6. These supplementary drawings, for each section of the work, can be seen at the office of the Engineer, also samples of material taken in connection with test borings. They are exhibited to the Contractor without any guarantee on the part of the Commission as to their completeness or correctness. The Contractor may have copies (blue prints) of these drawings for one or more of the sections, for such aid, if any, as may be derived from them, on the payment of the cost of printing.

In Case of Difficulties Not Indicated on Supplementary Drawings.

Section 7. If, upon opening the streets, by tunneling or otherwise, difficulties of any nature be encountered which are not indicated or suggested by the supplementary drawings, or by the samples of the test borings, or if additional surface or subsurface structures or obstructions be discovered or found of different size or in different positions or of different nature from those shown on the supplementary drawings, or if in any way such supplementary drawings be found erroneous, the Contractor shall take every necessary or proper precaution to overcome the unforeseen difficulty, and is to support, maintain, protect, remove, adjust or readjust, as the case may be, the additional or different surface or subsurface structures according to the direction of the Engineer, and as provided in this contract and these specifications.

Specifications Not Exclusive.

Section 8. It is expressly understood that the specifications do not include all requirements, but are requirements in addition to those heretofore or elsewhere given or provided in this contract. The specifications and other provisions of this contract, and the contract drawings, are intended to be explanatory of each other. Should, however, any discrepancy appear or any misunderstanding arise as to the import of anything contained in either, the explanation of the Engineer shall be final and conclusive.

Section 9. These specifications arer grouped in subdivisions as follows:

PAGE
1. Description of the Work ... 76
2. General Clauses ... 77
3. Manner of Prosecution and Maintenance of Traffic ... 88
4. Street Railroad Tracks, Mains and Other Surface or Subsurface Structures 96
5. Excavation ... 102
6. Tunneling ... 112
7. Backfiling ... 120
8. Piling and Timbering ... 121
9. Cement ... 123
10. Bortar ... 127
11. Masonry ... 128
12. Concrete ... 130
13. Brick Masonry ... 137
14. Stone Masonry ... 139
15. Waterproofing ... 140
16. Steel and Iron ... 145
17. Painting ... 157
18. Ducts and Conduits ... 160
19. Drains and Pumps ... 167
20. Sewers ... 171
21. Requirements for Pipes ... 197
22. Street Surface and Park Surface Restored ... 206
23. Vault Lights, Gratings and Hand-rails ... 209

1—Brief Description of the Work.

General Nature.

Section 10. The Rapid Transit Railroad which is hereinbefore described is to be an underground railroad or subway, the general details of construction and the location of the various tracks, junctions, grades, etc., being indicated more particularly on the contract drawings.

Stations to be Constructed.

Section 11. Stations are to be constructed at such places as are indicated on the plans, but station finish work is not included in the work to be done under this contract. Station construction must, however, be kept so advanced that station finish contractors can complete their work coincidently with the completion of the Railroad.

Surface and Subsurface Structures.

Section 12. In addition to the construction of the Railroad, it will be necessary to do various incidental work which is generally referred to in Article X hereof.

Ventilating Chambers and Gratings.

Section 13. In order to provide for a frequent renewal of air in the Railroad, chambers for the installation of necessary ventilating devices shall be built at the sides of the Railroad and in connection therewith. These chambers shall be generally of the form and dimensions as shown on the plans, varying somewhat with the requirements of local conditions. They will be so arranged that the air will discharge through gratings placed generally in the sidewalks in the roofs of the chambers. If, owing to local conditions, it becomes necessary to lead the air to gratings or other outlets away from the chambers, suitable air-ways, ducts or flues shall be constructed.

The chambers will be built at the places and as indicated on the plans.

Section 14. Other openings with gratings will be built at or over the stations, for the purpose of admitting air to the Railroad.

Section 15. The chambers will be provided with suitable doors or openings, and with ladders reaching to the street for use as exits in case of emergency.

2—General Clauses.

Prevention of Water Percolation.

Section 16. It is the very essence of these specifications to secure a railroad structure underground which shall be free from the percolation of ground or outside water. The mixing and placing of the concrete and the placing and protection of the waterproofing shall be with this end in view.

Best Quality of Work.

Section 17. All materials and workmanship must be of the best class in every respect, and the Engineer is to be the sole judge of their quality and efficiency.

Rapidity and Safety.

Section 18. All the work shall be prosecuted in the manner, according to local conditions, best calculated to promote rapidity in construction, to secure safety to life and property and to reduce to the minimum any interference with abutting property and the public travel. Decking of the streets, paving, or other surface work affecting, or affected by, street traffic shall be prosecuted during such hours as will reduce such interference to a minimum. Night work shall be conducted, in accordance with the directions of the Engineer, so that annoyances to occupants of abutting property shall be reduced to a minimum, and the Engineer may, if in his judgment conditions so require, direct that night work be omitted.

Contract Section Part of System.

Section 19. The contract section embraced in this contract is one of a number of contract sections forming part of an extensive rapid transit railroad system, which the interests of the City imperatively require should be completed and put in operation without delay. If the Contractor shall fail so to prosecute his work that, in the judgment of the Engineer, it shall not be reasonablly probable that the work will be completed within the time limited, the Contractor, if directed by the Commission, shall increase the number of shifts and the number of men in each shift as may be necessary to insure the completion of the work within the time required by this contract, or within the shortest possible time thereafter.

Emergencies.

Section 20. In case of emergencies involving danger to life or property, continuous work with an increased force may be ordered by the Engineer for such time as may be necessary.

Permits.

Section 21. No work shall be begun until the Commission shall issue to the Contractor a permit authorizing him to proceed. No permits for excavation will be issued until the Contractor has given satisfactory assurance to the Engineer that the material needed for construction has been acquired and is available. Such permits are to be in such form and to cover such portions of the work as the Commission shall prescribe.

When to be Filed with Borough President.

Section 22. Before any opening is made in the surface of a street. a copy of the permit issued by the Commission shall have been filed with the Borough President not less than five days, unless the Engineer shall expressly direct work to begin within a less period.

Notice Regarding Commencement of Work.

Section 23. Before commencing work on any part of the route, whether on the Railroad or on the sewers lying off the line of the Railroad, the Contractor shall give notice in writing to the Engineer at least one (1) week in advance of his intention to commence such operations; and before commencing manufacture, or resuming manufacture, if the same has been suspended, of any article called for by these specifications, notice shall be given to the Engineer in writing at least one (1) week in advance, with the name and address of the maker and the amount and description of the material to be manufactured.

Shafts and Dumping Platforms.

Section 24. Plans showing the proposed location, and proposed methods of construction, of shafts, dumping platforms, etc., shall be submitted to the Engineer and receive his approval before permits will be granted for such plant and appliances to be constructed and put in operation.

Ordinances and Regulations.

Section 25. In all operations connected with the Works, all ordinances of the City, and of the Board of Health. so far as they may be valid and operative with respect thereto, and all laws of this State which are now applicable to and control or limit in any way the actions of those engaged in the work or affecting the materials belonging to them, shall be respected and strictly complied with, and the Contractor shall further strictly comply with all applicable Federal, State and Municipal regulations regarding the transportation in and around the City and Harbor of materials used in, or in connection with, the work.

Requirements of Borough President, etc., to be Observed.

Section 26. Whenever the construction of the Works under the provisions of this contract shall interfere with, disturb or endanger any sewer, water pipe, gas pipe, or other duly authorized subsurface structure, the work of construction at such points shall be conducted in accordance with the reasonable requirements of the Borough President or the Commissioner of Water Supply, Gas and Electricity or other officer or local authority having the care of and the jurisdiction or control over such subsurface structures so interfered with, disturbed or endangered.

Building and Water Permits; Shut-offs for Water Pipes, etc.

Section 27. The Contractor shall procure all permits necessary or requisite for the underpinning of buildings and the reconstruction thereof; he shall, at his own cost, provide for the water supply necessary for his work and he shall bear the cost of the service of inspectors required by any municipal department or other public authority in or about the execution of the work other than the inspectors or the employees of the Commission. He shall bear the expense absolutely necessary in the bagging of gas pipes where it is necessary to cut off the supply of same and of the shutting off and restoration of the flow in water mains where such work applies to the maintenance and support thereof as provided in section 70 of the specifications.

Storage on Cross Streets.

Section 29. No material of any nature shall be stored along the streets occupied by the Railroad in Manhattan or on 138th street, in The Bronx. On cross streets adjacent to the work, only such material may be stored as may be necessary, in case of an emergency, to sheet or to support the excavation; or a reasonable amount of such structural material as may be absolutely necessary to avoid delay in construction may be stored; such material must not be allowed to accumulate, but must be replenished from day to day. The amount to be so allowed shall be determined by the Engineer.

Material Stored.

Section 30. Excavated sand, gravel or stone that in the judgment of the Engineer is suitable for use in mortar, concrete, or masonry, also structural and other material to be used in the work, may be stored in such locations and for such periods as are approved by the Engineer.

Approval of Engineer Revocable.

Section 31. In any case material may only be so stored with the approval of the Engineer, revocable at any time; and if so ordered, such material shall be removed immediately on receipt of the order, or within a period of time to be therein stated.

Access to Fire Hydrants.

Section 32. Wherever the work is being carried on, free access must be given to every fire hydrant and fire alarm box, and when required hydrants shall be extended by suitable tube or piping to an accessible point as approved by the Engineer, and to the satisfaction of the Chief of the Fire Department. Materials must not be piled at any time or place within ten (10) feet of any fire hydrant or fire alarm box; and where materials are unavoidably piled or placed in the vicinity of a fire hydrant or fire alarm box, and to such height as to obscure a sight of the same, the position of such hydrant or fire alarm box shall be indicated by suitable signals, both day and night.

Work to be Cleared.

Section 33. At his own expense and as directed from time to time by the Engineer, the Contractor is to clear the work, streets and all public places occupied by him of all refuse and rubbish that may accumulate from any source whatever and leave them in a neat condition.

Assistance to be Rendered to Owners of Buildings.

Section 34. Where access to any adjacent property is temporary cut off, owing to the occupancy of the street by the Contractor, he must, at his own cost. tender every assistance to the owner or occupant in handling such materials of any description, including all material to be removed by the Department of Street Cleaning, that has to be taken to or removed from such property; such material shall be taken to or from the nearest accessible point that in the opinion of the Engineer is convenient for handling.

Waste Material.

Section 35. Waste material of any character will under no conditions be permitted to remain on the streets, but must immediately on its becoming unfit for use in the work be carted away and disposed of by the Contractor as hereinbefore provided; nor shall such materials be allowed to accumulate in the trenches.

Conveniences for Men.

Section 36. Necessary conveniences, properly secluded from public observation, shall be constructed and maintained by the Contractor at his own expense, wherever needed for the use of the Contractor's employees, to the satisfaction of the Engineer and the sanitary authorities.

Fences.

Section 37. Wherever necessary the Contractor shall erect and maintain at his own expense fences for the protection of adjoining property and of the adjoining public places.

Advertisements Forbidden.

Section 38. The using of fences and buildings during construction for advertising purposes, other than the name and address of the Contractor, is forbidden; all temporary buildings and fences erected by the Contractor shall be neat in appearance and shall be painted as directed by the Engineer.

Barricades.

Section 39. Barricades and bridges shall be erected by the Contractor at his own cost, for the protection of the work or use of the public; they shall be substantial in character and neat in appearance.

Detailed Drawings.

Section 40. The Engineer will prepare and furnish to the Contractor, from time to time as required, drawings and plans amplifying such details of the contract drawings as may be necessary, and drawings and plans necessary to show the adjustment and reconstruction of all surface and subsurface structures wherever the reconstruction of the same is necessitated by the construction of the railroad. These plans must be strictly followed, unless local conditions should develop, during construction, suggesting changes, when, with the approval of the Engineer, such changes may be permitted.

Working and Shop Drawings.

Section 41. The Contractor shall make all working or shop drawings which may be required in addition to the contract drawings, or in addition to such other drawings as the Commission may issue in amplification of such contract drawings, as explained above. All working or shop drawings shall be submitted in duplicate to the Engineer for his approval, which approval shall be indicated by his countersigning one set of such working or shop drawings and returning the same to the Contractor. Should the working or shop drawings be not approved by the Engineer, then the Engineer shall return one set of such working or shop drawings, with the necessary corrections and changes indicated thereon; and the Contractor must make such corrections and changes, and again submit plans in duplicate for the approval of the Engineer; and no work called for by said working or shop drawings shall be done until the approval of the Engineer be obtained, which must be given or refused within ten (10) working days after delivery to him at his office of such plans in duplicate.

Lines and Grades.

Section 42. During the progress of the work the Commission will give, through the Engineer, to the Contractor, suitable points, marks or benches, indicating the line and grade of the Railroad and of the sewers; such points or bench marks to be established at such intervals as the Engineer deems necessary for the Contractor to be able to perform his work. The principal lines and grades are to be given by the Engineer, who may change them from time to time as may be authorized and directed by the Commission. The stakes and marks given by the Engineer shall be carefully preserved by the Contractor, who shall give to the Engineer all necessary assistance and facilities for establishing benches and plugs for making measurements.

Notice, How Given.

Section 43. When the Contractor is absent from any part of the work where it may be necessary to give instructions, orders will be given by the Engineer to, and shall be received and promptly obeyed by, the superintendent or overseer of the Contractor, who may have charge of the particular work in relation to which the orders are given, and a confirmation in writing of such orders will be given to the Contractor by the Engineer if so requested.

Imperfect Work.

Section 44. Any imperfect construction which may be discovered before the final acceptance of the work, shall be corrected immediately on the requirement of the Engineer and at the Contractor's expense, notwithstanding that it may have been overlooked by the proper inspector.

Damaged Work to be Replaced.

Section 45. All work of whatever kind which during its progress and before its final acceptance shall become damaged from any cause, so much of it as may be objectionable shall be broken up or removed and be replaced by good and sound work at the Contractor's expense.

Condemned Materials to be Removed.

Section 46. If any material brought on the ground for use in the work or selected for the same shall be condemned by the Engineer as unsuitable or not in conformity with the specifications, the Contractor shall forthwith remove such materials as may be directed by the Engineer.

Competent Men.

Section 47. The Contractor shall employ only competent, skillful and faithful men to do the work. Whenever the Engineer shall notify the Contractor in writing that in his opinion any man on the work is incompetent, unfaithful or disorderly, such man shall be discharged from the work and shall not again be employed on it.

3—MANNER OF PROSECUTION AND MAINTENANCE OF TRAFFIC.

Access to Buildings, etc.

Section 48. No building shall, without the consent of the occupant, and after notice to the Engineer, be deprived of means of access thereto; and, where streets are open suitable bridges shall be built and maintained, at the Contractor's expense, to permit owners and occupants to reach their premises. Where necessary, proper and easy means for passengers to reach or leave street cars shall be maintained.

Wharves and Docks.

Section 50. For that portion of the route adjoining wharves and docks the work must be so prosecuted as to permit free access to neighboring wharves and docks.

Contiguous Contract Sections.

Section 50-a. On the division line of contiguous contract sections, the Engineer will decide any matters in the details of construction within a limit of ten feet on either side of the line where the work of contractors may be in conflict, and direct which of the contractors shall complete the details of construction within such limits.

Other Portions of the Route.

Section 51. Generally the Contractor will be permitted to conduct its work in the most expeditious manner possible, having due regard for the safety of persons and property and facilities for traffic and under such instructions as the Engineer may give from time to time.

Facilities for Travel.

Section 52. All necessary facilities are to be furnished by the Contractor for the benefit of street travel, both in longitudinal and cross streets.

Decking of Streets and Sidewalks.

Section 53. In order to provide the minimum interference with traffic and the minimum inconvenience to abutting property owners, during the construction of the Railroad, on all parts of the work when the excavation is in trench the streets and sidewalks shall, except as hereinafter specifically provided, be substantially decked or covered over, and every precaution must be taken to keep traffic free from interruption.

Street Intersections.

Section 61. The street intersections, except in cases where open trench excavation without cover is permitted, shall be kept at all times open for traffic for their full width. The street intersections in cases where open trench excavation without cover is permitted must be kept at all times open to traffic for at least one-half the width of the cross roadway, except that cross roadways in which surface railroads are located shall be kept at all times open to traffic for their full width.

Where portions of a street intersection are opened the same shall be substantially and neatly bridged for foot traffic. In all cases the Contractor shall at all times keep all the street crossings on the lines of the sidewalks in a clean and neat condition, bridging gutters and low places where water might collect.

Close Observance of Above Requirements.

Section 62. The Commission will insist upon the close observance of the above requirements, and no departure therefrom will be allowed, excepting upon the written permission of the Commission.

Openings for Ventilation.

Section 63. Wherever the excavations are decked, where gas pipes are maintained in service or where gases are liable to accumulate, suitable openings shall be provided for proper ventilation, or the Contractor may maintain services by temporary mains above the street decking.

Temporary Pipes, etc.

Section 64. Temporary pipes, if laid above the street or sidewalk surfaces, shall be neatly and substantially placed, and in a manner to cause the minimum of inconvenience to the abutting property owners and to the public.

In General.

Section 65. In general, work will, as provided herein, be carried on under covered roadways. In exceptional cases, however, where rock is within a few feet of the street or sidewalk surface, it may be impracticable to operate drills while the street is covered, until a sufficient depth of excavation has been obtained. In such cases such latitude will be allowed the Contractor as may prove absolutely necessary for the execution of its contract, and as the Engineer with the approval of the Commission may deem advisable, after a thorough understanding of the exact conditions and necessities has been determined.

4—STREET RAILROAD TRACKS, MAINS AND OTHER SURFACE OR SUBSURFACE STRUCTURES.

Notice to be Given.

Section 66. Notice is to be given by the Contractor to all companies and the proper City officials, owning or having charge of surface or subsurface structures along any part of the work. of his intention to commence operations along such part of the route, at least one (1) week in advance, and the Contractor shall file with the Engineer at the same time a copy of said notice; and he shall co-operate with the proper officers or officials in charge of such structures and shall furnish them with all reasonable facilities to inspect the methods of caring for their property.

Plans Furnished.

Section 67. In the rearrangement of subsurface structures requiring removal and relaying or reconstruction due to interference with the railroad structure a tentative plan will be made by the Engineer, which will be submitted to the parties interested; if any reasonable changes are then requested by any of the said parties within ten days after the submission of the tentative plan, such changes will then be made, if, in the judgment of the Engineer they will best conserve the interest of all parties concerned; a further plan will then be made which, on the approval of the Engineer, will be final.

Reconstruction or Relaying, etc.

Section 68. Whenever it becomes necessary to cut, move, change, or reconstruct any surface or subsurface structures, or connections therewith, such work shall be done according to the reasonable satisfaction of the owners of such pipes or other structures.

Reasonable Dispatch.

Section 69. All work of reconstruction or alteration shall be done with reasonable dispatch, and facilities are to be provided so that said work will interfere as little as possible with the practical working and use of such structures.

Maintenance, Support, etc.

Section 70. The Contractor shall at all times, by suitable bridging or other supports, maintain and support in an entirely safe condition for the usual service and to the reasonable satisfaction of the owners, all surface and subsurface structures encountered during the prosecution of his work. All surface and subsurface structures and surfaces of whatever character along the line of the work shall be protected from injury, but should any injury occur the Contractor shall fully restore such surface or subsurface structures or surfaces to as good a condition as existed before the injury was done. All the above, including also all changes of surface or subsurface structures made by the Contractor for his own convenience in executing his work, shall be done at the Contractor's own expense and included in the prices stipulated in the schedule for excavation except as otherwise herein specifically provided.

Necessary Permanent Changes of Pipes.

Section 71. Changes of water, gas, steam or other pipes made necessary because of physical interference with the railroad structure, and requiring the removal, relaying or reconstruction of such pipes and their appurtenances in other than the original position, will be paid for at the prices stipulated in Schedule Items 77 to 99, Items 102 to 106, Items 109 to 114, Items 121 and 122, and Item 125. These prices are per linear foot of pipe laid including all work, labor and material incidental to such laying, excepting that:

(1) If new pipes have to be provided and are ordered by the Engineer, such new pipes will be paid for in addition to the price paid for laying, etc., at the prices stipulated in Schedule Items 100 and 101, Items 107 and 108, Items 115 to 120, Items 123 and 124, and Item 126, which prices are to cover the cost of the new pipes delivered on the work.

(2) If the pipes in their new locations are outside of the ordered net lines for excavation for the railroad structure, necessitating additional excavation and restora-

tion of street surface, such excavation will be paid for at the prices stipulated in Schedule Items 2-A and 3-A (which prices shall include all the matters referred to in Section 107), and for restoration of street surface, Item 30-A and B, but only to the net lines ordered by the Engineer for excavation for such pipe work.

Necessary Permanent Changes of Electric Conduits and Ducts.

Section 71-a. Changes of electric conduits or ducts and their appurtenances found in the streets (other than street railway ducts, payment for which is provided for in Schedule Item 75-A), made necessary because of physical interference with the railroad structure, and requiring the removal, relaying or reconstruction in other than the original position, will be paid for at the price stipulated in Schedule Item 127. The price per duct foot as provided in Schedule Item 127 is to include the cost of all ducts in place; of all manholes, vaults, service boxes and their appurtenances; of drawing cables and providing new cables where necessary; of the proper restoration of all services that may be affected by the changes in the duct lines; of such excavation and restoration of street surface as may be necessitated by the changes in the duct lines, and all other work and material incidental to and necessary for the completed duct lines.

Surface and Elevated Railroads.

Section 72. The Contractor shall maintain and support, in a manner that will cause the minimum interference with traffic, all surface, subsurface and elevated railroads along the line of or crossing the line of the work.

Surface Railroads.

Section 73. The Contractor shall maintain and support, both temporarily and permanently, in a safe condition all street surface railroads (including steam railroads), including ducts, cables and all other appurtenances of such railroads; he shall rebuild either in their original or in new locations all parts of such surface railroads, including ducts, cables and all other appurtenances of such railroads, whose reconstruction or rebuilding may be necessitated by the construction of the work. Payment therefor will be at the rates specified in the Schedule for electric railroad, Item 75-A, or for horse railroad, Item 75-B, which prices will include the cost of all work incidental thereto. Where permanent masonry supports are required and added, and where additional vaults in excess of the number existing are required and constructed to give equivalent facilities, they will be paid for at the prices given in the Schedule for the several classes of work or material applicable thereto.

Elevated Railroads.

Section 74. The Contractor shall maintain and support both temporarily and permanently in a safe condition all elevated railroad structures. Payment therefor will be at the rate specified in Schedule Item 76, which price will include the cost of all incidental work, including the reconstruction and building where necessary of all column foundations and parts of column foundations lying without the net lines of the subway structure.

Subsurface Railroads.

Section 75. The Contractor shall support and maintain both temporarily and permanently in a safe condition all subsurface railroads and their appurtenances. Payment therefor shall be deemed included in the prices for excavation, Schedule Items 1, 2 and 3.

Facilities to be Given to Make Extensions.

Section 76. In the event of the owners or the City desiring to make any alteration or extension to their structures, or do any work to or in connection with surface or subsurface structures owned by them or it, at the time the work under this contract is in progress, the Contractor shall give said owners or the City all reasonable opportunity to perform such work; provided such work or alteration for the benefit solely of the owners of subsurface structures does not cause the Contractor any serious loss or delay, as shall be determined by the Commission.

Parks and Parkways, Trees, etc.

Section 77. In any park or parkway, or where any grass plots or trees exist along any street occupied by the Contractor, proper precautions must be taken to protect from injury all such trees or grass plots. For every tree removed, injured or destroyed, the Contractor shall set out a new thrifty tree of the same kind as the tree removed, injured or destroyed, and not less than fifteen (15) feet in height and not less than three and one-half (3½) inches in diameter measured two feet above the surface of the ground, and in such position as the Commissioner of Parks shall indicate. All roads, cross-paths, grass plots, shrubbery and other plants

removed or affected by the construction of the railroad, shall be restored as soon as possible to as good a condition as existed before the commencement of the work.

Replanting Under Direction of Park Commissioner.

Section 78. In replanting trees and the replanting of grass plots the Contractor must be governed by the reasonable requirements of the Commissioner of Parks or by other authorities specially charged with the care of these trees or grass plots, and the nature and depth of the soil to be placed therein must be approved by such authorities and by the Commission.

Payments, How Made.

Section 79. Payment for all work covered by Sections 77 and 78 shall be included in the prices paid for Park or Street Surface Restored, Schedule Items 31 or 30.

5—EXCAVATION.

Width of Excavation.

Section 80. Special care must be taken to avoid damage wherever excavation under cover is being done or where open excavation is permitted. The width of such excavation shall not exceed the width actually necessary, in the opinion of the Engineer, for the proper prosecution of the work. All excavations shall be of such width, in addition to that of the railroad, as shall be necessary in the opinion of the Engineer for the proper and expeditious progress of the work, and to permit the laying and readjusting of all sewers, mains, subways and other subsurface structures encountered along the route and contiguous to the railroad.

Depth of Trenches.

Section 81. Trenches shall be excavated to such depth, both in soft ground and in rock, as may be necessary to permit the laying of such concrete bed or special foundation as may be deemed necessary by the Engineer.

Sides to be Secured.

Section 82. The sides of the excavations shall be secured against slips by suitable sheet piling or sheeting, held in place by braces, shores or walling timbers, special precautions being taken where there is additional pressure, due to the presence of buildings or other structures. Where a movement of the ground might cause the settlement of an adjacent building, the sheeting must be started, if near the building, before the elevation of the bottom of the foundation of the building is reached; if away from the building, at such depth of the excavation as the Engineer may permit; and the excavation must not be made in advance of or below the bottom of the sheeting.

Filling Back of Sheeting.

Section 83. Sheeting shall be driven wherever possible, but when it is placed against the sides of the excavation, the spaces or voids back of the sheeting must be immediately and carefully filled with suitable material to prevent as far as possible the natural ground back of the sheeting from moving.

Buildings Underpinned.

Section 84. To secure adjacent ground or the buildings thereon, or to prevent bringing an unusual pressure on the structure when completed, the Contractor shall secure the sides of the excavation by suitable timbering, and shall safely and permanently underpin adjacent buildings. As part of this obligation the Contractor shall use such methods of construction or underpinning, pneumatic or otherwise, as special conditions may require and the Engineer shall approve.

Payment For.

Section 86. Where underpinning of a building is necessary and the work is done as provided in Section 84, payment will be made to the Contractor as, and at the price, provided in Schedule Item 4. The classification as to the number of stories has reference to the number of stories above the surface of the street.

Sheeting.

Section 87. No payment shall be made to the Contractor for sheeting left in the ground or in the work, unless the Engineer shall in writing require it to be left in, in which case payment shall be made to the Contractor for the sheeting so left in as measured by the Engineer, and at one-half the current market price for new material of the same grade, character and dimensions, and without any allowance or payment for placing the same or the expense thereof. This section applies only to the sheeting in trench work.

Timber for Temporary Purposes.

Section 88. All timber used for sheeting, shoring, bracing, decking or other temporary purposes, shall be sound and free from any defects that may impair its strength. It shall be provided, placed and removed at the Contractor's own cost and expense. The top or wearing surface of all decking used for carriageways shall be of hard yellow pine, sound, straight and free from all shakes, and large loose knots. All sheeting and timber used temporarily shall be put in place by skilled mechanics, keyed tight by wedges where necessary, and so arranged as to be withdrawn readily without endangering the adjoining soil.

Vaults of Abutting Property.

Section 89. The cost of the removal, where necessary, of all walls or other parts of vaults of abutting property along the line of the railroad that are within the ordered net lines of excavation is to be included in earth excavation as provided in Section 102, but the restoration of all such walls or other parts of vaults within the ordered net lines of excavation will be paid for at the unit prices specified in the Schedule applicable to the several classes of work and material involved in such restoration.

The above is not to be construed, however, as applicable to any work beyond the ordered net lines of excavation, which shall be at the Contractor's own cost and expense.

Vaults Disturbed.

Section 90. Wherever vaults are broken through or otherwise disturbed, the Contractor shall, at his own cost and expense, erect a temporary partition on or about the building line, or as directed, that will afford proper protection to the owner or occupant of the adjoining premises.

Rock.

Section 91. Ledge rock in place, and boulders within the ordered line of excavation requiring blasting, will be considered as rock excavation.

Preparations for Rock Measurement.

Section 92. Whenever rock is encountered in the trench, it shall be stripped of earth in sections of not less than 20 feet; and the engineer in charge shall be duly notified, in order that he may measure or cross-section the same.

Blasting.

Section 93. Whenever rock or material requiring blasting is encountered in any trench or tunnel, all necessary precautions must be exercised by the Contractor, as required by the ordinances of the City relative to blasting. Explosives shall be used only of such character and strength as may be permitted by the Commission, and the right is reserved for the Engineer to direct that in special cases ordinary blasting powder only, in small charges, shall be used. Blasting shall not be done between the hours of 11 p. m. and 7 a. m. without the express permission of the Engineer, and under such restrictions as he may impose.

Storage of Explosives.

Section 94. No larger quantity of explosives shall be kept on the line of the work than will be actually required for the twelve (12) hours of work next ensuing, and it shall be kept under lock, the key to which is to be only in the hands of the foreman or other equally trustworthy person. The amount of explosives kept in any one place shall not exceed the limit permitted by any ordinance of the City, or as may be determined by the Commission. Caps and exploders shall not be kept in the same place with dynamite and other explosives. During freezing weather, special precautions shall be taken as to the care and manipulation of dynamite.

Near Pipes and Mains.

Section 95. Whenever any pipe or main is encountered in or alongside of the trench, right is reserved to direct that all rock within five (5) feet of the same shall be removed by means other than blasting.

General Precautions in Blasting.

Section 96. In rock excavation in the trenches for the railroad the work must be so regulated as to avoid, as far as possible, shattering the rock beyond the established line for excavation.

Blasting.

Section 97. Generally the central portion of the excavation must, when directed by the Engineer, be kept some distance in advance of the excavation near the sides,

and if the rock, owing to its general character and structure, has a tendency to break large, or the strike and dip of the stratification indicate a liability to slip or slide into the excavation, the Contractor must place the drill holes at close intervals on the established lines for excavation, in order to avoid excessive excavation and to preserve the established lines thereof.

Pumping.

Section 98. Whenever water is encountered in trenches, the same shall be removed by bailing or pumping, great care being taken when pumping that the surrounding particles of soil be not disturbed or removed. If necessary to prevent such disturbance, the pumping must be done by a series of driven wells whose points are protected by fine wire cloths, the rate of flow at each well being made so slow as not to remove the particles of soil; or the pumping must be done by other means approved by the Engineer. The delivery from all pumps shall be conducted into the adjacent sewers, and the delivery pipes shall be so arranged as to be readily inspected at all times to ascertain if the water is free from particles of soil.

Carts to be Tight.

Section 99. All carts, buckets or other vehicles used by the Contractor for the removal of material, shall be tight and so arranged and so loaded as not to spill over. Whenever a cart, bucket or other vehicle so used is leaky or unsuitable, it shall be immediately withdrawn from the work on notification by the Engineer, or his duly qualified assistant, in charge of that portion of the work.

Removed Expeditiously.

Section 100. Excavated material shall be removed expeditiously and disposed of, in any place selected by the Contractor, subject to the ordinances and regulations of the City authorities governing the disposal of such material, and the regulations of the United States Government as to the disposal or dumping of material in and about or near the Harbor of New York.

When Excavated Material May be Taken by the City.

Section 101. If at any time during the course of construction the City shall desire for City purposes any part of the material excavated, and the cost of such disposal shall not exceed the cost to the Contractor of the method in which he is then disposing of it, the Commission may order such material dumped or turned over to the City at a point designated without cost to the City.

Earth Excavation, Definition of.

Section 102. Earth excavation includes the excavation of all materials of whatever nature encountered in the trenches, excepting ledge rock in place and boulders requiring blasting.

Excavation in Trenches, How Measured.

Section 103. The net outside width of the railroad structure, as ordered and indicated on the plans, and the depth, also as ordered and as indicated on the plans, will govern as to width and depth in the measurements for payment for excavation. No deduction from the volume of excavation determined as above, will be made on account of basements or cellars in property acquired by the City for the construction of the railroad or on account of vault space or of spaces occupied by pipes and other subsurface structures.

No Allowance Outside of Ordered Net Lines.

Section 104. There will be no measurement or allowance made nor money paid for excavation outside (below or wider than) the net measurement lines as above indicated, or in rock excavation, for irregularities of surface; and no allowance shall be made for any excess excavation caused by slips or slides. It is understood and agreed that for all such matters the Contractor has estimated and allowed in the unit prices of the schedule.

Change of Street Grade.

Section 105. Where the contract drawings indicate that the grade of any street is to be raised the Contractor shall fill in the street to the changed grade as required and such work shall be measured and paid for at the price stipulated for earth excavation, Schedule Item 1.

Payment for Excavation.

Section 106. Excavation shall be paid for at the price or prices given in Schedule Items 1 and 2 for excavation in earth and Item 3 for excavation in rock.

Prices for Excavation to Include.

Section 107. The prices herein stipulated for excavation, Schedule Items 1, 2 and 3, are to include the cost of the disposal of the materials excavated, of backfilling, of all decking and bridging, of all sheeting and bracing, and of maintaining and supporting of trenches during and after excavation, of all pumping or bailing, and of the maintenance, support, etc., of all surface and subsurface structures of whatever nature, payment for the maintenance and support of which is not herein elsewhere specifically provided for.

6—TUNNELING.

How Lined.

Section 108. All tunnels shall be lined with steel or cast iron and concrete, or with concrete or brick masonry.

Where tunnels are lined with concrete or brick work without metal tubes, proper provisions shall be made for keeping the tunnels dry by the use of drains, and by other methods as elsewhere provided.

Packing.

Section 109. The space between the extrados of the arch or back of the sidewalls and the rock or other materials of excavation, shall be filled with concrete to a height of two feet above the spring line of the arch—above this concrete the space shall be filled with dry masonry packing. Similarly in the tunnel floor, if concrete is used, all loose muck shall, if directed by the Engineer, be removed to the solid rock and the space filled in with concrete up to the bottom line of the section ordered by the Engineer for tunnel excavation and concrete. All such concrete or other packing, being outside of the net section line for excavation as ordered by the Engineer, shall be at the sole expense of the Contractor.

Grout.

Section 110. After the tunnel lining and packing is in place, if required by the Engineer, a grout, consisting of one (1) part fine, clean and sharp sand and one (1) part Portland cement, shall be pumped in under pressure, from time to time behind the masonry, so as to completely fill all the voids. Where tunnels are made by the use of a shield, similar grout shall be pumped in to completely fill the space left by the tail piece of the shield as soon as the shield is moved forward.

Payment for Grout.

Section 111. Where grout is ordered and used, it shall be paid for at the price herein provided, Schedule Item 11.

Lines for Excavation.

Section 112. The tunnel, at any place, is to be excavated to the line of the cross-section ordered by the Engineer for that place.

No Payment for Excavation Beyond Ordered Lines.

Section 113. All loose or shaky rock, whose fall or settlement might, in the judgment of the Engineer, produce an unequal or concentrated pressure on the masonry, shall be removed, and the space refilled with such class of masonry as the Engineer may require and as provided in Section 109, but no payment will be made for any excavation outside of the cross-section of the tunnel excavation ordered by the Engineer, as provided in Section 112.

Blasting.

Section 114. Drilling and blasting must be conducted with all possible care and in such a manner as not to shatter the roof and sides outside of the section lines, as ordered by the Engineer, nor endanger adjoining property.

Drains.

Section 115. All seams carrying water shall be carefully drained, as specified under the clauses relating to drainage.

Precautions Against Settlement.

Section 116. The Contractor must take every precaution, and such precautions as the Engineer may direct, by suitable shields, timbering, lagging or other supports, to prevent any settlement or movement of surrounding ground. Such timber as cannot be drawn without endangering the work or the ground above, shall be left in place and thoroughly surrounded by masonry and grouted.

Timbering.

Section 117. Timbering shall be used wherever necessary to support the materials or to secure the safety of the work or workmen. It will be at the sole expense of the Contractor and included in the contract price for tunnel excavation, Schedule Item 5. Wherever practicable it shall be removed before the concrete lining or concrete or other packing is placed.

Compressed Air.

Section 118. If for the work under the Harlem River and for the approaches thereto or elsewhere on the work a method is adopted requiring the use of compressed air, a plant must be provided of sufficient capacity to insure at all times and under all conditions an ample supply of air to prosecute the work with safety and dispatch, and proper air locks shall be built with safety locks, in addition to provide for the escape of workmen at time of accident.

Methods to be Approved.

Section 119. All methods of tunneling shall be subject to the approval of the Engineer, and be changed from time to time, if, in his judgment, the local conditions so require, and during construction approved methods of ventilation and lighting shall be used.

Tunneling, Payment For.

Section 120. The price per cubic yard, stipulated herein, Schedule Item 5, for tunnel excavation, is to cover all expense due to the presence of quicksand or other soft material, rotten rock, boulders, etc.; the cost of all pumping and bailing; of all timbering, and removal of same; of removing all excavated material; of all ventilation and lighting; and of all other work incident to the excavation of the tunnel. Any expense that may arise from loose or shaky rock or from falls or cave-ins, or from any unexpected obstacles, shall be borne by the Contractor. In earth sections the tunnel excavation must be large enough to permit building the masonry to the full required thickness, clear of such timbering and lagging as it may be necessary to build in. As a fair provision for such contingencies, it is assumed that the excavation will extend an average distance of one (1) foot outside the net line in the roof and sides and six (6) inches below the net line in the floor, and measurements for payment in tunnel excavation in earth will be made to those lines. It is distinctly understood, however, that no such allowances or any other allowance in tunnel excavation will be made in connection with timbering in tunnel excavation in rock.

Chambers, Drains, etc.

Section 121. Excavations for chambers, for skewbacks of arches, for sump holes, drains or for any other purpose in the tunnel, are to be measured according to the lines of the cross-sections determined by the Engineer, and paid for by the cubic yard as tunnel excavation.

Additional Enlargement.

Section 122. If after the excavation has been made of a certain size by direction of the Engineer, he is of opinion that the nature of the rock or other material is such that the form and dimensions of the masonry for which said excavation was intended must be increased, he may order an enlargement of the excavation for the purpose of building masonry of greater thickness, and the Contractor is to make such enlargement, which is to be measured according to the lines given by the Engineer, and paid for at the price per cubic yard stipulated in the schedule for tunnel excavation.

7—Backfilling.

Quality of Material. How Placed.

Section 128. The trenches at the sides of and over the top of the subway and wherever backfilling is necessary, shall be backfilled with sand, gravel or other good clean earth, free from perishable material and from stones exceeding six (6) inches in diameter, and not containing in any place a proportion of stone of or below that size exceeding one (1) part of stone to five (5) parts of earth. The filling shall be compacted by flooding with water or, in cases where flooding with water is not practicable it shall be compacted by ramming in layers, not exceeding six inches in depth.

Subsurface Structures. Frozen Material Not Permitted.

Section 129. Whenever pipes, sewers or other subsurface structures are met with, the filling must be carefully packed, rammed and tamped under such subsurface structures, using special tools for the purpose. No filling of trenches with frozen earth will in any case be permitted, nor will any filling be permitted over frozen material.

Sheeting Removed.

Section 130. As fast as the work of filling permits, sheeting and other timber supporting the sides of the excavation shall be carefully withdrawn, or shall be left in place, as may be directed by the Engineer, and the spaces left by the removal of such material carefully back-filled.

How Paid For.

Section 131. The cost of backfilling is to be included in the prices paid for earth and rock excavation, Schedule Items 1, 2, 2-A, 3 and 3-A.

8—PILING AND TIMBERING.

Piles.

Section 132. If in the judgment of the Engineer the ground is of such a character as to require piling, the Contractor shall drive such piles as the Engineer directs. The piles shall be of good sound pine or spruce, straight and free from shakes; they shall be not less than twelve (12) inches in diameter at the butt end, or less than six (6) inches in diameter at the point, and shall be driven to the satisfaction of the Engineer and by means of a steam hammer driver if so required by him. If necessary the points of the piles shall be protected by proper shoes, and the butts by rings or caps. Piles shall not be spliced unless permitted by the Engineer, and then in such manner as he directs. Piles shall be carefully cut off to the grade given by the Engineer.

Piles Driven in Required Location.

Section 133. Piles shall be driven in the position and manner and to the depth ordered; if driven in a wrong position or injured in any way by driving they must be withdrawn and replaced by others. After being driven they shall be cut off to a true plane for proper adjustment with capping timber or masonry.

Payment for Timber Piles.

Section 134. The price herein stipulated to be paid, per linear foot of timber piles, Schedule Item 12, is to cover the cost of furnishing, driving and preparing the piles ready for the capping timbers or masonry, and the portion cut off and removed will not be included in the length measured for payment. No test piles, guide piles, or piles other than those that are a part of the finished foundation and are included within the net width of the finished foundation will be paid for.

Concrete Piles.

Section 135. If in the judgment of the Engineer special conditions so require, piles of reinforced concrete of an approved form of construction shall be used.

Payment for Piles Other Than Timber Piles.

Section 136. Payment for piles other than timber piles will be as provided in Article XII. of the contract.

Grillage.

Section 137. Timber grillage foundations shall be built if so directed by the Engineer.

Foundation Timber.

Section 138. All foundation timber shall be of pine or spruce, or other timber permitted by the Engineer, sound and free from shakes. It shall be of such dimensions, and laid in such manner, as the special plans to be issued shall require, and held in place by spikes or good seasoned oak or locust treenails.

Foundation Timber, Measurement and Payment.

Section 139. No wastage is to be allowed for, and the estimate of the quantities of foundation timber used will be based on the amount ordered by the Engineer and placed according to his direction. Payment for foundation timber will be as provided in Schedule Item 13.

9—CEMENT.

Portland Cement.

Section 140. All cement used in the work shall be true Portland cement, by which is meant the finely pulverized product, resulting from the calcination to incipient fusion of a properly proportioned intimate mixture of argillaceous and calcareous earths or rocks, to which no addition greater than three (3) per cent. has been made subsequent to calcination.

Brand to be Approved.

Section 141. Before any cement is furnished, the brand shall receive the approval of the Engineer. Cement, to be acceptable, shall be of a well-known brand which has been in successful use for large engineering works in America for at least five (5) years, and which has an established reputation for uniform character. Preference will be given to cements which, by their records, show a tendency to maintain high strength of mortar with increased age.

Inspection.

Section 142. Cement shall be subject to inspection at the place of manufacture or on the work, and to such tests as may be ordered by the Engineer. The Engineer or his representatives shall have access at all times and places to inspect the methods of manufacture, storage and protection, and shall have liberty to inspect the daily laboratory records of tests and analyses at the cement works.

Tests.

Section 143. In general, tests will conform to the methods recommended by the Committee on Uniform Tests of Cement of the American Society of Civil Engineers. Unless otherwise directed, samples will be taken at the place of manufacture by a representative of the Engineer, and sent to the Commission's laboratory, where the tests will be made. If required, tests will be made on the individual samples, without intermixing.

Specific Gravity and Color.

Section 144. The cement shall have a specific gravity of not less than 3.10 nor more than 3.25 after being thoroughly dried at a temperature of 212 degrees Fahr. The color shall be uniform, bluish gray, free from yellow or brown particles.

Chemical Analysis.

Section 145. Chemical analyses of cement made from time to time shall show a reasonably uniform composition. Cement shall not contain more than 1.75 per cent. of sulphuric anhydride (SO_3) nor more than 4 per cent. of magnesia (MgO).

Fineness.

Section 146. The fineness of the cement shall be such that it shall leave by weight a residue of not more than eight (8) per cent. on a No. 100, and not more than twenty-five (25) per cent. on a No. 200 sieve; the wires of the sieves being respectively 0.0045 inch and 0.0024 inch in diameter.

Time of Setting.

Section 147. It shall not develop initial set in less than thirty (30) minutes unless a more quickly-setting cement is specifically required, and shall develop hard set in not less than one (1) hour nor more than ten (10) hours. .

Soundness.

Section 148. Pats of neat cement, after remaining one (1) day in moist air, shall be kept in air or water of normal temperature for at least twenty-eight (28) days, or shall be exposed to an atmosphere of steam, above boiling water, in a loosely closed vessel for at least five (5) hours; and the separate parts under any of these conditions, shall remain hard without any indications of checking, cracking, distortion, disintegration or blotching.

Tensile Strength.

Section 149. Neat cement briquettes shall have at the end of one (1) day in moist air a breaking strength, per square inch of sectional area, of not less than one hundred and fifty (150) pounds; at the end of seven (7) days—one (1) day in air, six (6) days in water—of not less than five hundred (500) pounds; and at the end of twenty-eight (28) days—one (1) day in air, twenty-seven (27) days in water—of not less than six hundred (600) pounds. The strength at twenty-eight (28) days shall not be less than that at seven (7) days.

Mortar Briquettes.

Mortar briquettes, composed of one (1) part of cement and three (3) parts of standard Ottawa sand, by weight, shall have at the end of seven (7) days—one (1) day in air, six (6) days in water—a breaking strength, per square inch of sectional area, of not less than two hundred (200) pounds; and at the end of twenty-eight (28) days—one (1) day in air, twenty-seven (27) days in water—of not less than three hundred (300) pounds. The strength at twenty-eight (28) days shall show an increase of not less than fifty (50) pounds over the strength at seven (7) days.

Long-time Tests.

Section 150. Tests will be made from time to time extending over longer periods than twenty-eight (28) days. If such tests show a tendency to unsoundness or unusual reduction in strength with increased age, the Engineer shall have the right to prohibit further use of that brand and to require that another brand be substituted.

Storage During Tests.

Section 151. All cement shall be held in storage to allow ample time for tests to be made before the cement is required for use in the work.

How Contained.

Section 152. Cement shall be packed and delivered in canvas sacks or other strong, well-made packages, plainly marked with the manufacturer's brand, and sealed in an approved manner. The weights of such packages shall be uniform.

Methods of Storing.

Section 153. The Contractor shall at all times keep in store on the work, or at some point convenient thereto, an abundant supply of cement, so as to guard against possible shortage. It shall be stored in a weather-tight building, with a tight floor a proper distance above the ground, and with sufficient floor space to admit of storing each lot of cement, of not more than two hundred (200) barrels, or its equivalent, separately, so as to facilitate identification of each individual lot in case of necessity for further tests or rejection. Cement that has become partially set or otherwise damaged shall not be used.

10—MORTAR.

Cement and Sand. Mixing.

Section 154. All mortar shall be prepared from accepted cement and clean, sharp sand, approved by the Engineer. These ingredients shall be thoroughly mixed dry in the proportions as specified below; water shall then be added, so as to produce a stiff paste. Water used in mortar, grout or concrete must be clean, fresh water, no salt water being permitted. The mortar shall be freshly mixed for the work on hand, in proper boxes made for that purpose, and no mortar shall be used that has stood beyond such limit of time as may be determined by the Engineer.

How Measured.

Section 155. For purposes of mixture, three hundred and seventy-five (375) pounds of Portland cement shall be estimated at three and one-half (3½) cubic feet of volume. The proportional parts of sand and stone or gravel shall be by volume as cast into the measuring box. The proportions for brick and stone masonry shall be one (1) part cement to two (2) parts sand; for pointing, one (1) part cement and one (1) part sand; for concrete masonry, as specified under the head of concrete; and for other classes of work, as directed by the Engineer; for grout, one (1) part of cement to one (1) part of fine sand.

11—MASONRY.

Laid in Portland Cement.

Section 156. All masonry, except as otherwise specified, shall be laid in Portland cement mortar, and shall be built of the forms and dimensions shown on the plans, or as directed by the Engineer from time to time; and the system of joining or bonding ordered by the Engineer shall be strictly followed.

Water Not to Interfere With.

Section 157. Care must be taken that no water shall interfere with the proper laying of masonry in any of its parts.

Freezing Weather.

Section 158. During freezing weather such masonry only shall be built whose construction, in the judgment of the Engineer, can not be postponed, except at the cost of delaying the work. The Contractor shall provide such appliances as are necessary for heating the water and the materials used in the masonry according to the specific instructions of the Engineer.

Protected in Freezing Weather.

Section 159. During freezing weather all masonry shall be protected by a suitable covering of salt hay, canvas, tarpaulin or by such material or in such ways as may be necessary to insure it against freezing.

Hot Weather.

Section 160. During hot weather all masonry, especially concrete, shall be kept wet by sprinkling and properly covered until it has become thoroughly set and hardened.

Pointing.

Section 161. Unless otherwise permitted, every joint that is to be pointed shall be raked out, within two days after being laid, to a depth of at least two inches.

Section 162. Pointing of the face joints of masonry shall be thoroughly made with cement mortar mixed in the proportion of one (1) part of cement to one (1) part of sand, except where otherwise specially provided.

Section 163. No pointing shall be done in freezing weather, and masonry laid between December 1 and April 1 shall not be pointed until permitted by the Engineer.

Defective Masonry.

Section 164. Any masonry which is found to be defective from any cause whatsoever, before the final completion and acceptance of the work, must be removed and properly rebuilt, or if damaged during such time must be properly repaired.

Stone Cleaned.

Section 165. All stone before being laid shall be thoroughly cleaned and washed if so directed by the Engineer.

12—CONCRETE.

How Composed.

Section 166. The concrete shall be composed of gravel or broken stone, or a mixture of both, free from all dust and dirt, and mixed together with the proportion of mortar specified below.

Sand.

Section 167. Sand for concrete shall be of the kind herein specified for mortar.

Stone.

Section 168. Stone for concrete shall be sound, clean gravel, or sound, hard, broken limestone, or trap rock, or a mixture of such gravel and broken stone may be used.

Sizes of Stone.

Section 169. Broken stone or gravel for concrete shall be graded from fine to coarse, and that which is all of one size, or practically so, shall not be used. It shall be screened or washed so as to remove all dust, and it shall contain no pieces that will pass through a hole three-eighths (⅜) inch in diameter, and no pieces that will not pass through a hole one and one-half (1½) inches in diameter. Broken stone or gravel for concrete, graded as above, but between three-eighths (⅜) and three-fourths (¾) inch in diameter, may be required and used in special parts of the work.

Rubble Concrete.

Section 170. In concrete, where the thickness is thirty (30) inches or more, if permitted by the Engineer, the Contractor may embed in the same pieces of sound stone whose greatest diameter does not exceed twelve (12) inches and whose least diameter or thickness is not less than three-quarters (¾) of the greatest diameter. These stones shall be set by hand in the concrete as the layers are being rammed, and so placed that each stone is completely and perfectly embedded. No two (2) stones shall be within six (6) inches of each other and no stones within four (4) inches of an exposed face, nor shall any such stone be placed nearer than six (6) inches to any metal built in the concrete for reinforcing the same.

Proportions.

Section 171. The proportions of cement, sand and stone (or gravel) used in making concrete shall be as follows:

Section 172. Concrete in floor, sidewalls and roof one (1) part of cement, two (2) parts of sand and four (4) parts of stone. Concrete for tube tunnels under the Harlem River will be as indicated on the plans.

Section 173. Protective concrete outside of waterproofing lines on sides and roof, one (1) part of cement, four (4) parts of sand and eight (8) parts of stone.

Mixing by Machine.

Section 174. Whenever practicable, concrete shall be machine mixed. A rotary machine of a pattern approved by the Engineer, and mixing only one batch at a time, shall be used.

Mixing by Hand.

Section 175. When concrete is mixed by hand the stone or gravel shall be spread on a platform in a bed about six (6) inches thick, and shall be thoroughly wet. Sand shall be spread on a platform and the requisite portion of cement spread on the sand. After thoroughly mixing the latter, the dry mixture thus formed shall be spread evenly over the bed of stone wet, as above, and the whole turned over until thoroughly mixed, but not less than two (2) turnings on the mixing board shall be allowed in any case, water being added as necessary. Care shall be taken to keep the bed of concrete wet and avoid piling.

How Laid.

Section 176. Concrete shall be placed immediately after mixing in layers of such thickness as may be directed by the Engineer, and shall be thoroughly compacted throughout the mass by ramming or spading, special tamping bars or tools being used as approved by the Engineer. The amount of water used in making the concrete shall be as approved by the Engineer. If a small amount of water has been used in mixing, ramming shall be continued until the water flushes to the surface; as a rule, however, concrete shall be placed wet.

Made Smooth to Receive Waterproofing.

Section 177. Concrete to which waterproofing is to be applied shall be made smooth at the time of laying and shall be carefully protected from injury by barricades or otherwise, if necessary, until thoroughly set.

Time for Hardening.

Section 178. Concrete shall be allowed to set for twelve (12) hours, or more, if so directed, before any work shall be laid upon it; and no walking over or working upon it shall be allowed while it is setting. Concrete shall not be flooded with water before being thoroughly set.

Rock Surface to be Cleaned.

Section 179. Before laying concrete on rock surfaces the latter shall be swept clean of all debris and dirt, and when laid on earth the earth shall be rammed as directed before placing the concrete.

Surface Rough for Bonding.

Section 180. Wherever a section of concrete is necessarily left unfinished, leaving a surface which will be hard set before additional concrete is laid, the surface shall be left rough to form a bond with the new work; and if deemed necessary by the Engineer, the points shall be reinforced with steel bars or dowls, to be furnished by the Contractor.

Joints Cleaned.

Section 181. In all cases of joints of old with new work the old surfaces shall be thoroughly cleaned and wet, and a coating of mortar or cement shall be applied, if required, before placing the concrete.

Forms.

Section 182. Suitable forms shall be provided by the Contractor to support the concrete while being placed in the walls or roofs. These forms shall be immediately replaced by new ones as soon as they commence to lose their proper shape. Before being used they shall be carefully cleaned of cement and dirt in order to provide a perfectly smooth face to the exposed surface of the concrete. The forms shall be made of wood, kept carefully planed; or made of metal sufficiently thick to retain their shape without the use of wood.

Section 183. No forms made of wood, and covered with iron will be permitted.

Section 184. The forms, if made of wood, shall be made of boards with tight joints, tongued and grooved, if required by the Engineer.

Precautions in Placing.

Section 185. Every precaution shall be taken in placing or assembling the forms to do so in such a manner that when removed, after the concrete has been placed, the faces of the concrete that are to remain exposed shall present a smooth and even surface.

Forms, How Set. Forms Removed. Surface Irregularities Corrected. Defective Work Replaced.

Section 186. The forms shall be set true to line, firmly secured, and be so tight as not to allow water in the mortar to escape; they shall be thoroughly wet before

placing the concrete and shall be removed as soon after the concrete has been placed as in the judgment of the Engineer may be done with safety to the work. Immediately on the removal thereof the faces that will remain exposed shall be carefully examined and any irregularities of the surface corrected; projections shall be removed and voids filled with mortar. If, however, the voids are such as to indicate an excessive loss of mortar, portions of the concrete shall be cut out to the fullness of such defects and the space refilled with a rich concrete or mortar in such proportions and in such manner as the Engineer may direct.

Reinforcement Steel.

Section 187. Where reinforcement steel or wire mesh is used, efficient means shall be provided to maintain it in the exact position it is to occupy in the completed work, and to prevent it from becoming dislodged, or moved in any manner, when concrete is placed.

Surfaces Not to be Painted.

Section 188. The exposed faces of the concrete, excepting within station limits, shall be left with the natural cement finish; therefore, immediately following the removal of the forms, followed by the removal of the projections and the filling of voids, as provided above, these entire surfaces shall be rubbed down in such a manner, approved by the Engineer, as will leave a smooth and even surface, the object in view being to obtain a generally smooth finished surface with uniformity in color.

Impervious to Water.

Section 189. It is intended to obtain concrete impervious to water; the concrete shall be mixed and deposited with this end in view, and on the roof of the Railroad, if waterproofing is not used, the top surface of the concrete shall be carefully troweled as may be directed in order to add to its imperviousness.

Concrete, How Measured and Paid For.

Section 190. Concrete masonry shall be measured in place in the work to the prescribed net lines ordered by the Engineer and shall be paid for at the prices in Schedule Items 6 and 7; which prices are to include the cost of all scaffolding, centres, forms, etc., and removing the same, and all work incidental thereto.

Backing or Filling Concrete, Not Paid For.

Section 191. No concrete backing or filling outside of the ordered net lines of excavation will be paid for.

(For Concrete in Sewers, see Sewers.)

13—Brick Masonry.

Quality.

Section 192. Bricks for masonry shall be of the best quality common bricks, burned hard entirely through, regular and uniform in shape and size and of compact texture.

Hollow Terra Cotta Blocks.

Section 193. Hollow terra cotta blocks or bricks may be required in station work, on the outside of walls of the structure or at such other places as the Engineer may direct. They shall be of the best porous terra cotta as approved by the Engineer, and shall be laid in such manner as hereinafter specified or as the Engineer may direct.

How Laid.

Section 194. All brick masonry shall be laid in mortar of the quality above described, except that in exposed locations coloring matter may be added, if required by the Engineer. The bricks shall be laid to line with joints in the face work (except in stations) not exceeding one-quarter (¼) of an inch in the beds, and three-eighths (⅜) of an inch on ends; the bricks to be thoroughly wet before laying and to be completely embedded in mortar under the bottom and on the sides and ends at one operation, care being taken to have every joint full of mortar.

All exterior surfaces shall be smooth and regular.

Cleaned.

Section 195. The inside faces of all arches and other exposed parts shall have all the mortar scraped off and washed clean immediately after the centres have been struck, and shall be pointed and left in neat condition.

No "Bats" or Culls.

Section 196. All bricks of whatever nature shall be carefully culled and, if necessary, gauged before laying, at the expense of the Contractor. No "bats" shall be used except in large masses of brickwork, where a moderate proportion, to be determined by the Engineer, may be used, but nothing smaller than half bricks.

Racked or Toothed.

Section 197. All unfinished work shall be racked or toothed, as directed by the Engineer, and before new work is joined to it the faces of the brick in the old work must be scraped entirely clean, scrubbed with a stiff brush and be well moistened.

Special Bricks.

Section 198. Where necessary to make a neat joint in connection with steel framework, or at corners, curves, or other similar places, special bricks of proper shape shall be furnished and used. All centres and forms shall be made to fit the curves of the work; they shall be put up and removed in a manner satisfactory to the Engineer.

Measurements and Payments.

Section 199. Brick masonry shall be measured to the lines indicated and shown on the plans and as ordered by the Engineer and shall be paid for as herein stipulated in Schedule Item 9, for common brick masonry, and Item 10 for hollow terra cotta brick or tile masonry; these prices are to include the cost of all scaffolding, forms, centres, etc., and the removal of the same, of all plastering and pointing, and of all other work incidental thereto.

14—STONE MASONRY.

Rubble Stone Masonry, Where Used.

Section 200. Rubble stone masonry will be used for supporting the street railroads over the roof of the Railroad where permanent supports are required, or at such other places as the Engineer may require.

How Laid.

Section 201. Rubble stone masonry shall be made of sound, clean stone of suitable size, quality and shape for the work in hand and shall be laid in mortar mixed in the proportion of one (1) part of cement to three (3) parts of sand. All beds and joints shall be well filled with mortar and the work must be thoroughly bonded.

Measurements and Payments.

Section 202. Rubble stone masonry shall be measured in place in the work and to the lines ordered by the Engineer, and it shall be paid for as herein stipulated under Schedule Item 8.

Other Masonry.

Section 203. In case, during the progress of the work, stone masonry of a different class than that specified above shall become necessary and shall be required by the Engineer, the same shall be constructed according to specifications applicable to the best work of such class, and it shall be paid for as provided in Article 12 of the contract.

15—WATERPROOFING.

General Limits of Waterproofing.

Section 204. In general, waterproofing of the structure will be limited to the roof and sidewalls at the stations, and to those surfaces near ground water or mean high water if ground water level is found for any reason to be below mean high water. At other places free drainage shall be provided by pipe drains, hollow tile or broken stone.

Protecting Masonry.

Section 205. The protecting masonry shall be hollow terra cotta blocks, common brick or concrete, laid and paid for as herein elsewhere provided, and shall not be less than four inches in thickness.

Laid Against Sheeting.

Section 206. In places where permanent sheeting is placed at the waterproofing line, the waterproofing, if permitted by the Engineer, may be applied against the sheeting.

Surfaces to be Made Smooth.

Section 207. All surfaces to which waterproofing is to be applied shall be made as smooth as possible; on these surfaces there shall be spread either hot melted pitch or asphaltum in a thick layer of uniform thickness; on this layer of pitch or asphaltum shall be laid a treated woven fabric of such material as may be approved by the Engineer; this process shall be repeated until such number of layers as may be required by the Engineer have been placed and a final coat of pitch or asphaltum shall then be applied.

Definition of Term "Ply."

Section 208. The term "ply" as used in these specifications shall mean a layer of treated woven fabric, both sides of which shall be coated with pitch or asphaltum at the time of laying.

Number of "Ply."

Section 209. The number of plies of waterproofing on the sides at stations shall in no case be less than three (3), except as hereinafter provided where brick laid in asphalt mastic is used.

Brick in Asphalt Mastic.

Section 210. Over the roof of the structure within station limits and over the tracks passing through the stations within said limits, also on the sides and bottom of the structure below a line of two (2) feet above ground water, or if ground water is below mean high water level, then two (2) feet above mean high water, one (1) ply of waterproofing, as described above, shall be used with one or more layers of brick laid in asphalt mastic; the number of layers of bricks to be determined by the Engineer.

In any case where brick laid in asphalt mastic is not used, the number of plies shall be as local conditions require and as directed by the Engineer.

Quality of Brick.

Section 211. The quality of brick shall be the same as provided in the specifications under the head of Brick Masonry. The brick shall be properly dried and shall be heated before laying.

Measurements and Payments.

Section 212. Brick in asphalt mastic will be measured in place to the lines ordered by the Engineer, and will be paid for at the price herein stipulated, Schedule Item 16.

Section 213. Six (6) plies of waterproofing may be substituted for brick in asphalt mastic, if approved by the Engineer, and will be paid for as provided for fabric waterproofing.

Asphalt Mastic.

Section 214. Asphalt mastic shall contain one-third (1-3) pure bitumen, the other ingredients to be sand and lime dust or cement, in proportions governed by local requirements and weather conditions.

Leaks Stopped.

Section 215. Any masonry that is found to leak at any time prior to the completion of the work and final acceptance thereof by the Commission shall be cut out and the leak stopped, at the sole expense of the Contractor.

Quality of Pitch.

Section 216. Pitch shall consist of either coal-tar or natural asphalt as the Engineer shall elect; it must be delivered on the work in packages that are plainly marked with the manufacturer's brand, and indicating the grade and quality of the material.

Coal-tar Pitch.

Section 217. The coal-tar pitch shall be straight-run pitch containing not less than twenty-five (25) per centum and not more than thirty-two (32) per centum of free carbon, which will soften at approximately 70° F., and melt at 100° F., being a grade in which distillate oils distilled therefrom shall have a specific gravity of 1.05.

Quality of Asphalt.

Section 218. The asphalt used shall be the best grade of Bermudez, lake or other natural asphalt, subject to the approval of the Engineer, and shall comply with the following requirements:

The asphalt shall contain in its refined state not less than ninety-five (95) per cent. of natural bitumen soluble in rectified carbon bisulphide or in chloroform. The remaining ingredients shall be such as not to exert an injurious effect on the work. Not less than two-thirds (2-3) of the total bitumen shall be soluble in petroleum

naphtha of seventy (70) degrees Baume or in acetone. The asphalt shall not lose more than four (4) per cent. of its weight when maintained for ten (10) hours at a temperature of three hundred (300) degrees Fahrenheit.

Woven Fabric for Waterproofing.

Section 219. The fabric to be used shall be a woven fabric which shall have been treated with pitch or asphaltum before being brought on the work. The fabric and the material used in its treatment shall be approved by the Engineer.

Concrete to Be Dry.

Section 220. All concrete shall be dry before waterproofing is attached. If, in the judgment of the Engineer, it is impracticable to have the concrete dry, then there shall be first laid a layer of the treated fabric, on the upper surface of which is to be spread the first layer of pitch or asphaltum; the said layer of fabric shall then be counted as one of the required plies.

Each layer of pitch or asphaltum fluxed as directed by the Engineer must completely and entirely cover the surface on which it is spread without cracks or blowholes.

Fabric for Waterproofing to Be Carefully Laid.

Section 221. The fabric must be rolled out into the pitch or asphaltum while the latter is still hot, and pressed against it so as to insure its being completely stuck over its entire surface, great care being taken that all joints are well broken by overlapping, and that the ends of the rolls of the bottom layers are carried up on the inside of the layers on the sides, and those of the roof down on the outside of the layers on the sides so as to secure a full lap of at least one (1) foot. Especial care must be taken with this detail.

Section 222. When the finishing layer of concrete is laid over or next to the waterproofing material, care must be taken not to break, tear or injure in any way the outer surface of the pitch or asphaltum.

Skilled Labor to Be Employed.

Section 223. None but competent men, especially skilled in work of this kind, shall be employed to lay the waterproofing.

Measurements and Payments.

Section 224. Measurements will be made on the basis of actual area covered by the number of plies ordered, no account being taken of laps, and the waterproofing will be paid for as herein stipulated, Schedule Item 15.

16—STEEL AND IRON.

Open Hearth Process.

Section 225. Steel shall be made in open hearth furnace.

Chemical and Physical Properties.

Section 226. The chemical and physical properties of finished material shall conform to the following limits:

Properties	Structural Steel.	Carbon Rivet Steel.	Steel Castings.
Phos. (Max.)	.04%	.04%	.05%
Sulph. "	.05%	.04%	.05%
Mn. "	.60%	.60%	.80%
Si. "	.10%	.10%	.35%
Ult. Str.	60000±4000	50000±4000	65000±(Min.)
Yield Point	55% Ult.	55% Ult.	35000±(Min.)
Elongation	$\frac{1500000}{\text{Ult. Str.}}$	$\frac{1500000}{\text{Ult. Str.}}$	20% in 2″
Fracture	Silky.	Silky.	Fine granular.
Cold Bend	180° flat.	180° flat.	120° (d.=3+.)

Yield Point.

Section 227. The yield point shall be that strain, beyond which the elongation ceases to be proportional to the weight imposed, and may be indicated by drop of beam. The speed of testing shall be governed by the inspector.

Finish.

Section 228. Sufficient discard shall be made to insure sound material free from piping or excessive segregation. The material shall be finished straight and smooth, and shall be free from all seams or other defects. Any imperfection which may develop during the progress of the work will be sufficient cause for rejection.

Steel Castings.

Section 229. Steel castings shall be true to pattern and free from injurious imperfections.

Standard Test Pieces.

Section 230. The tensile strength, yield point and ductility of the material shall be determined from a standard test piece of not more than two (2) inches in width, and about one-half (½) square inch in sectional area, cut from a full sized bar, with sides turned or planed parallel so as to give a uniform minimum section for at least nine (9) inches. Whenever practicable the two sides of the test piece shall be left as they come from the rolls, but the finish on opposite sides shall be alike in this respect.

Specimens for Bending.

Section 231. Specimens for bending shall be cut from the material as rolled.

Rivet Rods.

Section 232. Rivet rods shall be tested as rolled.

Steel Castings.

Section 233. For steel castings the test piece shall be turned to a uniform minimum section of one-half (½) inch diameter, for a length of at least two and one-half (2½) inches. Specimens for bending shall be one (1) inch by one-half (½) inch in section.

Ductility Elongation.

Section 234. In determining the ductility, the elongation shall be measured after breaking on an original length as specified, in which length shall occur the curve of reduction each side of the point of fracture.

Where Taken From.

Section 235. For rollers the specimens shall be cut from the finished bar so that the centre of the specimen shall be one inch from the outside of the bar.

Section 236. For steel castings the specimens shall be cut from coupons cast on some portion of a casting from each melt, and shall be annealed with the casting before it is cut off.

Treatment of Test Specimens.

Section 237. The material from which test specimens are cut shall receive the same treatment as the material which it represents in the finished structure.

Number of Tests.

Section 238. At least one tensile and one bending test shall be made from each melt of steel as rolled. In case steel differing three-eighths (⅜) inch or more in thickness is rolled from one melt, a test shall be made from the thickest and from the thinnest material rolled.

Variation in Weight.

Section 239. A variation in weight of any piece of steel of two and one-half (2½) per centum from that specified, shall be sufficient cause for rejection, except in case of sheared plates exceeding one hundred (100) inches in width, where the variation may be five (5) per centum.

Material Marked.

Section 240. Each finished piece of steel shall be marked with the melt number, excepting that bars for reinforcing concrete shall be bundled and the melt number stamped on a metal tag attached to each bundle.

WROUGHT IRON.

Double Rolled.

Section 241. All wrought iron shall be double rolled, and no scrap used in its manufacture. It shall be thoroughly welded in rolling, shall be tough, ductile, and fibrous, and shall be finished straight and smooth. It shall be uniform in quality and free from surface defects.

Method of Testing.

Section 242. The methods specified for testing rolled steel shall apply generally to wrought iron. It shall show by the standard test piece an ultimate strength of fifty thousand (50,000) lbs. per square inch, and a yield point of twenty-six thousand (26,000) lbs. per square inch. It shall bend one hundred and thirty-five (135) degrees with inner radius not to exceed twice the thickness of the piece tested. When nicked and bent the fracture shall show at least ninety (90) per centum fibrous.

CAST IRON.

True to Pattern.

Section 243. All castings shall be true to pattern, out of wind and free from injurious imperfections. They shall be of a good quality of tough gray iron made by the cupola process. Sample test pieces, cylindrical in shape, one and one-quarter (1¼) inches in diameter, and fifteen (15) inches long, cast under the same circumstances as those which attended the casting of the full-sized piece, shall sustain at the centre, when resting upon two dull knife edges twelve (12) inches apart, a load of three thousand (3,000) lbs. with a deflection of at least one-tenth (1/10) of an inch before rupture.

WORKMANSHIP.

Quality.

Section 244 All workmanship shall be first class. All parts exposed to view shall be neatly finished. All nuts on the finished structure shall be hexagonal.

Rods Deformed Sections.

Section 245. Rods and bars to be used for reinforcing concrete shall be deformed as approved by the Engineer; plain bars will not be used.

Bent Rods and Bars.

Section 246. Bent rods and bars and other bent material shall be bent hot and annealed, except that obtuse bends in material less than one square inch section may be made cold when permitted by the Engineer. The bending shall be done before the material is delivered on the work. Except in special cases, all bends shall be made uniformly to template.

Material Straightened in Shop.

Section 247. All material shall be straightened in the shop before being worked in any way.

Holes Accurately Spaced.

Section 248. All holes shall be accurately spaced and punched. Unfair holes shall be reamed to exact match; drifting to enlarge the holes will not be allowed. Poor matching of holes will be cause for rejection.

Size of Punch.

Section 249. In punching, the diameter of the punch shall not exceed by more than one-sixteenth (1/16) of an inch, the diameter of the rivet to be used, and the diameter of the die shall be as small as may be required to punch a clean hole. When the materials to be sub-punched and reamed, a punch of diameter three-sixteenths (3/16) of an inch smaller than specified above shall be used, and all reaming shall be done after the material is assembled, with twist drills of one-sixteenth (1/16) of an inch greater diameter than the rivet to be used.

Sub-punching and Drilling.

Section 250. All material over seven-eighths (⅞) of an inch thick shall be drilled from the solid. Material over five-eighths (⅝) of an inch and not exceeding seven-eighths (⅞) of an inch in thickness shall be sub-punched and reamed. All other material may be direct punched.

Sheared Edges.

Section 251. Sheared edges of material exceeding five-eighths (⅝) of an inch in thickness, to be used in main members shall be planed at least one-eighth (⅛) of an inch.

Burrs Removed.

Section 252. All burrs shall be removed, and the members shall have all parts firmly drawn together with bolts before reaming or riveting is commenced.

Riveting.

Section 253. Rivets when driven shall completely fill the holes, and shall be machine driven wherever possible. They shall have full concentric heads or they shall

be countersunk when so required. Rivet heads shall not be flattened to less than half the diameter of the rivet on the line of the shank unless countersunk.

Use of Bolts.

Section 254. Generally the use of bolts instead of rivets will not be permitted, but when used in special cases the holes shall be reamed parallel, and the bolts turned to a driving fit.

Templates.

Section 255. All holes for field rivets, excepting those in connections of lateral and sway bracing, shall be sub-punched and accurately drilled to an iron template, or reamed and match marked while the connecting parts are temporarily assembled in the shop. In case of splices of upper chords or other compression members, the abutting members shall be brought to a forcible contact.

Finished Members.

Section 256. Finished members shall be true and free from kinks, twists, or open joints. Ends of floor beams and stringers shall be finished square and true.

Rods Upset.

Section 257. Rods and bars which are to receive a thread shall be properly upset. Where threads are cut on steel, they shall be properly filleted.

Annealing.

Section 258. Steel, except in minor details, which has been partially heated, shall be properly annealed. All steel castings shall be annealed.

Abutting Surfaces Faced.

Section 259. All abutting surfaces, except flanges of plate girders, shall be neatly planed or faced perpendicular to the direction of the strain, so as to insure even bearings.

Stiffeners.

Section 260. Stiffeners of plate girders shall fit neatly against the flange angles. Web splice plates and fillers under stiffeners shall be cut to fit within one-eighth (⅛) of an inch of flange angles.

Pins and Rollers.

Section 261. Pins and rollers shall be turned accurately to a gauge, and shall be of full size throughout. All pin-holes shall be bored truly and at right angles to the axes of the members to be connected, and shall fit the pins with a play not exceeding one thirty-second (1/32) of an inch.

Bed Plates Planed.

Section 262. Bed plates shall be planed. The bottom of the shoes shall be planed exactly parallel to the centre line unless otherwise shown. The cutting of the planing tool shall be in the direction of expansion.

Details Boxed.

Section 263. Nuts, bolts, rivets and other details shall be boxed.

Weight Marked.

Section 264. The weight of every piece and box shall be plainly marked upon it.

Inspection.

Section 265. Free access and information shall be given by the Contractor for a thorough inspection of material and workmanship, with proper office facilities.

Mill Orders in Triplicate.

Section 266. The Engineer shall be furnished copies in triplicate of all mill orders, and no material shall be rolled nor work done before the Engineer has been notified so that he may arrange for the Inspector.

Contractor Responsible.

Section 267. The Inspector shall make detailed reports of his inspection to the Engineer and may notify the Contractor of any defects in the material or workmanship, but all acceptances made by him shall be considered temporary, and his inspection shall in no way relieve the Contractor of full responsibility for the character and accuracy of the work until its completion and final acceptance by the Engineer.

Errors in Plans.

Section 268. The Contractor shall be responsible for all errors which can be discovered by checking or examining the plans.

Chemical Analysis.

Section 269. Chemical determination of the percentage of carbon, phosphorus, sulphur and manganese shall be made by the manufacturer from a test ingot, so taken, during the casting of each melt of steel, as to fairly represent the melt. Two copies of such analysis shall be furnished to the Engineer or his Inspector.

Check Analysis.

Section 270. Check analysis shall be made, at the discretion of the Engineer, of the finished material, on drillings from pieces selected by the Inspector from parts suspected of being most highly segregated. These analyses shall not show a variation above the ladle analysis of more than twenty-five (25) per centum for phosphorus, nor more than fifty (50) per centum for sulphur. The analyses shall be made by a chemist designated by the Engineer.

Contractor to Make Tests.

Section 271. The Contractor shall furnish, without extra charge, such standard test pieces as may be necessary to determine the uniform quality of the material and also the use of a reliable testing machine, with necessary labor for testing.

Inspector's Office.

Section 272. The Contractor shall furnish for the use of the Inspector a suitably equipped office at the mills and at the shops.

Loading and Shipping.

Section 273. All parts shall be carefully loaded and protected from injuries during transportation by such means as will be satisfactory to the Inspector. After delivery of materials at the work the Contractor will be required to store the same on skids at least twelve (12) inches above the ground and to keep the same in good condition. Any piece showing injurious effects of rough handling at any stage until the final acceptance of the work may be rejected.

Payments for Steel and Cast Iron.

Section 274. The prices to be paid for steel and cast iron are as herein provided in Schedule Items 19, 20, 21, 22, 23 and 24. These prices include the cost of material delivered and erected in the work, with the exception of Item 23, the placing of which is provided for in Item 22. These prices are to include also the cost of all necessary cleaning and painting (where painting is required) and of all other incidental work. The quantity of metal to be paid for shall be the number of pounds actually placed in accordance with the drawings or orders.

Miscellaneous Castings.

Section 275. For other castings, not included in the above and not including castings for sewer work or pipes, payment will be made as provided in Schedule Item 25.

Wire Mesh.

Section 276. Wire mesh, of a character and weight to be approved by the Engineer, is to be furnished and placed around the lower flanges of the roof girders, and at other places as may be required, in order to hold the concrete in place.

Wire Mesh, Payment For.

Section 277. Wire mesh, wherever used, will be paid for as stipulated in Schedule Item 26, which price is to include the material in place and all work necessary and incidental thereto.

17—PAINTING.

Section 278. All metal work, excepting as otherwise herein provided, shall be painted with three coats of paint, including the shop coat, of kind and quality approved by the Engineer. Lead or carbon paint will generally be required.

Shop Coat.

Section 279. All iron shall be scraped free from scale, and receive one coat of red lead paint as herein specified before leaving the shops. All surfaces which come

in contact or are enclosed shall be painted before being assembled. All turned or faced surfaces shall receive a coat of white lead and tallow before leaving the shops.

Quality of Red Lead.

Section 280. The red lead shall be strictly pure, and shall contain at least 80 per cent. of "true lead" ($Pb_3 O_4$). The color shall be a clean, pure tint. The red lead shall be of the fineness that when washed with water through a No. 19 silk bolting cloth, not more than 1 per cent. shall be left on the screen.

Quality of Linseed Oil.

Section 281. The linseed oil must be absolutely pure, fully aged and ripened, well settled oil. It shall be perfectly clear on receipt, and after heating to 212° Fahr. on a current of hydrogen, shall not show a deposit of foots nor a loss of over 0.4 per cent. for raw oil, nor over 0.2 per cent. for boiled oil. The specific gravity at 60° Fahr. for raw oil shall be between 0.932 and 0.937, and for boiled oil between 0.936 and 0.940.

Original Packages.

Section 282. All material shall be delivered, inspected and sampled in original packages.

Proportions in Mixture.

Section 283. Red lead paint shall be mixed in the proportion of 500 pounds of red lead to 5½ gallons of boiled linseed oil, and 11 gallons of raw linseed oil.

Damaged Shop Coat to be Renewed.

Section 284. Where the shop coat has become damaged before or after erection, through any cause whatever, it shall be renewed with the same kind of paint as originally used, such renewal to be considered only as a part of the original shop coat. If the Engineer so directs, on members or parts of members buried in concrete the shop coat will be omitted.

Structural Steel and Rods.

Section 285. Structural steel and rods to be embedded in concrete shall be protected from the weather before being put in place, and shall be cleaned and scales removed but not painted before being incased in the concrete.

Second Coat Carbon Paint.

Section 286. The second coat of paint shall be a carbon paint approved by the Engineer. It shall be applied after erection, but not until the metal has been cleaned from dirt or other objectionable matter that may be found thereon.

Metal to be Cleaned After Erection.

Section 287. After erection the metal shall be thoroughly cleaned of all dirt, rust or scales by stiff wire brushes or sand blasts, as directed, and afterward dusted and thoroughly and evenly painted as described above. No paint shall be applied until the cleaning has been passed upon by an Inspector.

Section 288. Between stations the exposed members shall be given a third coat, which shall be a carbon paint of a color and quality approved by the Engineer.

Third Coat, When Applied.

Section 289. The third or finishing coat shall be applied to all exposed surfaces of the metal after its erection, and after a completion of the masonry or other work; it shall be applied at such time after such completion and before the final acceptance of the work as in the judgment of the Engineer may be advisable. The several field coats shall be sufficiently tinted to be distinctive.

Surfaces in Contact.

Section 290. Surfaces of exposed members inaccessible after erecting, shall be cleaned and painted before erecting.

Recesses, etc.

Section 291. All recesses that might contain water, or through which water could enter, must be filled with thick paint or a waterproof cement of ground skins before receiving final painting.

Section 292. All surfaces so close together as to prevent the insertion of a brush, must be painted thoroughly by using a piece of cloth, if necessary.

Rainy or Freezing Weather.

Section 293. No painting in rainy or freezing weather or on wet surfaces will be permitted.

Payments.

Section 294. Payment for painting is included in the prices for steel and iron.

18—Ducts and Conduits.

Vitrified Ducts—Quality and Size.

Section 295. The ducts to contain cables for transmitting electricity shall be manufactured of the best clay, thoroughly mixed, burnt and vitrified, sound in all respects, straight and free from soft spots, stones, cracks or blisters liable to impair their strength or durability; in lengths generally of from eighteen (18) to thirty-six (36) inches, shorter lengths shall only be used as directed; generally in four-way form with circular holes, the least diameter to be three and one-half (3½) inches; one, two or three-way ducts shall be used in special cases as determined by the Engineer. The interior surface of the holes to be smooth and clear of warts, tits, pits or blisters, which may tend to injure the electric cable in pulling the same through the duct. The ends to be cut smooth and at right angles to the axis of the duct and beveled on inside for three-quarters (¾) of an inch.

Thickness of Ducts.

Section 296. The outside walls and webs of four-way ducts to be three-quarters (¾) of an inch thick; the outside dimensions of ducts to be not less than nine and one-quarter (9¼) nor more than ten (10) inches, and constructed square on outer lines; the dimensions of single, two-way or three-way ducts shall be consistent with the above.

Ends Combed.

Section 297. The ends of ducts to be combed with two (2) sets of three (3) combings each, each combing to have a width of one-quarter (¼) of an inch and a depth of one-sixteenth (1/16) of an inch.

Glaze.

Section 298. The inside and outside of ducts to be thoroughly glazed in the most approved manner with good salt glaze.

Inspection.

Section 299. All ducts to be subject to inspection, both at the place of manufacture and on the work. All rejected ducts to be promptly removed by the Contractor at his expense.

How Laid.

Section 300. The ducts shall be laid in beds of cement mortar about one-quarter (¼) of an inch in thickness, with broken joints and with full bearing. Two (2) strips of thick unbleached muslin six (6) inches wide, and coated with neat cement mortar, shall be used to wrap each joint, the ends of the wrap to lap six (6) inches. The muslin shall be not less than 56 by 60 count, weight not less than four (4) ounces to the yard and width thirty-six (36) inches. In laying the ducts care must be taken to close abutting joints so that practically the end of ducts shall be in contact on all sides. Where ducts are laid on curves, the wraps must be doubled if required, to protect the openings between the ends of the ducts on the outer line of the duct and to exclude all mortar from duct openings.

Mandrels.

Section 301. The ducts shall be laid with a linked mandrel of the length and diameter to be prescribed, the same accurately fitting the duct openings, the mandrel to be left in each duct until the next succeeding duct is laid.

Dowel Pins.

Section 302. The ducts shall be laid with dowel pins, at least two pins on the opposite sides horizontally.

Laid to Line.

Section 303. The ducts shall be so laid that the centre of the holes shall be true to line and grade.

To be Rodded.

Section 304. After the ducts are laid, and sufficient time is given to allow the mortar in beds to partially set, they shall be rodded; all mortar or other foreign matter must be cleaned from the duct openings, leaving a clear and smooth opening.

If obstructions are found in rodding the ducts which cannot be removed by cleaners, so as to give a clear and smooth opening of three and one-half (3½) inches in all duct openings, the ducts shall be removed and relaid; all ducts, during construction and after being rodded, shall be plugged with suitable plugs, to be furnished by the Contractor. If wooden plugs are used they shall be immersed in water for at least eight (8) hours before being put in place.

Measurement and Payment for Vitrified Ducts.

Section 305. Tunnel ducts shall be paid for per duct foot in place at the price herein stipulated for tunnel ducts, Schedule Item 18, which price shall include the cost of furnishing, laying, rodding and all the material and work incidental thereto. The tunnel ducts to be provided under Schedule Item 18, shall include only those intended solely for the purpose of the operation of the Railroad.

Duct Manholes.

Section 306. Duct manholes shall be built at the sides of the railroad in connection therewith and as indicated on the plans. These manholes shall be generally at intervals of about three hundred feet, and shall be on either or both sides of the Railroad, as necessary, in accordance with the location of the duct lines. They may vary in form as may be necessary to accommodate the work to local conditions.

Duct Manholes at Stations.

Section 307. Duct manholes will be built at the ends of the stations to provide for the passage of the ducts under the station platforms, and if found necessary on account of the lengths of stations, additional manholes will be constructed under the platforms.

Section 308. At manholes the ducts will be laid to conform to the special conditions.

Section 309. In all work where iron pipe or fibre conduits are installed for a part of their length in the structure and for another part as open construction, the ends of such runs shall be carried outside of said structure as open construction and shall terminate in outlet or junction boxes located by the Engineer.

Section 310. The iron pipe or fibre conduits required by section 309 will be built mainly in the walls, roofs or other parts of the stations; portions, however, of the runs will be left exposed, to be covered later by the station finish work.

Quality of Iron Pipe Conduit.

Section 311. All iron conduit used for any purpose in connection with the work herein shall be of the best grade (Galvaduct or equal), standard weight wrought iron or steel piping, protected inside and out by a coat of zinc or enamel. It shall be delivered to the work in bundles of full length pipes, each length marked with the trade-mark of the manufacturer. It shall bend cold 90 degrees about a radius equal to ten diameters without signs of flaw or fracture in either pipe or enamel.

Installation.

Section 312. All conduit shall be carefully cleaned before and after erection, and all ends shall be reamed free from burrs, and inside surfaces shall be free from all imperfections liable to injure the cable.

Joints Watertight.

Section 313. All joints shall be made with standard couplings, well treated with red lead, and screwed up to make a watertight job.

Fibre Conduits, Quality, Laying, etc.

Section 314. All fibre conduit shall be made of impregnated fibre equal to that manufactured by the Fibre Conduit Company of Orangeburg, New York.

It shall be of uniform thickness, having walls of not less than one-quarter (¼) inch and true cylindrical holes not less than two (2) inches in diameter. Lengths shall be not less than five (5) feet, and all ends shall be finished.

All joints shall be made by suitable finished sleeves fitting closely over the ends of the conduit and made watertight by making up with an approved bituminous compound.

After laying, all ducts shall provide a clear, true opening, free from obstructions and imperfections in any way injurious to the wires to be installed. All ducts shall be rodded and cleaned with an approved mandrel not less than one and three-quarter (1¾) inches in diameter and eighteen (18) inches long.

Built in Concrete, etc.

Section 315. Conduits built into concrete or other parts of the structure shall be properly protected and supported, so that the same shall not be injured by the building operations.

Not Built in Concrete.

Section 316. Conduit not built into the structure shall be supported by approved pipe straps located not more than eight feet apart, or in any other manner designated by the Engineer, and they shall be kept boxed or otherwise suitably protected from injury.

Bends and Offsets.

Section 317. Bends and offsets may be made in the field if proper tools are used, but in no case shall deformed, split or crushed conduit be erected. Not more than two right angle bends shall be made between any two outlet boxes without special approval of the Engineer.

Measurement and Payment.

Section 318. Measurements for the above iron pipe or fibre conduits shall be per linear foot of single conduit placed in the work—in accordance with the requirements—and payment for the same shall be as herein stipulated in Schedule Item 32.

Outlet and Pull Boxes and Payment for Same.

Section 319. All outlet and pull boxes shall be made of cast iron, with openings threaded for the conduit ends, and conduits shall be screwed into these openings and made up with red lead to effect a watertight joint. Covers shall be of cast iron and watertight, and no other boxes or covers shall be used except under special permission of the Engineer. The price for each cast iron outlet box furnished and placed in the work shall be as herein stipulated in Schedule Item 33.

19—DRAINS AND PUMPS.

Railroad to be Drained.

Section 320. Every part of the Railroad, the stations and appurtenances connected therewith, must be arranged so far as possible that any water finding access thereto will be led away automatically to the City sewers.

Section 321. Where the Railroad is on an inclined gradient, and is constructed in dry, porous soil, the floor of the Railroad may be depended on to act as a conduit. At the bottom of the inclined gradient connections must be made with a sewer or with subdrains lying beneath the Railroad and draining into the sewers.

Subdrains.

Section 322. Along such parts of the work where the soil is not porous, or where the floor of the Railroad cannot, in the judgment of the Engineer, be used as a conduit, there shall be laid, beneath the rail level and on a continuous descending gradient, drain pipes of vitrified salt-glazed stoneware, of the quality described in these specifications for sewer pipe. These drain pipes shall be of such diameter not exceeding fifteen (15) inches, as the Engineer may direct, and there shall be one (1) such drain for each two (2) tracks. Each drain shall be laid in the concrete or directly in the soil with tight or open joints, as directed, and in such manner and in such position as, in the opinion of the Engineer, local circumstances require.

Connections and Cross Drains.

Section 323. Where drain pipes connect with the City sewers, the junction shall be protected by suitable traps, and back-pressure valves or gate valves where necessary, to prevent back rush of water or gas from the sewers. Connections with the Railroad shall be as necessity demands and all as directed by the Engineer. Cross drains to connect with the main drains will be placed at such places and in such manner as the Engineer shall direct; also vertical drains at the sides of the Railroad. These drains shall be of vitrified pipe or of cast iron, as directed.

Broken Stone for Drainage.

Section 324. On the roof of the Railroad and at other points as may be directed or indicated on the plans, broken stone shall be placed for the purposes of drainage.

Sumps.

Section 325. At the low points of the grade of the Railroad where the same passes below the bottom of adjacent sewers there shall be constructed sumps connected with the subdrains or the floor of the Railroad. Such sumps must be watertight, with a capacity of not less than eight hundred (800) gallons each.

Pumps for Tunnel Drainage.

Section 326. Adjacent to each sump a suitable enclosure shall be provided in which two pumps shall be installed, each of which shall have ample capacity to remove all the water entering the sump at that point under ordinary conditions. These pumps shall each have a separate source of power, and shall be arranged to operate antomatically. Under this contract the Contractor will only furnish the pump or pumps required and set them in place as directed, including the necessary pipe and drainage connections between the sumps and sewers.

The pumps shall be of the capacity required by the Engineer.

Capacity.

Section 327. If in the opinion of the Engineer the service requires it, each of these pumps shall be able to remove from the sump eight hundred gallons per minute.

Delivery to Sewers, etc.

Section 328. The delivery of such pumps shall be into the City sewers, and all piping, valves, etc., in connection therewith, shall be installed as a part of this contract.

Payment for Drains, Broken Stone, Pumps, etc.

Section 329. All drains shall be measured in place and the actual net length as laid for each class of drain will be paid for as herein provided in Schedule Item 17. The prices therein provided for each class of pipe will include providing and laying the pipe and all specials of any nature whatsoever such as bends, tees, wyes, handholes, etc., and all materials necessary for jointing the same. Where back-pressure valves or gate valves are required the cost of setting the same will be included in the above, but the Contractor will be paid in addition the actual net cost of such valves plus ten (10) per cent.

Section 330. For broken stone for drainage, furnished and placed, Section 324, payment will be made as provided in Schedule Item 14.

Section 331.. For pumps, Section 326, the Contractor will be paid as provided in Article XII. of the contract, not including, however, the pipe connections with sumps and sewers which pipe will be paid for as hereinbefore provided in Schedule Item 17.

Soil Pipes for Stations.

Section 332. It will be necessary to lay soil pipes in the floors and walls of the stations. These pipes are to be cast iron, "extra heavy." They will be placed in positions as shown on the plans and will be paid for as provided in Schedule Item 34.

20—SEWERS.

In Accordance With Plans and Specifications.

Section 333. All sewers and appurtenances shall be built of the materials, of the sizes and dimensions, on the lines and grades, at the depths, with the connections, and in the manner called for by these specifications and shown on the drawings.

Change of Location.

Section 334. If in the opinion of the Engineer, it is impracticable during the progress of the work to construct any sewers, manholes, or other appurtenances, according to the contract drawings, owing to the presence of unknown subsurface structures or other contingencies, the Contractor shall construct such sewers, manholes or appurtenances in the location given by and according to the directions of the Engineer.

General Clauses Apply.

Section 335. The general clauses in this contract relating to excavation, both in open trench and tunnel, backfilling, cement, mortar, masonry, waterproofing, piling, timber work of all kinds, care of streets and public places, maintenance of surface and subsurface structures, protection of persons and property, repaving or restoring of the surface of the street or other public places, responsibility of the Contractor, authority of the Engineer to examine and condemn materials, and the power of the Commission and the Engineer in all or any other respects to enforce this contract, apply to the construction and reconstruction of sewers, water mains or pavements, unless specifically amended or exempted, both along the route occupied by the Railroad and elsewhere.

No Claims for Damages.

Section 336. Should postponement or delay be occasioned by the precedence of paving or other contracts, which may be either let or executed by the Borough President, Commissioner of Water Supply, Gas and Electricity, or other heads of

departments, either before or after the execution of this contract, on the line of the work, no claims for damages therefor shall be made or allowed; nor shall any claim for damages be made or allowed in consequence of the street or the adjoining sewers not being in the condition contemplated by the parties at the time of making the contract, except that if the Contractor shall be delayed in the performance of his work by reason of the street or the adjoining sewers not being in such condition, an allowance of time may be given for the completion of the work as elsewhere provided in this contract.

Size of Trenches.

Section 337. The trenches for sewers and basin culverts both in earth and in rock, in streets along the route of the Railroad, shall have vertical sides and shall be not less than six inches wider than the greatest external width of the sewer or its foundation on the side farthest away from the subway; and in other streets the trenches shall have vertical sides, and shall be not less than six inches wider on each side than the greatest external diameter of the sewer, but shall be not less than three feet in width. They shall be excavated to the depth and to the form of the sewer or its foundation.

Limit of Trench Opening.

Section 338. Not more than one hundred (100) feet of trench in sewers off the line of the railroad shall be opened at any one time in advance of the sewer already completed, unless by permission of the Engineer, and for a distance specified.

Excavation Completed in Advance.

Section 339. The excavation of trenches shall be fully completed a sufficient distance in advance of the laying of the sewer, and the exposed end of the sewer shall in all cases be fully protected.

Trenches for Manholes and Receiving Basins.

Section 340. Where the foundation for a manhole or a receiving basin extends beyond the line of such manhole or receiving basin, the minimum excavation required in earth shall be to the lines of the smallest rectangle, enclosing the full dimensions of the exterior of the foundation, and shall have vertical sides to the surface, but it shall, in all cases, be not less than six inches larger than the greatest external dimension of the manhole or receiving basin. In rock excavation, the trench shall be six inches larger than the greatest external dimension of the manhole or receiving basin, or its foundation, and shall have vertical sides to the surface.

Foundations.

Section 341. Where the ground does not afford a sufficiently solid foundation, the trench shall be excavated to such increased depth as the Engineer may deem necessary, and this extra depth, and all other irregularities in the bottom of the trench, shall be filled up to the required level and form, with such material, and in such manner, as the Engineer shall direct. If so directed, piles shall be driven and a timber or reinforced concrete foundation shall be constructed, as elsewhere provided in these specifications, to support the sewer.

Inspection of Grades.

Section 342. When the trench is properly prepared, and before laying any sewer, the Contractor shall notify the Engineer, who will, thereupon, cause the grades for the sewer to be tested, and if correct the sewer shall then be laid in the presence of a duly authorized inspector, and no construction work shall be done in his absence.

Trenches to be Kept Free from Water.

Section 343. The trenches shall be kept entirely free from water while the foundation and the masonry are being constructed or the sewer laid. In no case shall water be allowed to flow over the invert or foundation or through the sewer until the mortar is thoroughly set.

Tunneling.

Section 344. When tunneling for sewers shall be deemed advisable, it shall be done in a manner approved by the Engineer.

Gutter and Passageway to be Kept Open.

Section 345. At all times, gutters shall be kept open for surface drainage, and the streets and sidewalks shall be kept clear and free for the passage of carts, wagons, carriages and street or steam railroad cars or pedestrians, and as otherwise provided in these specifications.

Crosswalk, Sidewalk and Roadway to be Kept Clear.

Section 346. Where any crosswalk or roadway is cut by the trench, it shall be temporarily replaced by a timber bridge with side railings, according to the direction and approval of the Engineer. The work shall at all times be conducted so as to cause as little inconvenience as practicable to the public.

Disposition of Paving Material.

Section 347. All curb, gutter, flagging, paving and macadam stones, necessary to be removed, which in the judgment of the Engineer are suitable to be used again, shall be stored in such places as the Engineer shall direct, or shall be removed as provided in these specifications; in all cases a passageway on the sidewalks and in the roadway shall be preserved free from needless obstructions.

Flow of Sewers to be Maintained.

Section 348. The Contractor shall provide for the flow of all sewers, drains and watercourses, interrupted during the progress of the work, and shall restore and make good all connections, and shall immediately cart away all offensive matter, in such manner and with such precautions as the Engineer may direct. All temporary house connections shall be made by closed iron pipes, with suitable provision for preventing leakage at joints. Wooden troughs for such connections will not be permitted.

Brick.

Section 349. In the construction of brick masonry none but the best quality of common brick burned hard entirely through, regular and uniform in shape and size and of compact texture, shall be used. They shall be culled as they are brought on the ground, and bats and bricks of improper quality are to be removed from the work. A limited number of bats may be used in manholes and closures, and in the outer ring of the sewers where more than two rings of bricks are required.

How Laid.

Section 350. The bricks shall be properly wet immediately before laying. Every brick is required to be laid in a full joint of mortar, made as described in these specifications, on its bed, end and side, at one operation. In no case is mortar to be slushed or grouted in afterward. The bricks shall be neatly and truly laid, every second course to line, and the points to be carefully struck on the inside.

Racked Back or Toothed.

Section 351. All brick work, as it progresses, shall be racked back in courses, and in no case will it be allowed to be toothed, unless by special permission from the Engineer.

Back or Stone Inverts.

Section 352. All inverts, or bottom curves, shall be formed from profiles accurately made according to the dimensions of the sewer, and correctly set according to the grades furnished. The masonry shall be allowed to set for twenty-four (24) hours before the arch is turned. Vitrified brick or granite paving blocks shall be used for the inner ring of the invert when required by the Engineer, and whenever so used they must be thoroughly jointed, so as to be watertight along the inner surface of the sewer. The last course of the invert masonry below the springing line shall be laid as headers.

Brick Arches.

Section 353. The arches or upper curves shall be formed on strong centres of correct form, according to the sizes and shapes required, and keyed with stretchers in full joints of mortar. The extrados of the arch shall be plastered with mortar one inch thick, mixed in the proportion of one part of cement to two parts of sand. The centres shall not be removed or withdrawn in less than thirty-six hours, or until the work is thoroughly set, and until the filling in of the arch is properly put into place to a depth which is at least one foot above the crown of the arch. The centres in all cases shall be struck and not drawn, so as not to crack or injure the work. Should any crack or settlement appear in the arch after the centres are removed, so much of the work as the Engineer may require shall be taken down immediately and replaced.

Spurs.

Section 354. Vitrified or iron sewer pipes or spurs, equal in every respect to those described elsewhere in these specifications, and of a size required by the Engineer, but not less than six inches interior diameter with hubs moulded for house connections, and of sufficient length to project at least four inches beyond the exterior of the

sewer, shall be built into the walls of brick sewers and at such an angle as indicated on the plan, or as the Engineer may direct.

How Built In.

Section 355. Spurs shall be built in wherever similar house connections exist in the present sewer which is to be reconstructed under this contract, but in no case shall the distance be more than twenty feet between spurs. In the case of the construction of new sewers where no sewers existed previously, except sewers under public parks or those crossing intersecting streets, they shall be built opposite each house, and where there are no houses, they shall be not more than fifteen feet apart on each side of the sewer or at such frequent intervals as local conditions may require. They shall be set so that their inner ends shall be flush with the inner face of the sewer, at such height in the walls as the Engineer may direct, and each pipe shall be sealed on the outside with an approved earthenware cover set in mortar.

Iron Chair Spurs.

Section 356. Where the sewers to be built under this contract will be at a depth greater than thirteen feet below the established grade of the street (or below the surface of the street where final grades have not been established), cast iron chair spurs, of the design shown on the drawings, not less than six inches in diameter and of the weight of extra heavy soil pipe, shall be used unless otherwise ordered by the Engineer. Where house drains are to be connected to these spurs, extra heavy soil pipe and fittings shall be used for the riser between the spur and the house drain. Where the spurs are provided for future connections, risers of extra heavy soil pipe shall be placed in each spur and shall be brought to a point thirteen feet below the established grade of the street, the end of which shall be sealed with an approved cover laid in cement mortar. The joints of this pipe shall be packed, leaded and caulked in accordance with these specifications for laying water mains.

Under Station Platforms.

Section 357. Wherever the sewer passes under a station platform or other structure, extra heavy soil pipe shall be laid from the spur to the outside of such station or other structure, brought up to a point thirteen feet below the established grade of the street, caulked and sealed, as provided above. All pipes passing under such structures shall be laid in concrete.

Concrete Sewers, Form, Dimensions and Materials.

Section 358. If, during the construction of the sewers, it is deemed advisable to interchange concrete and brick, the Contractor may, with the approval of the Engineer, build such sewers of either kind and quality herein specified.

Steel Bars Used if Ordered.

Section 359. Concrete sewers shall be reinforced with steel bars, if so indicated on the plans or directed by the Engineer.

Profiles and Inverted Centres for Inverts.

Section 360. Proper profiles for the concrete inverts shall be set up at the required distances, and the concrete for the bottom and invert of the sewer shall be deposited in place and rammed and worked down to the required shape. The concrete for the bottom and invert, if so directed, shall be placed in alternate lengths extending between every other pair of profiles, so that opportunity may be given to properly work the concrete in place.

Invert to be Protected.

Section 361. The concrete of the invert shall be protected during the progress of the work with planking, or by such other suitable methods as the Engineer shall direct and for so long a time as he may require.

Forms, Moulds, etc.

Section 362. Suitable forms or moulds, of the size and design to be approved by the Engineer, shall be provided by the Contractor to support the concrete of the side walls and roof while the same is being rammed into the permanent work.

Defective Work.

Section 363. If any voids, or irregular or defective work is discovered upon removing the forms or moulds, such voids or work shall be cut out and filled with a rich concrete or mortar mixed in such proportions and of such materials as provided elsewhere in these specifications.

Joints.

Section 364. No joints between different sections of the walls of a sewer shall, in any case, be a straight line, but shall always be stepped or toothed, so as to give a broken joint in the manner to be approved by the Engineer.

Spur Pipes, Branches, etc.

Section 365. In so far as they will be applicable to sewers constructed of concrete, the provisions and requirements for spurs, branches, etc., in brick sewers shall be understood to govern in such construction.

Vitrified Pipe Sewers—Quality of Pipe.

Section 366. Pipe sewers shall be built of vitrified, salt glazed stoneware pipe, with or without hub, as the Engineer may direct. The pipe shall be of the best quality, thoroughly and perfectly burnt, without warps, cracks or imperfections, well and smoothly glazed over the entire inner and outer surfaces and perfect in shape. The pipe shall be subject to all tests ordered in conformity with any requirements of the Bureau of Sewers, at any time previous to its being used.

Thickness.

Section 367. The size of the pipes shall be designated by their interior diameters. Each pipe shall be a true cylinder, and of even thickness throughout, according to the following schedule:
6-inch pipes shall be not less than ⅝ of an inch thick.
8-inch pipes shall be not less than ¾ of an inch thick.
10-inch pipes shall be not less than ⅞ of an inch thick.
12-inch pipes shall be not less than 1 inch thick.
15-inch pipes shall be not less than 1¼ inches thick.
18-inch pipes shall be not less than 1½ inches thick.
24-inch pipes shall be not less than 2 inches thick.
30-inch pipes shall be not less than 2½ inches thick.

Lengths.

Section 368. No pipe shall be less than 2 feet in length, and pipes of 12 inches, 15 inches and 18 inches in diameter shall be not less than 3 feet in length.

Curved and Split Pipes.

Section 369. When required, curved pipes shall be furnished and laid, curved to such a radius as may be required or as indicated on the plan of the work. No curved pipe shall exceed 3 feet in length. Split pipes shall be used when found necessary.

Hub and Spigot Pipe.

Section 370. In case the Engineer shall order hub and spigot pipe to be used, the hub shall have a depth of at least three (3) inches from its face to the shoulder of the pipe on which it is moulded, and shall have an interior diameter not less than one (1) nor more than two (2) inches greater than the exterior diameter of the pipe which is to be fitted into it.

Straight Pipe With Collars.

Section 371. In case the Engineer shall order pipe without hubs to be used, it shall be fitted with a collar of the same thickness as the pipe and not less than five inches wide. Each collar must have an internal diameter of not less than one-half inch nor more than one and one-half inches greater than the external diameter of the pipe to which it is to be fitted.

Spur Pipes.

Section 372. Pipes having spurs not less than six inches in diameter with hubs moulded thereon for house connections shall be furnished and laid at such points as indicated on the plan or as directed by the Engineer, and when not immediately used, they shall be sealed on the outside with approved vitrified earthenware covers set in mortar.

Risers.

Section 373. The provisions for risers on brick sewers shall also apply to pipe sewers.

Bends.

Section 374. Bends, siphons and special pipes shall be furnished and laid of the size and forms shown on the plans of the work, or as required.

Pipe Sewers, How Laid.

Section 375. All pipes shall be laid in concrete cradles of the required form and dimensions. The first layer of concrete shall be four inches thick, for the full width of the cradle, and after being thoroughly tamped shall be allowed to set for a period of not less than twenty-four hours. Upon the bed thus prepared, the pipe shall be laid true according to the lines and grades furnished. The ends of the pipes shall abut against each other and in such manner that there shall be no shoulder or unevenness of any kind along the bottom half of the sewer on the inside. Unless otherwise ordered, not less than fifteen feet of pipe shall be laid at any one time, in any one length of trench. The remainder of the concrete shall then be put in place and shall be exposed for at least twenty-four hours for inspection, as required for the bottom course.

Jointing Hub and Spigot Pipes.

Section 376. When hub and spigot pipes are used, the lower half of each hub shall be plastered on the inside with a layer of cement mortar mixed in the proportion of one part of cement to one part of sand and of sufficient thickness to bring the inner surface of the abutting pipes flush and even with the established flow line. After the pipes are fitted, the space between the inside of the upper half of each hub and the outside of the entering pipe shall be filled with cement mortar mixed as above specified, and the outside of the joint shall be thoroughly sealed with the same kind of mortar and the joints carefully wiped inside and outside.

Jointing Pipes Without Hubs.

Section 377. When pipe without hubs is used, a collar or ring shall be used at joints and shall lap equally the ends of each abutting pipe. Such collar or ring shall consist of not more than three pieces, the largest of which shall be placed at the bottom.

Spaces Between Pipes Uniform.

Section 378. The space between the ring and the pipes shall be as uniform as possible and shall be thoroughly filled with cement mortar mixed in the proportions specified for hub and spigot pipe. The joints shall be carefully wiped and pointed inside and outside and all mortar that may be left on the inside shall be removed and the inside of the pipe left clean and smooth throughout.

Iron Pipe Sewers.

Section 379. Sewers of iron pipe, of quality and laid in the manner described elsewhere in these specifications for the laying of water mains, shall be laid wherever indicated on the plans or at such places as the Engineer shall direct.

Special Castings.

Section 380. Wherever such pipes are laid under station platforms or through vaults, they shall, when required by the Engineer, be provided with special castings for manholes, which shall be fitted with a cover bolted on so as to make an airtight joint, according to the plans to be furnished by the Engineer.

Ventilators.

Section 381. Whenever, in the opinion of the Engineer, it becomes necessary to provide ventilation for sewers under station platforms or other structures, iron pipe shall be laid from the sewer to the surface of the street and fitted with proper gratings according to the plans to be furnished by the Engineer.

Connections.

Section 382. All existing sewers, culverts, drains and house connections intercepted by the proposed sewers, culverts or receiving basins shall be connected with the new work by proper curves and grades and in such manner as the Engineer shall direct; and all drains, basins or culverts rendered unnecessary or becoming disused by the work herein contemplated shall be filled in and made solid with good wholesome earth in the manner directed. Provision shall also be made for the connection of future sewers or basins by constructing brick spurs or inserting vitrified pipe at the points indicated on the contract drawings and at other points as the Engineer may direct. These connections shall be closed with bulkheads not less than eight inches in thickness and of the quality specified for brick masonry.

Fresh Work to be Protected.

Section 383. All fresh work shall be carefully protected from injury in every way. No wheeling or walking will be allowed on it and any portion injured must be relaid by the Contractor; no walking or working over the pipes after they are laid,

except as may be necessary in tamping the earth and refilling, will be allowed until there is at least two and one-half feet of earth over them.

Pipes to be Kept Clean.

Section 384. The interior of pipe sewers shall be carefully freed from all dirt, cement and superfluous material of every description as the work progresses, for which purpose a disc, mould or plate, attached to a rod sufficiently long to pass two joints from the end of the pipe last laid, shall be continuously worked through.

Exposed Ends of Pipes to be Protected.

Section 385. The exposed ends of pipe sewers shall, in all cases, be protected with a board or other stopper carefully fitted to the pipe, to prevent earth or other substances from washing in, and in no case shall brick or stone be used for that purpose.

Manholes.

Section 386. The masonry of manholes shall be carried up so that the top of the iron head when set shall be at the level of the established grade of the street at that point or to such height as the Engineer may direct, and from templates correctly made and set at top and bottom, between which not less than eight lines shall be drawn. Where manholes are not built to the established grade of the street, they shall be covered, when necessary, by selected bluestone slabs eight inches in thickness, to support the manhole heads. All joints shall be neatly struck and pointed on the inside. Each manhole shall be plastered thoroughly on the outside with cement mortar one inch in thickness, mixed in the proportion of one part of cement to two parts of sand.

Foundations.

Section 387. The foundations for manholes shall be of concrete or masonry of the kind indicated on the plans and shall be not less than twelve inches below the invert elevation of the sewer, except as otherwise indicated on the plan. When foundation additional to that indicated on the plan is required, it shall be built as directed by the Engineer.

Section 388. Sewer pipes shall be built in and trimmed, when necessary, so as to be flush with the inner face of the manhole, and an arch, laid in cement mortar, shall be turned over the pipe.

Vitrified Bricks or Granite Blocks.

Section 389. The invert shall be built of vitrified brick, granite blocks or concrete masonry, as indicated on the contract drawings.

Use of Bats.

Section 390. A reasonable number of bats not smaller than half bricks may be used in the construction of manholes or receiving basins, provided all interstices are thoroughly filled with mortar.

Steps.

Section 391. Standard steps of good quality of galvanized wrought iron, of the size, length and shape required for steps, shall be built into the interior sides of all manholes at a distance apart of not more than fifteen (15) inches vertically and they shall be so arranged that the lowest step shall be not more than two feet above the bench at the bottom of the manholes nor more than two feet above the invert of the sewer where there is no bench. Each manhole head shall be cast with a wrought iron step on the inside, when directed by the Engineer.

Bluestone.

Section 392. Hammer-dressed bluestone shall be furnished and laid of the form and thickness required as indicated on the plans or as otherwise directed.

Manhole Head and Cover.

Section 393. A cast iron manhole head and cover of the quality specified for cast iron, and except in special cases, of the pattern adopted by the President of the Borough in which the work is located, and in dimensions, weight and all other respects satisfactory to the Engineer shall be fitted on a bed of mortar to each of the above described manholes. Manhole heads and covers which do not conform to these specifications shall be at once removed from the work.

Perforations.

Section 394. Covers to be used on manholes in the street shall be perforated. Those used on sidewalk manholes shall be tight-fitting, without perforations.

Weights.

Section 395. Each manhole head and cover shall have its weight distinctly marked upon it with oil paint. The following shall be allowed as the minimum and maximum weights:

Street manhole head, 475 to 500 pounds.
Street manhole cover, 135 to 150 pounds.
Sidewalk manhole head, 300 to 310 pounds.
Sidewalk manhole cover, 100 to 110 pounds.

Noiseless Heads and Covers.

Section 396. When the pavement of the street is asphalt on wooden block, the manhole shall be fitted with a noiseless head and cover, to be approved by the Engineer, where new heads and covers are necessary.

Sealed Manhole Heads and Covers.

Section 397. All manholes in station platforms, vaults or other structures shall be provided with sealed manhole heads and covers according to the design indicated on the plans.

Emergency Manholes.

Section 398. Where a sewer crosses under the subway, emergency manholes shall be provided when directed by the Engineer and according to plans to be furnished by him.

Manholes to be Completed.

Section 399. Manholes shall in all cases be fully and completely built and fitted with their covers as the work progresses, and the sewers shall not be laid beyond or in advance of any uncompleted manhole.

Receiving Basins.

Section 400. Receiving basins shall be built as located on the plans or as the Engineer shall direct and in accordance with the plans to be furnished. Each portion of the basin shall be built of the size and materials designated on said drawings and shall be thoroughly plastered, both inside and outside, with cement mortar in the proportion of one part of cement to two parts of sand.

Foundations.

Section 401. The foundations for receiving basins shall be of concrete or masonry of the kind indicated on the plans and shall extend not less than twelve inches below the finished floor of the basin, except as otherwise indicated on the plans. When additional foundation is required, it shall be built as directed by the Engineer.

Stone Flooring.

Section 402. The flooring shall be of hammer-dressed North River bluestone flagging, not less than three inches thick, in not more than two pieces, and shall be well set in a full bed of mortar and rammed into place. The floor may be finished with cement mortar mixed in the proportion of one part of cement to one part of sand if so directed by the Engineer. The mortar shall be spread, while fresh, upon the concrete base and before the latter shall have reached its first set; it shall be in such quantity that after thorough manipulation it shall be one inch in thickness.

Head Stone and Gutter Stone.

Section 403. Where head stone and gutter stone are required they shall be of sound, durable granite of the dimensions indicated on the plan, hammer dressed to an even surface and cut to the satisfaction of the Engineer. Cast iron basin heads and gutter pieces of the design indicated on the plans shall be set instead of the above when required.

Cast-Iron Cover.

Section 404. A cast-iron cover of approved pattern weighing not less than eighty nor more than ninety-five pounds shall be fitted to the opening in the head stone.

Grate Bar.

Section 405. A grate bar made according to the plan shall be fastened solidly into the said head stone in the manner indicated.

Cast-Iron Trap.

Section 406. A cast-iron trap of the form and dimensions indicated on the plan free from imperfections, and properly coated with coal pitch varnish shall be furnished and built into place as directed by the Engineer.

Joints.

Section 407. The joints shall be tightly fitted with an oakum gasket or with cement mortar if so directed.

Iron Steps.

Section 408. Galvanized iron steps of the same design required for manholes shall be built into the walls.

Culvert Pipes.

Section 409. The culvert pipe for connections with sewers shall be 12-inch vitrified pipe unless otherwise indicated on the plan, and of the kind and quality previously described, and shall be laid, in all cases, in a concrete cradle of the form and dimensions required for pipe sewers in accordance with the directions of the Engineer. In case it becomes necessary to connect any basin already built, with the work to be constructed, so much of such culverts as in the opinion of the Engineer may be necessary shall be taken up and rebuilt or relaid with vitrified pipe, or brick as the case may be, in the manner described above and reconnected in a straight line from the basin to the sewer.

Flush Tanks.

Section 410. Automatic flush tanks of a type approved by the Engineer shall be built where indicated on the plans or where directed by the Engineer.

Waterproofing.

Section 411. Whenever, in the opinion of the Engineer, it is necessary to waterproof a sewer, chamber or receiving basin, or their appurtenances, it shall be done as indicated on the plans or as directed by the Engineer and in the manner described elsewhere in these specifications.

Mortar.

Section 412. All masonry shall be laid in Portland cement mortar of the quality described in these specifications. It shall be mixed in the proportion of one (1) part of cement to two (2) parts of sand, excepting as otherwise specially provided.

Concrete.

Section 413. All concrete for sewers shall be made in the proportions of one (1) part of cement to two and one-half (2½) parts of sand and four and one-half (4½) parts of stone of the quality described in these specifications.

Paving.

Section 414. On the completion of each section of one hundred feet of sewer, the sidewalks and roadways shall be restored as provided under the heading of "Street Surface and Park Surface Restored."

Permits for Connections.

Section 415. The Commissioner of Public Works shall have the right to connect any sewer or sewers with the sewers herein described or to grant permits to any person or persons to make connections therewith at any time before it is finally completed, and the Contractor shall not interfere with or place obstructions in the way of such person or persons as may be employed in building such new sewer or sewers or in making such connections. This is not to be construed, however, as permitting the introduction of storm water or sewerage into any sewer being constructed under this contract before its final completion.

Thoroughly Cleaned.

Section 416. During the progress of the work, and until the entire completion and final acceptance thereof, the sewers, drains, basins, culverts and connections shall be kept thoroughly cleaned throughout, and left clean, and the drainage of any old sewer that may be taken up or intercepted shall be provided for and taken care of by the Contractor, all at his own expense.

Payment for Sewers.

Section 417. Payment for sewers will be per lineal foot of sewer complete as herein provided in Schedule Items 37 to 74, both inclusive, except as hereinafter specifically provided. The price for each class of sewer is to include each and every item applicable thereto as herein given in Sections 333 to 416 of these specifications and as otherwise provided in the contract and as indicated on the plans; excepting as is hereinafter specially provided.

Excavation.

Section 418. In addition to the price per lineal foot for completed sewer, as above provided, excavation will be paid for at the prices herein stipulated in Schedule Items 2-A and 3-A (which prices shall include all the matters referred to in Section 107), on the basis of size of trench stipulated in Sections 337 and 340, excepting where the sewer is built by tunneling, in which case tunnel excavation will be paid for at the price herein stipulated in Schedule Item 5-A (which prices shall include all the matters referred to in Sections 117 and 120), on the basis of the net ordered lines of the sewer. Payment for street surface restored shall be as provided in Schedule Items 30-A or B.

Steel Beams and Reinforcing Rods.

Section 419. Where steel beams or reinforcing rods are required and ordered, such beams and rods will be paid for in addition to the price bid for the sewer and at the prices herein stipulated for furnishing and placing such material and all work incidental thereto, in Schedule Item 20 or 21

Automatic Flush Tanks.

Section 420. Where automatic flush tanks are built as provided in Section 410 of the specifications they will be paid for as herein provided in Article XII of the contract.

Waterproofing.

Section 421. Where waterproofing is required and placed in accordance with Section 411 of the specifications it will be paid for at the prices herein stipulated for waterproofing, Schedule Item 15 or 16.

Siphons.

Section 422. Where inverted siphons passing under the subway structure are called for and built, they shall be considered as part of the regular subway construction from outside to outside of the sewer chambers or between points of departure from standard sewer construction, such limits being indicated on the plans; and payment for such siphons will be made in accordance with the various classes of work or material as are applicable thereto in the Schedule and at the prices therein stipulated for such items.

Cast-Iron Pipe Sewers, etc.

Section 424. All cast-iron pipe sewers wherever built, and the parts, within the limits of the Railroad, or as indicated on the plans, of all other sewers crossing over or under the Railroad, will be paid for in accordance with the various classes of work or material applicable thereto in the Schedule and at the prices stipulated therein for such classes of work or material.

House and Drainage Connections.

Section 425. The cost of the maintenance, support or construction of all house or other drainage connections made necessary by construction under Sections 422 and 424 will be included in the prices for the several classes of work and material entering into such construction.

21—Requirements for Pipes.

Generally.

Section 426. Whenever it is necessary to relay any water main, all new material required for the same shall be of the quality and laid in the manner specified below, and subject to the various clauses of these specifications applicable thereto.

Pipes to be Cylinders.

Section 427. The pipes shall be circular cylinders, with the inner and outer surfaces concentric, and of the full interior diameter required.

Hubs and Spigots.

Section 428. The hub or socket and the spigot end shall be shaped in exact conformity with the standards of the Department of Water Supply, to be furnished by the Commission, and will be tested by circular gauges.

Section 429. The seat or shoulder of the socket and the end of the spigot shall be straight and even, and at right angles to the axis of the pipe, so as to make a smooth, tight joint. Special care will be required in making the sockets and spigots

to conform to the drawings and all pipes will be rigorously inspected at these points. No pipe will be received whose eccentricity at either the spigot or socket ends, exceeds one-eighth (⅛) of an inch, or whose dimensions differ by more than one-eighth (⅛) of an inch from those required.

Section 430. The pipes shall be designated by dimensions of the interior diameter

Section 431. Bands, lugs, buttons, or ribs shall, if required, be cast on the pipes, of such forms and dimensions as the Engineer may direct.

Length of Pipe.

Section 432. The straight pipe shall be twelve (12) feet long, exclusive of hub; other pipe as may be directed.

Section 433. All straight pipes shall be straight in the direction of the axis of the cylinder.

Thickness and Weights.

Section 434. The thickness of the pipes, branches and special castings shall correspond with the standards of the Department of Water Supply. The weight for straight pipe shall be approximately as follows:

60-inch pipes,	12,835 pounds each.
48-inch pipes,	8,270 pounds each.
42-inch pipes,	6,860 pounds each.
36-inch pipes,	5,305 pounds each.
30-inch pipes,	3,940 pounds each.
24-inch pipes,	2,660 pounds each.
20-inch pipes,	2,005 pounds each.
16-inch pipes,	1,475 pounds each.
12-inch pipes,	1,015 pounds each.
8-inch pipes,	580 pounds each.
6-inch pipes,	415 pounds each.

High Pressure Fire System.

Section 435. For high-pressure fire system standard spigots and grooves—The weights for straight pipes, with lugs, shall be approximately as follows, in pounds per length:

	Of 3 ft.	Of 4 ft.	Of 6 ft.	Of 12 ft.
8-inch	355	420	550	935
12-inch	615	745	1,000	1,765
16-inch	1,005	1,215	1,635	2,905
20-inch	1,475	1,795	2,425	4,320
24-inch	2,105	2,585	3,535	6,385

All requirements as to weights, laying, tests, etc., shall be in strict accordance with the standard requirements of the Department of Water Supply, Gas and Electricity.

Section 436. The thickness of the metal of the pipes and special castings will be tested by calipers after the castings have been freed from sand and cleaned.

Variations in Thickness.

Section 437. No pipe will be received when the thickness of metal is less by more than one-twelfth (1-12) of an inch than the thickness required by the standards.

Underweight.

Section 438. No straight pipe or casting will be received which weighs less than the weights above mentioned by more than five (5) per cent., for pipes 16 inches or less in diameter, or more than four (4) per cent. for pipes more than 16 inches in diameter. No special casting will be received which weighs less than the standard weight by more than ten (10) per cent. for pipes 12 inches or less in diameter, and eight (8) per cent. for larger pipes.

Straight Pipe Cast Vertically.

Section 439. All straight pipes shall be cast vertically, and all pipes 12 inches or more in diameter shall be cast with the hub end down.

Section 440. All the castings shall be made in such molding sand or loam as will leave the surface clean and smooth.

Castings, How Marked.

Section 441. All the castings shall have the year in which they are cast, the running number of the castings of the same size and form, the letters D. W. S., and

the initials or name of the Contractor, and of the foundry where cast, cast on the outer side in raised letters of not less than two (2) inches in length and one-eighth (⅛) of an inch in relief, in such manner as the Engineer may designate; and in case any pipe shall be condemned, the letters D. W. S. shall be erased by the Contractor.

Quality of Cast Iron.

Section 442. The metal of which the castings are to be cast (which shall be remelted in a cupola or air-furnace) shall be pig-iron, made without any admixture of cinder-iron, or other inferior metal, and shall be of such character as to make a pipe strong, tough and of an even grain, entirely free from uncombined carbon when seen under the microscope, and such as will bear, satisfactorily, drilling and cutting, and shall have a tensile strength of at least sixteen thousand (16,000) pounds to the square inch.

Section 443. The castings shall be free from scoria, sand holes, air bubbles, and other defects and imperfections.

Castings to be Clean.

Section 444. The castings shall be perfectly cleaned and no lumps shall be left on the inner surface of the barrels or sockets, or on the outer surface of the spigot end. The castings shall be subject to hammer inspection. Iron-wire brushes shall be used, as well as softer brushes, to remove the loose dust. No acid or other liquid shall be used in cleaning the castings.

Pipes to be Coated.

Section 445. Every pipe, branch and special casting shall be carefully coated inside and out with coal pitch and oil. Every casting shall likewise be entirely free from rust when the coating is applied. If the casting cannot be dipped immediately after being cleaned, the surface shall be oiled with linseed oil, to preserve it until it is ready to be dipped. No casting shall be dipped after rust has set in.

Pitch.

Section 446. The coal-tar pitch shall be made from coal tar distilled until the naphtha is entirely removed and the material mixed with linseed oil so as to make a smooth, tough and tenacious coating. Pitch which becomes hard and brittle when cold will not answer for this use.

Section 447. Pitch of the proper quality having been obtained, it shall be carefully heated in a suitable vessel to a temperature of three hundred (300) degrees Fahrenheit, and shall be maintained at not less than this temperature during the time of dipping. The material will thicken and deteriorate after a number of pipes have been dipped; fresh pitch shall, therefore, be frequently added, and occasionally the vessel shall be entirely emptied of its old contents and refilled with fresh pitch.

Section 448. Every casting shall attain a temperature of three hundred (300) degrees Fahrenheit, before being removed from the vessel of hot pitch. It shall then be slowly removed and laid on skids to drip.

To be Inspected Before Dipping.

Section 449. No casting shall be dipped until the authorized inspector has examined it as to cleaning and rust, and subjected it thoroughly to the hammer test. It may then be dipped, after which it will be passed to the hydraulic press to meet the required water test. The proper coating shall be tough and tenacious when cold on the pipes, and not brittle or with any tendency to scale off.

Tests.

Section 450. The castings must be capable of sustaining a pressure, in the hydraulic press, of three hundred (300) pounds to a square inch, and any casting which shows any defect by leaking, sweating or otherwise, will be rejected. This test shall be made at the foundry, and at the expense of the Contractor.

Weighed and Marked.

Section 451. The castings shall be weighed, and the weight distinctly marked on the castings in white paint. The Contractor shall provide at the foundry where the pipes and castings are to be manufactured proper sealed scales and weights for weighing the castings, which shall be done at the expense of the Contractor, under the supervision of the Inspector.

Blocking and Wedges.

Section 452. Each pipe over eight (8) inches inside diameter, unless otherwise ordered, shall be placed on two (2) blocks and four (4) wedges of hemlock timber, the wedges to rest on the blocks and the pipe on the wedges.

Timber for Blocking.

Section 453. The blocks and wedges shall be of sound hemlock timber; 48 and 36-inch pipe shall be laid on blocks 4 feet long, 12 inches wide and 6 inches thick, with wedges 18 inches long, 6 inches wide, 4 inches thick on one end and ½ inch thick on the other; 30 and 24-inch pipe on blocks 3 feet long, 10 inches wide and 5 inches thick, with wedges 15 inches long, 5 inches wide and 3½ inches thick on one end and ½ inch thick on the other end; 12 and 20-inch pipe on blocks 2 feet long, 8 inches wide and 4 inches thick with wedges 12 inches long, 4 inches wide, 3 inches thick on one end and ½ inch thick on the other.

Joints.

Section 454. The spigot end of the pipe shall be inserted into the hub to within from one-fourth (¼) to one-eighth (⅛) of an inch of the full depth of the hub, and the space around the pipe shall be equalized so as to give as nearly as possible an equal space for the packing. The space between the pipe and the hub shall be packed with clean, sound jute packing yarn, free from tar, far enough to leave the proper space for lead. The remaining space shall then be filled by running it full of lead to a depth of four (4) inches, with a bead outside of the face of the hub large enough to allow for caulking, so that when the joint is properly caulked the lead will be flush with the hub of the pipe. After the joint shall have been run with lead, it shall be caulked by means of proper tools, so as to make a watertight joint

Lead.

Section 455. The lead to be used shall be of the best quality of pure, soft lead. and in every respect suitable for the purpose.

Notice of Interruption to be Given.

Section 456. In case it becomes necessary to cut any connection with any other main, house or hydrant, or in any way to interfere with the continuous and normal flow of water, due notice shall be sent at least forty-eight (48) hours in advance to the Engineer and to the Commissioner of Water Supply, and the Contractor shall, if so ordered, make a temporary by-pass or other arrangement to preserve the flow of water while breaking connections.

Connections Interfered With.

Section 457. All connections cut, interfered with or injured shall be restored under the directions of the Engineer, without delay and in accordance with the rules and regulations of the Department of Water Supply governing such matters, to a suitable condition as good as existed before commencing work.

Stopcocks, etc.

Section 458. Stopcocks, boxes, branches, curved pipe, and other specials according to the standards of the Department of Water Supply shall be set where necessary.

Section 459. For gas pipes, steam pipes, air pipes, mail tubes and any other pipes not herein enumerated, the standard weights and all other requirements shall be in accordance with the standard specifications and requirements of the several owners of such structures.

22—Street Surface and Park Surface Restored.

Pavement to be Restored.

Section 460. As soon as the structure in any excavation or trench made within a street shall be completed and the trench backfilled, a temporary pavement shall be laid and maintained in a condition satisfactory to the Engineer; and after the earth shall have become, in the opinion of the Engineer, sufficiently settled, the Contractor shall proceed to restore the surface to a condition similar to, and equally as good as, that existing previous to the commencement of construction; except that the Contractor will not be required to permanently restore the pavement of roadways between curb lines, but shall provide a temporary roadway pavement as follows:

Temporary Roadway Pavement.

Section 461. Upon the backfill, placed and compacted as provided under the clauses relating to backfilling, shall be placed a layer of sand, about an inch and

a half in thickness, on which shall be laid a pavement of granite blocks carefully laid and rammed to the required finished grade of the street surface. The end and side joints shall be thoroughly filled with sand, and shall not exceed ¾ of an inch in thickness. The granite blocks required for this temporary pavement, if found in or under the original pavement, shall be stored at a suitable place until required for use. In case granite blocks are not found in or under the original pavement, they may be obtained by the Contractor, free of cost, from the Bureau of Highways at the corporation yards.

The Contractor shall maintain the temporary roadway pavement thus laid for a period not exceeding six months from the time of its completion in any one block or street intersection. During this period the Contractor shall, without requiring previous notice, readjust or relay any portion of the pavement wherever and whenever a straight edge 3 feet long, laid in any direction, shows a depression of more than ¾ inch.

All the requirements as to street surface restored, including temporary roadway pavements, shall apply to the trenches for sewers, pipes or other subsurface structures along or off the line of the Railroad. Within the limits of private property to be taken by the City for the extension of Irving Place, these requirements will not apply.

Other Sidewalks May be Laid.

Section 462. Nothing contained in these specifications shall be understood or construed as prohibiting the Contractor from making any arrangement with any property owner to lay another style of sidewalk, or other surface covering within curb lines, in place of the sidewalk or other surface covering taken up; in which case the Contractor shall file with the Commission a copy of his contract with such property owner, duly acknowledged in writing by both parties.

In case any property owner desires to lay a sidewalk, or other surface covering within curb lines, affected by this contract, different from the one removed, and shall notify the Commission in writing that he has failed to make satisfactory arrangements for such work with the Contractor, then the Commission, in its discretion, may direct the Contractor to finish and dress off the filling over his work to such grade as the Engineer may select, and further direct him to remove from the area to be restored all material of whatever nature not required to be relaid, and to permit another contractor to lay such sidewalk or other surface covering; in which case the liability of the Contractor under this contract shall cease, as far as that part of his work is concerned, whenever the Engineer shall report to the Commission that the instructions of the Commission have been complied with, exactly the same as if the Contractor had fully completed the restoration as hereinbefore provided.

Payment for Street Surface Restored.

Section 463. Payment for street surface restored will be made as provided in Schedule Item 30-A or B, which prices shall include the cost of restoring all curbs, manhole heads and covers, gratings, vault lights, etc., that formed a part of the original street surface.

Measurements.

Section 464. The measurement for payment for street surface restored will be to the net line of ordered excavation.

Outside of Net Lines.

Section 465. All other pavement outside of the net lines of ordered excavation, either along or off the line of the Railroad, that may have become damaged, directly or indirectly, as the result of the Contractor's operations, shall be restored by the Contractor at his own cost and expense to a condition similar to and equally good as that existing previous to the commencement of construction.

Parks and Parkways.

Section 466. All parks and parkways including trees, shrubbery, etc., as elsewhere provided in this contract and the specifications, are to be restored to the satisfaction of the Department of Parks.

Measurement.

Section 467. Measurements for park surface restored are to be to the net lines of ordered excavation.

Payment For.

Section 468. Payment for park surface restored will be made at the price provided in Schedule Item 31.

Outside of Net Lines.

Section 469. Any damage done outside of the net lines of ordered excavation in connection with the construction of the work to park surfaces or growths, under the jurisdiction of the Department of Parks, shall be restored to the satisfaction of the said Department, and at the Contractor's own cost and expense.

23—VAULT LIGHTS, GRATINGS AND HAND-RAILS.

Vault Lights.

Section 470. The roofs of the stations, where under sidewalks, parks or parkways, shall, to as great an extent as possible, consist of vault light construction. These lights shall be made with lenses, not exceeding three (3) inches in diameter, of strong glass set in cement; they shall be provided with non-slipping treads, buttons or other devices all of design approved by the Engineer; and shall be of sufficient strength to carry, when supported in a manner similar to that in which they are to be permanently set, an equally distributed load of at least five hundred (500) pounds per square foot without signs of failure, deformation or permanent set, when such test load is removed. The right is reserved to test at least one (1) frame or panel in every ten (10), as selected by the Engineer. Should the one selected fail, another will be selected by the Engineer; and if that fail, then the whole lot may be rejected. The vault lights must be set in place with cement, lead or other means to be absolutely waterproof. Any tests required shall be at the Contractor's expense.

Measurement and Payment.

Section 471. The area for payment for vault lights shall be to lines not exceeding one (1) foot outside of the inner faces of the supporting walls, and the price paid will be as provided in Schedule Item 29, which price shall include all material and work incidental to the completed vault lights in place.

Steel Gratings.

Section 472. Steel gratings shall be provided and placed over fan and other ventilating chambers, over stations and station approaches, at places shown on the plans, or at other places if required by the Engineer. They will be constructed as shown on the detailed plans for gratings.

Measurement and Payment.

Section 473. Gratings will be measured to the lines as constructed and payment therefor will be made as herein provided in Schedule Item 28, which price shall include the grating in place in the work, all frames and framing, and all incidental work.

Galvanized Iron Pipe Hand-Rails.

Section 474. Galvanized iron pipe hand-rails will be placed in the Railroad over the benches containing the ducts. They shall be securely fastened to the wall of the tunnel by means of expansion bolts, and as shown on the contract drawings. Measurements for payment will be per lineal foot of hand-rail in place in the work, complete, and at the price as stipulated in Schedule Item 27.

IV.—SECURITY TO BE FURNISHED BY CONTRACTOR.

Security by Contractor. Contractor's Bond.

Article 27. Simultaneously with the execution of this contract the Contractor shall give security for the performance of his obligation by filing with the Comptroller a bond in the form annexed hereto, entitled, "Form of Bond," executed by the Contractor and by two or more sureties to be corporations or persons approved by the Commission in the sum specified in the Invitation to Contractors for the Section embraced in this contract. In case any of the sureties upon the bond shall become insolvent or unable in the opinion of the Commission to pay promptly the amount of such bond to the extent to which such surety might be liable, then the Contractor within ten days after notice by the Commission to the Contractor shall, by supplemental bond or otherwise, substitute another and sufficient surety to be approved by the Commission in place of the surety so insolvent or unable. If the Contractor shall fail, within such ten days or such further time as the Commission may grant, to substitute another and sufficient surety, then the contractor shall, for all the purposes of this contract be deemed to be in default in the performance of his obligations hereunder and upon the said bond, and the Commission may terminate the contract or may bring any proper suit or proceeding against the Contractor and the sureties, or either of them, or may require to be deducted from any moneys then in, or thereafter coming into, the hands of the City and due to the Contractor

the amount for which the surety insolvent or unable as aforesaid shall have justified on the bond; and the moneys so deducted shall be held by the Comptroller as collateral security for the performance of the condition of the bond.

V.—Payments to Contractor.

Partial Payments.

Article 28. In order to assist the Contractor to prosecute the work advantageously, the Engineer shall, from time to time, as the work progresses, but not oftener than once a month, make in writing an estimate, such as in his opinion shall be just and fair, of the amount and value of the work done and materials incorporated in the work by the Contractor according to the terms of this contract (but it is understood that in making such estimates the Engineer shall not necessarily be governed by the unit prices contained in the Contractor's proposal), provided, however, that estimates may at any time be withheld or reduced, if, in the opinion of the Engineer, the work is not proceeding in accordance with the contract. The first such estimate shall be of the amount and value of the work done and materials incorporated in the work since the Contractor commenced the performance of this contract on his part. Every subsequent estimate except the final estimate shall be of the amount and value of the work done and materials incorporated in the work since the last preceding estimate was made, provided, however, that no such estimate shall be required to be made when, in the judgment of the Engineer, the total value of the work done and materials incorporated in the work since the last preceding estimate amounts to less than ten thousand dollars ($10,000). The Engineer shall further include accepted structural iron and steel delivered on the site of the work, but not incorporated in the work, at the rate of forty dollars ($40) per ton of two thousand pounds. But the quantity of such structural iron and steel included in any partial estimate shall not exceed the quantity of such material, as determined by the Engineer, required for the ensuing six months, and any material included in a partial estimate which may subsequently become unsatisfactory, shall be deducted from succeeding partial estimates. No materials not incorporated in the work, excepting such structural iron and steel, and none of the Contractor's plant shall be included in partial estimates.

Not by Strict Measurement.

Article 29. Such estimates shall not be required to be made by strict measurement, but they may be made by measurement or by estimation, or partly by one method and partly by the other, and it shall be sufficient if they are approximate only.

Vouchers.

Article 30. Upon each such estimate being made and certified in writing to the Commission, the Commission shall forthwith prepare and certify a voucher for ninety per cent. of the amount stated in such estimate or certificate to be the value of the work done and materials furnished, and the City shall within thirty (30) days after the date of the certification of such voucher by the Commission pay the same; provided, however, that the City may at all times reserve and retain from said partial payments, or any of them, in addition to the ten per cent. above mentioned to be retained and reserved, any sum or all sums which by the terms hereof, or of any law of the State of New York passed prior to the date hereof, it is or may be authorized to reserve or retain.

Final Estimate.

Article 31. Whenever, in the opinion of the Engineer, the Contractor shall have completely performed this contract on his part, the Engineer shall so certify, in writing, to the Commission, and in his certificate shall state, from actual measurements, the whole amount of work done by the Contractor, and also the value of such work under and according to the terms of this contract. On the expiration of ninety (90) days after the acceptance by the Commission of the work herein agreed to be done by the Contractor, and the filing of a certificate of the completion and acceptance of the work in the office of the Comptroller, signed by the Engineer and the Commission, the City shall pay to the Contractor the amount remaining after deducting from the amount or value stated in the last-mentioned certificate, all such sums as shall theretofore have been paid to the Contractor under any of the provisions of this contract, and also any sum or all such sums of money as by the terms hereof the City is or may be authorized to reserve or retain; provided, that nothing herein contained shall be construed to affect the right, hereby reserved, of the Commission to reject the whole or any portion of the aforesaid work, should the said certificate be found, or known to be, inconsistent with the terms of this contract, or otherwise improperly given. All prior certificates upon which partial payments may have been

made, being merely estimates, shall be subject to correction in the final certificate, which final certificate may be made without notice thereof to the Contractor, or of the measurements upon which it is based.

Interest in Case of Delayed Payments.

Article 32. If the payment of the amount due the Contractor on any voucher shall be delayed beyond the time stipulated in Article 30, in the case of partial payment, or Article 31, in the case of final payment, the City shall pay the Contractor interest on such amount at the rate of four and one-half (4½) per cent. per annum for the period of such delay; it being understood that such payments of interest, if any, are to be in lieu of any claim of the Contractor for alleged damages for breach of contract or otherwise in case of delayed payments. The term for which interest shall be paid shall be reckoned, in the case of a partial payment from the thirtieth day after the certification of such voucher by the Commission, and in the case of a final payment from the ninetieth day after the acceptance of the work by the Commission, to the date of payment of the voucher. The date of payment of a voucher shall be considered the day on which the voucher is ready for payment as evidenced by the records of the Department of Finance. If interest shall become due on any partial payment the amount thereof, as determined by the Commission, shall be added to a succeeding payment. If interest shall become due on a final payment it shall be paid on a supplementary voucher prepared by the Commission and forwarded to the Comptroller for payment in the usual manner.

No Estoppel.

Article 33. The City shall not, nor shall any Department or officer thereof, be precluded or estopped by any return or certificate made or given by the Commission, any Engineer, or other officer, agent or appointee thereof under any provision of this contract, from at any time either before or after the final completion and acceptance of the work and payment therefor pursuant to any such return or certificate, showing the true and correct amount, quality and character of the work done and materials furnished by the Contractor or any other person under this agreement, or from showing at any time that any such return or certificate is untrue and incorrect or improperly made in any particular, or that the work and materials, or any part thereof, do not in fact conform to the specifications; and the City shall not be precluded or estopped, notwithstanding any such return or certificate and payment in accordance therewith, from demanding and recovering from the Contractor such damages as it may sustain by reason of his failure to comply with this contract or the specifications.

No Waiver.

Article 34. Neither the acceptance of the Commission or its Engineer, or any of its employees, nor any order, measurement or certificate by the Engineer, nor any order by the Commission for payment of money, nor any payment for, nor acceptance of the whole or any part of the work by the Engineer or the Commission, nor any extension of time, nor any possession taken by the Commission, or its employees, shall operate as a waiver of any portion of this contract or of any power herein reserved to the Commission, or any right to damages herein provided; nor shall any waiver of any breach of this contract be held to be a waiver of any other or subsequent breach.

Final Payment to Terminate Liability of City.

Article 35. The acceptance by the Contractor of the last payment aforesaid shall be and shall operate as a release to the City, from all claim and liability to the Contractor for anything done or furnished for, or relating to, the work, or for any act or neglect of the Commission, the City or of any person relating to or affecting the work, except only the claim against the City for the remainder, if any there be, of the amounts kept or retained as provided in this contract.

Contractor's Claims for Damage. Statements of Damage to be Filed With Engineer.

Article 36. If the Contractor shall claim compensation for any damage sustained by reason of the acts of the Commission, or its agents, he shall, within ten days after the sustaining of such damage, make a written statement of the nature of the damage sustained to the Engineer. On or before the fifteenth day of the month succeeding that in which any such damage shall have been sustained, the Contractor shall file with the Engineer an itemized statement of the details and amount of such damage, and, unless such statement shall be made as thus required, his claim for compensation may be forfeited and invalidated, and he shall not be entitled to payment on account of any such damage.

Lien Law.

Article 37. If at any time before or within thirty days after the whole work agreed herein to be performed and all the labor and material herein agreed to be delivered have been performed or delivered or completed and accepted by the City any person or persons claiming to have performed any labor or furnished any material toward the performance or completion of this contract shall file with the Commission and with the Comptroller of the City any such notice as is described in the Lien Law, the City shall retain until the discharge thereof from moneys under its control so much of such moneys as shall be sufficient to satisfy and discharge the amount in such notice claimed to be due, together with the costs of any action or actions brought to enforce such lien created by the filing of such notice.

VI.—CONTRACTOR'S LIABILITY FOR INJURIES TO PERSONS OR PROPERTY.

Contractor Approves Plans as Involving No Damage.

Article 38. The Contractor expressly admits and covenants to and with the City that the plans and specifications and other provisions of this contract, if the work be done without fault or negligence on the part of the Contractor, do not involve any danger to the foundations, walls or other parts of adjacent buildings or structures or to navigation; and the Contractor will at his own expense make good any damage that shall, in the course of construction, be done to any such foundations, walls or other parts of adjacent buildings or structures or to navigation. The liability of the Contractor under this covenant is absolute and is not dependent upon any question of negligence on his part, or on the part of his agents, servants or employees and the neglect of the Engineer to direct the Contractor to take any particular precautions or to refrain from doing any particular thing, shall not excuse the Contractor in case of any such damage. Where the work is required to be done by tunneling the same admission and covenant shall also apply to the foundations, walls and other parts of buildings and to any railroad track or structure, subway, street, conduit, pipe, sewer or other structure or surface over the tunnel. But this admission and covenant shall not apply to the foundations, walls or other parts of buildings or any part thereof acquired by the City and which the Engineer may determine should be razed.

Traffic to be Maintained.

Article 39. The Contractor shall, during the performance of the work, safely maintain the traffic on streets, avenues, highways, parks, waters or other public places as provided in the specifications, and shall take all necessary precautions to place proper guards for the prevention of accidents and put up and keep at night suitable and sufficient lights.

Indemnification for Accidents, etc.

Article 40. The Contractor shall be solely responsible for all physical injuries to persons or property occurring on account of and during the performance of the work hereunder, and shall indemnify and save harmless the City from liability upon any and all claims for damages on account of such injuries to persons or property, and from all costs and expenses in suits which may be brought against the City for such injuries to person or property; it being distinctly understood, stipulated and agreed that the Contractor shall be solely responsible and liable for and shall fully protect and indemnify the City against all claims for damages to persons or property occasioned by or resulting from blasting or other methods or processes in the work of construction whether such damages be attributable to negligence of the Contractor or his employees or otherwise.

Money Due the Contractor or May be Retained to Meet Claims.

Article 41. In case any claim shall be made by any person or corporation against the Contractor or the City for loss or damage to person or property as aforesaid, the amount of such claim or so much thereof as the Commission shall deem reasonable, shall, upon the requirement and in the discretion of the Commission, be retained by the Comptroller out of any moneys thereafter growing due to the Contractor hereunder (in addition to the other sums hereinbefore authorized to be so retained), as security for the payment of such claim or claims. If and when the liability of the City or the Contractor on such claim or claims shall have been established by a judgment of a court of competent jurisdiction, or shall have been admitted by the Contractor to be valid, the said claim or claims shall be paid from the amount so retained and the balance, if any, paid to the Contractor. Should there be any unsatisfied claims for injuries to persons or property at the time when the final estimate for the work is made and returned, the Engineer shall have the right to retain out of said final estimate a sum in his judgment sufficient to protect the City in regard

to all unsatisfied claims as aforesaid and in case the amount thus retained should be insufficient to pay the amount adjudicated to be due upon such claim the City may sue for and recover from the Contractor the amount or balance as a debt from the Contractor to the City. The Engineer may further, if in his judgment such a course is necessary, at the time of making the final estimate, and as a condition to making the same, require the Contractor to continue his bond or any part thereof, for a time not exceeding the time when such claims would be barred under the existing Statute of Limitations, as security against any claims then unsatisfied or not presented.

Examinations of Abutting Property.

Article 42. In order to safeguard the owners or tenants of abutting property and at the same time prevent unjust or fraudulent claims against the Contractor or the City in respect thereto, the Engineer shall cause a detailed examination of all adjacent or abutting property to be made before construction is begun. The owner, or tenant of each parcel or his or their duly authorized representative, shall be invited by a notice in writing delivered to a person apparently in charge of the premises, to be present, and the Contractor, or his duly authorized representative, shall attend and with the Engineer shall make such detailed examination. A complete record of the existing conditions of each parcel shall be made in triplicate, signed by the Engineer and the Contractor, and one copy shall be delivered to the owner, one to the Contractor and one shall be retained by the Commission. At such times as the Engineer may direct, and upon the completion of the work, or upon notice to the Engineer by the owner or tenant that physical injury has occurred, further examination shall be made and the findings recorded and filed as above.

Damage to Works During Construction.

Article 43. All risk of loss or damage to the works, or to any part thereof, or to any of the materials, tools, implements or other things used in doing the work, prior to final completion, is assumed and shall be borne by the Contractor, and any such loss or damage shall be made good by the Contractor at his own cost, and the construction shall be carried forward by him in accordance with this contract, without additional cost to the City by reason of such loss or damage.

VII.—CITY TO SECURE CONTRACTOR AGAINST INTERFERENCE BY INJUNCTIONS, TO ACQUIRE REAL ESTATE, ETC.

City's Assurances to Contractor of Right to Construct.

Article 44. The City hereby stipulates and covenants to and with the Contractor that the City will secure and assure to the Contractor so long as the Contractor shall perform the stipulations of this contract, the right to construct the railroad as prescribed in this contract free of all right, claim or other interference, whether by injunction, suit for damages or otherwise, on the part of any owners, abutting owner, or other person; but not including any interference, legal or otherwise, by patentees or persons claiming to be patentees of tools, methods or appliances.

Claims for Infringement of Patents.

Article 45. The Contractor shall hold himself responsible for any claims made against the City for any infringement of patents by the use of patented articles in the performance and completion of the work, or of any process connected with the work agreed to be performed under this contract, or of any materials used upon the said work; and shall save harmless and indemnify the City for all costs, expenses and damages which the City shall be obliged to pay by reason of any infringement of patents used in the performance and completion of the work.

Acquisition of Real Estate.

Article 46. The City will acquire all such real estate and rights of way or other rights, terms, franchises, easements and privileges therein which, in the opinion of the Commission, it shall be necessary to acquire or extinguish for the purpose of constructing the works free of interference or right of interference; provided, however, that this covenant shall not apply to or include any damages for physical injuries to property referred to in chapter 6 hereof, whether or not compensation for such damages be awarded in a condemnation proceeding. If compensation for any such damages shall be included in an award in condemnation proceedings the Contractor shall, upon demand, promptly reimburse the City for any payments made by it for such purposes.

VIII.—TIME FOR COMPLETION, DAMAGES FOR DELAY, ETC.

Commencement and Completion of Work.

Article 47. Time is of the essence of this contract. The Contractor shall begin actual work within sixty (60) days after the execution of this contract. The entire work covered by this contract shall be completed in all respects within forty-two (42) months from the date of the delivery of this contract.

Price to be Reduced for Delay.

Article 48. In the event of delay in completion of the works beyond the period herein prescribed, or beyond the period to which such time may be extended by resolution of the Commission for good cause shown, the City shall—whether the working force be increased as provided in the specifications or not—be paid damages for such delay. Inasmuch as the amount of such damages will be extremely difficult to ascertain, especially in view of the fact that the railroad herein contracted for is only a part of a complete system, the remainder of which is to be constructed under other contracts, it is hereby expressly agreed that damages shall be liquidated and paid by reducing the price to be paid the Contractor as follows: From the amounts which shall become payable to the Contractor after the expiration of the periods above limited (but not including the retained percentages from amounts theretofore certified to be due) there shall be deducted and retained by the City the following percentages: From the amount due for the first month after the expiration of such periods one (1) per centum thereof; from the amount due for the second month after the expiration of such periods two (2) per centum thereof; from the amount due for the third month after the expiration of such periods three (3) per centum thereof; from the amount due for the fourth month after the expiration of such periods four (4) per centum thereof; similarly from any amounts which may subsequently become due there shall be deducted a percentage, the rate of which shall equal the number of months which may have elapsed between the expiration of the periods above limited and the time when such payments shall become due. These amounts shall be deducted and retained by the City and are hereby agreed upon and determined as the measure of liquidated damages (and not as a penalty) to the City. But in case the Contractor shall be delayed by reason of any labor strike not caused or instituted or provoked by the Contractor, or by any subcontractor, agent or representative of the Contractor (which fact the Contractor shall prove to the satisfaction of the Commission), or in case the Contractor shall be delayed by any injunction or by any interference of public authority, and in case the Contractor cannot, notwithstanding such injunction or interference, with reasonable diligence make up for the delay so occasioned by speedier work when the Contractor shall not be so interfered with, then the said date for completion shall be extended by resolution of the Commission to a date later than the expiration of the said period by the amount of the time of such delay.

Commission May Intervene in Case of Injunction.

Article 49. But no injunction, strike or interference of public authority shall be ground for such extension, except if and from the time when the Contractor shall give the Commission notice of the injunction or other cause of delay, with copies of the injunction or other orders and of the papers upon which the same shall have been granted. The Commission and the City or either shall be accorded the right to intervene or become a party to any suit or proceeding in which any such injunction shall be obtained, and to move to dissolve the same or otherwise, as the Commission or City may deem proper. If necessary the Corporation Counsel or the Counsel of the Commission or both shall be authorized by the Contractor to appear, for that purpose, as counsel or attorneys for him.

Article 50. The time stipulated within which to complete the works is based upon the quantities of the various items entering into the work as stated in the form of proposal, which are given solely for the purpose of classifying bids. In case these quantities are exceeded or diminished then an extension or diminution of the term of this contract shall be made. It is, however, understood and agreed that in case an increase in any one item is balanced or offset by diminution of other items, no change in the term shall be made, and in any event the Engineer shall determine the amount of extension or diminution of time in respect of the relative increase or reduction in the quantities involved in the final completion.

Suspension of Work and Additional Time for Performance.

Article 51. The Commission reserves the right of temporarily suspending the execution of the whole or any part of the work herein contracted to be done, if it shall deem it for the interest of the City so to do, without compensation to the Contractor

for such suspension, other than extending the time for completing the work as much as it may have been delayed by such suspension.

Time for Completion to be Extended in Case of Delay in Acquiring Real Estate.

Article 52. In case the Contractor shall at any time give notice to the Commission that any real estate is necessary under this contract for any of the purposes specified above, which notice shall give a brief description of such real estate, the Commission shall (if it finds that such exists) begin and conduct with diligence, proceedings to acquire the real estate described; and in case the Commission shall fail to put the Contractor in possession of such real estate within three (3) months from the date of the delivery of such notice the Commission shall allow the Contractor so much additional time wherein to perform and complete this contract on his part as the Engineer shall certify in writing to be just, but no allowance by way of damages shall be made for such delay.

Extensions Not Cumulative.

Article 53. It is expressly understood, however, that the periods of extension referred to herein shall not be cumulative, but only the single period of delay giving the greatest extension shall be taken into consideration.

Permission to Complete Contract Not a Waiver.

Article 54. The permitting of the Contractor to go on and finish the work, or any part of it, after the time fixed for its completion, or after the date to which the time for completion may have been extended, or the making of partial payments to the Contractor after any such periods, shall in no wise operate as a waiver on the part of the City of any of its rights under this contract.

IX.—REMEDIES IN CASE OF CONTRACTOR'S DEFAULT.

Article 55. If the work to be done under this contract shall be abandoned by the Contractor, or if this contract shall be assigned, or the work sublet by him, otherwise than as herein specified, or if at any time the Engineer shall be of the opinion, and shall so certify in writing to the Commission that the performance of the contract is unnecessarily or unreasonably delayed, or that the Contractor is wilfully violating any of the provisions or covenants of this contract, or of the specifications, or is executing the same in bad faith or not in accordance with the terms thereof, or if the work be not fully completed within the time named in this contract for its completion, or within the time to which the completion of the contract may be extended by the Commission, the Commission may

(1) Notify the Contractor, by a written notice, to discontinue all work, or any part thereof, under this contract, and thereupon the Contractor shall discontinue the work, or such part thereof, and the Commission shall thereupon have the right to contract for the completion of the works in the manner prescribed by law, or to place such and so many persons as it may deem advisable, by contract or otherwise, to work, and complete the work herein described, or such part thereof, to take possession of and use any or all of the materials, plant, tools, equipment, supplies and property of every kind provided by the Contractor for the purpose of his work, and to procure other materials for the completion of the same, and to charge the expense of said labor and materials to the Contractor. The expense so charged shall be deducted and paid by the City out of such moneys as may be due or may at any time thereafter grow due to the Contractor under and by virtue of this contract, or any part thereof. And in case such expense shall exceed the amount which would have been payable under the contract if the same had been completed by the Contractor, he shall pay the amount of such excess to the City; and in case such expense shall be less than the amount which would have been payable under this contract if the same had been completed by the Contractor, he shall forfeit all claim to the difference; and when any particular part of the work is being carried on by the Commission, by contract or otherwise, under the provisions of this article of the contract, the Contractor shall continue the remainder of the work in conformity with the terms of this contract, and in such manner as in nowise to hinder or interfere with the persons or workmen employed, as above provided, by the Commission, by contract or otherwise, to do any part of the work, or to complete the same under the provisions of this article of the contract. And

Or Proceed Upon Bond.

(2) The City may also proceed as to the Commission shall seem proper upon the bond. And

Or May Bring Suit.

(3) The City may also bring any suit or proceeding for specific performance or for injunction or to recover damages or to obtain any relief or for any purpose proper under this contract.

X.—MISCELLANEOUS PROVISIONS.

Changes in the Contract.

Article 56. No correction or change in this contract shall be made except by written instrument duly authorized by the Commission and consented to by the Contractor and by the sureties upon his bond; but this provision shall not limit or affect the right to prescribe variations whether of construction or location of route as in this contract elsewhere provided.

Members of Commission Not Liable.

Article 57. No claim shall be made by the Contractor against any member of the Commission personally by reason of this contract or of any of its articles or provisions.

Contractor Not to Assign, Sublet, Etc.

Article 58. The Contractor shall not assign, transfer, convey, sublet or otherwise dispose of this contract or his right, title or interest in or to the same or any part thereof without the previous consent in writing of the Commission, and he shall not assign by power of attorney or otherwise any of the moneys to become due and payable under this contract unless by and with the like consent. If the Contractor shall without such previous written consent assign, transfer, convey, sublet or otherwise dispose of this contract or of his right, title or interest therein or any of the moneys to become due under this contract, to any other person, company or corporation, this contract may at the option of the Commission be revoked and annulled and the City shall thereupon be relieved and discharged from any and all liability and obligations growing out of the same to the Contractor and to his assignee or transferee; and no right under this contract or to any money to become due hereunder shall be asserted against the City in law or in equity by reason of any so-called assignment of this contract or any part thereof or of any moneys to grow due hereunder unless authorized as aforesaid by the written consent of the Commission; provided that nothing herein contained shall be construed to hinder, prevent or affect an assignment by the Contractor for the benefit of his creditors made pursuant to the statutes of the State of New York.

Provisions in Case Commission Ceases.

Article 59. In case the Commission shall cease to exist the Legislature may provide what public officer or officers shall exercise the powers and duties of the Commission under and by virtue of this contract; and in default of such provision, such powers and duties shall be deemed to be vested in the Mayor of the City. In case any officer or officers other than the Commission shall hereafter have the powers of the Commission or any of them, then the provisions of this contract shall be applicable to such officer or officers to the extent to which the powers of the Commission shall appertain to such officer or officers, and any official act or determination of such officer or officers or of this Commission shall be sufficient hereunder, anything herein to the contrary notwithstanding, if the same be done or had by lawful vote or resolution or in such manner as the Legislature may from time to time prescribe.

Labor Law.

Article 60. The Contractor agrees to comply with the provisions of the Labor Law, including section 3 thereof as re-enacted by chapter 36 of the Laws of 1909. The Contractor further agrees and stipulates that no laborer, workman or mechanic in the employ of the Contractor, subcontractor or other person doing or contracting to do the whole or a part of the work contemplated by this contract, shall be permitted or required to work more than eight hours in any one calendar day, except in cases of extraordinary emergency, caused by fire, flood or danger to life or property; and further, that the wages to be paid for a legal day's work as hereinbefore defined to all classes of such laborers, workmen or mechanics upon the work contemplated by this contract or upon any material to be used upon or in connection therewith, shall not be less than the prevailing rate for a day's work in the same trade or occupation in the Borough of the City, where the work hereby contemplated, about or in connection with which such labor is performed, is in its final or completed form to be situated, erected or used; and that each such laborer, workman or mechanic employed by the Contractor or by any subcontractor or other person on, about or upon the work contemplated by this contract, shall receive such wages herein provided for. This contract shall be void

and of no effect, unless the Contractor shall comply with the provisions of this section. In obedience to the requirements of section 14 of the Labor Law, it is further provided that if the provisions of the said section 14 are not complied with, this contract shall be void.

All Necessary Legal Provisions Deemed Inserted Herein.

Article 61. It is the intent and understanding of the parties to this agreement that each and every provision of law required to be inserted in this contract should be and is inserted herein. Furthermore, it is hereby stipulated that every such provision is to be deemed to be inserted herein; and if, through mistake or otherwise, any such provision is not inserted or is not inserted in correct form, then the contract shall forthwith, upon the application of either party, be amended by such insertion so as to comply strictly with the law, and without prejudice to the rights of either party hereunder.

Provision in Case of Unlawful Provision.

Article 62. If this contract contains any unlawful provision not an essential part of the general structure of the contract and which shall not appear to have been a controlling or very material inducement to the making thereof the same shall be deemed of no effect and shall, upon the application of either party, be struck from the contract without affecting the binding force of the contract as it shall remain after omitting such provision.

In witness whereof, this contract has been executed for The City of New York by the Public Service Commission for the First District under and by resolution duly adopted by the Commission and the seal of the Commission has been hereto affixed and attested by its Secretary and these presents have been signed by its Chairman; and the Contractor has caused its corporate seal to be hereto affixed and these presents to be executed by its proper officers the day and year first above written.

PUBLIC SERVICE COMMISSION FOR THE FIRST DISTRICT.
By...................., Chairman.

Attest:
...................., Secretary.

State of New York, County of New York, ss.:

On the .... day of ...., 1910, before me personally appeared William R. Willcox and Travis H. Whitney, to me known and known to me to be the said William R. Willcox, the Chairman, and the said Travis H. Whitney, the Secretary of the Public Service Commission for the First District; and the said William R. Willcox and Travis H. Whitney being by me duly sworn, did depose and say, each for himself and not the one for the other, the said William R. Willcox, that he resides in the Borough of Manhattan, in the City, County and State of New York, that he is the Chairman of the said Commission and that he subscribed his name to the foregoing contract by virtue of the authority thereof; and the said Travis H. Whitney, that he resides in the Borough of Brooklyn, in the County of Kings, City and State of New York, that he is the Secretary of the said Commission and that he subscribed his name thereto by like authority; and both the said William R. Willcox and Travis H. Whitney that they know the seal of the said Commission and that the same was affixed to the foregoing instrument by the authority of the said Commission and of a resolution duly adopted by the same.

State of New York, County of New York, ss.:

On this .... day of ...., 1910, before me personally came .... to me known and known to me to be the individual.. described in and who executed the foregoing instrument, and ..he.. duly acknowledged to me that ..he.. executed the same.

State of New York, County of New York, ss.:

On this .... day of ...., 1910, before me personally appeared ...., to me known, who, being by me first duly sworn, did depose and say: That he resided in ...., in the State of........; that he is .... of ...., the corporation described in and which executed the foregoing instrument; that he knew the corporate seal of said company; that one of the seals affixed to said contract was such corporate seal, and that it was affixed thereto by order of the Board of Directors of said Company, and that he signed his name thereto by like authority.

FORM OF CONTRACTOR'S BOND.

Route 5, Section No. 11.

Know All Men by These Presents, That .... of ...., hereinafter called the Contractor, and .... and ...., hereinafter called the Sureties, are

held and firmly bound unto The City of New York, hereinafter called the City, in the sum of .... dollars ($........), lawful money of the United States of America, to be paid to the City, for which payment well and truly to be made the Contractor and the Sureties do hereby bind themselves and their, and each of their, executors, administrators, successors and assigns firmly by these presents, as follows: The Contractor to be so held and bound for the full amount of the said sum of .... dollars ($........), and each of the said Sureties to be so held and bound only for a portion of said sum as follows:

The said ....
for the sum of..........................dollars ($........); the said ....
for the sum of..........................dollars ($........); the said ....
for the sum of..........................dollars ($........); the said ....
for the sum of..........................dollars ($........).

In Witness Whereof, The Contractor and the Sureties have hereunto set their hands and seals and such of them as are corporations have caused their respective seals to be hereto affixed and these presents to be attested by the proper officers, this .... day of ...., 1910.

Whereas, The City by the Public Service Commission for the First District (hereinafter called the Commission) is about to enter into a contract with the Contractor bearing even date herewith for the construction of that portion of a Rapid Transit Railroad known as Section 11 of Route 5, in.........., and extending from.......... street to .... street, in the Borough of ...., in The City of New York, more particularly described in the said contract; and

Whereas, The City is about to enter into such contract with the Contractor upon the condition, and not otherwise, that this bond shall be given to the City, and upon the faith thereof, now therefore,

The condition of the foregoing obligation is such that if the Contractor shall fully perform the said contract, then this obligation shall be null and void, but else it shall remain in full force and virtue.

It is expressly agreed, between the City and the Sureties (and it is upon such agreement that the City accepts this bond) that the Sureties will and do waive any and every notice of default on the part of the Contractor; that they will and do permit the City to extend the time of the Contractor to make any payment or do any act; that no omission on the part of the City to give any notice of extension of time granted by or on behalf of the City shall be availed of by the Sureties or any of them as a defense upon this Bond; that the Sureties shall not set up or have any defense upon this bond by reason of any alteration of the said contract unless such alteration shall be represented by a formal written instrument duly executed between the City and the Contractor which shall have been duly authorized by a vote of the Commission; and that in case of such alteration, however made, the same shall be a defense to the Sureties only to the extent of the actual injury or damage caused to the Sureties by said alteration.*

ROUTE 5, SECTION 1, BATTERY PARK TO DEY STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 1.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of invitation to contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned†..

.... do..
hereby, in pursuance of the invitation to contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form

---

*The execution of the bond must be duly proved before delivery in the form essential to proof to entitle a deed to record in the State of New York. Full affidavits of justification of sureties must be added.

†The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

annexed hereto with The City of New York for the construction of section 1 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard........................	....	160,000	....
2.	For earth excavation, below mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard........................	....	143,000	....
2a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard........................	....	9,000	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard.........	....	61,000	....
4.	For underpinning buildings, including all incidental work and material, per lineal front foot of building underpinned as follows:			
	(a) For buildings less than seven stories in height, per front foot................	....	3,000	.
	(b) For buildings from seven to twelve stories in height, per front foot........	....	400	....
	(c) For buildings over twelve stories in height, per front foot..................	....	300	....
6.	For concrete masonry, in place, per cubic yard	....	70,500	....
7.	For protective concrete masonry in place, outside of waterproofing, per cubic yard.	....	10,300	....
8.	For rubble stone masonry in place, per cubic yard	....	2,300	....
9.	For brick masonry, in place, per cubic yard	....	100	....
10.	For hollow terra cotta brick masonry, in place, per cubic yard..................	....	770	....
12.	For timber piles, in place, and prepared, per lineal foot.......................	....	5,000	....
13.	For timber foundations, placed and fastened, per thousand feet, B. M..........	....	2M	....
14.	For broken stone or gravel, in place, other than that used in concrete, per cubic yard	....	3,200	....
15.	For waterproofing, treated woven fabric, laid with pitch or asphaltum, in place, as follows:			
	(a) For 1-ply, per square yard...........	....	80,000	....
	(b) For 2-ply, per square yard...........	....	100	....
	(c) For 3-ply, per square yard...........	....	4,000	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	(d) For 4-ply, per square yard..........	....	100	....
	(e) For 5-ply, per square yard...........	....	100	....
	(f) For 6-ply, per square yard...........	....	100	....
16.	For waterproofing, brick laid in asphalt mastic, in place, per cubic yard..........	....	12,200	....
17.	For vitrified or cast-iron drain pipe, in place, as follows:			
	(a) For 12-inch vitrified pipe, per lineal foot	....	100	....
	(b) For 10-inch vitrified pipe, per lineal foot	....	100	....
	(c) For 8-inch vitrified pipe, per lineal foot	....	2,430	....
	(d) For 6-inch vitrified pipe, per lineal foot	....	200	....
	(e) For 4-inch vitrified pipe, per lineal foot	....	100	....
	(f) For 8-inch cast-iron pipe, per lineal foot	....	....	....
	(g) For 6-inch cast-iron pipe, per lineal foot	....	100	....
	(h) For 4-inch cast-iron pipe, per lineal foot	....	1,800	....
18.	For tunnel ducts, in place, as required by Section 305 of the specifications, per duct foot	....	238,000	....
19.	For riveted steel, painted and erected, per ton of two thousand pounds............	....	5,500	....
20.	For steel beams and shapes with connections, painted and erected, per ton of two thousand pounds	....	4,400	....
21.	For steel rods and bars built in concrete, per ton of two thousand pounds........	....	660	....
25.	For miscellaneous iron castings, other than tunnel lining, such as manhole heads and covers, gratings, etc.; but not including castings for sewer work or pipes; in place, per ton of two thousand pounds..	....	10	....
26.	For wire mesh in place, per pound........	....	10,600	....
27.	For one and one-half inch (1½ inch) galvanized iron pipe hand rail, in place, including expansion bolts, etc., per lineal foot	....	100	....
28.	For steel gratings for ventilation, in place, including frames, etc., per square foot..	....	9,000	....
29.	For vault lights, in place, per square foot..	....	4,500	....
30.	For street surface restored:			
	(a) Sidewalks, including curbs and all structures and growths therein or thereon, per square yard...................	....	7,140	....
	(b) For temporary repavement and maintenance of roadways, per square yard...	....	14,520	....
31.	For park surface restored (all classes), per square yard	....	20,800	....
32.	For wrought iron or fibre electric conduits, in place, in stations, as follows:			
	(a) For three-fourths inch (¾-inch) wrought iron, per lineal foot..........	....	18,900	....
	(b) For one and one-half inch (1½ inch) wrought iron, per lineal foot..........	....	3,230	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	(c) for two inch (2 inch) wrought iron, per lineal foot........................	....	1,730	....
	(d) For two inch (2 inch) fibre, per lineal foot	....	6,600	....
33.	For cast-iron outlet boxes in place, in stations, each	....	1,030	....
34.	For six inch (6 inch) cast-iron pipe and fittings, including specials ("extra heavy"), in place in stations, per lineal foot......	....	140	....
	SEWERS—ITEMS 37 TO 74.			
	Vitrified and Cast-Iron Pipe—Items 37 *to* 43.			
38.	For 15-inch vitrified pipe sewer, per lineal foot	....	1,250	....
39.	For 18-inch vitrified pipe sewer, per lineal foot	....	720	....
	Egg-Shaped Brick or Concrete Sewers—Items 44 *to* 51.			
45.	For 3 foot 6 inch by 2 foot 4 inch per lineal foot	....	*2,168	....
47.	For 4 foot by 2 foot 8 inch per lineal foot.	....	*452	....
	SURFACE AND SUBSURFACE STRUCTURES—ITEMS 75 AND 76.			
75.	For street surface railroads, including the support, reconstruction, rebuilding, etc., where necessary (but not including permanent masonry supports, if required and added, and not including additional vaults, if required and constructed in excess of the number existing), as follows:			
	(a) For electric railroads, per lineal foot of single track........................	....	5,500	....
	(b) For horse railroads, per lineal foot of single track	....	240	....
76.	For the temporary and permanent support and maintenance of elevated railroad structures, and all work incidental thereto, per column........................	....	120	....
	PIPES IN STREETS—ITEMS 77 TO 126.			
	For Work and Material as Called for by Section 71 *of the Specifications. Water and Gas Pipes—Items* 77 *to* 108. *Water Pipes—Items* 77 *to* 88.			
	For water pipes in place, as follows:			
78.	For 4-inch water pipe, per lineal foot.....	....	100	....
79.	For 6-inch water pipe, per lineal foot....	....	760	....
82.	For 12-inch water pipe, per lineal foot....	....	730	....
84.	For 20-inch water pipe, per lineal foot....	....	680	....
	Gas Pipes—Items 89 *to* 99.			
	For gas pipes in place, as follows:			
90.	For 4-inch gas pipe, per lineal foot........	....	280	....
91.	For 6-inch gas pipe, per lineal foot.......	....	610	....

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York, pursuant to the terms of the said contract, a bond in the sum of five hundred thousand dollars ($500,000) in the form hereto annexed with the following named sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room .... on the ...... floor of the building .... in the Borough of ...., in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of fifteen thousand dollars ($15,000). If the Commission shall notify the undersigned that this contractor's proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the invitation to contractors and this contractor's proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said invitation to contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this proposal shall not be ac-

cepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this proposal.

(6) There are no persons interested with the undersigned in this proposal, except*

(7) This proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District, is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated the ...., 1910.

Affidavit of Verification.

State of New York, City and County of New York, ss.:

...., being duly sworn, says: I am† the proposing contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this .... day of ...., 1910.

ROUTE 5, SECTION 2, DEY STREET TO WALKER STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.
(Route 5, Section 2.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of invitation to contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned‡... .... do.. hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 2 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of ...."; if a corporation, say, "the (President or other officer duly authorized) of the........ .... Company."

‡The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard........................	....	256,100	....
2.	For earth excavation, below mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard........................	....	142,300	....

3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard...............	....	100	....
4.	*For underpinning buildings, including all incidental work and material, per lineal front foot of building underpinned as follows:			
	(a) For buildings less than seven stories in height, per front foot................	....	3,000	....
	(b) For buildings from seven to twelve stories in height, per front foot.........	....	1,300	....
	(c) For buildings over twelve stories in height, per front foot..................	....	750	....
5.	For tunnel excavation, including disposal of material, timbering, etc., per cubic yard	....	23,300	....
6.	For concrete masonry in place, per cubic yard	....	84,800	....
7.	For protective concrete masonry in place outside of waterproofing, per cubic yard.	....	6,220	....
8.	For rubble stone masonry in place, per cubic yard	....	3,250	....
9.	For brick masonry, in place, per cubic yard.	....	50	....
10.	For hollow terra cotta brick masonry, in place, per cubic yard..................	....	2,360	....
11.	For grout of Portland cement, per barrel of Portland cement used..............	....	4,000	....
12.	For timber piles, in place, and prepared, per linear foot........................	....	1,000	....
13.	For timber foundations, placed and fastened, per thousand feet B.M...........	....	2M	....
14.	For broken stone or gravel, in place, other than that used in concrete, per cubic yard	....	3,300	....
15.	For waterproofing, treated woven fabric, laid with pitch or asphaltum, in place, as follows:			
	(a) For 1-ply, per square yard...........	....	45,500	....
	(b) For 2-ply, per square yard...........	....	100	....
	(c) For 3-ply, per square yard............	....	5,300	....
	(d) For 4-ply, per square yard............	....	100	....
	(e) For 5-ply, per square yard............	....	100	....
	(f) For 6-ply, per square yard...........	....	100	....
16.	For waterproofing, brick laid in asphalt mastic, in place, per cubic yard..........	....	7,300	....

*Not to include underpinning, if any, in connection with construction of iron-lined tunnel portion.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
17.	For vitrified or cast-iron drain pipe, in place, as follows:			
	(a) For 12-inch vitrified pipe, per lineal foot	....	100	....
	(b) For 10-inch vitrified pipe, per lineal foot	....	100	....
	(c) For 8-inch vitrified pipe, per lineal foot	....	210	....
	(d) For 6-inch vitrified pipe, per lineal foot	....	100	....
	(e) For 4-inch vitrified pipe, per lineal foot	....	100	....
	(f) For 8-inch cast-iron pipe, per lineal foot	....	....	....
	(g) For 6-inch cast-iron pipe, per lineal foot	....	100	....
	(h) For 4-inch cast-iron pipe, per lineal foot	....	1,600	....
18.	For tunnel ducts, in place, as required by section 305 of the specifications, per duct foot	....	365,400	....
19.	For riveted steel, painted and erected, per ton of two thousand pounds............	....	6,700	....
20.	For steel beams and shapes with connections, painted and erected, per ton of two thousand pounds	....	3,850	....
21.	For steel rods and bars built in concrete, per ton of two thousand pounds........	....	1,240	....
22.	For cast-iron tunnel lining, in place in the work, including the placing of bolts and washers and caulking of joints, etc., per ton of two thousand pounds............	....	5,300	....
23.	For steel bolts and washers for tunnel lining, per ton of two thousand pounds..	....	75	....
25.	For miscellaneous iron castings, other than tunnel lining, such as manhole heads and covers, gratings, etc.; but not including castings for sewer work or pipes; in place, per ton of two thousand pounds...	....	20	....
26.	For wire mesh, in place, per pound........	....	13,620	....
27.	For one and one-half inch (1½ inch) galvanized iron pipe hand rail, in place, including expansion bolts, etc., per linear foot	....	9,130	....
28.	For steel gratings for ventilation, in place, including frames, etc., per square foot..	....	10,310	....
29.	For vault lights, in place, per square foot..	....	2,900	....
30.	For street surface restored:			
	(a) Sidewalks, including curbs and all structures and growths therein or thereon, per square yard.....................	....	8,065	....
	(b) For temporary repavement and maintenance of roadways, per square yard...	....	18,695	....
31.	For park surface restored (all classes), per square yard	....	1,300	....
32.	For wrought-iron or fibre electric conduits, in place in stations, as follows:			
	(a) For three-fourths inch (¾ inch) wrought-iron, per lineal foot...........	....	31,300	....
	(b) For one and one-half inch (1½ inch) wrought-iron, per lineal foot..........	....	1,550	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York, pursuant to the terms of the said contract, a bond in the sum of six hundred thousand dollars ($600,000), in the form hereto annexed with the following named sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room ...., on the .... floor of the building ...., in the Borough

of ...., in the City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of fifteen thousand dollars ($15,000). If the Commission shall notify the undersigned that this Contractor's proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this proposal.

(6) There are no persons interested with the undersigned in this proposal except*

(7) This proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the Contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated the ...., 1910.

	New Cast-iron Spigot and Groove Pipe for High Pressure Fire System—Items 107 *and* 108.			
107.	For new cast-iron spigot and groove straight pipe delivered on the work, per ton of two thousand pounds..........	....	12	....
108.	For new cast-iron spigot and groove pipe, special castings, delivered on the work, per ton of two thousand pounds......	....	4	....
	DUCTS IN STREETS.			
	Electric Ducts and Conduits in Streets. (Other than tunnel ducts and street railroad ducts which are provided for in Items 18 and 75-a.)			
127.	For electric ducts and conduits in place, as provided in Section 71-a of the specifications, per duct foot................	....	11,000	....

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of two hundred and fifty thousand dollars ($250,000) in the form hereto annexed with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No................on the................floor of the building No.........................in the Borough of..................................
in the City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the

said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated the.., 1910.

Affidavit of Verification.

State of New York, City and County of New York, ss.:

.... being duly sworn, says: I am†............ the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this............day of.............., 1910.

ROUTE 5, SECTION 3, HOWARD STREET TO BLEECKER STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 3.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of Invitation to Contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned‡...
.... do hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 3 of Route 5. and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

---

*Here insert the names and addresses of all persons interested with the bidder If there are no such persons strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of.."; if a corporation, say "the (President or other officer duly authorized) of the............ ....Company."

‡The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard....................	....	172,000	....
2.	For earth excavation, below mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard....................	....	40,500	....
2-a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard.......................	....	10,400	....
4.	For underpinning buildings, including all incidental work and material, per lineal front foot of building underpinned as follows:			
	(a) For buildings less than seven stories in height, per front foot..............	....	3,700	....
	(b) For buildings from seven to twelve stories in height, per front foot........	....	1,700	....
	(c) For buildings over twelve stories in height, per front foot..................	....	....	....
6.	For concrete masonry, in place, per cubic yard	....	42,300	....
7.	For protective concrete masonry in place outside of waterproofing, per cubic yard.	....	2,200	....
8.	For rubble stone masonry in place, per cubic yard	....	2,300	....
9.	For brick masonry, in place, per cubic yard	....	50	....
10.	For hollow terra cotta brick masonry, in place, per cubic yard..................	....	1,230	....
12.	For timber piles, in place, and prepared, per lineal foot.........................	....	1,000	....
13.	For timber foundations, placed and fastened, per thousand feet B. M...........	....	2M	....
14.	For broken stone or gravel, in place, other than that used in concrete, per cubic yard	....	2,800	....
15.	For waterproofing treated woven fabric, laid with pitch or asphaltum, in place, as follows:			
	(a) For 1-ply, per square yard..........	....	16,900	....
	(b) For 2-ply, per square yard..........	....	100	....
	(c) For 3-ply, per square yard..........	....	3,700	....
	(d) For 4-ply, per square yard..........	....	100	....
	(e) For 5-ply, per square yard..........	....	100	....
	(f) For 6-ply, per square yard..........	....	100	....
16.	For waterproofing, brick laid in asphalt mastic, in place, per cubic yard........	....	3,060	....
17.	For vitrified or cast-iron drain pipe, in place, as follows:			
	(a) For 12-inch vitrified pipe, per lineal foot	....	100	....
	(b) For 10-inch vitrified pipe, per lineal foot	....	100	....
	(c) For 8-inch vitrified pipe, per lineal foot	....	1,460	....
	(d) For 6-inch vitrified pipe, per lineal foot	....	200	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
	(e) For 4-inch vitrified pipe, per lineal foot	....	100	....
	(f) For 8-inch cast-iron pipe, per lineal foot	....	....	....
	(g) For 6-inch cast-iron pipe, per lineal foot	....	100	....
	(h) For 4-inch cast-iron pipe, per lineal foot	....	1,170	....
18.	For tunnel ducts, in place, as required by Section 305 of the specifications, per duct foot	....	207,400	....
19.	For riveted steel, painted and erected, per ton of two thousand pounds	....	2,560	....
20.	For steel beams and shapes with connections painted and erected, per ton of two thousand pounds	....	780	....
21.	For steel rods and bars built in concrete, per ton of two thousand pounds	....	1,530	....
24.	For cast-iron columns erected and painted, per ton of two thousand pounds	....	10	....
25.	For miscellaneous iron castings, other than tunnel lining, such as manhole heads and covers, gratings, etc.; but not including castings for sewer work or pipes; in place, per ton of two thousand pounds	....	12	....
26.	For wire mesh, in place, per pound	....	6,400	....
27.	For one and one-half-inch (1½-inch) galvanized iron pipe hand rail, in place, including expansion bolts, etc., per lineal foot	....	3,520	....
28.	For steel gratings for ventilation, in place, including frames, etc., per square foot	....	8,200	....
29.	For vault lights. in place, per square foot	....	5,000	....
30.	For street surface restored:			
	(a) Sidewalks including curbs and all structures and growths therein or thereon, per square yard	....	9,390	....
	(b) For temporary repavement and maintenance of roadways, per square yard	....	14,240	....
32.	For wrought-iron or fibre electric conduits, in place in stations, as follows:			
	(a) For three-fourths inch (¾-inch) wrought-iron, per lineal foot	....	7,600	....
	(b) For one and one-half inch (1½ inch) wrought-iron, per lineal foot	....	1,000	....
	(c) For two-inch (2-inch) wrought-iron, per lineal foot	....	520	....
	(d) For two-inch (2-inch) fibre, per lineal foot	....	....	....
33.	For cast-iron outlet boxes in place in stations, each	....	440	....
34.	For six-inch (6-inch) cast-iron pipe and fittings, including specials ("extra heavy"), in place in stations, per lineal foot	....	160	....
	SEWERS—ITEMS 37 TO 74.			
	Vitrified and Cast-iron Pipe—Items 37 to 43.			
38.	For 15-inch vitrified pipe sewer, per lineal foot	....	1,272	....

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
39.	For 18-inch vitrified pipe sewer, per lineal foot	....	543	....
42.	For cast-iron sewer pipe (straight pipe) in place in the work, per ton of two thousand pounds	....	283	....
	Egg-shaped Brick or Concrete Sewers—Items 44 *to* 51.			
45.	For 3 foot 6 inch by 2 foot 4 inch, per lineal foot	....	*554	....
48.	For 4 foot 3 inch by 2 foot 10 inch, per lineal foot	....	484	....
	Circular Sewers—Brick or Concrete or Reinforced Concrete—Items 52 *to* 66.			
53.	For 4 foot 0 inch, per lineal foot..........	....	1,145	....
54.	For 4 foot 3 inch, per lineal foot..........	....	*284	....
	SURFACE AND SUBSURFACE STRUCTURES. ITEMS 75 AND 76.			
75.	For street surface railroads, including the support, reconstruction, rebuilding, etc., where necessary (but not including permanent masonry supports, if required and added, and not including additional vaults, if required and constructed in excess of the number existing), as follows:			
	(a) For electric railroads, per lineal foot of single track......................	....	5,470	....
	(b) For horse railroads, per lineal foot of single track......................	....	720	....
	PIPES IN STREETS—ITEMS *77 to* 126.			
	For Work and Material as Called for by Section 71 *of the Specifications.*			
	Water and Gas Pipes—Items 77 to 108.			
	Water Pipes—Items 77 *to* 88.			
	For water pipes in place, as follows:			
78.	For 4-inch water pipe, per lineal foot....	....	100	....
82.	For 12-inch water pipe, per lineal foot....	....	600	....
86.	For 30-inch water pipe, per lineal foot..	....	800	....
	New Cast-iron Hub and Spigot Water and Gas Pipe—Items 100 *and* 101.			
100.	For new cast-iron hub and spigot straight pipe delivered on the work, per ton of two thousand pounds	....	32	....
101.	For new cast-iron hub and spigot pipe, special castings, delivered on the work, per ton of two thousand pounds........	....	8	....
	High Pressure Fire System Pipes, Standard Spigot and Grooves—Items 102 *to* 106.			
	For high pressure fire system pipe in place, as follows:			
102.	For 8-inch high pressure fire system water pipe, per lineal foot....................	....	100	....

---

*Balance remaining after deducting portion of sewer included in Railroad construction under section 424 of the specifications.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
103.	For 12-inch high pressure fire system water pipe, per lineal foot....................	....	410	....

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of three hundred thousand dollars ($300,000) in the form hereto annexed with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No. .... on the .... floor of the building No. .... in the Borough of .... in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City damages by it sustained by reason of such failure of

the undersigned as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

(2) If this proposal is accepted, the undersigned will, within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of three hundred and fifty thousand dollars ($350,000) in the form hereto annexed, with the following named Sureties, viz.:

....
....
....
....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No. .... on the ...... floor of the building No. .... in the Borough of .... in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said con-

tract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated, the ...., 1910.

Affidavit of Verification.

State of New York, City and County of New York, ss.:

............................., being duly sworn, says: I am†..................
the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this ...... day of ...., 1910.

ROUTE 5, SECTION 7, 40TH STREET TO 53D STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 7.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of Invitation to Contractors, copy of form of contract, copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned‡...
.... do ..
hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 7 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of ...."; if a corporation, say, "the (President or other officer duly authorized) of the.......................Company."

‡The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.

(2) If this Proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of three hundred thousand dollars ($300,000) in the form hereto annexed with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No. .... on the .... floor of the building No. .... in the Borough of .... in the City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated the ...., 1910.

Affidavit of Verification.

State of New York, City and County of New York, ss.:

.............................., being duly sworn, says: I am† .... the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this .... day of ...., 1910.

ROUTE 5, SECTION 9, 67TH STREET TO 79TH STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 9.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of invitation to Contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned‡.. .... do .. hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 9 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder Amount.
1.	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard	....	101,100	....
2a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard	....	18,000	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard..........	....	48,400	....
3a.	For rock excavation for sewers and pipes, including the disposal of it, etc., per cubic yard	....	500	....

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pur-

suant to the terms of the said contract a bond in the sum of three hundred thousand dollars ($300,000) in the form hereto annexed with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No..........................on the........................ floor of the building No..in the Borough of ....in the City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of ten thousand dollars ($10,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of the City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated the.., 1910.

Affidavit of Verification.

State of New York, City and County of New York, ss.: ...

....being duly sworn, says: I am†.. the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this......................day of...................., 1910.

ROUTE 5, SECTION 11, 93RD STREET TO 106TH STREET.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 11.)

Notice—Sums of money must be written in words and also in figures, except in the schedules. There must remain annexed hereto: Copy of Invitation to Contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned†..

.... do.. hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with the City of New York for the construction of Section 11 of Route 5, and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.
1..	For earth excavation, above mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard......................	....	52,100	....
2.	For earth excavation, below mean high water (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard......................	....	22,700	....
2-a.	For earth excavation, both above and below mean high water, for sewers and pipes, including the disposal of it, etc., per cubic yard......................	....	3,600	....
3.	For rock excavation (except excavation for sewers and pipes), including the disposal of it, etc., per cubic yard..........	....	81,300	....
3-a.	For rock excavation, for sewers and pipes, including the disposal of it, etc., per cubic yard	....	1,900	....
4.	For underpinning buildings, including all incidental work and material, per lineal front foot of building underpinned as follows:			
	(a) For buildings less than seven stories in height, per front foot.............	....	2,300	....
	(b) For buildings from seven to twelve stories in height, per front foot........	....	....	....

---

†The bidder's name must be inserted here. If the bid is submitted by a corporation, the full legal title must be given here and a certified copy of the certificate of incorporation must be submitted, together with an affidavit showing the amount of stock paid in in cash and the names and addresses of the directors and principal officers. If the bid is submitted by a firm, the above blank must be filled up in the following form, "the firm of A. B. & Co., composed of A. B. C. D. etc." (giving the names of all the partners).

†Included in Railroad construction under section 424 of the specifications.

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid and at the same time will deliver to the Comptroller of The City of New York pursuant to the terms of the said contract a bond in the sum of five hundred thousand dollars ($500,000) in the form hereto annexed with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room.........on the...........floor of the building No...........in the Borough of..................in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of fifteen thousand dollars ($15,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted, and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the said sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this Proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This Proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

ROUTE 5, SECTION 14, 129TH STREET TO MOTT AVENUE, TYPE K.

Contractor's Proposal for the Construction of a Portion of a Rapid Transit Railroad.

(Route 5, Section 14.)

Notice—Sums of money must be written in words and also in figures, except in schedules. There must remain annexed hereto: Copy of Invitation to Contractors. Copy of form of contract. Copy of form of bond.

To the Public Service Commission for the First District:

1. The undersigned* ....

do... hereby, in pursuance of the Invitation to Contractors, a copy of which is attached hereto, propose according to the terms thereof to enter into a contract in the form annexed hereto with The City of New York for the construction of Section 14 of Route 5, in accordance with the type of tunnel construction designated "K," and to furnish all necessary labor, materials, machinery, tools, apparatus and other means of construction and perform all the work mentioned in the said contract at the unit prices for the several items as given in the following Schedule of Unit Prices, or as otherwise provided in the form of contract. It is understood that the quantities of various items specified in the following schedule are given as a basis for the uniform comparison of bids and are not in any way guaranteed or represented as correct or intended to be relied on, and they shall not be taken as final and shall form no basis for any claim in case they do not correspond with the final measurements or quantities. It is further understood that the Commission reserves the right to increase or diminish or to omit entirely any of the quantities of items as therein stated:

Type K—Schedule of Unit Prices.

Item.	Classification.	Unit Price.	Estimated Approximate Quantities.	This Column not to be Used by Bidder. Amount.

(2) If this proposal is accepted, the undersigned will within ten days after delivery of notice, execute and deliver the contract with the City in the form aforesaid, and at the same time will deliver to the Comptroller of The City of New York, pursuant to the terms of said contract, a bond in the sum of five hundred thousand dollars ($500,000) in the form hereto annexed with the following named Sureties, viz.:

....

....

....

....

(3) The Commission may cause any notice intended for the undersigned to be delivered at Room No........, on the........floor of the building No.............in the Borough of................, in The City of New York. Such delivery shall be sufficient notice to the undersigned.

(4) At the time of delivering this proposal to the Commission the undersigned will separately deliver a certified check payable to the order of the Comptroller of The City of New York for the sum of fifteen thousand dollars ($15,000). If the Commission shall notify the undersigned that this Contractor's Proposal is accepted, and that the proposed contract is consented to by the Board of Estimate and Apportionment, then if the undersigned shall fail within ten days thereafter or within such longer period as may be prescribed by the Commission to procure the above described bond to be duly executed and delivered; or if the undersigned shall fail to procure the contract to be duly executed and delivered as aforesaid, then the Invitation to Contractors and this Contractor's Proposal shall constitute a contract binding the undersigned to pay to the City the damages by it sustained by reason of such failure of the undersigned, as provided in said Invitation to Contractors. And the undersigned hereby assigns to the City the sum so specially deposited by the delivery of such certified check, subject only to the condition that if this Proposal shall not be accepted, or, if it shall be accepted and the undersigned shall within ten days after notice as aforesaid or any longer period prescribed by the Commission, execute the said contract and procure the said bond to be duly executed and delivered, then the amount of the said check so specially deposited shall be returned to the undersigned.

(5) A notice of acceptance of this proposal by the Commission addressed to the undersigned as aforesaid shall forthwith, at the option of the Commission, operate as against the undersigned as a complete making of a contract according to the form thereof as aforesaid, with the blanks therein contained filled in according to this Proposal.

(6) There are no persons interested with the undersigned in this Proposal, except*

(7) This proposal is made without any connection with any other person making a proposal or bid for the same purpose, and is in all respects fair and without collusion or fraud. No member of the Board of Aldermen, head of department, chief of bureau, deputy thereof or clerk therein, or other officer of The City of New York, or any member or employee of the Public Service Commission for the First District is interested directly or indirectly, as contracting party, partner, stockholder, or otherwise in, or in the performance of, the contract, or in the supplies, work or business to which it relates, or in any portion of the profits thereof.

Dated the.............................., 1910.

Affidavit of Verification.

State of New York, City and County of New York, ss.:

....being duly sworn, says: I am†.. the proposing Contractor above named. I have read the foregoing proposal. The same is in all respects true.

Sworn to before me this............day of............, 1910.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 21, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—Under date of July 5, 1911, the Public Service Commission of the First District transmitted to the Board of Estimate and Apportionment five proposed contracts for the construction of Sections 6, 7, 8, 10 and 11 of Route 5, the so-called Lexington Avenue Rapid Transit Railroad route. Attached to each of the proposed contracts was a communication, duly signed, sealed and attested, requesting the Board of Estimate and Apportionment to consent to the contract therewith transmitted, to prescribe a limit to the amount of bonds available to meet the requirements of the contract and, also, to direct the Comptroller to issue the bonds to the amount named.

At the meeting of this Board held July 6, 1911, the five communications of the Public Service Commission and the five proposed contracts were referred to me for consideration and report. I report thereon as follows:

The sections to be built under the proposed contracts with the names of the contractors and the amount of bonds requested for each section are as follows:

Section 6—From E. 26th st. under Lexington ave. to E. 40th st. Contractor: The Bradley Contracting Company. Amount, $3,634,213.50.

Section 7—From E. 40th st. under Lexington ave. to E. 53d st. Contractor: Charles H. Peckworth. Amount, $2,750,463.40.

Section 8—From E. 53d st. under Lexington ave. to E. 67th st. Contractor: The Bradley Contracting Company. Amount, $3,369,484.20.

Section 10—From E. 79th st. under Lexington ave. to E. 93d st. Contractor: The Bradley Contracting Company. Amount, $3,253,072.80.

Section 11—From E. 93d st. under Lexington ave. to E. 106th st. Contractor: The Bradley Contracting Company. Amount, $3,132,195.05.

The aggregate amount of the five contracts is $16,139,428.95.

I find that there are three main questions to be considered as follows:

1. Will the reduction in size of the subway tunnel since bids were received give the contractors basis for action for prospective profit on work they bid to do, but which, now, they cannot do because of the reduced quantities of materials to be handled?

2. Will the reduced size of the tunnel and the proposed change of grade make a substantial difference in the actual unit cost for the work?

---

*Here insert the names and addresses of all persons interested with the bidder. If there are no such persons strike out the word "except."

†If the bidder is an individual, do not fill this blank; if the bidder is a firm, here say, "a member of the firm of.."; if a corporation, say, "the (President or other officer duly authorized) of the...Company."

3. Should the Board of Estimate and Apportionment permit the contract price to contain a provision for indemnifying the contractors against loss under the Wainwright Workmen's Compensation Law, now that that law has been declared unconstitutional and is no longer in force?

Question 1 presents a serious aspect in view of the experience we have had with claims made by contractors on the existing subways.

The bids on which it is now proposed to award contracts were submitted for a larger and more costly subway than is to be built. The cross section of the subway has been reduced about two feet. Inasmuch as the bids were based on unit prices, it was considered unnecessary to readvertise the contracts on account of the reduction in size.

Article 13 of the Contracts states that the quantities of the various classes of work to be done and the materials to be furnished under the contract are approximate and that the contractor shall make no claim for anticipated profit or loss of profit because of a difference between the quantities of the various classes of work actually done or materials actually delivered and the estimated quantities stated in the Contractor's Proposal.

In other articles the Commission reserves the right to amplify the plans during the progress of the work, and to change the location and to alter the drawings in any way it may deem necessary.

So far as minor changes in the plans and specifications are concerned, these articles would probably give the City sufficient protection against unjust claims by the contractors, but it is doubtful if the contracts as they stand can guard against law suits for anticipated profits on work the contractors bid to do and materials they proposed to furnish, but which have been eliminated by the reduction in size of the subway.

I have conferred with representatives of the Public Service Commission and have found that, in their opinion, it will be possible to obtain waivers from the contractors which will guarantee the City against litigation on account of the change that has been made in size of the tunnel bore and the consequent reduction in quantities. The resolutions attached to this report make provision for this waiver as a condition that must precede the delivery of the contracts.

Question 2, which involves the probable difference in the unit cost of the reduced quantities and the quantities as proposed at the time bids were received, leads into many difficulties. It is conceded that the reduction in the size of the bore and the substantial raising of the grade in some sections of the Lexington avenue route will decrease the unit cost. In certain of the sections it is likely that there will be a marked reduction in unit cost as a result of these changes.

The engineers of the Public Service Commission state that the reduction in cross section of the portions to be built under the five contracts under consideration can hardly be expected to make any appreciable difference in unit cost. They believe it will be more economical to award the contracts on the bids received last October than to take a chance on readvertising.

It is stated that probably all of the remaining ten sections of the Lexington avenue route will be readvertised, largely because of changes made necessary by the entrance of the Brooklyn Rapid Transit Company into the situation since bids were opened. Some of these changes are material and the members of the Commission do not feel that it would be safe to make them without readvertising. By readvertising, the City will get the benefit of any reduction in unit prices which may result from reduced hazard of deep trench work, the reduced cost of underpinning buildings and other easier conditions due to the raising of grade and to a smaller bore.

I am convinced that it will be to the best interests of the City to let the contracts for Sections 6, 7, 8, 10 and 11, on the bid prices rather than readvertise. Readvertising might bring slightly reduced unit prices, but the delay and cost of readvertising would probably more than offset any gain.

As for Question 3, regarding the effect of the annulment of the Wainwright Compensation Law, I believe that the bid prices on these contracts contained ample provision to guarantee the contractors against any loss on account of injuries to workmen. In fact, I am informed that several of the bidders last fall were considerably excited over this question and were determined to make their bids sufficiently large to cover an indemnity.

The Wainwright Law was in force at the time bids were opened. Its constitutionality had not been attacked seriously at that time. The law compelled an employer to pay an injured employee half his weekly wages (not to exceed $10 per week) while incapacitated for work for a period not over eight years. Necessarily the contractors who bid on subway work had to make provision for the great risk they assumed under this law. They were able closely to approximate the amount of risk by taking the new special rates devised by the liability companies to meet the operation of the Compensation Law. These rates were equivalent to five per cent. of the payroll cost.

It is to be assumed that all bidders padded their bids sufficiently to provide for this five per cent. addition to payroll cost. At the same time they made provision for the larger risk put upon them by the Philips Employers' Liability Law. The latter law is still in force, but the Court of Appeals has declared the Wainwright Law unconstitutional.

As a result of the court's decision, there is no risk to be assumed by the contractors on account of the Wainwright Law, and the amounts added to their bids to indemnify them on this account must be clear profit to them. An estimate based on past experience shows that the payroll cost on the five sections of the subway now being considered should be about forty per cent. of the total cost, or about $6,400,000. Assuming that the contractors provided for five per cent. of this amount as an indemnity under the Compensation Law, their bids on the five sections included more than $300,000 as an insurance against a loss, which, under the court's decision, they cannot suffer.

By readvertising the contracts, the bids might be reduced by the amounts originally included on account of the Compensation Law. The apparent saving to the City would be substantial, but the City would be taking some risk and would suffer from the delay.

It should also be borne in mind that efforts are even now under way to re-enact a Compensation Law, designed to have the same effect as the Wainwright Compensation Law and still not conflict with the Constitution. It is possible that before work on these contracts is well under way the contractors may be again burdened with the risks imposed by a Compensation Law.

I believe that early digging is more important than a small saving. If contracts for all of the fifteen sections were about to be awarded on the bids of last October, it would be a different matter and we might well consider the advisability of readvertising to eliminate the unnecessary burden of insurance against a hazard that no longer exists. In my opinion, the saving on this one item would not justify the delay incident to readvertising the five sections in question.

A fourth question that at first seemed important was whether or not the contractor should be given the advantage of a substantial drop in prices of materials used in subway construction since the bids were made last year. The bids were opened October 27, 1910. At that time the prices listed as current were higher than the present listed prices for the same materials. However, it is doubtful if this decrease in price will influence the cost to any appreciable extent, as it would not take long for a slightly rising market to wipe out the apparent saving to the contractor. Therefore, I believe that this question deserves very little consideration.

I recommend that the Board of Estimate and Apportionment consent to the five contracts and that it authorize corporate stock to the amount of $16,139,428.95 to meet the requirements of the contracts.

Attached hereto are five resolutions which prescribe a limit to the amount of bonds available for the contracts, authorize the necessary corporate stock and give the consent of this Board conditional upon a waiver from each contractor to guarantee the City against lawsuits on account of prospective profits on quantities eliminated by the reduction of the cross section of the subway. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 37 of the Rapid Transit Act, being chapter 4 of the Laws of 1891, as amended, and the provisions of section 45 of the Greater New York Charter, and the requisition of the Public Service Commission for the First District, duly made by said Commission July 5, 1911, the Board of Estimate and Apportionment hereby consents to the proposed contract to be entered into between the Bradley Contracting Company and The City of New York, acting by the Public Service Commission for the First District, for the following purposes:

For the construction, in the Borough of Manhattan, of section 6 of route 5, known as the Lexington Avenue Route, being a four-track underground railroad, the centre line of which shall begin at a point about 140 feet north of the centre line of 26th street, and shall extend thence northerly under Lexington avenue to the centre line of 40th street, at a cost not to exceed three million six hundred and thirty-four thousand two hundred and thirteen and fifty one-hundredths dollars ($3,634,213.50); and be it further

Resolved, That the Board of Estimate and Apportionment prescribes that the limit to the amount of the proceeds of corporate stock available for the said purposes shall be three million six hundred and thirty-four thousand two hundred and thirteen and fifty one-hundredths dollars ($3,634,213.50) ; and be it further

Resolved, That the Comptroller be and he is hereby authorized and directed to issue corporate stock of The City of New York to the amount of three million six hundred and thirty-four thousand two hundred and thirteen and fifty one-hundredths dollars ($3,634,213.50) at such rate of interest as the Commissioners of the Sinking Fund shall prescribe, the proceeds to the amount of the par value thereof to be issued for the purposes mentioned in the communication of the Public Service Commission for the First District to this Board dated July 5, 1911; provided, however, that this resolution is adopted upon the understanding that before the delivery of the contract the Public Service Commission will obtain, in proper form, a consent by the said contractor to the reduction of the size of the cross section and waiver of all claims whether for prospective profits or otherwise therefor; said consent and waiver, however, not to affect the right of the City, acting by the said Commission, to make such further changes as it may deem necessary under the provisions of the contract in respect of changes in plans.

Which was adopted by the following vote:

Affirmative—The Acting Mayor, the Comptroller, the Acting President of the Board of Aldermen and the Presidents of the Boroughs of Brooklyn and Richmond—12.

Negative—The Presidents of the Boroughs of Manhattan, The Bronx and **Queens—4.**

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 37 of the Rapid Transit Act, being chapter 4 of the Laws of 1891, as amended, and the provisions of section 45 of the Greater New York Charter, and the requisition of the Public Service Commission for the First District, duly made by said Commission July 5, 1911, the Board of Estimate and Apportionment hereby consents to the proposed contract to be entered into between Charles H. Peckworth and The City of New York, acting by the Public Service Commission for the First District, for the following purposes:

For the construction, in the Borough of Manhattan, of section 7 of route 5, known as the Lexington Avenue Route, being a four-track underground railroad, beginning at a point at the centre line of 40th street and extending thence under Lexington avenue to a point about fifty feet north of the centre line of 53d street, at a cost not to exceed two million seven hundred and fifty thousand four hundred and sixty-three and forty one-hundredths dollars ($2,750,463.40) ; and be it further

Resolved, That the Board of Estimate and Apportionment prescribes that the limit to the amount of the proceeds of corporate stock available for the said purposes shall be two million seven hundred and fifty thousand four hundred and sixty-three and forty one-hundredths dollars ($2,750,463.40) ; and, be it further

Resolved, That the Comptroller be and he is hereby authorized and directed to issue corporate stock of The City of New York to the amount of two million seven hundred and fifty thousand four hundred and sixty-three and forty one-hundredths dollars ($2,750,463.40) at such rate of interest as the Commissioners of the Sinking Fund shall prescribe, the proceeds to the amount of the par value thereof to be issued for the purposes mentioned in the communication of the Public Service Commission for the First District to this Board dated July 5, 1911; provided, however, that this resolution is adopted upon the understanding that before the delivery of the contract the Public Service Commission will obtain, in proper form, a consent by the said contractor to the reduction in the size of the cross section and waiver of all claims whether for prospective profits or otherwise therefor; said consent and waiver, however, not to affect the right of the City, acting by the said Commission, to make such further changes as it may deem necessary under the provisions of the contract in respect of changes in plans.

Which was adopted by the following vote:

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 37 of the Rapid Transit Act, being chapter 4 of the Laws of 1891, as amended, and the provisions of section 45 of the Greater New York Charter, and the requisition of the Public Service Commission for the First District, duly made by said Commission July 5, 1911, the Board of Estimate and Apportionment hereby consents to the proposed contract to be entered into between the Bradley Contracting Company and The City of New York, acting by the Public Service Commission for the First District, for the following purposes:

For the construction, in the Borough of Manhattan, of section 11 of route 5, known as the Lexington Avenue Route, being a four-track underground railroad, beginning at a point about fifty feet south of the centre line of 93d street and extending thence under Lexington avenue to a point about seventy feet south of the centre line of 106th street, at a cost not to exceed three million one hundred and thirty-two thousand one hundred and ninety-five and five one-hundredths dollars ($3,132,195.05); and be it further

Resolved, That the Board of Estimate and Apportionment prescribes that the limit to the amount of the proceeds of corporate stock available for the said purposes shall be three million one hundred and thirty-two thousand one hundred and ninety-five and five one-hundredths dollars ($3,132,195.05); and be it further

Resolved, That the Comptroller be and he is hereby authorized and directed to issue corporate stock of The City of New York to the amount of three million one hundred and thirty-two thousand one hundred and ninety-five and five one-hundredths dollars ($3,132,195.05), at such rate of interest as the Commissioners of the Sinking Fund shall prescribe, the proceeds to the amount of the par value thereof to be issued for the purposes mentioned in the communication of the Public Service Commission for the First District to this Board dated July 5, 1911; provided, however, that this resolution is adopted upon the understanding that before the delivery of the contract the Public Service Commission will obtain, in proper form, a consent by the said contractor to the reduction in the size of the cross section and waiver of all claims whether for prospective profits or otherwise therefor; said consent and waiver, however, not to affect the right of the City, acting by the said Commission, to make such further changes as it may deem necessary under the provisions of the contract in respect of changes in plans.

Which was adopted by the following vote:

Affirmative—The Acting Mayor, the Comptroller, the Acting President of the Board of Aldermen and the Presidents of the Boroughs of Manhattan, Brooklyn, The Bronx, Queens and Richmond—16.

On motion of the Comptroller, the Board adjourned to meet Thursday, July 27, 1911, at 10.30 o'clock in the forenoon. JOSEPH HAAG, Secretary.

BOARD OF ESTIMATE AND APPORTIONMENT.

Minutes of Meeting of Board of Estimate and Apportionment, Held in Room 16, City Hall, Thursday, July 27, 1911, at 10.30 a. m.

FINANCIAL AND FRANCHISE MATTERS.

The Board met in pursuance of an adjournment.

Present—William J. Gaynor, Mayor; William A. Prendergast, Comptroller; Francis P. Bent, Acting President, Board of Aldermen; George McAneny, President, Borough of Manhattan; Lewis H. Pounds, Acting President, Borough of Brooklyn; Thomas W. Whittle, Acting President, Borough of The Bronx; Lawrence Gresser, President, Borough of Queens, and George Cromwell, President, Borough of Richmond.

The Mayor, Hon. William J. Gaynor, presided.

After disposing of the Public Improvements calendar, the following Financial and Franchise matters were considered:

The minutes (Financial and Franchise Matters) of the meeting held July 6, 1911, as printed in the City Record July 27, 1911, were approved.

FRANCHISE MATTERS.

Rapid Transit Railway, 59th Street-Queensboro Bridge Route.

The consideration of the communication dated July 17, 1911, from the Public Service Commission for the First District, transmitting resolution adopted by said Commission July 14, 1911, adopting route and general plan of construction for a proposed rapid transit railway from 7th avenue and 59th street, Borough of Manhattan. under Central Park and 59th street to 5th avenue, where the tracks diverge, one track extending under and along East 59th street and the other under and along East 60th street to the Queensboro Bridge, and upon, along and over said bridge and its approaches to a point in the Borough of Queens at or about midway between William and Crescent streets, and requesting the approval and consent of this Board thereto, was opened.

This communication was presented to the Board at the meeting of July 20, 1911, and by resolution, duly adopted, this day was fixed as the date for consideration.

An affidavit of publication was received from the City Record.

No one appeared in opposition or in favor, and the Chair declared the consideration concluded.

The matter was then referred to the Franchise Committee.

Rapid Transit Railway, Battery-East River-Atlantic Avenue Route.

In the matter of the communication dated June 30, 1911, from the Public Service Commission for the First District, transmitting resolutions adopted by said Commission as to route and general plan of construction for a proposed rapid transit railroad beginning at a point under Battery Park, Borough of Manhattan, and extending under the park and ferry or waterfront property to the East River; thence under the East River to a point at or near Atlantic avenue, Borough of Brooklyn, extended with the pierhead line; thence under and along Atlantic avenue to a point in said avenue about one hundred and fifty feet east of the easterly line of Court street, Borough of Brooklyn, where a connection can be made with Section 11-D of the Fourth Avenue Subway; and requesting the approval and consent of this Board thereto.

This communication was presented to this Board at the meeting of July 6, 1911, and, by resolution duly adopted, July 13, 1911, was fixed as the date for consideration, and the communication referred to the Franchise Committee.

At the meeting of July 13, 1911, the consideration was concluded and the matter was laid over until July 17, 1911, when it was laid over until July 18, 1911, and then laid over until July 20, 1911, when it was laid over until this day.

The following appeared in opposition:

Hon. Edward M. Grout, on behalf of Abraham & Straus and others, who objected to the proposed railway on Atlantic avenue; Hon. George V. Brower; L. S. Bedford.

The following appeared in favor:

James E. Kelly, on behalf of the Board of Delegates, Allied Trades, Atlantic Avenue Civic Association, Central and Smith Street Board of Trade and the Erie Basin Board of Trade; Hon. Milo R. Maltbie, Commissioner, Public Service Commission for the First District.

The Secretary presented the following:

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 11, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—At the meeting of the Board of Estimate and Apportionment on July 6, 1911, a communication was received from the Public Service Commission for the First District, transmitting for approval resolutions adopted by it on June 30, 1911, determining and establishing a route and general plan of construction for an additional rapid transit railroad to be known as the Battery-East River-Atlantic Avenue Route.

On July 6, 1911, the Board of Estimate and Apportionment adopted a resolution fixing July 13, 1911, as the date for consideration, and the communication was referred to the Franchise Committee of the Board of Estimate and Apportionment for consideration and report.

The route determined upon and established by the Public Service Commission for the First District, lies wholly within the Boroughs of Manhattan and Brooklyn. It begins at a point under Battery Park, in Manhattan, where a connection can conveniently be made with proposed rapid transit railroads in Battery Park as heretofore adopted and approved, and extends thence easterly under Battery Park and ferry or waterfront property to the East River; thence easterly under the East River to the easterly pierhead line of the East River at a point at or near the intersection of Atlantic avenue extended with the pierhead line; curving thence northeasterly under the East River, ferry or waterfront property and Atlantic avenue to a point in Atlantic avenue to a point therein about 150 feet east of the easterly line of Court street. Here a connection can conveniently be made with Section 11-D of the Fourth Avenue Route, as heretofore adopted and approved.

This route is among those recommended for construction in the report dated June 5, 1911, of the Select Committee of the Board of Estimate and Apportionment and the members of the Public Service Commission of the First District, which report has been approved by the Board of Estimate and Apportionment.

It is the opinion of your Committee that within the immediate future additional subway connections must be made between the lower part of the Borough of Manhattan and the Borough of Brooklyn.

One tunnel has been in operation about three years and has already reached its maximum capacity.

The proposed route can be used for either the Broadway-Lexington avenue line or the 7th avenue line. Both lines have their southerly terminals at the Battery, and obviously some connections should be made between these lines and their continuation in the Borough of Brooklyn.

We concur in the request of the Public Service Commission of the First District, that this route should be approved at an early date, as the construction of the under-river crossings will probably require the greatest time.

We, therefore, transmit herewith preamble and resolution, which, if adopted, will grant the request. Respectfully,

............., Mayor; WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Franchise Committee.

The following was offered:

Whereas, The Public Service Commission for the First District, constituted pursuant to the provisions of chapter 429 of the Laws of 1907, has duly determined upon a route or routes and general plan of construction of a rapid transit railway for the conveyance of persons and property, to be established in The City of New York, in addition to the already existing lines, and did by resolution of June 30, 1911, adopt such route or routes and general plan; and

Whereas, Thereafter said Public Service Commission for the First District did transmit to the Board of Estimate and Apportionment of The City of New York a copy of the plans and conclusions for said route or routes as adopted, which plans and conclusions were received by said Board of Estimate and Apportionment on the 6th day of July, 1911, at a meeting of the said Board of Estimate and Apportionment duly held on said day; and

Whereas, Said Board of Estimate and Apportionment, by resolution duly adopted at said meeting, did appoint a day not less than one week nor more than ten days after the receipt thereof for the consideration of such plans and conclusions, to wit, the 13th day of July, 1911, at 10.30 o'clock a. m.; and

Whereas, Said Board of Estimate and Apportionment, on the 13th day of July, 1911, proceeding with and concluded such consideration; and

Whereas, The plans and conclusions are fully set forth in the resolutions of said Public Service Commission for the First District adopted June 30, 1911, which resolutions are as follows:

RESOLUTIONS ADOPTED BY THE PUBLIC SERVICE COMMISSION FOR THE FIRST DISTRICT, JUNE 30, 1911.

Battery-East River-Atlantic Avenue Route.

Whereas, The Public Service Commission for the First District has determined that a rapid transit railroad for the conveyance and transportation of persons and property, in addition to those already existing, authorized or proposed, is necessary for the interests of the public and of The City of New York and should be established therein as hereinafter provided; and

Whereas, This Commission has duly made the inquest and investigation necessary or proper in the premises, and all such inquests and investigations as are necessary or proper for such determination,

Now, therefore, this Commission does hereby adopt the following route for an additional rapid transit railroad in The City of New York, and does hereby determine and establish the said additional route thereof as follows, and does hereby adopt a general plan of construction of the said railroad, the route of which is herein provided, and does in such general plan hereby adopted show the general mode of operation and such details as to manner of construction as may be necessary to show the extent to which any street, avenue or other public place is to be encroached upon and the property abutting thereon affected.

This Commission in adopting the said route and general plan expressly reserves all the powers in relation to the construction of the said route which are conferred upon it by the Rapid Transit Act.

Route.

A route lying wholly within the Boroughs of Manhattan and Queens, the centre line of which shall begin at a point under 59th street, in the Borough of Manhattan, at or adjoining the westerly building line of 7th avenue extended; running thence easterly under Central Park and 59th street to a point in 59th street about three hundred and fifty feet west of the centre line of 5th avenue where the tracks diverge, one track extending thence easterly under 59th street and the other track crossing under 5th avenue diagonally and continuing thence easterly under 60th street (crossing under the tracks of the New York Central and Hudson River Railroad Company in Park avenue) to points at or adjoining the easterly curb line of 2d avenue, at which points the tracks will pass into the Manhattan terminal station of the Queensboro Bridge; extending thence through such terminal to a point about three hundred and ten feet east of the easterly building line of 2d avenue; extending thence easterly along the Manhattan approach and along and across the main span of the Queensboro Bridge and along the Queens approach thereto to a point in the Borough of Queens at or about midway between William street and Crescent street.

The said route shall also include a suitable spur or connection in the Borough of Manhattan, the centre line of which shall begin at a point under 59th street, between 6th and 7th avenues, and after passing under portions of Central Park, 59th street and 7th avenue shall continue in a general southwesterly direction under 7th avenue, to a point therein at or near 57th street, where a connection can conveniently be made with a proposed rapid transit railroad in 7th avenue as heretofore adopted and approved.

General Plan of Construction.

The general plan of construction hereby adopted for the foregoing route is as follows:

For the entire route there shall be two tracks, except that from a point about three hundred and fifty feet west of the centre line of 5th avenue to points at or adjoining the easterly curb line of 2d avenue, one of such tracks shall be constructed under 59th street and the other track diagonally under 5th avenue and under 60th street. For the spur of connection above described there shall be two tracks.

All of such tracks except those upon the Queensboro Bridge and its approaches shall be placed in subway or tunnel. Where there are two or more tracks in one street, such subways or, tunnels shall be substantially parallel with each other and on substantially the same level; except that wherever required by special necessities of surface or subsurface structures or other special or local necessities, or for the purpose of avoiding grade crossings, any one or more of the tracks may be depressed below the level of the other track or tracks so far as may be necessary. Upon the Queensboro Bridge and the approaches thereto there shall be occupied part of the viaduct and two of the tracks constructed or to be constructed by the City as part of such bridge structure.

The tracks shall be placed in general under the central part of the longitudinal streets of the route so far as may be practicable and convenient, except that wherever required by special or local necessities or for curves and at stations and station approaches the tracks or any one or more of them may be diverted as far as necessary to one side or the other of the longitudinal streets of the route or any of them. Any part of the longitudinal streets of the route may be occupied so far as the purposes of this general plan require.

The roof of the tunnels when under the streets shall be as near the surface of the street as street conditions and grades and rapid transit railroads heretofore proposed or constructed will conveniently permit.

The tunnels above described shall in no case be more than sixteen (16) feet in height in the clear.

The roof of the said tunnels shall be of iron or steel with brick or concrete arches, supported when necessary by iron or steel or masonry columns and resting upon masonry walls; or the roof shall be a masonry structure, or the whole of the lining may be of metal.

Adjacent tracks may be connected by necessary and suitable switches and connections, and additional track for siding accommodations may be constructed not to exceed in length one-fourth of a mile for each mile of roadway.

Except upon the Queensboro Bridge or bridge viaduct or approach, the tracks where there are two or more tracks under a street, may at any point of the said route be placed in the same tunnel; or there may be separate tunnels for one or more tracks as shall be most convenient.

The tracks shall be of standard gauge, that is to say, of the width of four (4) feet and eight and one-half (8½) inches between the rails.

There shall be a width in the tunnels not exceeding fifteen (15) feet for each track in addition to the thickness of the supporting walls, unless it shall be necessary to tunnel by the shield method, in which event the tracks may be placed in tubes not exceeding twenty (20) feet in outside diameter and driven or placed along such part of the street or streets as shall be most practicable and convenient, except that at stations, station approaches, switches, turnouts, curves and crossovers, the width or diameter may be increased.

Stations and station approaches shall in general be at the intersections of streets and shall be built under the streets or through or under private property to be acquired for the purpose or both under streets and through or under private property as aforesaid. The streets under which stations or station approaches shall be built may include cross streets, but no part of any cross street shall be used for a station or station approach at a distance greater than seventy-five (75) feet from the exterior line or side of the longitudinal street of the route.

Wherever along any part of the route above described it shall be necessary for the proper maintenance or accommodation of pipes, wires, sewers or other subsurface structures, the removal, construction or reconstruction of which shall be rendered necessary by the construction of the railroad, any tunnel or subway may be enlarged on either or both sides by an additional width not to exceed fifteen (15) feet on each side of the route. All or any pipes, wires, sewers or other subsurface structures may be placed in suitable galleries to be constructed within the additional width hereinbefore permitted. At each cross street where accommodation for pipes, wires, sewers and other subsurface structures shall be thus provided within the tunnels or subways, such tunnels or subways, in order to provide convenient access to the same, may have, within the limit of the sides or exterior lines of such cross streets or such lines produced, an additional width on each side of the route not to exceed fifteen (15) feet.

Pipes, wires sewers, street railway tracks, poles for electric wires and other surface and subsurface structures at any part of the said route shall be removed or disturbed only when necessary for the construction or operation of the railroad above referred to, and if removed or disturbed shall be placed over, upon or under the several streets in such manner and in such location that the use and service thereof shall not be impaired. All pipes, wires, sewers and other subsurface structures shall be left or shall be so arranged as to give free access for their repair or alteration, or for the placing with them, so far as there may be space, of new pipes, wires, sewers and other like structures, and for making connection between the same and abutting buildings at any time.

The manner of construction shall be by tunneling or excavation under cover, except in places where this Commission shall give express permission to construct by open excavation.

In parks, parkways and public places under the jurisdiction of the Department of Parks, all trees injured or destroyed shall so far as possible be replaced under the direction and to the satisfaction of the said Department.

Mode of Operation.

The general mode of operation of the route above described shall be by electricity or some other power not requiring combustion within the tunnels as shall be capable of furnishng transportation at a speed of not less than forty (40) miles per hour for long distances, exclusive of stops.

Definitions.

The word "street" wherever used herein shall include an avenue or public place.

The words "Rapid Transit Act" wherever used herein shall be taken and held to mean chapter 4 of the Laws of 1891, as amended by chapter 752 of the Laws of 1894, and by other acts of the Legislature.

Maps and Drawings.

It is further Resolved, That the maps or drawings, dated July 6, 1911, entitled "State of New York, Public Service Commission for the First District, Engineering Department, Routes and General Plan. Route No. 36, 59th street—Queensboro Bridge—from 7th avenue, Manhattan, to Crescent street, Queens," and designated respectively 36, Sheet No. 1 and 36, Sheet No. 2, are hereby adopted as showing the foregoing route and general plan for convenience merely, and that said maps or drawings are not to be deemed a part of the description of the route or a part of the general plan for any purpose whatever.

Resolved, That the Board of Estimate and Apportionment of The City of New York, by a majority vote, according to the number of votes by law pertaining to each member of the Board, hereby approves such plans and conclusions and consents to the construction of a railway or railways in accordance therewith.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx and the President of the Borough of Richmond—12.

Negative—The President of the Borough of Queens—1.

Present and Not Voting—The Mayor—3.

His Honor, the Mayor, stated he would refrain from voting or expressing his views thereon until the matter came before him as Mayor for his approval as required by law.

Bronx Traction Company.

A communication was received from Edward Polak on behalf of property owners in the vicinity of Schuyler road, Shore drive and Eastern boulevard, the Parents' Association of Public School No. 4, and the Federated Parents' Association of Greater New York in opposition to the grant of a franchise to The Bronx Traction Company to operate a railroad in any part of Pelham Bay Park.

At the meeting of July 6, 1911, the petition of this Company for a franchise in this locality was referred to the President of the Borough of The Bronx.

The communication was ordered filed and the Secretary directed to forward a copy of the same to the President of the Borough of The Bronx.

Communications from the Mayor's Office.

Communications were received from the Mayor's office returning duly approved by his Honor the Mayor, on July 11, 1911, resolutions adopted by this Board July 6, 1911, as follows:

(a) Modifying ordinance of August 2, 1904, granting a franchise to the New York, Westchester and Boston Railway Company.

(b) Granting a franchise to the Southern Boulevard Railroad Company.

(c) Approving agreement proposed to be entered into with the Nassau Electric Railroad Company and others for the use of a certain piece of track in Flatbush avenue between Atlantic and 4th avenues.

(d) Granting permission to J. B. Malatesta to construct, maintain and use a narrow-gauge railroad track in the Borough of The Bronx.

(e) Granting permission to the Mason and Hanger Company to install, maintain and use a compressed air line in the Borough of The Bronx.

(f) Granting permission to the Lakeville Holding and Development Company to construct, maintain and operate a single span bridge over and across Little Neck road, Borough of Queens.

(g) Granting permission to the Lakeville Holding and Development Company to construct, maintain and operate a single span bridge over and across Alley road, Borough of Queens.

(h) Granting permission to the Greenhut-Siegel Cooper Company to construct, maintain and use a conduit under and across 6th avenue, Borough of Manhattan.

(i) Granting permission to the New York Central and Hudson Railroad Company to continue to maintain and use an existing track across Harlem River terrace, Borough of The Bronx.

(j) Granting permission to the New York Edison Company to install, maintain and use additional ducts in existing bridge over East 39th street, Borough of Manhattan.

(k) Granting permission to the American Ice Company to transfer to the Ice Manufacturing Company all of its right, title and interest in a certain pipe under and along East 70th and Exterior streets, Borough of Manhattan.

(l) Revoking consent to Hardman, Peck and Company to install, maintain and use a pipe across West 49th street, Borough of Manhattan.

(m) Revoking consent to R. J. Dean and Company to install, maintain and use a pipe under and across Greenwich street, Borough of Manhattan.

Returning duly approved by his Honor the Mayor on July 12, 1911, resolution adopted by this Board July 6, 1911, as follows:

(a) Granting permission to the Lakeville Holding and Development Company to construct, maintain and use a single span bridge across Clinton avenue, Borough of Queens.

Designating newspapers as follows:

(a) The New York Herald and the New York Press as the newspapers in which the form of contract and notice of hearing thereon for a grant of a franchise to the New York City Interborough Railway Company to construct, maintain and operate a railway on Dongan street, Stebbins avenue and 163d street and other streets in the Borough of The Bronx shall be pubished prior to the final hearing on September 21, 1911.

(b) The New York Sun and Evening Mail as newspapers in which the resolution, form of contract and notice of hearing thereon for a grant of a franchise to the New York City Interborough Railway to construct, maintain and operate a railway on West 145th street, from Lenox avenue to Broadway, Borough of Manhattan, shall be published prior to the final hearing on September 21, 1911.

(c) The Globe and Standard Union as the newspapers in which the resolution, form of contract and notice of hearing thereon for a grant of a franchise to the New

York City Interborough Railway Company to construct, maintain and operate a railway upon and along 149th street and Southern boulevard, Borough of The Bronx, shall be published prior to the final hearing on September 21, 1911.

(d) The Sun and the New York Press as the newspapers in which the petition and notice of hearing thereon for a grant of a franchise to the Manhattan Bridge Service Company shall be published prior to the hearing on September 21, 1911.

(e) The New York Herald and New York Press as the daily newspapers in which the petition and notice of hearing thereon of the Staten Island Rapid Transit Railway Company for an extension of time to complete construction of tracks across Richmond terrace, Borough of Richmond, shall be published prior to the hearing on September 21, 1911.

(f) The Evening Mail and the Globe as the daily newspapers in which the petition and notice of hearing thereon of the New York Magnaphone and Music Company shall be published prior to the hearing on September 21, 1911.

Which were ordered filed.

New York, New Haven and Hartford Railroad Company.

In the matter of the petition of the New York, New Haven and Hartford Railroad Company for the cancellation of a certain bond in the sum of two hundred thousand dollars ($200,000) for the faithful performance of the terms and conditions of agreement dated December 21, 1904, relative to the six-tracking of the Harlem River and Port Chester Railroad Company, a leased line of this Company.

At the meeting of June 22, 1911, by resolution duly adopted the Comptroller was authorized to cancel the bond upon the filing of a new bond of thirty thousand dollars ($30,000) by the Company.

The Secretary presented the following:

Board of Estimate and Apportionment, The City of New York, Bureau of Franchises, Room 801, 277 Broadway, July 19, 1911.

Nos. 5026—9300.

Hon. William J. Gaynor, *Mayor, Chairman, Board of Estimate and Apportionment:*

Sir—By resolution adopted by the Board of Estimate and Apportionment at its meeting of June 22, 1911, the Comptroller of the City was authorized to cancel a certain bond in the sum of $200,000 given by the New York, New Haven and Hartford Railroad Company to insure the faithful performance of the terms and conditions of an agreement dated December 21, 1904, between the City and the Company upon the filing by the Company of a new bond in the sum of $30,000.

As was recited in a report of this Bureau presented at the meeting of June 22, all the work under the agreement of December 21, 1904, has been performed by the Company with the exception of the construction of two footbridges at Lincoln and Forest avenues. These bridges the Company is willing to construct at such time in the future as they may be called for by the City and the new bond is to be given to insure such construction.

After the adoption of the resolution authorizing the cancellation of the $200,000 bond and the substitution therefor of a bond in a lesser amount, a copy of the same was forwarded to the attorney for the Company.

In a communication under date of June 30, 1911, Mr. Charles M. Sheafe, Jr., attorney for the New York, New Haven and Hartford Railroad Company, acknowledges the receipt of the resolution and states that in his opinion $30,000 is too large an amount for the new bond, and requests to be advised as to the procedure necessary to have the amount of the bond reduced. The matter has since been taken up with Mr. Sheafe, and in view of the fact that the Company has been paying carrying charges on the bond of $200,000 since December, 1904, and the delay in building these two bridges has been entirely due to the fact that the City has not been and is not ready as yet to designate a location for the same, I am willing to recommend that the new bond be reduced to $10,000. There is transmitted herewith a resolution authorizing the Comptroller to accept the bond in the sum of $10,000 and upon the filing of the same by the Company to cancel the bond for $200,000, now on file in his office. Such resolution also rescinds the resolution adopted by the Board at its meeeting of June 22, 1911.

Respectfully, HARRY P. NICHOLS, Engineer, Chief of Bureau.

The following was offered:

Whereas, The Board of Estimate and Apportionment did by resolution adopted December 23, 1904, and approved by the Mayor December 28, 1904, accept a certain agreement executed by the New York, New Haven and Hartford Railroad Company December 21, 1904, in relation to the six tracking of the Harlem

River and Port Chester Railroad, leased to said New York, New Haven and Hartford Railroad Company, and

Whereas, By the terms of said agreement the Company was, at its own cost and expense, to erect certain bridges and perform certain other work, as therein more particularly specified, and

Whereas, The time allowed for the completion of the work under the said agreement expired April 1, 1909, and

Whereas, The Board of Estimate and Apportionment did, by resolutions adopted June 25, 1909, December 3, 1909, and October 28, 1910, and approved by the Mayor June 29, 1909, December 6, 1909, and November 3, 1910, respectively, grant said Company extensions of time up to and including April 1, 1911, for the completion of the work specified in the aforesaid agreement, and

Whereas, The President of the Borough of The Bronx in a communication dated May 31, 1911, has certified that the Company has completed all of the work under the aforesaid agreement with the exception of the construction of two footbridges over the tracks of the Company at Lincoln and Forest avenues, and

Whereas, Pursuant to the provisions of said agreement the New Haven Company furnished a bond in the sum of $200,000 for the faithful performance of all the terms and conditions of said agreement, and

Whereas, The Company has, by a petition dated October 11, 1909, requested that said bond in the sum of $200,000 be canceled and that a bond for a less amount be substituted therefor, and

Whereas, This Board did, by resolution adopted June 22, 1911, authorize the Comptroller of the City to cancel said bond in the sum of $200,000 upon the filing by the Company of a bond in the sum of $30,000, and

Whereas, The attorney for the Company, in a communication dated June 30, 1911, has requested that the amount of said bond be still further reduced; now, therefore, be it

Resolved, That the Comptroller of the City be, and he hereby is, authorized, upon the filing by the Company of a bond in the sum of $10,000 given to insure the faithful performance of the terms and conditions of said agreement of December 21, 1904, to cancel the bond in the sum of $200,000, heretofore given by the Company for the above named purpose, and be it further

Resolved, That the resolution adopted by this Board June 22, 1911, authorizing the cancellation of said bond in the sum of $200,000 upon the filing by the Company of a bond in the sum of $30,000 be and the same is hereby rescinded.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

E. F. Keating Company.

In the matter of the pipe maintained by E. F. Keating Company under and across Water street, connecting premises Nos. 435 and 437 with 452 Water street, Borough of Manhattan.

By resolution adopted June 8, 1911, this Company was directed to remove said pipe, restore the street surface and pay into the City treasury the sum of three hundred and ninety dollars ($390) as full compensation for the past use and occupation of said street.

The Secretary presented the following:

Nos. 6545—8494.

Board of Estimate and Apportionment, The City of New York, Bureau of Franchises, Room 801, 277 Broadway, July 17, 1911.

Hon. WILLIAM J. GAYNOR, *Mayor, Chairman, Board of Estimate and Apportionment:*

Sir—At the meeting of the Board of Estimate and Apportionment held June 8, 1911, resolution was adopted directing the E. F. Keating Company to pay into the City Treasury on or before July 1, 1911, the sum of three hundred and ninety dollars as full compensation for the past use of Water street, Borough of Manhattan, by a certain pipe under and across Water street connecting the said company's premises known as 435-437 and 452 Water street. The resolution further provided that the President of the Borough of Manhattan remove such portion of the said pipe as might in his opinion be necessary to render the remainder of the pipe unfit for service and advise the Board when such work was completed.

I have now been informed by the office of the Comptroller that in compliance with said resolution the sum of three hundred and ninety dollars was paid into the

City Treasury on June 29, and in a communication dated June 19, 1911, the Commissioner of Public Works had advised me that the pipe has been removed.

Payment having been made, as required, and the pipe having been removed from the street, the entire matter is closed, and I would suggest that the papers be ordered filed. Respectfully, HARRY P. NICHOLS, Engineer, Chief of Bureau.

Which was ordered filed.

Fred Oppermann, Jr., Brewing Company.

In the matter of the pipe maintained by the Fred Oppermann, Jr., Brewing Company under and across East 45th street, connecting Nos. 333 and 335 East 45th street, Borough of Manhattan.

By resolution adopted February 2, 1911, this Company was directed to remove said pipe, restore the street surface and pay into the City treasury the sum of five hundred dollars ($500) for the past use and occupation of said street.

The Secretary presented the following:

No. 6611.

Board of Estimate and Apportionment, The City of New York, Bureau of Franchises, Room 801, 277 Broadway, July 17, 1911.

Hon. William J. Gaynor, *Mayor, Chairman, Board of Estimate and Apportionment:*

Sir—At the meeting of the Board of Estimate and Apportionment, held February 2, 1911, a resolution was adopted directing the Fred Oppermann, Jr. Brewing Company to remove on or before April 1, 1911, certain pipes under and across East 45th street, Borough of Manhattan, connecting 333 and 334 East 45th street, the said pipes having been installed without proper authorization. The resolution also directed the Comptroller to make formal demand upon the Company for the payment of certain moneys for the past use and occupation of the said street by the pipes.

Subsequently, at the meeting held April 27, 1911, the resolution of February 2, 1911 was amended so as to provide for the removal of the pipes by May 15, 1911 and the payment of five hundred dollars for the past use and occupation of the street.

I am now in receipt of communications from the Commissioner of Public Works and the Deputy Commissioner of Water Supply, Gas and Electricity dated respectively June 30 and June 29, 1911, stating that the pipes have been removed and the pavement restored. The Finance Department has also advised me that on May 15, 1911, the Brewing Company paid into the City Treasury the sum of five hundred dollars for the past use and occupation of East 45th street by the said pipes.

Payment having been made, as required, and the pipes having been removed from the street, thus entirely closing this matter, I would suggest that the papers be ordered filed. Respectively, HARRY P. NICHOLS, Engineer, Chief of Bureau.

Which was ordered filed.

Rockwood & Co.

The Secretary presented the following:

Parfitt Brothers, Architects, 26 Court Street, Brooklyn, N. Y., June 20, 1911.

To the Board of Estimate and Apportionment, City of New York:

Sirs—The owners and users of the factory property situate on the northeast corner of Park and Waverly avenues, as per map and plan attached, made by Parfitt Brothers, architects, office, 26 Court street, Brooklyn, respectfully request permission to erect on the Waverly avenue sidewalk, at a point 67 feet 2 inches north of Park avenue, a sidewalk platform scale, size 8 feet by 14 feet, the top of same to be level with and set at the grade of said sidewalk.

Said scale to be for the exclusive use of the petitioners to weigh merchandise to be manufactured on said property. Respectfully submitted,

ROCKWOOD & CO., Wallace F. Jones, President.

No. 9225.

Board of Estimate and Apportionment, The City of New York, Bureau of Franchises, Room 801, 277 Broadway, July 20, 1911.

Hon. William J. Gaynor, *Mayor, Chairman, Board of Estimate and Apportionment:*

Sir—Rockwood & Co. has presented a petition dated June 20, 1911, to the Board of Estimate and Apportionment for permission to construct, maintain and use a platform scale eight feet by fourteen feet in front of its premises and within the easterly sidewalk lines of Waverly avenue, in the Borough of Brooklyn, at a point about sixty-seven feet two inches north of the northerly line of Park avenue, for the purpose of weighing merchandise in wagons.

A copy of the petition and accompanying plan was sent to the President of the Borough of Brooklyn with a request that examinations be made by the various bureaus having jurisdiction, with a view to ascertaining if there are any objections to the scale or any particular conditions which should be incorporated in the form of consent heretofore used by the Board for private structures in the City streets. In a reply dated June 30, 1911, I have been informed that there are no objections to the scale, and no particular conditions necessary to be inserted in the form of consent.

The sidewalk in front of the premises of the petitioner is paved with granite block, and the proposed scale is to be set at the grade of the sidewalk. At present trucks back up on the sidewalk to a loading platform in front of the petitioner's platforms and are kept standing in that position for some time while the merchandise to be loaded on the trucks is weighed on small scales situated within the building lines. By weighing the entire truck loads on the proposed scale the period of occupation of the sidewalk by the trucks will be lessened.

With the exception of two small frame dwellings, the entire block between Park avenue and Flushing avenue is occupied by factories, and there is very little use made of the sidewalks by pedestrians.

In view of these facts and as the President of the Borough has stated that there are no objections to the scale, I can see no good reason why the requested permission should not be given should the Board see fit to do so. In such case I would suggest that consent be granted only during the pleasure of the Board of Estimate and Apportionment, but in no case to extend beyond a term of ten (10) years from the date of the approval of the consent by the Mayor and revocable upon sixty (60) days' notice, and that it be made a condition of the consent that a security deposit in the sum of five hundred dollars ($500) be required, said deposit to be in the form of either money or securities to be approved by and deposited with the Comptroller for the faithful performance of the terms and conditions of the consent.

No precedent has been heretofore established by the Board upon which to fix the compensation for the privilege. I would, therefore, suggest that the charge be fixed at the minimum of one hundred dollars per annum, heretofore established by the Board for private structures in the city streets.

The customary form of resolution granting the consent is herewith submitted for adoption. Respectfully,

HARRY P. NICHOLS, Engineer, Chief of Bureau.

The following was offered:

Whereas, Rockwood & Co. has presented a petition dated June 20, 1911, to the Board of Estimate and Apportionment for permission to construct, maintain and use a platform scale in front of its premises within the easterly sidewalk lines of Waverly avenue at a point sixty-seven feet north of the northerly line of Park avenue, in the Borough of Brooklyn; now, therefore, be it

Resolved, That the consent of the Corporation of The City of New York be, and the same is, hereby given to Rockwood & Co. to construct, maintain and use a platform scale eight feet by fourteen feet in front of its premises within the easterly sidewalk line of Waverly avenue at a point sixty-seven feet two inches north of the northerly line of Park avenue, in the Borough of Brooklyn; the said scale to be used for the purpose of weighing the petitioner's merchandise loaded on wagons and for no other purpose, all as shown on the plan accompanying the application and entitled: "Plan showing location of Proposed Platform Scale to be constructed on the east side of Waverly avenue, Borough of Brooklyn to accompany application dated June 20, 1911, of Rockwood & Co. to the Board of Estimate and Apportionment, City of New York," and signed Rockwood & Co., by C. T. Pierce, Vice-President, a copy of which is attached hereto and made a part hereof upon the following terms and conditions:

1. Said consent shall continue only during the pleasure of the Board of Estimate and Apportionment, and shall be revocable upon sixty (60) days' notice in writing to the grantee, but in no case shall it extend beyond a term of ten (10) years from the date of its approval by the Mayor, and thereupon all rights of the grantee in said street by virtue of this consent shall cease and determine.

2. The grantee shall pay into the Treasury of The City of New York, as compensation for the privilege hereby granted, one hundred dollars ($100) per annum. Such payments shall be made in advance on November 1 of each year, provided, however, that the first payment shall be made within sixty (60) days of the approval of this consent by the Mayor, and shall be only such proportion of

the annual charge as the time between the approval of this consent by the Mayor and November 1 following bears to a whole year.

Such payments shall not be considered in any manner in the nature of a tax, but shall be in addition to any and all taxes of whatsoever kind or description now or hereafter required to be paid under any ordinance of The City of New York, or by any law of the State of New York.

3. Upon the removal of the grantee from either of the premises to be connected by the structure, or upon the revocation or termination by limitation of this consent, the grantee shall cause the structure hereby authorized to be removed and all of said street affected by this permission to be restored to its proper and original condition, if required to do so by The City of New York or its duly authorized representatives, and the entire cost of such work shall be borne by the said grantee. If the structure hereby authorized shall not be required to be removed, it is agreed that it shall become the property of The City of New York.

4. This consent is for the exclusive use of the grantee and shall not be assigned either in whole or in part, or leased or sublet in any manner, nor shall title thereto, or right, interest or property therein pass to or vest in any other person, firm or corporation whatsoever, either by the acts of the grantee or by operation of law, without the consent in writing of The City of New York, acting by the Board of Estimate and Apportionment.

5. The grantee shall pay the entire cost of all work, labor and material in connection with the structure hereby authorized, and particularly—

(*a*) Its construction, maintenance and removal.

(*b*) The protection of all structures which shall in any way be disturbed by its construction or removal.

(*c*) All changes in sewers or other subsurface structures necessitated by its construction or removal, including the laying or relaying of pipes, conduits, sewers or other structures.

(*d*) The replacing or restoring of the pavement in said street which may be disturbed during its construction or removal.

(*e*) Each and every item of the increased cost of the installation of any future structures or repairs or alterations to any existing or future structures caused by its presence in the street.

(*f*) The inspection of all work during its construction or removal as herein provided, which may be required by the President of the Borough and the Commissioner of Water Supply, Gas and Electricity.

6. Before the construction or removal shall be begun, the grantee shall obtain permits to do the work from the President of the Borough and from the Commissioner of Water Supply, Gas and Electricity. The grantee shall perform all the duties which may be imposed by those officials as conditions of such permits, provided such conditions are not inconsistent with the provisions of this consent. The grantee shall submit to those officials working plans which shall include and show in detail the method of construction of the structure hereby authorized and the mode of protection or changes in all structures required by the construction or removal of the same.

Upon the competion of the work, the grantee shall furnish to the President of the Borough a plan of such character as he may direct, showing accurately and distinctly the location, size and type of construction and complete dimensions of the structure erected or installed under this consent; also the location and dimensions of all substructures, encountered during the progress of the work. The depth below the street surface of the new structure and of the substructures encountered must be shown; also their location with reference to the nearest curb line and the nearest curb-line intersection.

7. The grantee shall allow to The City of New York a right of way through, under or above any part of the structure hereby authorized for any and all structures which are now or may be hereafter placed by The City of New York in said street.

If at any time it shall become necessary to replace or alter any structure in said street, the City shall have the right to break through or remove all or any portion of the structure hereby authorized, and the grantee shall pay to the City the expense incurred by such removal.

8. The structure hereby authorized and any fixtures laid therein shall be constructed, maintained and operated subject to the supervision and control of the proper authorities of The City of New York. It shall be open at all times to the inspection of all the authorities who have jurisdiction in such matters under the Charter of The City of New York.

9. This consent is subject to whatever right, title or interest the owners of abutting property or others may have in and to said street.

10. Said grantee shall be liable for all damages to persons or property, including the street and structures therein and thereunder, by reason of the construction and operation or maintenance of the structure hereby authorized, and it is a condition of this consent that The City of New York assumes no liability to either person or property on account of this consent.

11. This consent is granted on the further and express condition that all laws or ordinances now in force, or which may hereafter be adopted, shall be strictly complied with.

12. This consent is upon the express condition that within sixty (60) days after its approval by the Mayor, and before anything is done in exercise of the rights conferred hereby, the grantee shall deposit with the Comptroller of The City of New York the sum of five hundred dollars ($500), either in money or in securities to be approved by him, which fund shall be security for the performance of the terms and conditions of this consent, especially those which relate to the payment of the annual charge, the repairs of the street pavement and the removal of the structure hereby authorized. In case of default in the performance by said grantee of any of such terms and conditions, The City of New York shall have the right to cause the work to be done and the materials to be furnished for making the necessary changes or repairs, after ten (10) days' notice, and shall collect the reasonable cost thereof from the said fund without legal proceedings, or in case of default in the payment of the annual charge, shall collect the same, with interest, from such fund after ten (10) days' notice in writing to the said grantee.

In case of any drafts so made upon the security fund the said grantee shall, upon thirty (30) days' notice in writing, pay to the Comptroller of The City of New York a sum of money sufficient to restore the said fund to the original amount of five hundred dollars ($500), and in default of the payment thereof, the consent hereby given may be canceled and annulled, at the option of the Board of Estimate and Apportionment of The City of New York, acting on behalf of said City. No action or proceeding or rights under the provisions of this section shall affect any other legal rights, remedies or causes of action belonging to The City of New York.

13. Said grantee shall give notice, in writing, to the President of the Borough and to the Commissioner of Water Supply, Gas and Electricity of its intention to begin the work hereby authorized at least forty-eight hours before such work commences. The grantee shall also give to the Board of Estimate and Apportionment notice, in writing, of the date on which the work is commenced and also the date on which the same is completed, not later than ten (10) days after such dates.

14. Said grantee shall commence the construction of the structure hereby authorized and complete the same on or before November 1, 1911, otherwise this consent shall be forfeited forthwith, and without any proceedings, either at law or otherwise, for that purpose; provided, however, that such time may be extended by the Board of Estimate and Apportionment.

15. This consent shall be null and void unless said grantee shall duly execute an instrument in writing, wherein said grantee shall accept this consent and shall promise, covenant and agree to conform to, abide by and perform all the terms, conditions and requirements in this consent fixed and contained and file said instrument with the Board of Estimate and Apportionment of The City of New York within thirty (30) days after the approval of this consent by the Mayor; provided, however, that such time may be extended by the Board of Estimate and Apportionment.

And said grantee shall promise, covenant and agree in said instrument to hold The City of New York harmless from all damages to persons or property which may result from the construction, use, maintenance or operation of the structure hereby authorized.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

Astoria Light, Heat and Power Company.

In the matter of the consent granted to the Astoria Light, Heat and Power Company to install, maintain and use an 8-inch pipe under and across East 132d street, east of Locust avenue, Borough of The Bronx, connecting premises of the grantee on opposite sides of said street, for the purpose of conveying steam between said premises.

The Secretary presented the following:

Board of Estimate and Apportionment, The City of New York, Bureau of Franchises, Room 801, 277 Broadway, July 15, 1911.

Hon. WILLIAM J. GAYNOR, *Mayor, Chairman, Board of Estimate and Apportionment:*

Sir—By resolution adopted by the Board of Estimate and Apportionment June 8, 1911, approved by the Mayor June 9, 1911, the Astoria Light, Heat and Power Company was granted permission to install, maintain and use an eight-inch pipe under and across East 132d street, east of Locust avenue, Borough of The Bronx, connecting premises of the grantee on opposite sides of said street, for the purpose of conveying steam between said premises.

Section 15 of the consent provides as follows:

"This consent shall be null and void unless said grantee shall duly execute an instrument in writing wherein said grantee shall accept this consent and shall promise, covenant and agree to conform to, abide by and perform all the terms, conditions and requirements in this consent fixed and contained, and file said instrument with the Board of Estimate and Apportionment of The City of New York within thirty (30) days after the approval of this consent by the Mayor; provided, however, that such time may be extended by the Board of Estimate and Apportionment.

"And said grantee shall promise, covenant and agree in said instrument to hold The City of New York harmless from all damages to persons or property which may result from the construction, use, maintenance or operation of the structure hereby authorized."

Under and pursuant to the above-quoted section, the grantee presented an agreement dated June 20, 1911. This agreement was approved as to form by the Corporation Counsel and returned to this office with a communication dated July 5, 1911.

The Departments interested, likewise the grantee, have been furnished with certified copies of the approved resolution and the grant is now in full force and effect.

Respectfully, HARRY P. NICHOLS, Engineer, Chief of Bureau.

Which was ordered filed.

A. Hupfel's Sons.

An application was received from A. Hupfel's Sons for permission to construct, maintain and use a 2-inch water pipe under St. Anns avenue, connecting premises of the petitioner on the block bounded by St. Anns avenue, East 159th street and East 161st street and the property at the southwest corner of East 159th street and St. Anns avenue, Borough of The Bronx, leased by the petitioner for the purpose of conveying water from an artesian well to its brewery.

This application is submitted in lieu of communication received from said Company for said right at the meeting of May 25, 1911.

The application was referred to the Bureau of Franchises.

Tuttle & Bailey Manufacturing Company.

The Secretary presented the following:

To the Honorable, the Board of Estimate and Apportionment, The City of New York:

Gentlemen—Your petitioner, the Tuttle & Bailey Manufacturing Company, respectfully shows to your honorable Board that it is a domestic corporation, duly organized and existing under and by virtue of the laws of the State of New York.

Your petitioner further shows that it is the owner in fee simple of the following-described real estate situate in the Borough of Brooklyn, in the City and State of New York, that is to say, Lot numbered one (1) in Block numbered twenty-two ninety-six (2296) in Section numbered eight (8), with a frontage of two hundred twenty-five (225) feet five (5) inches on the northerly side of North 10th street, and known as number seventy-nine (79) to ninety-five (95), both inclusive, and Lot numbered nine (9) in Block numbered twenty-three hundred and three (2303) in Section numbered eight (8), and with a frontage of three hundred and fifty (350) feet on the southerly side of North 10th street, and known as numbers ninety-eight (98) to one hundred and twenty-four (124), both inclusive, and that your petitioner occupies and uses said real property in its general business of manufacturing iron, steel and metal work.

The said Tuttle & Bailey Manufacturing Company hereby respectfully petitions your honorable Board to be permitted to construct, operate and maintain a pipe line under and across North 10th street, between Berry street and Wythe avenue, in the said Borough of Brooklyn, connecting the properties of the said Company as is more specifically shown by the formal drawing and plan submitted herewith.

The said pipe line is intended to carry:

(a) Piping carrying electric wiring.

(b) Piping carrying steam of a maximum pressure of 175 pounds per square inch.

(c) Piping carrying compressed air at a maximum pressure of 100 pounds per square inch.

(d) Such other and additional piping as may become necessary through the growth and expansion of the business of your petitioner.

In that regard your petitioner shows that it moved to its present location in the year 1866, then occupying the said Lot number one (1) only, and that the growth of its said business since said time has been such as to warrant the belief that a pipe under and across said North 10th street, of a diameter of less than sixteen (16) inches, would be wholly insufficient to meet the necessities of its growing business.

Referring to the miniature track across said street, shown in the plan herewith:

By a resolution, number thirty-three (33), duly adopted on or about the ninth (9th) day of October, A. D. eighteen ninety-three (1893), by the then Board of Aldermen of the then City of Brooklyn, the said Tuttle & Bailey Manufacturing Company was duly authorized to construct, operate and maintain said track over, upon and across said street.

Accompanying this petition are submitted:

(a) The original petition and four (4) copies thereof.

(b) A plan, eighteen (18) inches by twenty-four (24) inches, drawn upon tracing cloth, to a definite scale, showing thereon the location of the properties of the applicant on both sides of the street, the building and curb lines, all tracks, electrical conduits, sewers and similar substructures in the street, also sections, longitudinal and transverse, indicating in detail all distances and dimensions; also the manner of construction and character of materials to be used in said proposed work. The details of existing structures are shown in black, and the details of the proposed new construction are shown in red in the said plan.

(c) Nine (9) litho prints from the said tracing, two (2) on paper and seven (7) on cloth, in addition to the tracing, each print colored the same as the tracing.

Dated this twenty-ninth (29th) day of June, A. D. 1911.

TUTTLE & BAILEY MANUFACTURING COMPANY, by SILAS TUTTLE, its President.

Board of Estimate and Apportionment, The City of New York, Bureau of Franchises, Room 801, 277 Broadway, July 21, 1911.

Hon. WILLIAM J. GAYNOR, *Mayor, Chairman, Board of Estimate and Apportionment:*

Sir—The Tuttle & Bailey Manufacturing Company has presented a petition dated June 29, 1911, to the Board of Estimate and Apportionment for permission to install, maintain and use a pipe sixteen inches outside diameter under and across North 10th street, Borough of Brooklyn, at a point approximately 220 feet east of the easterly line of Wythe avenue, for the purpose of connecting properties owned by the petitioner on the opposite sides of said street and known respectively as 79-95 and 98-124 North 10th street. Such pipe is to be used exclusively by the petitioner and is to contain smaller pipes for the transmission of electric current, steam, compressed air and such other piping as may become necessary.

The petition recites that the company is a domestic corporation and the owner of the property to be connected by the pipe and will use the same in its general business of manufacturing iron, steel and metal work.

Copies of the petition and accompanying plan were sent to the President of the Borough of Brooklyn and the Commissioner of Water Supply, Gas and Electricity, with a request that examinations be made by the various bureaus having jurisdiction, with a view to ascertaining if there are any objections to the proposed pipe or any particular conditions necessary to be incorporated in the form of consent used by the Board for similar privileges.

In replies dated respectively July 19 and July 20, 1911, the said officials have stated that there are no objections to the pipe and no particular conditions necessary to be inserted in the form of consent. As there are no objections to the proposed pipe, I can see no good reason why the requested permission should not be given should the Board see fit to do so. In such case I would suggest that the consent be given only during the pleasure of the Board of Estimate and Apportionment, but in no case to extend beyond a period of ten (10) years from the date of the approval of the consent by the Mayor, and revocable upon sixty days' notice in writing, and that it be made a condition of the consent that a security deposit in the sum of five hundred dollars be required, said deposit to be in the form of either cash or securities to be approved by and deposited with the Comptroller for the faithful performance of the terms and conditions of the consent.

The length of the proposed pipe between building lines is sixty feet. On the basis of charge heretofore fixed by the Board for private pipes in the city streets, namely, $2 per linear foot for pipes not exceeding 100 feet in length and sixteen inches in diameter, the charge for the privilege should be $120 per annum. Such sum to be paid into the City Treasury in advance on November 1 of each year.

It has been made a condition of the resolution herewith submitted that the pipe be installed by December 1, 1911.

The customary examination by a representative of this Bureau having revealed the presence of other structures in North 10th street in the vicinity of the proposed sixteen-inch pipe, the company was requested to furnish a list of all structures maintained by it under and across said street. In a communication under date of July 18, 1911, the company states that as near as can be determined at the present time it is maintaining the following: One 6-inch water main, one 8-inch water main, two 1¼-inch electrical conduits and two 1½-inch electrical conduits.

As the records of this Bureau do not show any authority for the existence of these structures there is transmitted herewith a resolution directing the company to advise the Board on or before October 1, 1911, under what authority said structures were installed or in the event of their having been installed without authority to present an application for their continued use and maintenance.

Respectfully, HARRY P. NICHOLS, Engineer, Chief of Bureau.

The following was offered:

Whereas, The Tuttle & Bailey Manufacturing Company has presented a petition dated June 29, 1911, to the Board of Estimate and Apportionment for its consent to the installation, maintenance and use of a pipe 16 inches outside diameter under and across North 10th street, Borough of Brooklyn, at a point 221 feet 8 inches east of the easterly line of Wythe avenue, connecting properties owned by the petitioner on opposite sides of said street, known as 79-95 and 98-124 North 10th street, and to be used exclusively by the petitioner to contain smaller pipes for the transmission of electric current, steam, compressed air and such other additional piping as may become necessary; now, therefore, be it

Resolved, That the consent of the Corporation of The City of New York be and the same is hereby given to Tuttle & Bailey Manufacturing Company, a domestic corporation, and the owner of certain properties on opposite sides of North 10th street, Borough of Brooklyn, City of New York, known as 79-95 North 10th street and 98-124 North 10th street, to install, maintain and use a pipe 16 inches outside diameter under and across said North 10th street, at a point 221 feet 8 inches east of the easterly line of Wythe avenue, connecting said property; the said pipe to contain smaller pipes for the transmission of electric current, steam, compressed air and any other additional piping that may become necessary, all to be used exclusively by the petitioner for carrying on its business and for no other purpose, all as shown on the plan accompanying the application and entitled: "Plan showing location of Proposed Pipe Line to be constructed in North 10th street, Borough of Brooklyn, to accompany application of Tuttle & Bailey Manufacturing Company, to the Board of Estimate and Apportionment, City of New York, dated June 29, 1911," and signed Silas Tuttle, President, a copy of which is annexed hereto and made a part hereof upon the following terms and conditions:

1. Said consent shall continue only during the pleasure of the Board of Estimate and Apportionment, and shall be revocable upon six (60) days' notice in writing to the grantee, but in no case shall it extend beyond a term of ten (10) years from the date of its approval by the Mayor, and thereupon all rights of the grantee in said street by virtue of this consent shall cease and determine.

2. The grantee shall pay into the Treasury of The City of New York, as compensation for the privilege hereby granted the annual sum of $120. Such payments shall be made in advance on November 1 of each year, provided, however, that the first payment shall be made within sixty (60) days of the approval of this consent by the Mayor and shall be only such proportion of the annual charge as the time between the approval of this consent by the Mayor and November 1 following bears to a whole year.

Such payments shall not be considered in any manner in the nature of a tav, but shall be in addition to any and all taxes of whatsoever kind or description now or hereafter required to be paid under any ordinance of The City of New York, or by any law of the State of New York.

3. Upon the removal of the grantee from either of the premises to be connected by the structure, or upon the revocation or termination by limitation of this consent, the grantee shall cause the structure hereby authorized to be removed and all of said street affected by this permission restored to its proper and original condition, if required so to do by The City of New York or its duly authorized representatives, and the entire cost of such work shall be borne by the said grantee. If the structure hereby authorized shall not be required to be removed, it is agreed that it shall become the property of The City of Nw York.

4. This consent is for the exclusive use of the grantee and shall not be assigned either in whole or in part, or leased or sublet in any manner, nor shall title thereto, or right, interest or property therein pass to or vest in any other person, firm or corporation whatsoever, either by the acts of the grantee or by operation of law, without the consent in writing of The City of New York, acting by the Board of Estimate and Apportionment.

5. The grantee shall pay the entire cost of all work, labor and material in connection with the structure hereby authorized, and particularly—.

(*a*) Its construction, maintenance and removal.

(*b*) The protection of all structures which shall in any way be disturbed by its construction or removal.

(*c*) All changes in sewers or other subsurface structures necessitated by its construction or removal, including the laying or relaying of pipes, conduits, sewers or other structures.

(*d*) The replacing or restoring of the pavement in said street which may be disturbed during its construction or removal.

(*e*) Each and every item of the increased cost of the installation of any future structures or repairs or alterations to any existing or future structures caused by its presence in the street.

(*f*) The inspection of all work during its construction or removal as herein provided, which may be required by the President of the Borough and the Commissioner of Water Supply, Gas and Electricity.

6. Before the construction or removal shall be begun, the grantee shall obtain permits to do the work from the President of the Borough and from the Commissioner of Water Supply, Gas and Electricity. The grantee shall perform all the duties which may be imposed by those officials as conditions of such permits, provided such conditions are not inconsistent with the provisions of this consent. The grantee shall submit to those officials working plans which shall include and show in detail the method of construction of the structure hereby authorized and the mode of protection or changes in all structures required by the construction or removal of the same.

Upon the completion of the work, the grantee shall furnish to the President of the Borough a plan of such character as he may direct, showing accurately and distinctly the location, size and type of construction and complete dimensions of the structure erected or installed under this consent; also the location and dimensions of all substructures, encountered during the progress of the work. The depth below the street surface of the new structure and of the substructures encountered must be shown; also their location with reference to the nearest curb line and the nearest curb-line intersection.

7. The grantee shall allow to The City of New York a right of way through, under or above any part of the structure hereby authorized for any and all structures which are now or may be hereafter placed by The City of New York in said street.

If at any time it shall become necessary to replace or alter any structure in said street, the City shall have the right to break through or remove all or any portion of the structure hereby authorized and the grantee shall pay to the City the expense incurred by such removal.

8. The structure hereby authorized and any fixtures laid therein shall be constructed, maintained and operated subject to the supervision and control of the proper authorities of The City of New York. It shall be open at all times to the inspection of all the authorities who have jurisdiction in such matters under the Charter of The City of New York.

9. This consent is subject to whatever right, title or interest the owners of abutting property or others may have in and to said street.

10. Said grantee shall be liable for all damages to persons or property, including the street and structures therein and thereunder, by reason of the construction and operation or maintenance of the structure hereby authorized, and it is a condition of this consent that The City of New York assumes no liability to either person or property on account of this consent.

11. This consent is granted on the further and express condition that all laws or ordinances now in force, or which may hereafter be adopted, shall be strictly complied with.

12. This consent is upon the express condition that within sixty (60) days after its approval by the Mayor, and before anything is done in exercise of the rights conferred hereby, the grantee shall deposit with the Comptroller of The City of New York the sum of five hundred dollars ($500), either in money or in securities to be approved by him, which fund shall be security for the performance of the terms and conditions of this consent, especially those which relate to the payment of the annual charge, the repairs of the street pavement and the removal of the structure hereby authorized. In case of default in the performance by said grantee of any of such terms and conditions, The City of New York shall have the right to cause the work to be done and the materials to be furnished for making the necessary changes or repairs, after ten (10) days' notice, and shall collect the reasonable cost thereof from the said fund without legal proceedings, or in case of default in the payment of the annual charge, shall collect the same, with interest, from such fund after ten (10) days' notice in writing to the said grantee.

In case of any drafts so made upon the security fund the said grantee shall, upon thirty (30) days' notice in writing, pay to the Comptroller of The City of New York a sum of money sufficient to restore the said fund to the original amount of five hundred dollars ($500), and in default of the payment thereof, the consent hereby given may be canceled and annulled, at the option of the Board of Estimate and Apportionment of The City of New York, acting on behalf of said City. No action or proceeding or rights under the provisions of this section shall affect any other legal rights, remedies or causes of action belonging to The City of New York.

13. Said grantee shall give notice, in writing, to the President of the Borough and to the Commissioner of Water Supply, Gas and Electricity of its intention to begin the work hereby authorized at least forty-eight hours before such work commences. The grantee shall also give to the Board of Estimate and Apportionment notice, in writing, of the date on which the work is commenced and also the date on which the same is completed, not later than ten (10) days after such dates.

14. Said grantee shall commence the construction of the structure hereby authorized and complete the same on or before December 1, 1911, otherwise this consent shall be forfeited forthwith, and without any proceedings, either at law or otherwise, for that purpose; provided, however, that such time may be extended by the Board of Estimate and Apportionment.

15. This consent shall be null and void unless said grantee shall duly execute an instrument in writing, wherein said grantee shall accept this consent and shall promise, covenant and agree to conform to, abide by and perform all the terms, conditions and requirements in this consent fixed and contained and file said instrument with the Board of Estimate and Apportionment of The City of New York within thirty (30) days after the approval of this consent by the Mayor; provided, however, that such time may be extended by the Board of Estimate and Apportionment.

And said grantee shall promise, covenant and agree in said instrument to hold The City of New York harmless from all damages to persons or property which may result from the construction, use, maintenance or operation of the structure hereby authorized.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The following was offered:

Whereas, Tuttle and Bailey Manufacturing Company is maintaining one 6-inch water main, one 8-inch water main, two 1½-inch electrical conduits, and two 1¼-inch electrical conduits, under and across North 10th street, between Wythe avenue and Berry street, in the Borough of Brooklyn; and

Whereas, Said structures are maintained without apparent authority; now, therefore, be it

Resolved, That Tuttle and Bailey Manufacturing Company be and it hereby is directed to advise this Board on or before October 1, 1911, under what authority said structures were installed and are now maintained, or in the event of said structures having been installed and maintained without proper authority, to present an application on or before October 1, 1911, to the Board of Estimate and Apportionment for permission to continue to use and maintain said structures.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

Gimbel Brothers, New York.

An application was received from Gimbel Brothers, New York, for an extension of time until September 1, 1911, in which to accept the consent granted said Company by resolution adopted June 8, 1911, approved by the Mayor June 9, 1911, to install, maintain and use a bridge over and across West 33d street, connecting its department store on the westerly side of 6th avenue between 32d and 33d streets, with the elevated railway station at 33d street and 6th avenue.

Which was referred to the Bureau of Franchises.

Union Railway Company of New York City.

Copies of consents of abutting property owners to the construction, maintenance and operation of a street surface railway by the Union Railway Company of New York City as an extension to its existing system on Broadway, from 225th to 230th street, Boroughs of Manhattan and The Bronx, were received.

This franchise was granted by resolution adopted by this Board April 13, 1911, approved by the Mayor on the same day.

The copies of consents were referred to the Bureau of Franchises.

New York, New Haven and Hartford Railroad Company.

In the matter of the application of the New York, New Haven and Hartford Railroad Company for permission to construct, maintain and use foundations for three catenary bridges to be located on property of the City along the northerly side of West Farms road, between Adams and Taylor streets, Borough of The Bronx.

This petition was presented to the Board at the meeting of May 11, 1911, and referred to the Bureau of Franchises.

The Secretary presented the following:

Report No. 9012.

Board of Estimate and Apportionment, The City of New York, Bureau of Franchises, Room 801, 277 Broadway, July 19, 1911.

Hon. William J. Gaynor, *Mayor, Chairman, Board of Estimate and Apportionment:*

Sir—The New York, New Haven and Hartford Railroad Company and the Harlem River and Port Chester Railroad Company, leased to and operated by the New Haven Company, have presented a joint petition dated May 2, 1911, to the Board of Estimate and Apportionment, requesting the consent of the City to the construction, maintenance and use of foundations for three catenary bridges to be located on property of the City along the northerly side of West Farms road, between Adams and Taylor streets, Borough of The Bronx. The petition was presented to the Board at its meeting of May 11, 1911, and referred to the Chief Engineer and Bureau of Franchises.

It is recited in the petition that the catenary bridges are made necessary by the change of motive power on the line of the Harlem River and Port Chester Railroad Company from steam to the overhead system of electricity and that in order to complete the construction of three of the bridges it will be necessary to erect catenary poles on the top of the City's retaining wall along the northerly side of West Farms road. From an examination of the plans submitted with the petition it would appear that the bridges are to be erected at points approximately forty-four feet east of the easterly line of Adams street, midway between Van Buren and Hancock streets and midway between Hancock and Taylor streets. It further appears from such plans that the steel foundation or base-plates which occupy a width of seventeen inches, measured at right angles to the tracks of the Company, and a length of three feet eight inches, measured parallel to said tracks, are to be set in the top of the retaining wall along the northerly side of West Farms road and forming the dividing line between that street and the right of way of the Company in such manner that no portion of these foundations will overhang the coping of the wall on the side adjacent to the street. At the first of the above named points the bridge truss rests directly upon the wall, and at the other two points steel posts, approximately twelve feet high in one case and nineteen feet in the other, are to be erected on the wall to support the catenary bridges spanning the tracks of the Company and supporting the wire carrying electric power. No portion of the surface of the street is to be occupied by the structures.

The petition was referred to the President of the Borough of The Bronx with a request that he advise this Bureau if, in his opinion, any particular conditions should be imposed in the form of consent granting the requested permission. In a communication under date of June 26, 1911, said official states that he has no objection to the project, nor any conditions other than those heretofore employed to suggest for incorporation in the consent.

I can see no reason why permission should not be granted for the use of the retaining wall as above described, and there is transmitted herewith the usual form of consent revocable upon sixty (60) days' notice to the grantee, and in no case to extend beyond a term of ten (10) years from the date of its approval by the Mayor.

The compensation for the privilege has been fixed at one hundred dollars ($100) a year, the minimum charge established by the Board for similar privileges. It has been made a condition of the consent that within sixty (60) days after its approval by the Mayor, the grantees shall deposit with the Comptroller of the City the sum of two hundred and fifty dollars ($250), either in money or securities to be approved by him, for the performance of the terms and conditions of said consent. The time for the commencement and completion of the work has been fixed as November 1, 1911.

It has also been made a condition that the consent shall be null and void unless the grantees shall execute an instrument in writing accepting the terms and conditions of said consent and file the same with the Board of Estimate and Apportionment within thirty (30) days after its approval by the Mayor.

A resolution in the usual form granting the requested permission is attached hereto. Respectfully, HARRY P. NICHOLS, Engineer, Chief of Bureau.

The following was offered:

Whereas, The New York, New Haven and Hartford Railroad Company, and the Harlem River and Port Chester Railroad Company have presented a petition dated May 2, 1911, to the Board of Estimate and Apportionment for its consent to the construction, maintenance and use of three (3) catenary bridges upon foundations on the property of The City of New York along the northerly side of West Farms road, between Adams street and Taylor street, in the Borough of The Bronx; now, therefore, be it

Resolved, That the consent of the Corporation of The City of New York be and the same is hereby given to the New York, New Haven and Hartford Railroad Company and the Harlem River and Port Chester Railroad Company, the owners of certain property on the northerly side of West Farms road, between Adams and Taylor streets, in the Borough of The Bronx, to construct, maintain and use steel foundations or base plates three (3) feet eight (8) inches in length and seventeen (17) inches in width, measured respectively parallel and at right angles to the tracks of said companies, to be set in the top of the retaining wall upon property of The City of New York along the said northerly side of West Farms road at three (3) points approximately forty-four (44) feet, two hundred and eighty-one (281) feet and five hundred and thirty-seven (537) feet, respectively, east of the intersection of the northerly line of West Farms road with the easterly line of Adams street and to erect thereon catenary bridges for the support of power wires for the exclusive use of the petitioners and for no other purpose; all as shown on the plan accompanying the application, and entitled: "N. Y., N. H. & H. R. R., Shore Line Division, Harlem River Branch Electrification, Main Line Bridge Construction. Map showing location of proposed catenary bridge foundations to be constructed in West Farms road between Rosedale avenue and White Plains road, Borough of The Bronx, to accompany application dated May 2, 1911, of the New York, New Haven and Hartford Railroad Company and the Harlem River and Port Chester Railroad Company to the Board of Estimate and Apportionment, City of New York," dated May 23, 1911, and signed by E. H. McHenry, Vice-President, and C. S. Mellen, President, and approved by Wm. T. Murray, Electrical Engineer; a copy of which is annexed hereto and made a part hereof upon the following terms and conditions:

1. Said consent shall continue only during the pleasure of the Board of Estimate and Apportionment, and shall be revocable upon sixty (60) days' notice in writing to the grantees, but in no case shall it extend beyond a term of ten (10) years from the date of its approval by the Mayor, and thereupon all rights of the grantees in said street by virtue of this consent shall cease and determine.

2. The grantees shall pay into the Treasury of The City of New York, as compensation for the privilege hereby granted, the annual sum of one hundred dollars ($100).

Such payments shall be made in advance on November 1 of each year; provided, however, that the first payment shall be made within sixty (60) days of the approval of this consent by the Mayor, and shall be only such proportion of the annual charge as the time between the approval of this consent by the Mayor and November 1 following bears to a whole year.

Such payments shall not be considered in any manner in the nature of a tax, but shall be in addition to any and all taxes of whatsoever kind or description now or hereafter required to be paid under any ordinance of The City of New York, or by any law of the State of New York.

3. Upon the revocation or termination by limitation of this consent, the grantees shall cause the structures hereby authorized to be removed, and all of said street affected by this permission to be restored to its proper and original conditon, if required so to do by The City of New York or its duly authorized representatives, and the entire cost of such work shall be borne by the said grantees. If the structures hereby authorized shall not be required to be removed, it is agreed that they shall become the property of The City of New York.

4. This consent is for the exclusive use of the grantees and shall not be assigned, either in whole or in part, or leased or sublet in any manner, nor shall title thereto, or right, interest or property therein pass to or vest in any other person, firm or corporation whatsoever, either by the acts of the gantees or by operation of law, without the consent, in writing, of The City of New York, acting by the Board of Estimate and Apportionment.

5. The grantees shall pay the entire cost of all work, labor and material in connection with the structures hereby authorized, and particularly—

(*a*) Their construction, maintenance and removal.

(*b*) The protection of all structures which shall in any way be disturbed by their construction or removal.

(*c*) All changes in sewers or other subsurface structures necessitated by their construction or removal, including the laying or relaying of pipes, conduits, sewers or other structures.

(*d*) The replacing or restoring of the pavement in said street which may be disturbed during their construction or removal.

(*e*) Each and every item of the increased cost of the installation of any future structures or repairs or alterations to any existing or future structures caused by their presence in the street.

(*f*) The inspection of all work during their construction or removal as herein provided, which may be required by the President of the Borough and the Commissioner of Water Supply, Gas and Electricity.

6. Before the construction or removal shall be begun, the grantees shall obtain permits to do the work from the President of the Borough and from the Commissioner of Water Supply, Gas and Electricity. The grantees shall perform all the duties which may be imposed by those officials as conditions of such permits, provided such conditions are not inconsistent with the provisions of this consent. The grantees shall submit to those officials working plans which shall include and show in detail the method of construction of the structures hereby authorized and the mode of protection or changes in all structures required by the construction or removal of the same.

Upon the completion of the work the grantees shall furnish to the President of the Borough a plan of such character as he may direct, showing accurately and distinctly the location, size and type of construction and complete dimensions of the structures erected or installed under this consent; also the location and dimensions of all substructures encountered during the progress of the work. The depth below or above the street surface of the new structures and of the substructures encountered must be shown; also their location with reference to the nearest curb line and the nearest curb-line intersection.

7. The grantees shall allow to The City of New York a right of way through, under or above any part of the structures hereby authorized for any and all structures which are now or may be hereafter placed by The City of New York in said street.

If at any time it shall become necessary to replace or alter any structure in said street, the City shall have the right to break through or remove all or any portion of the structures hereby authorized and the grantees shall pay to the City the expense incurred by such removal.

8. The structures hereby authorized and any fixtures laid therein or erected

thereon shall be constructed, maintained and operated subject to the supervision and control of the proper authorities of The City of New York. They shall be open at all times to the inspection of all the authorities who have jurisdiction in such matters under the Charter of The City of New York.

9. This consent is subject to whatever right, title or interest the owners of abutting property or others may have in and to said street.

10. Said grantees shall be liable for all damages to persons or property, including the street and structures therein and thereunder, by reason of the construction and operation or maintenance of the structures hereby authorized, and it is a condition of this consent that The City of New York assumes no liability to either person or property on account of this consent.

11. This consent is granted on the further and express condition that all laws or ordinances now in force, or which may hereafter be adopted, shall be strictly complied with.

12. This consent is upon the express condition that within sixty (60) days after its approval by the Mayor, and before anything is done in exercise of the rights conferred hereby, the grantees shall deposit with the Comptroller of The City of New York the sum of two hundred and fifty dollars ($250), either in money or in securities to be approved by him, which fund shall be security for the performance of the terms and conditions of this consent, especially those which relate to the payment of the annual charge, the repairs of the street pavement and the removal of the structures hereby authorized. In case of default in the performance by said grantees of any of such terms and conditions, The City of New York shall have the right to cause the work to be done and the materials to be furnished for making the necessary changes or repairs, after ten (10) days' notice, and shall collect the reasonable cost thereof from the said fund without legal proceedings, or in case of default in the payment of the annual charge, shall collect the same, with interest, from such fund after ten (10) days' notice, in writing, to the said grantees.

In case of any drafts so made upon the security fund the said grantees shall, upon thirty (30) days' notice, in writing, pay to the Comptroller of The City of New York a sum of money sufficient to restore the said fund to the original amount of two hundred and fifty dollars ($250), and in default of the payment thereof, the consent hereby given may be canceled and annulled at the option of the Board of Estimate and Apportionment of The City of New York, acting on behalf of said City. No action or proceeding or rights under the provisions of this section shall affect any other legal rights, remedies or cause of action belonging to The City of New York.

13. Said grantees shall give notice, in writing, to the President of the Borough and to the Commissioner of Water Supply, Gas and Electricity of their intention to begin the work hereby authorized at least forty-eight hours before such work commences The grantees shall also give to the Board of Estimate and Apportionment notice, in writing, of the date on which the work is commenced and also the date on which the same is completed, not later than ten (10) days after such dates.

14. Said grantees shall commence the construction of the structures hereby authorized and complete the same on or before November 1, 1911, otherwise this consent shall be forfeited forthwith, and without any proceedings, either at law or otherwise, for that purpose; provided, however, that such time may be extended by the Board of Estimate and Apportionment.

15. This consent shall be null and void unless said grantees shall duly execute an instrument in wrting, wherein said grantees shall accept this consent and shall promise, covenant and agree to conform to, abide by and perform all the terms, conditions and requirements in this consent fixed and contained and file said instruments with the Board of Estimate and Apportionment of The City of New York within thirty (30) days after the approval of this consent by the Mayor; provided, however, that such time may be extended by the Board of Estimate and Apportionment.

And said grantees shall promise, covenant and agree in said instrument to hold The City of New York harmless from all damages to persons or property which may result from the construction, use, maintenance or operation of the structures hereby authorized.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

Sulzberger & Sons Company.

In the matter of the application of Sulzberger & Sons Company for permission to maintain and use an existing spur track in Gansevoort street, west of West street, in front of West Washington Market, Borough of Manhattan.

At the meeting of June 22, 1911, this matter was referred to the Corporation Counsel to advise the Board as to its right to permit of the use of this track by the applicant.

The Secretary presented the following:

Report No. 9053.

Board of Estimate and Apportionment, The City of New York, Bureau of Franchises, Room 801, 277 Broadway, July 17, 1911.

Hon. William J. Gaynor, *Mayor, Chairman, Board of Estimate and Apportionment:*

Sir—Sulzberger & Sons Company, successors to Schwarzschild & Sulzberger Company, has presented a petition dated May 15, 1911, to the Board of Estimate and Apportionment for permission to make use of an existing spur track in Gansevoort street, west of West street, in front of West Washington Market. The spur track in question was constructed under the authorization of a resolution adopted by the Board of Aldermen and Council on October 31, 1899, and approved by the Mayor November 3, 1899, granting permission to Adams & Co. to lay a spur from the tracks of the New York Central and Hudson River Railroad on West street to Stand 39, occupied by the grantee in West Washington Market. The track leaves the westerly main track of the railroad company in West street at a point about 188 feet south of the northerly line of Gansevoort street and runs in a westerly direction in a wide curve to a point about 48 feet east of the easterly line of Lawson avenue, in West Washington Market, at which point the northerly rail is about five feet from the north curb of Gansevoort street; thence the track extends westerly to Lawson avenue, where it is four feet from the curb, and thence still westerly parallel to the curb to a point about 47 feet east of the easterly line of 13th avenue.

From an examination on the ground it was found that Adams & Co. no longer occupies any of the stands in the market, and the track has been used for some time past without any authorization, so far as the records show by the National Packing Company, occupying stands formerly used by Adams & Co.

The petitioner is engaged in the wholesale meat business and its stands in West Washington Market have a frontage on Gansevoort street between West street and Lawson avenue. At present the dressed meat is carted in wagons from the freight yards and the use of the spur track will eliminate this carting and consequent handling of the meat. The petitioner's representative has stated the spur is to be used not over four days in any week and only one car per day will be received; the cars to be unloaded between the hours of two and five in the morning.

From an examination of other spur tracks in this vicinity it would appear that the railroad company permits many cars to remain on the spurs during the entire day. The portion of the track in front of the petitioners' stand is on the curve of the spur and the inner rail of the track at its nearest point to the said stands is twenty feet from the curb. It can thus be seen that use of the track by the petitioners whereby cars are permitted to remain standing thereon during the day will cause considerable obstruction in the roadway. The petitioners claim little public use is made of Gansevoort street west of West street, and state that cars consigned to it will be placed on the curve some distance west of the petitioners' stands, where the tracks are about seven feet from the curb, at which point the car will present the least possible obstruction to public use of the roadway. However, I can see no method of insuring that the cars will be customarily so placed.

At the meeting of the Board of Estimate and Apportionment held April 3, 1908, it was proposed to revoke the resolutions authorizing this spur and other existing spurs connecting with the New York Central and Hudson River Railroad tracks on the west side of the City, such action to be taken in accordance with an opinion of the Corporation Counsel presented to the Board the same day, wherein it was held that the resolutions authorizing the spurs were illegal. At the request of counsel for certain of the users of the said spurs, action was deferred, in order to permit of a stipulation being entered into by the Corporation Counsel under which the use of the spurs could be continued pending a final settlement of the west side track situation.

In view of the decision of the Court of Appeals in the case of Hatfield vs. Straus, that the Board had no authority under the Charter to grant to individuals the right to construct or use spur tracks in the streets, a report was presented at the meeting of the Board held June 22, 1911, recommending that the matter be referred to the Corporation Counsel to advise the Board as to its right to permit the use of the track as requested, and the matter was so referred.

The Corporation Counsel has now rendered an opinion, dated June 30, 1911, advising "that the petition of Sulzberger & Sons Company, which is an application for the right to use public streets for private purposes must be denied under the decision of Hatfield vs. Straus."

In view of this opinion, it would appear that there is no course of action open to the Board other than the denial of the requested privilege. Respectfully,

HARRY P. NICHOLS, Engineer, Chief of Bureau.

The following was offered:

Whereas, Sulzberger & Sons Company have presented a petition dated May 15, 1911, to the Board of Estimate and Apportionment for permission to make use of an existing spur track in Gansevoort street, west of West street, in front of West Washington Market; and

Whereas, In an opinion dated June 30, 1911, the office of the Corporation Counsel has advised this Board that under the decision of the courts, the application must be denied; now therefore be it

Resolved, That the hereinabove mentioned petition of Sulzberger & Sons Company be and the same is hereby denied.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

FINANCIAL MATTERS.

The following transfers of appropriations were made upon the recommendation of the Comptroller:

$500 within the appropriation made to the Department of Education for the year 1910.

Board of Education, Park Avenue and 59th Street, New York, July 13, 1911.

Mr. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Dear Sir—I have the honor to transmit herewith a certified copy of a resolution adopted by the Board of Education at a meeting held on the 12th inst., relative to the transfer of $500 within the Special School Fund for the year 1910.

Respectfully yours, A. E. PALMER, Secretary, Board of Education.

Resolved, That the Board of Estimate and Apportionment be and it is hereby respectfully requested to transfer the sum of five hundred dollars ($500) from the Special School Fund for the year 1910 and from the item contained therein entitled "General Supplies, Truant Schools, No. 1000," which item is in excess of its requirements, to the item also contained within the Special School Fund for the year 1910, entitled "Contingencies, Truant Schools, No. 1050," which item is insufficient for its purposes

A true copy of resolution adopted by the Board of Education on July 12, 1911.

A. E. PALMER, Secretary, Board of Education.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 22, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 12, 1911, the Board of Education requested the transfer of $500 within the Special School Fund appropriation for the year 1910. In connection therewith I report as follows:

The proposed transfer is from General Supplies, No. 1000, Truant Schools, to Contingencies, No. 1050, Truant Schools.

The appropriation for No. 1050 was $2,756, but $500 was transferred therefrom at the request of the Board of Education. It now appears that bills in the sums of $458.97 for carfare for truant officers and $199.55 for telephone service have come in since the transfer was made, with the result that there is an apparent deficit in the account of $574.85. It is estimated that deductions on the bills for carfare, when they come up for audit in the Department of Finance, will make $500 sufficient to liquidate the account.

The balance in No. 1050 will permit of the transfer.

I recommend that the request be granted by the adoption of the attached resolution. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 237 of the Greater New

York Charter, the Board of Estimate and Apportionment hereby approves of the transfer of funds appropriated to the Department of Education for the year 1910, as follows:

From

Special School Fund, Maintenance, General Supplies—
1000. Truant Schools $500 00

To

Special School Fund, Maintenance, Contingencies—
1050. Truant Schools $500 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx and the Presidents of the Boroughs of Queens and Richmond—13.

$1,000 within the appropriation made to the Department of Street Cleaning for year 1911.

Department of Street Cleaning of The City of New York, 13-21 Park Row, New York, July 7, 1911.

Hon. William J. Gaynor, *Mayor, Chairman, Board of Estimate and Apportionment:*

Sir—I have to request that a transfer amounting to the sum of one thousand dollars ($1,000) be made within the appropriation allowed the Department of Street Cleaning for the year 1911, as follows:

From

Administration, Borough of The Bronx—
959. Removal of Snow and Ice.. $1,000 00

To

Administration, Borough of Manhattan—
909. Removal of Snow and Ice.. $1,000 00

The reason for the above transfer is to enable me to liquidate outstanding liabilities amounting to the sum of $241.86 for the removal of snow and ice in the Borough of Manhattan during the past winter, and also to have a small balance in this account so that I may be able to certify to contracts for the removal of snow and ice in the Borough of Manhattan for the seasons of 1911 and 1912.

Respectfully, WM. H. EDWARDS, Commissioner of Street Cleaning.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 22, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—In reference to a request of the Commissioner of the Department of Street Cleaning, under date of July 7, 1911, for a transfer of $1,000 within appropriations to the Department for the year 1911, I report as follows:

The proposed transfer is from No. 959, Administration, Borough of The Bronx, Removal of Snow and Ice, to No. 909, Administration, Borough of Manhattan, Removal of Snow and Ice. The Commissioner states that the transfer is necessary to enable him to liquidate outstanding liabilities in the sum of $241.86 in No. 909, and to leave a small balance in the account so that he may be able to certify to contracts for the seasons of 1911 and 1912.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 237 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves of the transfer of funds appropriated to the Department of Street Cleaning for the year 1911, as follows:

Department of Street Cleaning.

From

Administration, Borough of The Bronx—
959. Removal of Snow and Ice.. $1,000 00

To

Administration, Borough of Manhattan—
909. Removal of Snow and Ice.. $1,000 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs

of Brooklyn and The Bronx and the Presidents of the Boroughs of Queens and Richmond—13.

$1,000 from Account 1810 to Account 1816, supporting the appropriations made to the office of the President of the Borough of Brooklyn for the year 1911.

The City of New York, Office of the President of the Borough of Brooklyn, Brooklyn, July 30, 1911.

To the Honorable, the Board of Estimate and Apportionment:

Gentlemen—I would respectfully request that your honorable Board adopt a resolution transferring the sum of one thousand dollars ($1,000) from Account 1810, Repairs and Replacements by Contract or Open Order, to Account 1816, Contingencies.

The balance in Account 1816 is not sufficient for the needs of this Department for the remainder of the year, whereas Account 1810 has a large surplus.

I would thank you to give this matter your early consideration.

Respectfully, ALFRED E. STEERS, President, Borough of Brooklyn.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 30, 1911, the President of the Borough of Brooklyn requested the transfer of $1,000 within appropriations to the Bureau of Public Buildings and Offices in his office for the year 1911.

The proposed transfer is from No. 1810, Repairs and Replacements by Contract or Open Order, to No. 1816, Contingencies.

The appropriation for No. 1816 was $1,000. The expenditures are stated to be as follows:

Compensation of emergency help	$583 75
Carfares	200 00
Stamps	108 00
	$891 75

There are bills now due amounting to $300. The $1,000 is stated to be necessary to cover the deficit in the account and to provide for emergency Firemen, Telephone Operators and general expenses for the rest of the year.

There is sufficient balance in No. 1810 for the transfer.

The attached resolution, if adopted, will grant request. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 237 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves of the transfer of funds appropriated to the office of the President of the Borough of Brooklyn, for the year 1911, as follows:

From

Bureau of Public Buildings and Offices, Maintenance—

1810. Repairs and Replacements by Contract or Open Order	$1,000 00

To

Bureau of Public Buildings and Offices, Maintenance—

1816. Contingencies	$1,000 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx and the Presidents of the Boroughs of Queens and Richmond—13.

$750 within appropriations to the Department of Health for the year 1910.

Department of Health, City of New York, Southwest Corner 55th Street and 6th Avenue, Borough of Manhattan, Office of the Secretary, New York, July 20, 1911.

Hon. Joseph Haag, *Secretary, Board of Estimate and Apportionment,* 277 Broadway:

Sir—At a meeting of the Board of Health of the Department of Health, held July 18, 1911, the following resolution was adopted:

Resolved, That the Board of Estimate and Apportionment be and it is hereby respectfully requested to transfer the sum of $750 from the appropriation made to the Department of Health for the year 1910, entitled and as follows:

Code 265—Administration, Division of the Chief Clerk, Contingencies,

—the same being in excess of the amount required for the purposes thereof, to the appropriation made to the same Department for the same year entitled:

Code 264—Administration, Division of the Chief Clerk, Telephone Service, —the amount of said appropriation being insufficient.

A true copy. EUGENE W. SCHEFFER, Secretary.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 18, 1911, the Board of Health requested the transfer of $750 within appropriations to the Department of Health for the year 1910. In connection therewith, I report as follows:

The credit transfer is to cover a deficit of $750 in No. 264, Administration, Division of the Chief Clerk, Telephone Service. The debit account is No. 265, Administration, Division of the Chief Clerk, Contingencies.

The following table covers the two accounts:

264.	Appropriation, 1910	$20,000 00
	Refunds	1,265 00
	Total available	$21,265 00
	Expended to July 25, 1911	20,221 05
		$1,043 95
	Bills outstanding	1,786 79
	Deficit	$742 84
	Credit transfer requested	750 00
265.	Appropriation, 1910	$8,000 00
	Expended to July 25, 1911	7,184 60
	Balance	$815 40

I recommend that the request be granted by the adoption of the attached resolution. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 237 of the Greater New York Charter, hereby approves of the transfer of funds appropriated to the Department of Health for the year 1910, as follows:

From

265.	Administration, Division of the Chief Clerk, Contingencies	$750 00

To

264.	Administration, Division of the Chief Clerk, Telephone Service	$750 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communications (3) from the Comptroller, relative to issue of corporate stock, as follows:

A—$9,740 for the payment of costs and expenses, as taxed by a Justice of the Supreme Court, in the matter of acquiring title to certain lands in the block bounded by Avenue A and 1st avenue, 59th and 60th streets, and in the block bounded by 1st and 2d avenues, 59th and 60th streets, Manhattan, for the Manhattan approach to the Queensboro Bridge.

City of New York, Department of Finance, Comptroller's Office, July 24, 1911.

To the Honorable, the Board of Estimate and Apportionment:

Gentlemen—I have been advised by the Corporation Counsel that bill of costs and expenses, in the matter of acquiring title by The City of New York, to certain lands and premises situated in the block bounded by Avenue A and 1st avenue, 59th and 60th streets, and in the block bounded by 1st and 2d avenues, 59th and 60th streets, in the Borough of Manhattan, duly selected for bridge purposes, according to law, have been taxed by a Justice of the Supreme Court, under dates of July 7 and 10, in favor of the Commissioners of Estimate and Appraisal, amounting in the aggregate to the sum of nine thousand seven hundred and forty dollars ($9,740).

To provide means for the payment of these obligations, corporate stock to the amount of nine thousand seven hundred and forty dollars ($9,740) should be issued, pursuant to the provisions of section 47 of the Greater New York Charter.

A resolution for that purpose is herewith submitted.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York, to an amount not exceeding nine thousand seven hundred and forty dollars ($9,740), for the purpose of providing means for the payment of the costs and expenses, as taxed by a Justice of the Supreme Court, under dates of July 7 and 10, 1911, respectively, in the matter of acquiring title to certain lands in the block bounded by Avenue A and 1st avenue, 59th and 60th streets, and in the block bounded by 1st and 2d avenues, 59th and 60th streets, in the Borough of Manhattan, duly selected for bridge purposes, according to law, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller is authorized to issue corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, to an amount not exceeding nine thousand seven hundred and forty dollars ($9,740), the proceeds whereof to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

—

B—$58,228.82, to replenish the Fund for Street and Park Openings in the matter of extending Clasons Point road from Westchester avenue to the East River.

City of New York, Department of Finance, Comptroller's Office, July 24, 1911.

To the Honorable, the Board of Estimate and Apportionment:

Gentlemen—I have been advised by the Corporation Counsel that the supplemental and amended report of the Commissioners of Estimate and Assessment, in the matter of opening and extending Clasons Point road, from Westchester avenue to the East River, on Long Island Sound, in the 24th Ward, Borough of The Bronx, was confirmed by an order of the Supreme Court, dated June 12, 1911, and entered in the office of the Clerk of the County of New York June 17, 1911.

The title to the lands, etc., taken in this proceeding became vested in The City of New York on August 1, 1906, pursuant to the provisions of a resolution of the Board of Estimate and Apportionment, adopted June 15, 1906.

The total amount of the award is	$245,550 47
Amount of taxed costs	18,412 13
Amount of additional taxed costs	713 85
Total	$264,676 45

Pursuant to the provisions of a resolution of the Board of Estimate and Apportionment, adopted April 14, 1905, twenty-two per cent. (22%) of the entire cost and expense of this proceeding is to be borne and paid by The City of New York, for which corporate stock to the amount of fifty-eight thousand two hundred and twenty-eight dollars and eighty-two cents ($58,228.82) should be issued.

A resolution for that purpose is herewith submitted.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 174 of the Greater New York Charter, the Comptroller be and hereby is authorized to issue corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, to the amount of fifty-eight thousand two hundred and twenty-eight dollars and eighty-two cents ($58,228.82), the proceeds whereof to be applied to replenish the "Fund for Street and Park Openings" for this amount to be paid therefrom, in the proceeding to open and extened Clason's Point road from Westchester avenue to the East River, or Long Island Sound, in the Twenty-fourth Ward, Borough of The Bronx, pursuant to the provision of a resolution of the Board of Estimate and Apportionment, adopted April 14, 1905.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs

of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

C—$2,455.14 for bill of costs and expenses of the Commissioners of Estimate and Assessment in the proceeding to acquire title to certain pieces or parcels of land for the bridge over the Harlem River and approaches thereto between 125th street and 1st avenue and 134th street and Willis avenue.

City of New York, Department of Finance, Comptroller's Office, July 24, 1911.

To the Honorable, the Board of Estimate and Apportionment£

Gentlemen—I have been advised by the Corporation Counsel, under date of July 17, 1911, that a bill of costs and expenses of the Commissioners of Estimate and Assessment has been taxed by a Justice of the Supreme Court, under date of July 10, 1911, at the sum of two thousand four hundred and fifty-five dollars and fourteen cents ($2,455.14), in the proceeding to acquire title in fee to certain pieces or parcels of land between East 125th street and 1st avenue and the Harbor Commissioners' line of the Harlem River, and between the southerly line of 132d street and Willis avenue and the southerly line of 134th street and Willis avenue, and to a right of way or easement between the United States pierhead line of the Harlem River and 132d street at Willis avenue, for the construction of a bridge over the Harlem River and the approaches thereto between 125th street and 1st avenue and 134th street and Willis avenue, pursuant to the provisions of chapter 147 of the Laws of 1894.

To provide means to pay the amount of this bill of costs and expenses, corporate stock should be issued under the authority of section 47 of the Greater New York Charter, as amended by chapter 409 of the Laws of 1904.

A resolution for that purpose is herewith submitted.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended by chapter 409 of the Laws of 1904, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York, to an amount not exceeding two thousand four hundred and fifty-five dollars and fourteen cents ($2,455.14), to provide means for the payment of the bill of costs and expenses of the Commissioners of Estimate and Assessment as taxed by a Justice of the Supreme Court, under date of July 10, 1911, in the proceeding to acquire title in fee to certain pieces or parcels of land between East 125th street and 1st avenue and the Harbor Commissioners' Line of the Harlem River, and between the southerly line of 132d street and Willis avenue, and the southerly line of 134th street and Willis avenue, and to a right of way or easement between the United States Pierhead Line of the Harlem River and 132d street at Willis avenue, for the construction of a bridge over the Harlem River and the approaches thereto between 125th street and 1st avenue and 134th street and Willis avenue, pursuant to the provisions of chapter 147 of the Laws of 1894, and that when authority therefor shall have been obtained from the Board of Aldermen the Comptroller is authorized to issue corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, to an amount not exceeding two thousand four hundred and fifty-five dollars and fourteen cents ($2,455.14), the proceeds whereof to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented a resolution of the Board of Aldermen requesting that the salary of the First Deputy City Clerk be increased from $5,000 to $6,000 per annum.

Which was referred to the Committee on Salaries and Grades, consisting of the Comptroller and the President of the Board of Aldermen.

The Secretary presented the following communication from the Corporation Counsel in response to communication from the Secretary of the Board, dated July 19, 1911, asking information in relation to the present status of the action entitled "Amsterdam Electric Light, Heat and Power Company, and Edison Electric Illuminating Company of Brooklyn, Plaintiffs, against William J. Gaynor, as Mayor of The City of New York et al., etc., Defendants."

Which was ordered printed in the minutes, placed on file and the Secretary directed to transmit a copy thereof and a copy of the report of the Commissioner of Water Supply, Gas and Electricity, to the South Side Board of Trade of Brooklyn.

(On June 22, 1911, a petition was presented to the Board from the South Side Board of Trade of Brooklyn in regard to the validity of the franchise of the Edison Electric Illuminating Company in so far as it affects their operation in the Thirtieth Ward of Brooklyn, and recommending that a municipal light and power plant be constructed and operated in said ward in view of the excessive rates charged by said company to the City, as well as private consumers, which was referred to the Commissioner of Water Supply, Gas and Electricty.)

(On July 13, 1911, the report of the Commissioner of Water Supply, Gas and Electricity was presented, stating that for obvious reasons a municipal plant would not be successful, but that it would be wise, perhaps, to instruct the Corporation Counsel to draft and present to the Legislature a bill amending the Laws of 1905 by fixing the rate for electric light current the same as in the Boroughs of Manhattan and The Bronx, and the Secretary was directed to request the Corporation Counsel to advise the Board in regard to the present status of the above action.)

City of New York, Law Department, Office of the Corporation Counsel, New York, July 24, 1911.

Board of Estimate and Apportionment of The City of New York:

Sirs—I am in receipt of your communication dated July 19, 1911, asking information in relation to the present status of the action entitled "Amsterdam Electric Light, Heat and Power Company, and Edison Electric Illuminating Company of Brooklyn, Plaintiffs, against William J. Gaynor, as Mayor of The City of New York, et al., etc., Defendants." In reply I beg to say:

On March 17, 1911, a motion to make the temporary injunction, restraining the Board from taking any action to rescind the franchise heretofore granted to the Amsterdam Company, permanent during the pendency of the action, came up for argument and was granted. The case came on for trial on the 10th day of April, 1911. The defendants appeared by the Corporation Counsel and answered: "Ready." The plaintiffs, however, submitted an affidavit to the court stating at great length their inability to proceed with the trial of the case, for the reason that Judge Hatch, a member of the firm of Parker, Hatch & Sheehan, attorneys of record for the plaintiffs, who had special charge of the action on behalf of plaintiffs and was to try the same, was then seriously ill and unable to attend at court,, and thereupon the court adjourned the trial of the action to the 8th day of May, 1911. When the case was then reached the Corporation Counsel was ready and anxious to proceed with the trial, and again a similar affidavit was submitted by plaintiffs' attorneys. The court thereupon adjourned the trial of the action to May 22, 1911. On that date the Corporation Counsel attended and announced his readiness and desire to try the action, but at the request of the plaintiffs, and on submission of an affidavit showing that Judge Hatch had not recovered, the case was passed for the day. On May 23, the plaintiffs submitted an affidavit showing that Judge Hatch was seriously ill, and on that account the action was adjourned to June 12, 1911. On that day, the Corporation Counsel was once more in court, and ready to try this case, and so answered the call. The plaintiffs, however, asked the court for an adjournment on the plea that Judge Hatch was still dangerously ill and that he was the only person in the firm of Parker, Hatch & Sheehan who understood the facts in the case, and the court on this representation adjourned the trial of the action to October 16, 1911, when the Corporation Counsel expects that the same will be tried.

From all of which it will clearly appear the delay in the trial of this action has not been caused through any fault or neglect on the part of the Law Department.

Respectfully, G. L. STERLING, Acting Corporation Counsel.

The Secretary presented communications as follows:

From the President of the State Board of Charities, enclosing copy of report upon the conditions and needs of the Department of Public Charities of The City of New York, for consideration in connection with the appropriation to be made to said Department for the year 1912 for maintenance and improvements;

From the Central Labor Union of Brooklyn, requesting that appropriations be granted the various City Departments in the Budget for 1912 to permit the granting of a two weeks' vacation to per diem employees.

Which were referred to the Budget Committee, consisting of the Comptroller, the President of the Borough of Manhattan and the President of the Board of Aldermen.

The Secretary presented a communication from the Claremont Heights Property Owners' Association of the Borough of The Bronx, favoring the petition of the members of the New York Fire Department for increases in salaries.

Which was referred to the Committee on Standardization of Salaries and Grades, consisting of the Comptroller, the President of the Borough of Manhattan and the President of the Borough of Brooklyn.

The Secretary presented a communication from the Building Trades Council of New York, the Brooklyn Central Labor Union and the Socialist Party of New York County, requesting a hearing upon the question of incorporating in the new subway contracts a provision for the protection of the workingmen to be employed in construction, operation and maintenance.

Which was laid over one week—August 3, 1911.

(On June 29, 1911, a similar communication was presented to the Board and referred to the Public Service Commission.)

The Secretary presented communications (3) relative to additional rapid transit railways, etc., as follows:

From the Brooklyn League, expressing appreciation, as citizens of Brooklyn, of the great services rendered the City by the able handling by the Board of the transit question and calling attention to the imperative need that the Pineapple street tunnel be speedily constructed;

From the West End Citizens' League of the Borough of Queens, favoring the extension of the Cypress Hills L road, from Cypress Hills to Jamaica;

From Albert L. Leubuscher, of Water Mill, New York, submitting plan for financing the construction, etc., of new subways.

Which were referred to the Committee of the Whole.

The Secretary presented the following communication from the Commissioner of Water Supply, Gas and Electricity, submitting specifications for flaming arc lamps to be installed where deemed advisable in public buildings of the City, together with a report of the Comptroller and the Chief Engineer of the Board, to whom, on June 15, 1911, this matter was referred, relative thereto:

(On July 6, July 13 and again on July 20, 1911, the above matter was laid over for one week.)

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13-21 Park Row, City of New York, June 12, 1911.

Mr. Joseph Haag, *Secretary, Board of Estimate and Apportionment,* 299 Broadway, New York:

Gentlemen—I herewith submit draft of specifications for flaming arc lamps for use where deemed advisable in Public Buildings of this City. These specifications are submitted under Clause 1554 of the Charter, requiring that patented articles can not be purchased except when approved by the Board of Estimate and Apportionment, so that proper competition can be obtained.

There are a considerable number of types of flaming arc lamps. During 1909 we had a test made by Columbia University of the different kinds of lamps, so far as we could get them submitted at that time. A further test was made on the suggestion of the Finance Department, which has just terminated and the report of Columbia University on that test is transmitted herewith, and the lamps recommended by them have been given as the standard in the specifications submitted.

In case bids are made on lamps other than the types given, sample lamps must be submitted to Columbia for test and certification that they are equal to the style of lamps recommended by the University.

It would seem that this would provide ample protection to the City in the form of competition, and yet avoid the purchase of apparatus which would not be as serviceable as the lamps already tested under trial.

I would suggest that this report be forwarded to the Comptroller and the Chief Engineer of the Board of Estimate and Apportionment for consideration.

I am, Respectfully yours, HENRY S. THOMPSON, Commissioner.

Draft of Specifications for Obtaining Bids on Flaming Arc Lamps for Use in Certain Public Buildings.

The installation of work and material under this contract is for a complete equipment of..............................Flaming Arc Lamps in the............ ....Borough of .... such installation to include all wiring and control for the arc lamps or changes in the present wiring for same, etc., as may be required.

All work to be in accordance with the rules of the Bureau of Electrical Inspection of the Department of Water Supply, Gas and Electricity, and the New York

Board of Fire Underwriters. The number, kind, arrangement and type of lamps to be in accordance with the plans submitted to and approved by the Bureau of Lamps and Lighting of the Department of Water Supply, Gas and Electricity.

The entire work to be subject to the inspection and final approval of the Chief Engineer of Light and Power in charge of the above mentioned Bureaus.

The specifications and approved plans to be taken together as one, and what is shown on plans or mentioned in specifications is to be construed as supplementing each other and both taken together to include all the requirements of this work.

Any question of interpretation of said plans and specifications is to be referred to the Chief Engineer of Light and Power for settlement, and his decision to be accepted as final.

LAMPS.

Direct Current.

The D. C. lamps shall be of the clock feed type with regulation, workmanship and construction equal to the Excello, Polar, Aurola or Alba lamps.

Alternating Current.

The A. C. lamps shall be of the clock or motor feed type. If clock feed, they shall be equal in regulation, workmanship and construction to the Excello or Polar lamps. If motor feed, shall be equal in regulation, workmanship and construction to the Alba lamp.

The above lamps have been approved by Columbia University and if bids are made on other lamps, bidders will be required to submit sample lamps for test by the University, as to their conforming to above requirements.

Current.

Lamps are to operate two in series across a 115-volt circuit with proper resistance or reactance. The current and pressure supplied at various buildings to be tested and given by the Chief Engineer of Light and Power, and the lamps to be built and adjusted for this current supply with the variations in regulation noted.

Direct or Alternating Current.

Lamps to be supplied for Direct or Alternating current and so connected that sets of two each burn across each side of a 3-wire system, as ordered by the Chief Engineer of Light and Power, and adjusted for the voltage and regulation described for each installation.

Color of Light.

The lamps to be supplied with carbons for either yellow or white light, as required.

Equipment of Lamps.

With each lamp, all necessary parts, outer and inner globes, reflectors, regulating devices, resistants, reactive coils, economizers and twenty-five (25) pairs of carbons to be supplied.

Carbons.

The carbons to be used with these lamps to be of best grade carbons, as approved after trial by the Chief Engineer of Light and Power. It is important in the maintenance of these lamps that the proper carbons, resistances, reactive coils, outer and inner globes, etc., be used, in order to get the best effect from them.

Life Per Trim.

All carbons are to be of such length as to burn not less than seventeen (17) hours per trim.

Board of Estimate and Apportionment, City of New York, June 30, 1911.

To the Honorable, the Board of Estimate and Apportionment:

Gentlemen—At the meeting of the Board held on June 15, 1911, a communication was submitted by the Commissioner of Water Supply, Gas and Electricity forwarding to the Board a draft of specifications for flaming arc lamps for use where deemed advisable in public buildings of the City, which communication and accompanying specifications were referred to the Comptroller and the Chief Engineer of the Board for consideration and report.

The Commissioner of Water Supply states that these specifications are submitted under the provisions of section 1554 of the Charter, for the reason that all flaming arc lamps are patented.

As to the question of patented articles, we would call the attention of the Board to the fact that all lamps of this kind now on the market are patented, and inasmuch as the specifications designate four (4) separate direct current lamps and three (3) separate alternating current lamps as standards, we feel confident that the "fair and reasonable opportunity for competition" required by the Charter will be afforded.

The Commissioner of Water Supply has had exhaustive tests of the various types of flaming arc lamps now on the market made by the Electrical Testing Department of Columbia University, and a voluminous report of the results of these tests has been submitted to your Committee.

The specifications now presented provide that the direct current lamps shall be "equal in uniformity of regulation, continuous and steady illumination, current consumption, durability, workmanship and construction" to the four (4) lamps reported by Columbia University as giving the most satisfactory results, while lamps using an alternating current shall be equal in the same respects to the three lamps similarly reported as having been most satisfactory. The specifications further provide that if bids are submitted on other lamps than those named as standard, "bidders will be required to submit sample lamps for test by the University as to their conforming to above requirements."

As stated in the communication, these lamps are for use where deemed advisable in public buildings, and we are informed that the two buildings under immediate consideration are the Seventh Regiment Armory, where arc lamps of the old type which were furnished by the Regiment years ago, are worn out and must be replaced, and also in the new Twenty-second Regiment Armory now approaching completion.

The lamps have far greater illuminating power than the ordinary type of arc lamps, and while the first cost per lamp is greater, the reduction in the number of lamps required is expected to effect a substantial saving.

At the suggestion of the Committee some modifications have been made in the specifications as originally submitted, the foregoing comments and quotations referring to the specifications as so amended.

We believe that the policy of having these tests made by Columbia University is a wise one, and that the results of such tests can be accepted as accurate and unprejudiced. We believe also that the specifications in their present modified form, while designed to furnish the best lamps available, will leave the field open for any bidders who can furnish lamps of first class efficiency and reliability.

We would recommend the approval of the specifications in their present form.

Respectfully,

WM. A. PRENDERGAST, Comptroller; NELSON P. LEWIS, Chief Engineer, Board of Estimate and Apportionment.

The President of the Borough of Manhattan submitted the following amendment to the specifications presented by the Department of Water Supply, Gas and Electricity:

The second paragraph, under the caption, "Alternating Current," to read:

"The above lamps have been approved after test by Columbia University and when bids are made on other lamps, bidders will be required to submit sample lamps for test by the University, as to the conforming to the above requirements."

The amendment was accepted and the following was offered:

Whereas, the Commissioner of Water Supply, Gas and Electricity has presented to this Board specifications for furnishing to the City of New York, Flaming Arc Lamps to be installed where deemed advisable in public buildings in the City; and

Whereas, All of the Flaming Arc Lamps are patented; and

Whereas, The specifications designate as standards four (4) separate lamps using a direct current and three (3) separate lamps using an alternating current; and

Whereas, in the judgment of the Board of Estimate and Apportionment the specifications as presented afford competition between four (4) direct current lamps and three (3) alternating current lamps, giving thereby a just and reasonable opportunity for competition as required by section 1554 of the Charter; therefore, be it

Resolved, That the Commissioner of Water Supply, Gas and Electricity be and he hereby is authorized to advertise for bids for furnishing Flaming Arc Lamps for use where deemed advisable in public buildings in New York City, in accordance with the specification submitted by the said Commission to the Board of Estimate and Apportionment on June 15, 1911, as amended.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented a report of the Committee, consisting of the Comptroller and the Chief Engineer of the Board, to whom was referred on October 21, 1910, a communication from the Commissioner of Water Supply, Gas and Electricity relative to the acquisition of private water companies, in which he recommended that a special appropriation be made to conduct an investigation to determine the value of the private companies, etc.; also a communication from the Commissioner of Water Supply, Gas and Electricity, referring to the above report.

Which were laid over until the fall.

(On July 6, July 13, and again on July 20, 1911, the above matter was laid over for one week.)

The Secretary presented the following report of the Comptroller relative to increases in salaries of employees paid out of non-budgetary accounts, and recommending the adoption of the following resolutions:

1. That the rates of salaries and wages of employees to be paid out of other than tax budget accounts or budgetary part account, shall be fixed annually at the time of the adoption of the corporate stock budget, and that any salary or wage increase except those required by the prevailing rate of wage law, shall be limited within the succeeding twelve months to the annual rate then fixed, on the same principle which is now operative with regard to salary increases of employees paid out of the annual tax budget.

2. That, in the instances where schedules of employees are required for corporate stock or other work authorized in the intervals between corporate stock budgets, the rates fixed by such schedules must not be exceeded until action thereon at the next succeeding corporate stock budget period.

(On July 17, the above matter was laid over to July 27, 1911.)

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics July 14 1911.

To the Board of Estimate and Apportionment:

Gentlemen—In a communication to this Board, under date of May 4, 1911, the President of the Borough of The Bronx objects to the ruling of the Comptroller with reference to sundry increases in schedules of employees paid out of corporate stock or in part or in whole out of non-tax Budget appropriations.

The principle set down by the Comptroller in his attempt to maintain a control over the increase in the cost of government due to salary increase of employees, was that these increases should be treated in the same way as those of employees paid entirely out of the Tax Budget accounts, namely, that the salaries fixed at the opening of the account should not be changed until the next annual budgetary part-allowance schedules in the Budget or the modifications which would come with the annual Corporate Stock Budget.

The practice as fixed by the resolutions accompanying the Tax Budget do not permit of any salary increases in the intervals between budgets, except where a corresponding decrease in rate is shown to offset the proposed increase. This practice, since its establishment in the Budget of The City of New York, at the lowest estimate, saved the City from one-half to one million dollars annually.

I believe the Board of Estimate and Apportionment should adopt the same rule with regard to salaries paid out of non-budgetary account as is followed in the Budget, namely, that the rate of cost due to salary increases should not be increased oftener than once a year, namely, at the budget-making time, whether Corporate Stock or Tax Budget, but that if the Department can, through economies or through the distribution of one man's work among others and the elimination of that position, provide the necessary funds, these increases should be allowed within reason.

The President of the Borough of The Bronx, in the letter under consideration, says:

"According to this line of reasoning (referring to the Comptroller's report), the number of employees and the appropriations for salaries would remain constant. It is based on the assumption that there will be no increase in the amount of work required to be done, which is inconsistent with the rapid development of the City."

I do not agree with this conclusion. There is no question about the allowance of an increased force where increased work is to be done, and that the Comptroller has consistently favored in his reports, but an increase of City employees' salaries is not necessarily called for by "the rapid development of the City." It may or may not be helpful in Departmental work.

It would seem to me sufficient if the City employees had their opportunity for salary increases once a year. It certainly seems unfair that the opportunity for salary increases among certain classes of employees should be limited to once a year, and adopt the principle that employees paid out of other kinds of accounts shall be increased at will upon the request of the Department head.

I therefore recommend the adoption of the resolutions which I submit herewith.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the rates of salaries and wages of employees to be paid out of other than Tax Budget account or budgetary part account, shall be fixed annually at the time of the adoption of the Corporate Stock Budget, and that any salary or wage increase, except those required by the prevailing rate of wages law, shall be limited within the succeeding twelve months to the annual rate then fixed, on the same principle which is now operative with regard to salary increases of employees paid out of the annual Tax Budget.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The following resolution was offered:

Resolved, That in instances where schedules of employees are required for corporate stock or other work authorized in the intervals between Corporate Stock budgets, the rates fixed by such schedules must not be exceeded until action thereon at the next succeeding Corporate Stock Budget period.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Municipal Civil Service Commission requesting, and report of the Comptroller recommending the modification of Salary Schedule 1331, supporting the appropriation made in the Budget for the year 1911, for said Commission, providing for the elimination of a Stenographer and Typewriter at $900 per annum and the addition of a Clerk at $300 per annum:

Municipal Civil Service Commission of the City of New York, 299 Broadway, 11th Floor, New York, July 11, 1911.

Hon. WILLIAM A. PRENDERGAST, *Comptroller of The City of New York:*

Sir—The Municipal Civil Service Commission hereby respectfully requests that its salary schedule be amended to read as follows::

President	$6,000 00
Commissioners, 2 at $5,000	10,000 00
Secretary	5,000 00
Assistant Secretary	4,000 00
Labor Clerk	3,500 00
Chief Clerk	3,000 00
Clerk	2,400 00
Clerks, 3 at $2,100	6,300 00
Clerks, 3 at $1,800	5,400 00
Clerks, 2 at $1,650	3,300 00
Clerks, 2 at $1,500	3,000 00
Clerk	1,350 00
Clerks, 3 at $1,200	3,600 00
Clerks, 2 at $1,050	2,100 00
Clerks, 2 at $900	1,800 00
Clerks, 3 at $750	2,250 00
Clerks, 4 at $600	2,400 00
Clerks, 3 at $540	1,620 00
Clerks, 3 at $480	1,440 00
Clerks, 3 at $300	900 00
Stenographers and Typewriters, 3 at $1,500	4,500 00
Stenographers and Typewriters, 2 at $1,350	2,700 00
Stenographers and Typewriters, 2 at $1,200	2,400 00
Stenographer and Typewriter	750 00
Telephone Operator	1,050 00
Chief Examiner	4,200 00

Assistant Chief Examiners, 2 at $3,500	7,000 00
Medical Examiner	2,400 00
Examiners, 3 at $2,700	8,100 00
Examiners, 3 at $2,400	7,200 00
Examiners, 4 at $2,100	8,400 00
Examiners, 2 at $1,800	3,600 00
	$121,660 00

The balance of $600 is to remain unassigned pending the establishment of the necessary grades by the Board of Estimate and Apportionment to readjust the office force. Yours respectfully, F. A. SPENCER, Secretary.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 22, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 11, 1911, the Municipal Civil Service Commission requested modification of the salary schedule for their office for the year of 1911. In connection therewith I report as follows:

The only change involved is the striking out of a Stenographer and Typewriter at $900 per annum, and the adding of a Clerk at $300, the balance of $600 to be scheduled as unassigned.

The following table shows the line item changes in detail:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
1331.	Clerks, 3 at $300 per annum..	......	$300 00	......	$150 00
	Stenographer and Typewriter, 1 at $900	$900 00	......	$450 00	......
	Unassigned balance	......	600 00	......	300 00
		$900 00	$900 00	$450 00	$450 00

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the Municipal Civil Service Commission for the year 1911, as follows:

Municipal Civil Service Commission.

Administration—

1331. Salaries:

President	$6,000 00
Commissioners, 2 at $5,000	10,000 00
Secretary	5,000 00
Assistant Secretary	4,000 00
Labor Clerk	3,500 00
Chief Clerk	3,000 00
Clerk	2,400 00
Clerks, 3 at $2,100	6,300 00
Clerks, 3 at $1,800	5,400 00
Clerks, 2 at $1,650	3,300 00
Clerks, 2 at $1,500	3,000 00
Clerk	1,350 00
Clerks, 3 at $1,200	3,600 00
Clerks, 2 at $1,050	2,100 00
Clerks, 2 at $900	1,800 00
Clerks, 3 at $750	2,250 00
Clerks, 4 at $600	2,400 00
Clerks, 3 at $540	1,620 00
Clerks, 3 at $480	1,440 00
Clerks, 3 at $300	900 00
Stenographers and Typewriters, 3 at $1,500	4,500 00
Stenographers and Typewriters, 2 at $1,350	2,700 00
Stenographers and Typewriters, 2 at $1,200	2,400 00
Stenographer and Typewriter	750 00
Telephone Operator	1,050 00

Assistant Chief Examiners, 2 at $3,500	7,000 00
Medical Examiner	2,400 00
Examiners, 3 at $2,700	8,100 00
Examiners, 3 at $2,400	7,200 00
Examiners, 4 at $2,100	8,400 00
Examiners, 2 at $1,800	3,600 00
Unassigned balance	600 00
	$122,260 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Department of Water Supply, Gas and Electricity requesting, and report of Comptroller relative to, the modification of Salary Schedule 515, supporting the appropriation made in the Budget for the year 1911, for said Department, providing for an increase in the salary of the Chief Clerk, Bureau of Water Register, from $1,800 to $2,100 per annum, of a Clerk in charge of the Inspection Division from $1,800 to $2,100 per annum, of a Clerk in charge of the Meter Setting Division from $1,500 to $1,650 per annum, and a Telephone Operator from $900 to $1,050 per annum, said modification to be effective as of July 1, 1911:

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13-21 Park Row, City of New York, July 15, 1911.

Hon. William A. Prendergast, *Comptroller:*

Dear Sir—On account of the lack of a sufficient surplus in the appropriate salary account I have been unable until now to reward with an increase in salary some of the more deserving ones in the Bureau of Water Register, Borough of Manhattan. There are now, however, some vacancies which it is not necessary to fill, and by using the money set aside for these positions the promotions may be made. They are as follows:

2 Clerks in charge of divisions	from $1,800 each to $2,100 each
1 Clerk in charge of a Division	from $1,500 to $1,650
1 Telephone Operator	from $900 to $1,050

A total of $900.

To accomplish this a modification of the supporting salary schedule is required, and I therefore request that you present, with your approval, to the Board of Estimate and Apportionment the enclosed modification of schedule supporting Account 515 of 1910 entitled, "Water Supply, Boroughs of Manhattan and The Bronx, Distribution, Water Registration, Permits and Revenue Collections, Manhattan—Salaries, Regular Employees."

Yours truly, HENRY S. THOMPSON, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 22, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 15, 1911, the Commissioner of Water Supply, Gas and Electricity requested modification of the 1911 salary schedule entitled, Water Supply, Boroughs of Manhattan and The Bronx, Distribution, Water Registration, Permits and Revenue Collections, Manhattan, No. 515, Salaries, Regular Employees. In connection therewith I report as follows:

It is proposed to increase two incumbents $300 per annum each, and two incumbents $150 each.

The $900 necessary for the increases is to be provided by transfer from an unassigned balance and by dropping a Clerk at $540 per annum.

The proposed increases are for the following employees:

Thomas F. Bannon, Chief Clerk, Bureau of Water Register, from $1,800 to $2,100 per annum.

Mr. Bannon was appointed on December 18, 1902, at $800. On January 1, 1905, he was increased to $1,050; on February 1, 1907, to $1,350; on April 1, 1909, to $1,500; on March 1, 1910, to $1,650, and on May 1, 1910, to the present rate.

Charles H. Cooke, Clerk, in charge of Inspection Division, from $1,800 to $2,100 per annum.

Mr. Cooke was appointed on April 27, 1896, at $600, and increased as follows: May 14, 1897, to $800; December 1, 1901, to $900; October 1, 1903, to $1,050; March 1, 1905, to $1,200; May 1, 1906, to $1,350; April 1, 1909, to $1,500; March 1, 1910, to $1,650; May 1, 1910, to the present rate.

Leonard E. Hermes, Clerk in charge Meter Setting Division, from $1,500 to $1,650 per annum.

Mr. Hermes was transferred from the Tenement House Department on December 10, 1907, at $1,050; increased May 1, 1910, to $1,350, and on September 1, 1910, to the present rate.

John P. Heifing, Telephone Operator, from $900 to $1,050.

The incumbent was appointed on May 10, 1910, at the present rate.

The following table shows the schedule changes in detail:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
515.	Clerks, 3 at $1,800	$3,600 00	....	$1,800 00	....
	Clerks, at $2,100	....	$4,200 00	....	$2,100 00
	Clerks, 7 at $1,500	1,500 00	....	750 00	....
	Clerks, 6 at $1,650	....	1,650 00	....	825 00
	Clerk	540 00	....	270 00	....
	Telephone Operator, 1 at $900	900 00	....	450 00	....
	Telephone Operator, 1 at $1,050	....	1,050 00	....	525 00
	Inspectors, 9 at $1,350	1,350 00	....	675 00	....
	Inspectors, 94 at $1,100	....	1,100 00	....	550 00
	Unassigned balance, $600	110 00	....	55 00	....
		$8,000 00	$8,000 00	$4,000 00	$4,000 00

The attached resolution, if adopted, will grant the request.

Respectfully,
WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the Department of Water Supply, Gas and Electricity for the year 1911, to be effective as of July 1, 1911, as follows:

Department of Water Supply, Gas and Electricity.

Water Supply, Boroughs of Manhattan and The Bronx, Distribution, Water Registration, Permits and Revenue Collections, Manhattan—

515. Salaries, Regular Employees:

Water Registrar	$6,000 00
Cashier	2,500 00
Financial Clerk	2,100 00
Financial Clerk	1,500 00
Clerk	2,250 00
Clerks, 2 at $2,100	4,200 00
Clerk	1,800 00
Clerks, 7 at $1,650	11,550 00
Clerks, 6 at $1,500	9,000 00
Clerks, 9 at $1,350	12,150 00
Clerks, 2 at $1,200	2,400 00
Clerks, 14 at $1,050	14,700 00
Clerks, 41 at $900	36,900 00
Stenographers and Typewriters, 2 at $1,200	2,400 00
Stenographers and Typewriters, 3 at $1,050	3,150 00
Typewriting Copyists, 6 at $900	5,400 00
Telephone Operator	1,050 00
Automobile Engineman	1,200 00
Draftsman	1,500 00
General Inspector	1,800 00
Inspector	1,650 00
Inspector	1,500 00
Inspectors, 8 at $1,350	10,800 00
Inspectors, 95 at $1,100	104,500 00
Unassigned balance	490 00
	$242,490 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Department of Water Supply, Gas and Electricity requesting, and report of the Comptroller recommending, approval of the schedule, as revised, for said Department for the year 1911, Office of Borough Engineer, Corporate Stock and Water Revenue Force, providing for the addition of a Typewriter Copyist at $900 per annum, effective as of April 1, 1911:

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13-21 Park Row, City of New York, June 30, 1911.

Mr. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Dear Sir—A Typewriter Copyist at $900 per annum was transferred in April to the Borough of Brooklyn with the expectation that such employment would be a temporary one. He has, however, been continued, and provision for his pay has not yet been made, and I respectfully request that the Board of Estimate and Apportionment approve the enclosed modification of the salary schedule, such modification to take effect as of April, 1911.

Yours truly, HENRY S. THOMPSON, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 22, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 30, 1911, the Commissioner of Water Supply, Gas and Electricity requested modification of the 1911 schedule entitled, Administration, Office of the Borough Engineer, Salaries, Regular Employees, Corporate Stock and Revenue Force. The Commissioner states that, in April, 1911, a Typewriter Copyist at $900 per annum was transferred temporarily from the Office of the Borough Engineer, Manhattan, to the corresponding office in Brooklyn. It has since been found expedient to retain him there permanently, and it is proposed to include him in the schedule.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the Department of Water Supply, Gas and Electricity for the year 1911, to be effective as of April 1, 1911, as follows:

Department of Water Supply, Gas and Electricity.

Administration, Office of Borough Engineer—

Salaries, Regular Employees, Corporate Stock and Water Revenue Force:

First Assistant Engineer	1 at	$4,500 00
Assistant Engineer	1 at	2,400 00
Clerk	1 at	1,650 00
Clerk	1 at	1,200 00
Clerk	1 at	900 00
Stenographer and Typewriter	1 at	1,050 00
Typewriter Copyist	1 at	900 00
Automobile Engineer	1 at	1,500 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Department of Parks, Boroughs of Manhattan and Richmond requesting, and report of the Comptroller recommending, the modification of Wage Schedule 1082, supporting the appropriation made to said Department for the year 1911, providing for a decrease in the number of days for Gymnasium Attendants at $4 a day, and Playground Attendants at $3 a day, and increasing the number of days for Gymnasium Attendants at $3 a day, and Playground Attendants at $2 a day:

The City of New York, Department of Parks, Boroughs of Manhattan and Richmond, Arsenal, Central Park, July 10, 1911.

To the Board of Estimate and Apportionment, The City of New York:

Gentlemen—In order to carry on the summer work of the playgrounds under the jurisdiction of this Department, I have the honor to request the following modification in the 1911 Budget:

From Account 1082, Line Item 1—
Gymnasium Attendants at $4.00 per day, 2,288 days, $9,152.
Transfer $3,500 to Line Item 2—
Gymnasium Attendants at $3.00 per day, 2,448 days, $7,344.
—thus changing Line Items 1 and 2 to read respectively:
Gymnasium Attendants at $4.00 per day, 1,413 days, $5,652.
Gymnasium Attendants at $3.00 per day, 3,614 2-3 days, $10,844.
Also:
From Account 1082, Line Item 3:
Playground Attendants at $3.00 per day, 3,204 days, $9,612.
Transfer $3,500 to Line Item 4—
Playground Attendants at $2.00 per day, 2,946 days, $5,892.
—thus changing Line Items 3 and 4 to read respectively:
Playground Attendants at $3.00 per day, 2,037 1-3 days, $6,112.
Playground Attendants at $2.00 per day, 4,696 days, $9,392.

Respectfully,

CHAS. B. STOVER, Commissioner of Parks, Boroughs of Manhattan and Richmond.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 22, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 10, 1911, the Commissioner of Parks, Boroughs of Manhattan and Richmond, requested modification of the 1911 wage schedule for temporary employees in the Maintenance of Playgrounds, Bath Houses and Comfort Stations. In connection therewith I report as follows:

The Commissioner states that the modification is necessary for the proper supervision of the playgrounds during the summer months. It is proposed to decrease the number of days for Gymnasium Attendants, at $4, and Playground Attendants, at $3, and increase the number of days for Gymnasium Attendants, at $3, and Playground Attendants, at $2 a day. The change will give a larger force of attendants during the busy months, without additional cost to the City, as shown in the following tables:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
1082.	Gymnasium Attendants, at $4 per day (2,288 days)......	$3,500 00	....	$3,500 00	....
	Gymnasium Attendants, at $3 per day (2,448 days)......	....	$3,498 00	....	$3,498 00
	Playground Attendants, at $3 per day (3,204 days)......	3,498 00	....	3,498 00	....
	Playground Attendants, at $2 per day (2,946 days)......	....	3,500 00	....	3,500 00
		$6,998 00	$6,998 00	$6,998 00	$6,998 00

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule as revised, for the Department of Parks, Boroughs of Manhattan and Richmond, for the year 1911, as follows:

Parks, Manhattan and Richmond.

Maintenance, Playgrounds, Bath House and Comfort Stations—

1082. Wages, Temporary Employees:

Gymnasium Attendants, at $4 per day (1,413 days)..............	$5,652 00
Gymnasium Attendants, at $3 per day (3,614 days)...............	10,842 00

Playground Attendants, at $3 per day (2,038 days)	6,114 00
Playground Attendants, at $2 per day (4,696 days)	9,392 00
	$32,000 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Department of Public Charities requesting, and report of the Comptroller recommending, the modification of Schedules 712, 741 and 808-a, supporting the appropriation made in the Budget for the year 1911, for said Department by transferring the sum of $370 from Schedules 741 and 808-a to Schedule 712:

Department of Public Charities of the City of New York, Foot of East 26th Street, June 29, 1911.

To the Honorable, the Board of Estimate and Apportionment:

Gentlemen—In compliance with your resolution adopted in connection with the Budget for 1911, I have the honor to submit herewith the proposed revised salaries and wages schedules which I consider necessary in order to meet the demands upon this Department in an efficient and satisfactory manner during the present year. The changes can be met by transfers from:

808-a.	Additional allowance for salaries and wages in the Department of Public Charities to be expended subject to new schedules or amendments of existing schedules on approval thereof by the Board of Estimate and Apportionment	$50,000 00
	(Balance after resolution of June 1)	500 00
	(It is requested that the full amount be transferred, otherwise our appropriation for this class will be exceeded before the end of the year owing to the emergencies that had to be met during the past winter by employing extra help for the Morgues.)	
711.	Bureau of Dependent Adults, Salaries	480 00
	(This is the amount transferred from 712 to 711 by error, in the modification of June 1. We, therefore, wish it returned to this appropriation.)	
741.	New York City Children's Hospitals and Schools, Wages, Temporary Employees	240 00
		$1,220 00

To

712.	Bureau of Dependent Adults: Wages, Temporary Employees	$1,220 00

The supporting schedules follow.

Respectfully yours, M. J. DRUMMOND, Commissioner.

Administration, Manhattan and The Bronx, Bureau of Dependent Adults, 712—Wages, Temporary Employees.

	$42,760 00		$42,280 00

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 22, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 29, 1911, the Commissioner of Public Charities requested modification of four schedules supporting appropriations for salaries and wages to his Department for 1911, involving transfers aggregating $1,220. In connection therewith I report as follows:

To provide for a deficiency of $1,220 in No. 712, Wages, Temporary Employees, Bureau of Dependent Adults, Manhattan and The Bronx, it is proposed to make transfers of cash from the following accounts:

808a.	Additional allowance for salaries and wages in the Department of Public Charities, to be expended subject to new schedules or amendments of existing schedules on approval thereof by the Board of Estimate and Apportionment	$500 00
711.	Salaries, Bureau of Dependent Adults, Manhattan and The Bronx	480 00
741.	Wages, Temporary Employees, New York City Children's Hospitals and Schools	240 00
		$1,220 00

The original appropriation for No. 808a was $50,000. The amount has been reduced through modification to $500. The transfer of the $500 would permit of the use of accruals in the sum of $250, contrary to the resolutions governing the budget for 1911. The use of accruals was not permitted in previous modifications. I recommend, therefore, that this item in the request be approved to the extent of $250.

The proposed transfer of $480 from a salary to a wages appropriation is contrary to the resolutions governing the budget. The transfer of $240 from No. 741 would permit the use of $120 in accruals. I recommend, therefore, that this item in the request be approved to the extent of $120.

The following table shows the changes in detail:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
712.	Hospital Helpers	....	$740 00	....	$370 00
741.	Hospital Helpers	$240 00	....	$120 00	....
808a.	Additional allowance for salaries and wages in the Department of Public Charities, to be expended subject to new schedules or amendments of existing schedules upon approval thereof by the Board of Estimate and Apportionment	500 00	....	250 00	....
		$740 00	$740 00	$370 00	$370 00

I recommend the adoption of the attached resolutions approving of the transfer of $370 and the necessary modification of schedules. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules, as revised, for the Department of Public Charities, for the year 1911. to take effect as of July 1, 1911, as follows:

Department of Public Charities.

Administration, Manhattan and The Bronx, Bureau of Dependent Adults—

712. Wages, temporary employees, Hospital Helpers	$11,158 00

Institutions, Manhattan and The Bronx, New York City Children's Hospitals and Schools—

741. Wages, temporary employees, Hospital Helpers	$62,080 00

Miscellaneous—

808a. Additional allowance for salaries and wages in the Department of Public Charities, to be expended subject to new schedules or amendments of existing schedules upon approval thereof by the Board of Estimate and Apportionment	....

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 237 of the Greater New York Charter hereby approves of the transfer of funds appropriated to the Department of Public Charities for the year 1911, to take effect as of July 1, 1911, as follows:

From

Institutions, Manhattan and The Bronx, New York City Children's Hospitals and Schools—

741. Wages, temporary employees	$120 00

Miscellaneous—

808a. Additional allowance for salaries and wages in the Department of Public Charities, to be expended subject to new schedules or amendments of existing schedules upon approval thereof by the Board of Estimate and Apportionment	$250 00

To

Administration, Manhattan and The Bronx, Bureau of Dependent Adults—

712. Wages, temporary employees	$370 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary was directed to transmit a copy of the report of the Comptroller to the Commissioner of Public Charities.

The Secretary presented the following communication from the Supervisor of the City Record reqesting, and report of the Comptroller recommending, the modification of Salary Schedule No. 852, supporting the appropriation made in the Budget for the year 1911, for the office of said Supervisor of the City Record, providing for the elimination of an Inspector at $1,500 per annum and the addition of a Stenographer and Typewriter at $600 per annum:

The City of New York, Board of City Record, Office of the Supervisor, 13-21 Park Row, New York, July 5, 1911.

Hon. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Sir—I respectfully request a modification of the schedule supporting the appropriation Budget for the year 1911, made to the Board of City Record, entitled, "Administration, 852, Salaries," by eliminating therefrom:

Inspectors, 2 at $1,500	$3,000 00
Unassigned balance, $150	150 00
	$3,150 00

—and inserting in lieu thereof:

One Inspector at $1,500	$1,500 00
One Stenographer and Typewriter	600 00
Unassigned balance	1,050 00
	$3,150 00

The request for this modification entails no additional cost to the City and is made necessary to transact the constantly increasing business in the Bureau of Supplies. Respectfully submitted,

DAVID FERGUSON, Supervisor of the City Record.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 17, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—In reference to a request of the Supervisor of the City Record, under date of July 5, 1911, for modification of the 1911 schedule in his office, No. 852, Administration, Salaries, I report as follows:

It is proposed to strike out an inspector at $1,500 per annum, and add a Stenographer and Typewriter, at $600, the difference of $900 to be added to an unassigned balance. The position of Inspector has not been filled.

The Supervisor states that request is made necessary to transact the constantly increasing business in the Bureau of Supplies.

The following table shows the line item changes in detail:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
852.	Inspectors, 2 at $1,500........	$1,500 00	....	$750 00	....
	Stenographer and Typewriter, at $600	....	$600 00	....	$300 00
	Unassigned Balance..........	....	900 00	....	450 00
		$1,500 00	$1,500 00	$750 00	$750 00

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the Board of City Record for the year 1911, to take effect July 1st, as follows:

Board of City Record.

City of New York, Administration—

852. Salaries:

Supervisor	$5,000 00
Deputy Supervisor	2,500 00
Secretary and Chief Clerk	2,500 00
Editor	3,000 00
Stationer	2,500 00
Bookbinder	2,500 00
Inspector	1,500 00
Bookkeeper	2,550 00
Bookkeepers, 2 at $2,100	4,200 00
Examiner	1,800 00
Examiner	1,650 00
Stenographer and Book Typewriter	1,500 00
Stenographer and Book Typewriter	600 00
Stenographer and Typewriter	750 00
Stenographer and Typewriter	600 00
Book Typewriting Copyist	1,200 00
Clerks, 2 at $1,200	2,400 00
Clerk	900 00
Clerk	750 00
Clerks, 3 at $300	900 00
Storekeeper	1,800 00
Laborer	720 00
Balance unassigned	1,050 00
	$42,870 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Department of Water Supply, Gas and Electricity requesting, and report of the Comptroller recommending, approval of the schedule, as revised, for the account of said Department for the year 1911, Maintenance and Distribution of Water Supply, Borough of Brooklyn, S-256, Salaries, Regular Employees, providing for the substitution of a Clerk at $540 per annum for one at $600 per annum:

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13-21 Park Row, City of New York, June 27, 1911.

Mr. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Dear Sir—In the schedule supporting account, "Maintenance and Distribution of Water Supply in the Borough of Brooklyn, 1911, Maintenance, Distribution System, Salaries, Regular Employees, S-256," provision is made for two Clerks at $600.

I would like to have that schedule line amended so as to provide for only one Clerk at $600 and one at $540 in order that I may fill a vacancy now existing by promoting a Clerk now receiving $300, and for this purpose I respectfully request that the Board of Estimate and Apportionment modify the salary schedule in accordance with the enclosed copy. Yours truly,

HENRY S. THOMPSON, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 19, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—In reference to a request of the Commissioner of Water Supply, Gas and Electricity, on June 27, 1911, for modification of the 1911 non-budgetary schedule, Maintenance and Distribution of Water Supply, in the Borough of Brooklyn, Maintenance Distribution System, S-256, Salaries, Regular Employees, I report as follows:

It is proposed to drop a Clerk at $600 per annum and substitute one at $540, the schedule to be decreased by the balance of $60.

The following table shows the line item changes in detail:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
S-256.	Clerks, 2 at $600..........	$600 00	....	$300 00	....
	Clerk at $540..............	....	$540 00	....	$270 00
	Decrease in schedule.........	....	60 00	....	30 00
		$600 00	$600 00	$300 00	$300 00

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the employees of the Department of Water Supply, Gas and Electricity, paid from other than budgetary funds, for the year 1911, to be effective as of July 1, 1911, as follows:

Department of Water Supply, Gas and Electricity—Maintenance—Distribution.

Salaries, Regular Employees, Corporate Stock and Water Revenue Force:

Assistant Engineer	1 at	$3,000 00
Assistant Engineer	1 at	2,100 00
Transitman	1 at	1,650 00
Leveler	1 at	1,500 00
Leveler	1 at	1,350 00
Leveler	1 at	1,200 00
Rodman	1 at	1,050 00
Axeman	2 at	900 00
Draftsman	1 at	1,500 00
Draftsman	1 at	900 00
Clerk	1 at	1,650 00
Clerk	1 at	900 00
Clerk	1 at	750 00
Clerk	1 at	600 00
Clerk	1 at	540 00
Clerk	1 at	300 00
Stenographer and Typewriter....................................	1 at	1,200 00

Messenger	1 at	900 00
Messenger	1 at	1,200 00
Inspectors	2 at	1,100 00
Keeper	1 at	1,200 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Board of Education requesting, and report of the Comptroller recommending approval, pursuant to resolution adopted June 3, 1910, of the plans, specifications and estimates of cost for the following work under the jurisdiction of the Department of Education:

Portable school buildings at Annex to Public School 32, Queens	$7,000 00
Furniture for addition to Public School 7, Queens, at an aggregate cost of	6,875 50
Portable school buildings at Annex to Public School 46, Queens	3,600 00

Board of Education, Park Avenue and 59th Street, New York, July 17, 1911.

Hon. William A. Prendergast, *Comptroller:*

Dear Sir—I beg to advise you of the receipt of a communication from Mr. C. B. J. Snyder, Superintendent of School Buildings, under date of July 17, 1911, reading as follows:

"I am forwarding herewith plans and specifications for the following work, for transmission to the Comptroller, to be presented to the Board of Estimate and Apportionment in compliance with the resolution adopted by that Board on January 5, 1911.

Queens, for the General Construction of Portable School Buildings.

	Approximate Cost.
Annex, Public School 32	$7,000 00
Annex, Public School 46	3,600 00
**Furniture for Addition to Public School 7.*	
Item 1	1,215 00
Item 2	1,256 00
Item 3	540 00
Item 4	3,864 50

(Furnished by Prison Department.)

*No plans."

The plans and specifications referred to in the foregoing communication are transmitted herewith. Respectfully yours,

A. E. PALMER, Secretary, Board of Education.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 22, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 17, 1911, the Board of Education requested approval of plans, specifications and estimates of cost for the following work in the Borough of Queens:

	Approximate Cost.
General construction, etc., of portable school buildings at—	
Annex to Public School 32	$7,000 00
Annex to Public School 46	3,600 00
Furniture for addition to Public School 7—	
Item 1	1,215 00
Item 2	1,256 00
Item 3	540 00
Item 4	3,864 50

No plans were submitted for furniture for Public School 7.

An examination of the plans and specifications show that it is proposed to erect portable houses to provide four classrooms at the annex to Public School 32 and two classrooms at the annex to Public School 46, with the necessary heating, plumbing and toilet facilities, blackboards, furniture, etc. The furniture is to be taken from the storehouse of the Board of Education and set in the buildings by the contractor.

The plans and specifications are satisfactory and the estimates of cost reasonable.

The cost of the work is to be charged to the Corporate Stock Fund, "C-DE-92, Portable Buildings, Queens," approved by the Board of Estimate and Apportionment on June 3, 1910. There is a sufficient balance in the fund to pay for the work.

The specifications for furniture, when submitted, contained clauses calling for repairs to clocks, shades and slate blackboards. Upon the request of the Department of Finance, these features were eliminated by the omission of paragraph 2, under item 1, on page 7; paragraph 2, on page 10, and paragraph 6, on page 11.

Item 1 now includes new clocks, umbrella stands, dressing cabinets, screens, couches, carpets, linoleum, reading stand, medicine cabinet, fire-extinguishing apparatus, window shades and bench stops; item 2, slate blackboards; item 3, auditorium chairs; item 4, teachers' desk and chairs, tables and pupils' desks and seats.

The articles specified under item 4 are to be furnished by the State Commission on Prisons, who have given a release covering the other items. The specifications, in their present form, are satisfactory, and the estimates of cost reasonable.

The cost of the work is to be charged to Corporate Stock Fund, "C-DE-98A, Furniture for Public School 7, Borough of Queens," which was authorized by the Board of Estimate and Apportionment on January 26, 1911. There is a sufficient balance to pay the cost of the work.

I recommend the adoption of the attached resolution approving the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution adopted on June 3, 1910, hereby approves the plans, specifications and estimates of cost for the following work, under the jurisdiction of the Department of Education:

Portable school buildings at annex to Public School 32, Borough of Queens; estimated cost, seven thousand dollars ($7,000).

Portable school buildings at annex to Public School 46, Borough of Queens; estimated cost, three thousand six hundred dollars ($3,600).

Specifications, as amended, for furniture for addition to Public School 7, Borough of Queens:

Item 1; estimated cost, one thousand two hundred and fifteen dollars ($1,215).

Item 2; estimated cost, one thousand two hundred and fifty-six dollars ($1,256).

Item 3; estimated cost, five hundred and forty dollars ($540).

Item 4; estimated cost, three thousand eight hundred and sixty-four dollars and fifty cents ($3,864.50).

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Department of Parks, Borough of The Bronx, requesting, and report of the Comptroller recommending approval, pursuant to resolution adopted June 3, 1910, of the plans, specifications and estimate of cost ($4,200) for reconstructing the shelter building in Franz Sigel Park, under the jurisdiction of said Department:

Department of Parks, Borough of The Bronx, Office of Chief Engineer, Zbrowski Mansion, Claremont Park, June 28, 1911.

Hon. William A. Prendergast, *Comptroller,* 280 Broadway, City:

Dear Sir—Pursuant to the resolution adopted by the Board of Estimate and Apportionment June 3, 1910, I submit herewith, by order of the Commissioner of Parks, for the Borough of The Bronx, plans and specifications for the following contract, the estimated cost of which is $4,200:

"For reconstructing the shelter building in Franz Sigel Park, in the Borough of The Bronx, in The City of New York." Respectfully submitted,

MARTIN SCHENCK, Chief Engineer of Parks, Borough of The Bronx.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 22, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 28, 1911, the Chief Engineer of Parks, for the Borough of The Bronx, requested the approval of plans, specifications and estimated cost in the sum of $4,200 for reconstructing the Shelter Building in Franz Sigel Park.

Plans and specifications and estimated cost in the sum of $4,000 for reconstructing and altering the Shelter Building were submitted for approval on May 13, 1911. For the reason that the work called for consisted mainly of repairs to the old building and was therefore a proper maintenance charge, the plans, specifications and estimate of cost were returned to the Commissioner of Parks, without the approval of the Board of Estimate and Apportionment.

The plans and specifications now submitted provide for the removal of the old Shelter Building and the erection of a new structure, 64 feet long and 32 feet wide, following closely the design of the old building. The roof is to be larger and about two feet lower than at present and open louvres are to be placed in the roof at the ends of the building instead of at the sides. Parts of the building will be constructed of heavier material than in the old.

Provision is made for the use of some of the brick piers that are now in place and also of parts of the roof trusses that are in perfect condition.

The plans and specifications appear to be complete and satisfactory and the estimate of cost reasonable.

The cost of this work is to be charged against the corporate stock fund entitled, "Reconstruction of Shelter Building in Franz Sigel Park, C-DP-327A." The available balance in the fund is sufficient for this proposed expenditure.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution of June 3, 1910, hereby approves the plans, specifications and estimate of cost, four thousand two hundred dollars ($4,200) for reconstructing the Shelter Building in Franz Sigel Park, in the Borough of The Bronx, under the jurisdiction of the Department of Parks, Borough of The Bronx.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Board of Education requesting, and report of the Comptroller recommending approval, pursuant to resolution adopted June 3, 1910, of the plans, specifications and estimates of cost ($12,500 and $1,500) for installing heating and ventilating apparatus and temperature regulation in additions to and alterations in Public School 40, Borough of The Bronx:

Board of Education, Park Avenue and 59th Street, New York, July 11, 1911.

Hon. W. A. PRENDERGAST, *Comptroller:*

Dear Sir—I beg to advise you of the receipt of a communication from Mr. C. B. J. Snyder, Superintendent of School Buildings, under date of July 10, 1911, reading as follows:

"I am forwarding herewith plans and specifications for Item 1, installing heating and ventilating apparatus, and Item 2, installing temperature regulation in additions to and alterations in Public School 40, Borough of The Bronx, for transmission to the Comptroller, to be presented to the Board of Estimate and Apportionment, in compliance with the resolution adopted by that Board on January 5, 1911.

"The plans and specifications have been returned by the Department of Water Supply, Gas and Electricity, approved, as noted on the same.

	Approximate Cost.
Item 1	$12,500 00
Item 2	1,500 00"

The plans and specifications referred to in the foregoing communication are transmitted herewith. Respectfully yours,

A. E. PALMER, Secretary, Board of Education.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 22, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 11, 1911, the Board of Education requested approval of plans, specifications and estimates of cost for (Item 1) installing heating and ventilating apparatus at an approximate cost of $12,500, and for (Item 2) installing temperature regulation, at an approximate cost of $1,500, in addition to and alterations in Public School 40, Borough of The Bronx.

An examination of the plans and specifications shows that heating of the new addition is to be provided by the direct and indirect systems in conjuncton with the single duct plenum system of ventilation and thermostat temperature regulation, such as is now in use in the present building.

No alterations are to be made to the system in the old building, except to connect up the new work for the operation of the whole plant. The plans and specifications are satisfactory and the estimates of cost reasonable.

The cost of this work is to be charged to the corporate stock fund, "C-DE-77D, Heating and Ventilating and Electric Work," for which the sum of $18,600 was approved by the Board of Estimate and Apportionment on June 3, 1910. There is a sufficient balance in the fund to pay the cost of the work.

I recommend the adoption of the attached resolution approving the plans, specifications and estimates of cost as requested.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution adopted on June 3, 1910, hereby approves the plans, specifications and estimates of cost for the following work in additions to and alterations in Public School 40, Borough of The Bronx, under the jurisdiction of the Department of Education:

Item 1. Installing heating and ventilating apparatus, estimated cost, twelve thousand five hundred dollars ($12,500).

Item 2. Installing temperature regulation, estimated cost, one thousand five hundred dollars ($1,500).

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following resolution of the Board of Aldermen, requesting an issue of $2,743.48 special revenue bonds (subdivision 8, section 188 of the Charter), to provide for the salaries of certain employees in the Fire Department, Building Bureau, together with a report of the Comptroller, to whom on July 6, 1911, this application was referred, recommending that said request be denied, for the reason that if these salaries are properly chargeable to corporate stock they should not be paid out of short term bonds:

In the Board of Aldermen.

Resolved, That, pursuant to the provisions of subdivision 8 of section 188 of the amended Greater New York Charter, and for the purpose of meeting deficiency in the funds available for the payment for a portion of the month of September, and for the full months of October, November and December, 1911, of the salaries of 3 Inspectors of Buildings, at $1,800 per annum each, 2 Architectural Draftsmen, at $1,500 per annum each, and 1 Inspector of Masonry Construction at $1,500 per annum, in the employ of the Division of Buildings of the Fire Department of The City of New York, the Board of Aldermen hereby requests the Board of Estimate and Apportionment to authorize the Comptroller to issue special revenue bonds in the sum of two thousand seven hundred and forty-three dollars and fifty-eight cents ($2,743.58).

Adopted by the Board of Aldermen June 27, 1911, three-fourths of all the members voting in favor thereof.

Approved by the Mayor July 5, 1911. P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 22, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 27, 1911, the Board of Aldermen adopted a resolution requesting $2,743.58 in special revenue bonds, the proceeds to be used for the payment of the salaries of certain employees of the Fire Department. In connection therewith I report as follows:

Since July, 1902, certain employees of the Building Bureau of the Department have been paid from corporate stock funds. On July 1, 1911, the employees so paid were as follows:

Inspectors of Buildings, 3 at $1,800 per annum	$5,400 00
Draftsmen, 2 at $1,500 per annum	3,000 00
Inspector of Masonry Construction	1,500 00
	$9,900 00

To pay the salaries of the employees from July 1 to December 31, 1911, the sum of $4,950 will be required. Funds to the amount of $2,206.42 are available for the purpose in unincumbered balances in two corporate stock authorizations, leaving a deficiency of $2,743.58. The Commissioner states that the necessities of the Department require the continuance of the present force.

If these salaries are properly chargeable to corporate stock, they should not be paid out of short term bonds, but the deficiency should be met by an authorization of corporate stock.

I recommend that the request for revenue bonds be denied. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the request of the Board of Aldermen for an issue of special revenue bonds as contained in the resolution adopted by said Board, June 27, 1911, and approved by the Mayor, July 5, 1911, as follows:

> "Resolved, That, pursuant to the provisions of subdivision 8 of section 188 of the amended Greater New York Charter, and for the purpose of meeting deficiency in the funds available for the payment for a portion of the month of September and for the full months of October, November and December, 1911, of the salaries of 3 Inspectors of Buildings, at $1,800 per annum, each; 2 Architectural Draftsmen, at $1,500 per annum, each, and 1 Inspector of Masonry Construction, at $1,500 per annum, in the employ of the Division of Buildings of the Fire Department of The City of New York, the Board of Aldermen hereby requests the Board of Estimate and Apportionment to authorize the Comptroller to issue special revenue bonds in the sum of two thousand seven hundred forty-three dollars and fifty-eight cents ($2,743.58)"

—be and the same is hereby denied.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary was directed to transmit a copy of the report of the Comptroller to the Board of Aldermen and to the Fire Department.

The Secretary presented the following communication from the Commissioner of Water Supply, Gas and Electricity requesting, and report of the Comptroller recommending, the adoption of a resolution directing the heads of the various departments, bureaus and offices of The City of New York and of the county government therein, having charge of city owned property to which water is supplied by the Department of Water Supply, Gas and Electricity, to request funds in their Budget estimates for 1912 in a sufficient amount to provide for the purchase, installation and repair of water meters and for the payment, at the rate of ten cents per 100 cubic feet for water furnished:

(On June 29, 1911, a communication from the Commissioner of Water Supply, Gas and Electricity, requesting the Board to adopt a resolution, as above, was referred to the Comptroller.)

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13-21 Park Row, City of New York, June 27, 1911.

JOSEPH HAAG, Esq., *Secretary, Board of Estimate and Apportionment,* 277 Broadway, City:

Dear Sir—The preparation of the estimates for 1912 will soon be undertaken by the Departments, and I would respectfully request that the Board of Estimate and Apportionment adopt a resolution directing the several Borough Presidents and heads of departments having charge and control of city-owned property and buildings to which water is furnished by this Department to make provision in their Budget for sufficient money to cover the purchase, installation and repair of water meters in city-owned buildings and properties, and also to provide for an amount to pay for the water furnished at the regular fixed rate of 10 cents per 100 cubic feet, the same as any private company or individual.

I have had inspected a large number of the city-owned buildings and found, in most of them, that the plumbing was defective and that they were equipped with automatic flushing devices which wasted an enormous amount of water. The constant and uninterrupted flushing of the closets in these buildings is entirely unnecessary. The metering of these buildings will give the Department information as to the consumption of water, which we do not have now, and will also be a check on waste. If each department, board or commission is allotted a certain sum of money to pay for the water furnished to their respective buildings, I believe that the consumption of water will be considerably reduced. Yours truly,

HENRY S. THOMPSON, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 22, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 27, 1911, the Commissioner of Water Supply, Gas and Electricity requested the Board of Estimate and Apportionment to adopt a resolution directing the Borough Presidents and the heads of Departments having charge and control of city-owned property and buildings to which water is furnished by the Department of Water Supply, Gas and Electricity, to make provision in their departmental estimates for the Budget of 1912, for sufficient money to cover the purchase, installation and repair of water meters in city-owned buildings, and also for water furnished at regular fixed rate of 10 cents a hundred cubic feet. In connection therewith I report as follows:

The Commissioner's purpose is to prevent unnecessary waste of water and to subject all in control of city-owned buildings, etc., to which water is furnished, to the same rules and regulations as any private company or individual.

The Commissioner states he has found in a large number of city-owned buildings inspected by him, that the plumbing is defective; that the automatic flushing devices wasted an enormous amount of water. It is his opinion, therefore, that if each Department, Board or Commission is allotted a certain sum of money to pay for water furnished, the consumption of water would be considerably reduced.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the heads of the various Departments, Bureaus and Offices of The City of New York and of the county government therein, having charge and control of city-owned property and buildings to which water is supplied by the Department of Water Supply, Gas and Electricity, be and the same are directed to request funds in their departmental estimates for the Budget of the year 1912, in a sufficient amount to provide for the following purposes:

For the purchase, installation and repair of water meters in city-owned buildings and property.

For the payment, at the rate of ten (10) cents per one hundred (100) cubic feet, for water furnished thereto by the Department of Water Supply, Gas and Electricity.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented a report of the Comptroller referring to the communication from the State Board of Charities, urging an increase in the force of Examiners in the Children's Bureau of the Department of Public Charities, to provide for reinvestigations of commitments of children to private institutions, and stating that provision has been made by the Board, through transfer of funds and the issue of special revenue bonds, for an additional number of Examiners for the work.

Which was ordered filed and the Secretary directed to transmit copies thereof to the State Board of Charities and to the Commissioner of Public Charities.

(On April 20, 1911, the above communication was referred to the Comptroller and the Commissioner of Public Charities.)

The Secretary presented a report of the Comptroller, referring to a communication from Mr. Francis V. Morrell, of 177 Quincy street, Brooklyn, suggesting that copies be made of Colonial records owned by the City, and recommending that the matter be referred to the Commissioner of Records of New York County, as the Commissioner has stated that while he had no jurisdiction over these records he will copy them if the matter be referred to him.

Which was referred to the Commissioner of Records, New York County.

The Secretary was directed to transmit a copy thereof to Mr. Francis V. Morrell.

(On April 13, 1911, the above communication was referred to the Comptroller.)

The Secretary presented a report of the Comptroller, referring to a communication from the Commissioner of Parks, Borough of The Bronx, requesting authority to award the contract for resurfacing the roadway of the Bronx and Pelham parkway, from the Southern boulevard to Butler street road, to other than the lowest bidder, and to a subsequent communication from the Commissioner withdrawing said request, and recommending that the Secretary be directed to return to the Commissioner of Parks, Borough of The Bronx, his request of June 27, 1911.

The Secretary was directed to return the communication aforesaid to the Commissioner of Parks, Borough of The Bronx.

(On June 29, 1911, the communication, dated June 27, 1911, was referred to the Comptroller, and on July 20, 1911, the communication of withdrawal was also referred to the Comptroller.)

The Secretary presented the following communication from the Department of Bellevue and Allied Hospitals relating to, and report of the Comptroller recommending approval, pursuant to resolution adopted June 3, 1910, of the plans, specifications and estimate of cost ($1,500) for new flooring on the balconies of the Harlem Hospital, under the jurisdiction of said Department:

Bellevue and Allied Hospitals, June 23, 1911.

Hon. Joseph Haag, *Secretary, Board of Estimate and Apportionment,* 277 Broadway, New York City:

Sir—On March 30 the Board of Estimate and Apportionment adopted a resolution authorizing the issue of $2,500 corporate stock to provide means for the installation of floors of concrete construction to replace the present flooring of six of the balconies of Harlem Hospital under the jurisdiction of this Department. It has since been discovered that in order to provide concrete floors it will be necessary to construct supporting columns in order to strengthen the brackets which now support the balconies. The estimated cost of doing this work is $4,000. The architects, Messrs. McKim, Mead and White, have suggested that solid iron plates be placed over the present open gratings. This could be done at a cost of $1,500, and it is believed would answer the purpose. The Trustees, therefore, request that the wording of the resolution referred to be amended by omitting the words "for the installation of a floor of concrete construction," so that the resolution may read, "$2,500 to provide means for the replacement of the present flooring," etc. This will enable the contract to be let for the laying of solid iron plates over the present open gratings, as referred to.

The Trustees also have the honor to request that the accompanying plan showing the method of laying the new floors be approved. Respectfully,

M. ROBBINS, Acting Secretary, Board of Trustees.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 22, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 23, 1911, the Trustees of Bellevue and Allied Hospitals requested the approval of plans, specifications and estimate of cost ($1,500) for new flooring on the balconies of the Harlem Hospital, on Lenox avenue, between 136th and 137th streets, Borough of Manhattan.

The balconies, six in number, are to be floored with three-sixteenth-inch thick pressed steel floor plates; the plates are to be secured to the existing balcony flooring by bolts; before laying the plates two thicknesses of roofing felt is to be laid over the entire surface. The cost is to be charged to the Corporate Stock Fund, entitled "C-DH-13B, New Harlem Hospital, Flooring for Six Balconies."

The plans and specifications appear to be complete and satisfactory, and the estimated cost, in the sum of $1,500, reasonable.

I submit for adoption the resolution appended hereto. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution of June 3, 1910, hereby approves the plans, specifications and estimate of cost in the sum of one thousand five hundred dollars ($1,500) for new flooring on the balconies of the Harlem Hospital, on Lenox avenue, between 136th and 137th streets, Borough of Manhattan, under the jurisdiction of the Department of Bellevue and Allied Hospitals.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs

of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Board of Education requesting, and report of the Comptroller recommending, approval of the plans, specifications and estimate of cost ($77,000), for the general construction, etc., of additions to and alterations in Public School No. 20, The Bronx, Department of Education, provided, however, that no alterations shall be paid out of corporate stock except such as are incidental to the construction of the additions:

Board of Education, Park Avenue and 59th Street, New York, July 12, 1911.

Hon. W. A. Prendergast, *Comptroller:*

Dear Sir—I beg to advise you of the receipt of a communication from Mr. C. B. J. Snyder, Superintendent of School Buildings, under date of July 11, 1911, reading as follows:

"I am forwarding herewith plans and specifications for the general construction, etc., of additions to and alterations in Public School 20, Borough of The Bronx, for transmission to the Comptroller, to be presented to the Board of Estimate and Apportionment in compliance with the resolution adopted by that Board on January 5, 1911.

"The plans and specifications have just been returned by the Department of Water Supply, Gas and Electricity, approved, as noted on same."

Approximate cost: $77,000.

The plans and specifications referred to in the foregoing communication are transmitted herewith. Respectfully yours,

A. E. PALMER, Secretary, Board of Education.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 22, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 12, 1911, the Board of Education requested approval of plans, specifications and estimated cost, in the sum of $77,000, for the general construction, etc., of additions to and alterations in, Public School 20, Borough of The Bronx.

An examination of the plans and specifications shows that the new addition will be approximately 50 by 70 feet, five stories in height, and will contain fifteen rooms. A new coal storage building is to be constructed and a new demonstration table, blackboard, etc., are to be placed in one of the rooms on the second floor of the old building, to provide for the higher grade classes which will be established at this school.

The plans and specifications are satisfactory and the estimate of cost reasonable.

The cost of the work is to be charged to the corporate stock fund, "C-DE-110C, Construction and Equipment of an Addition to and Installing Electric Work in Public School 20, Borough of The Bronx." The authorization was approved by the Board of Estimate and Apportionment on March 9, 1911.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution adopted on June 3, 1910, hereby approves the plans, specifications and estimate of cost, seventy-seven thousand dollars ($77,000), for the general construction, etc., of additions to and alterations in Public School 20, Borough of The Bronx, provided, however, that no alterations shall be paid for out of corporate stock except such alterations as shall be necessarily incidental to the construction of the additions, under the jurisdiction of the Department of Education.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following report of the Comptroller referring to the request of the Fire Commissioner for approval of the specifications for alterations to the Telegraph Bureau of the Fire Department Headquarters, Manhattan, and recommending that the Fire Commissioner be notified that the plans and specifications in their present form are satisfactory, but are returned without approval for the reason that the work should not be paid for from an issue of corporate stock:

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 22, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On March 23, 1911, the Fire Commissioner submitted for approval the specifications for alterations to the Telegraph Bureau on the sixth floor of the Fire Department headquarters building, 157-159 East 67th street, Manhattan.

Bids for the work were received on March 17, 1911, and the estimated cost in the sum of $2,266, is the amount of the lowest bid.

It is proposed to charge the cost against two accounts, as follows:

Corporate Stock Fund.

C-FD-19A. Sites and Buildings:	
Alterations to headquarters building....................................	$2,123 91
1911 Budget Appropriation—	
975. Fire Department, Administration, Repairs and Replacements by Contract or Open Order....................................	$142 09

The cost, therefore, would be charged almost entirely against corporate stock, although the work consists of repairs, new flooring, changes in the location of partitions and electric light outlets.

Since the plans and specifications for the electric work were submitted for approval they have been redrawn and rewritten to secure the approval of the Department of Water Supply, Gas and Electricity.

The corporate stock fund C-FD-19A was established by the appropriation of $100,000 by the Board of Estimate and Apportionment on April 2, 1909, "for the purpose of providing means for alterations to the present headquarters building of the Fire Department, on 67th street west of 3d avenue, Borough of Manhattan, and for the completion and equipment of the extension thereto."

The proposed use of the unexpended balance in the fund for alterations to the sixth floor of the old building, principally in the rooms formerly occupied by the electric batteries of the telegraph system which have been moved into the new annex building, is not contrary to the purpose for which the appropriation was authorized. The work, however, calls for alterations and repairs, and the cost should not be charged against corporate stock.

I recommend, therefore, that the Fire Commissioner be notified that the plans and specifications in their present form are satisfactory, but that they are returned without approval for the reason that the work should not be paid for from an issue of corporate stock. Respectfully, WM. A. PRENDERGAST, Comptroller.

The Secretary was directed to notify the Fire Commissioner of the recommendations contained in the report of the Comptroller and to return the plans referred to therein for the reasons set forth in said report.

The Secretary presented the following communications from the Commissioner of Records of New York County, submitting plans and specifications for steel file cases in the office of the County Clerk, New York County, in the County Court House, together with a report of the Comptroller, to whom on June 29, 1911, this matter was referred, recommending that said plans and specifications, be disapproved, as they still contain defects of various kinds and call for a large number of cases unnecessarily expensive in details of construction and finish:

Commissioner of Records of the County of New York, Hall of Records, Borough of Manhattan, City of New York, June 24, 1911.

Hon. WILLIAM J. GAYNOR, *Mayor:*

Dear Sir—It is in obedience to the direction of the law that steel file cases and furnishings shall be provided for the office of the Clerk of the County of New York in the County Court House, "without unnecessary delay," that I request the Board of Estimate and Apportionment, in the communication enclosed herewith, to authorize the required issue of corporate stock before the adjournment of the Board for vacations, in order that the contract may be made and the work progressed during the summer; thus avoiding an unnecessary delay of several months.

The plans, form of contract and specifications, now submitted by direction of the statute, are exactly the same for what is required as the plans, contract and specifications, approved by the Board of Estimate and Apportionment upon the recommendation of the Comptroller, on December 1, 1910, and for which a contract was awarded on January 12, 1911; and similar to the plans, form of contract and specifications for what is now required, submitted to the Board and referred to the Stock Budget Committee on January 12, 1911, except that, as I explained when I appeared before that Committee on June 2, 1911, a reduction is made in the number of "case sections" required because of the enactment of laws permitting the destruction of old and useless records, with a relative decrease in the estimate of cost.

I assume it will be unnecessary, therefore, to delay action now, as the Stock Budget Committee has had these plans, contracts and specifications under consideration since January 12, 1911; and the request that provision should be immediately made for steel file cases and furnishings in the office of the Clerk of the County of New York in the County Court House has been under consideration by the Board of Estimate and Apportionment since May 21, 1909.

A certified copy of chapter 291, Laws of 1911, has been sent to the Secretary of the Board of Estimate and Apportionment. Very truly yours,

WILLIAM S. ANDREWS, Commissioner of Records, County of New York.

Commissioner of Records of the County of New York, Hall of Records, Borough of Manhattan, City of New York, June 24, 1911.

Hon. WILLIAM J. GAYNOR, *Mayor, Chairman, Board of Estimate and Apportionment:*

Dear Sir—As directed to do by chapter 291, Laws of 1911, I hereby report to the Board of Estimate and Apportionment plans, forms of contract and specifications for steel file cases and necessary furnishings required for the record rooms in the office of the Clerk of the County of New York in the County Court House, the estimated cost for which is $70,000.

There is an unexpended balance of more than $10,000 authorized to be used for the purpose of providing such steel file cases and furnishings; so that all that is required to be now authorized for this purpose is $60,000.

I, therefore, request your Board to authorize the Comptroller to issue and sell corporate stock to the amount of $60,000, to be applied to the cost of such steel file cases and furnishings.

I request your Board to make such authorization of corporate stock before the adjournment for the summer recess, in order that there may not be unnecessary delay in awarding a contract and proceeding with the work necessary for the care of the records and to safeguard them against danger from fire.

The estimated cost for such file cases and furnishings, as stated in my communication of January 9, was $75,000. Since then provision has been made by chapters 274 and 275, Laws of 1911, for the destruction of old and useless records, which will effect a saving of approximately one thousand cubic feet in the case space required, with a consequent reduction in cost. It is because of this reduction in the number of cases required that the estimate of cost is less. Respectfully submitted,

WILLIAM S. ANDREWS, Commissioner of Records, County of New York.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 22, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 24, 1911, the Commissioner of Records of the County of New York requested the Board of Estimate and Apportionment to authorize the issue of $60,000 corporate stock for steel file cases and necessary furnishings required for the record rooms in the office of the Clerk of the County of New York in the County Court House.

The Commissioner, with his request, transmitted a form of contract and plans and specifications for the steel file cases. He states that the estimated cost of the work is $70,000 and that there is an unexpended balance of more than $10,000 authorized for this purpose, so that the sum now required to be now authorized is $60,000.

On January 9, 1911, the Commissioner of Records requested this Board to authorize the issue of $75,000 in corporate stock for the purchase of steel file cases and furnishings in the office of the Clerk of the County of New York, and submitted plans and specifications for same.

The plans and specifications were redrawn, and those afterward submitted contained many discrepancies and indefinite requirements. On March 16, 1911, they were returned to the Commissioner without approval.

In the plans and specifications now submitted, certain suggestions made by the Department of Finance have been included and the number of cases called for has been reduced to the number recommended in my report of March 16, 1911. They still contain, however, defects of various kinds and call for a large number of cases unnecessarily expensive in details of construction and finish.

The statement as to unnecessary expense relates to cases to be used for the storage of documents in rooms not open to the public. These cases are to be made of a double shell, with adjustable shelving, and are to be finished with three coats of white varnish, each baked and rubbed down, applied over the two-coat Japan finish.

There are other defects in the plans and specifications.

Upon the end elevations of all articles of furniture shown in the plans are lines evidently intended to indicate ornamental mouldings, and the specifications state that all ornamental mouldings shall be of No. 14 gauge wrought iron. It is impossible to determine from the specifications whether mouldings are required or not. In describing the "case sections" the specification requires "These sections to be plain boxes as shown, without projections of any kind, except one-half inch at bottom." A decision by the architect after the contract has been made, that these lines are not intended to represent mouldings would save the contractor a considerable sum of money.

It is possible that ornamental panels are desired only at exposed ends of groups of cases. There are, however, no floor plans showing how many such ends there will be.

The absence of any floor plans or information as to the location proposed for the cases and furniture makes it difficult for a bidder to calculate the cost of complying with the following articles of the contract:

The contractor shall be held responsible for the overall sizes of each piece of furniture. He must at his own expense take all measurements of the rooms in which the furniture will be set up. He shall ascertain the conditions in these rooms and shall make the furniture suit the conditions, finishing his work in a neat and substantial manner and to the satisfaction of the architect.

In carrying out the hereinafter described work, should any electric, heating, vacuum-sweeping or plumbing lines, etc., be met with, the same must be charged to suit the instructions of the architect.

In reference to Figures 2, 3 and 4 of the plans, the outside dimensions shown, which agree with the figures quoted in the specifications, can be followed by the contractor, but the cases will not then agree with the interior dimensions quoted on the plan. It is the intention to settle these questions with the contractor after the contract has been made.

The details of the construction of the card index units are not given either in the plans or specifications.

On July 17, 1911, an appropriation of $25,000 was authorized by the Board of Estimate and Apportionment for file cases and furnishings for the office of the Clerk of the County of New York in the County Court House. With the unexpended balance from a former appropriation of approximately $10,000, there is therefore $35,000 available for this work. The plans and specifications call for labor and material costing more than this amount.

I recommend that the plans and specifications be not approved.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the plans and specifications submitted by the Commissioner of Records, under date of June 24, 1911, for steel file cases and necessary furnishings required for the record rooms in the office of the County Clerk of New York County, at an estimated cost of seventy thousand dollars ($70,000), be and the same are hereby disapproved.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary was directed to return the form of contract, etc., and to transmit a copy of the report of the Comptroller to the Commissioner of Records, New York County.

The Secretary presented a report of the Corporate Stock Budget Committee stating that action cannot safely be taken on the balance in the corporate stock account for a new site and building for the College of The City of New York, amounting to

$8,485.82, until such time as the drainage tunnel has been completed owing to the uncertainty as to its cost.

Which was ordered filed and the Secretary directed to transmit a copy thereof to the College of The City of New York.

(On December 22, 1910, the corporate stock estimate of the College of The City of New York for the years 1911 to 1915 was referred to said committee.)

The Secretary presented the following communication from the Department of Bellevue and Allied Hospitals relative to, and report of the Corporate Stock Budget Committee recommending, that the resolution adopted by the Board on March 30, 1911, authorizing an issue of $2,500 corporate stock to provide means for the installation of a floor of concrete construction, for the replacement of the present flooring of six of the balconies at Harlem Hospital, be amended by substituting the words "for the installation of a water-tight flooring on six of the balconies of Harlem Hospital" for the words "for the installation of a floor of concrete construction, for the replacement of the present flooring of six of the balconies at Harlem Hospital."

(On June 29, 1911, the request of the Board of Trustees for the amendment of the above resolution was referred to said committee.)

Bellevue and Allied Hospitals, Office of the Board of Trustees, 1st Avenue and 26th Street, New York, June 23, 1911.

Hon. Joseph Haag, *Secretary, Board of Estimate and Apportionment,* 277 Broadway, New York City:

Sir—On March 30 the Board of Estimate and Apportionment adopted a resolution authorizing the issue of $2,500 corporate stock to provide means for the installation of floors of concrete construction to replace the present flooring of six of the balconies of Harlem Hospital under the jurisdiction of this Department. It has since been discovered that in order to provide concrete floors it will be necessary to construct supporting columns in order to strengthen the brackets which now support the balconies. The estimated cost of doing this work is $4,000. The architects, Messrs. McKim, Mead and White, have suggested that solid iron plates be placed over the present open gratings. This could be done at a cost of $1,500, and it is believed would answer the purpose. The Trustees, therefore, request that the wording of the resolution referred to be amended by omitting the words "for the installation of a floor of concrete construction," so that the resolution may read, "$2,500 to provide means for the replacement of the present flooring, etc." This will enable the contract to be let for the laying of solid iron plates over the present open gratings, as referred to.

The Trustees also have the honor to request that the accompanying plan showing the method of laying the new floors be approved. Respectfully,

A. M. ROBBINS, Acting Secretary, Board of Trustees.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 22, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 23, 1911, the Trustees of Bellevue and Allied Hospitals requested amendment of a resolution adopted by the Board of Estimate and Apportionment on March 30, 1911, approving of an issue of corporate stock to an amount not exceeding $2,500, to provide means for the installation of a floor of concrete construction for the replacement of the present flooring of six of the balconies at Harlem Hospital. The Board of Aldermen concurred in the appropriation on April 11, 1911.

It has since been discovered that to provide for concrete floors it will be necessary to construct supporting columns in order to strengthen the brackets which now support the balconies. Messrs. McKim, Mead & White, the architects, therefore, have suggested that instead of new concrete floors, solid iron plates be placed over the present open gratings.

This will be cheaper construction, and we concur in the opinion of the architects that it will answer the purpose.

We recommend the adoption of the attached resolution approving the request.

Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan; Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Estimate and Apportionment on March 30, 1911, and concurred in by the Board of Aldermen on April 11, 1911, as follows:

"Resolved, That, pursuant to section 47 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding two thousand five hundred dollars ($2,500), to provide means *for the installation of a floor of concrete construction, for the replacement of the present flooring of six of the balconies, at Harlem Hospital,* and when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller is authorized to issue corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, to an amount not exceeding two thousand five hundred dollars ($2,500), the proceeds whereof to be applied to the purposes aforesaid."

—be and the same is hereby amended to read as follows:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding two thousand five hundred dollars ($2,500), to provide means *for the installation of a water-tight flooring on six of the balconies at Harlem Hospital,* and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the President of the Borough of Richmond relative to, and report of the Corporate Stock Budget Committee recommending, approval of the schedule, as revised for the budgetary part schedule No. 1892, Bureau of Engineering (Construction) and of the schedule for employees to be paid out of the Corporate Stock Fund for a Sewage Disposal Experimental Plant, Office of said Borough President, providing for increases in compensation of nine incumbents, and for an Assistant Engineer at $2,250 and three Laborers at $900 per annum each in the new schedule:

(On June 8, 1911, a communication from the President of the Borough of Richmond, relative to certain modifications of the present salary schedules for the Bureau of Engineering, Construction, and the adoption of a schedule for the Sewage Disposal Plant was referred to said Committee.)

Bureau of Engineering Construction, Borough Hall, New Brighton, New York City, June 2, 1911.

Board of Estimate and Apportionment, 277 Broadway, New York City:

Sirs—In adopting the Corporate Stock Budget for 1911, for matters affecting the Department of the President of the Borough of Richmond, we would like to have certain modifications of the present salary schedules for the Bureau of Engineering Construction made, so as to provide for a few changes in salaries which I propose to make, as follows:

Present Budget Schedule.

1 Engineer at, per annum	$4,000 00
1 Assistant Engineer at, per annum	3,000 00
3 Assistant Engineers at, per annum	2,700 00
5 Assistant Engineers at, per annum	2,250 00
3 Assistant Engineers at, per annum	2,000 00
2 Assistant Engineers at, per annum	1,800 00
2 Assistant Engineers at, per annum	1,650 00
2 Transitmen at, per annum	1,800 00
1 Transitman at, per annum	1,650 00
1 Transitman at, per annum	1,350 00
1 Transitman and Computer at, per annum	1,800 00
2 Transitmen and Computers at, per annum	1,650 00
1 Transitman and Computer at, per annum	1,500 00
1 Leveler at, per annum	1,500 00

5 Rodmen at, per annum	1,200 00
2 Rodmen at, per annum	900 00
3 Axemen at, per annum	900 00
1 Searcher at, per annum	1,200 00
1 Topographical Draftsman at, per annum	1,800 00
2 Topographical Draftsmen at, per annum	1,650 00
3 Topographical Draftsmen at, per annum	1,500 00
1 Topographical Draftsman at, per annum	1,350 00
1 Clerk at, per annum	1,650 00
1 Clerk at, per annum	1,350 00
1 Stenographer and Typewriter at, per annum	1,500 00
1 Messenger at, per annum	1,050 00
1 Auto Engineman, at, per annum	1,050 00
8 Inspectors of Regulating and Grading, etc., at, per annum	1,200 00
9 Inspectors of Sewer Construction at, per annum	1,500 00
8 Foremen at, per annum	1,050 00
5 Drivers at, per annum	900 00
17 Laborers at, per annum	900 00
1 Laborer at, per annum	720 00
3 Laborers, at, per day	2 00

Proposed Budget Schedule.

1 Engineer at, per annum	$5,000 00
1 Assistant Engineer at, per annum	3,000 00
3 Assistant Engineers at, per annum	2,700 00
3 Assistant Engineers at, per annum	2,400 00
2 Assistant Engineers at, per annum	2,250 00
4 Assistant Engineers at, per annum	2,000 00
2 Assistant Engineers at, per annum	1,800 00
1 Assistant Engineer at, per annum	1,650 00
2 Transitmen at, per annum	1,800 00
1 Transitman at, per annum	1,650 00
1 Transitman at, per annum	1,350 00
1 Transitman and Computer, per annum	1,800 00
2 Transitmen and Computers, per annum	1,650 00
1 Transitman and Computer, per annum	1,500 00
1 Leveler at, per annum	1,500 00
5 Rodmen at, per annum	1,200 00
2 Rodmen at, per annum	900 00
3 Axemen at, per annum	900 00
1 Searcher at, per annum	1,200 00
2 Topographical Draftsmen at, per annum	1,800 00
1 Topographical Draftsman at, per annum	1,650 00
3 Topographical Draftsmen at, per annum	1,500 00
1 Topographical Draftsman at, per annum	1,350 00
1 Clerk at, per annum	1,650 00
1 Clerk at, per annum	1,500 00
1 Stenographer and Typewriter at, per annum	1,500 00
1 Messenger at, per annum	1,050 00
1 Auto. Engineman at, per annum	1,500 00
8 Inspectors of Regulating and Grading, etc., at, per annum	1,200 00
8 Inspectors of Sewer Construction at, per annum	1,500 00
8 Foremen at, per annum	1,050 00
5 Drivers at, per annum	900 00
18 Laborers at, per annum	900 00
3 Laborers at, per day	2 00

Following are the names of the employees whose salaries it is proposed to change, and the reasons therefor in each case:

There are several employees in this Bureau who are deserving of recognition for faithful services performed over a long period of time, and I beg to make the following recommendations:

Theodor S. Oxholm, Engineer, from $4,000 to $5,000 per annum.

"May 17, 1911.

"*Board of Estimate and Apportionment,* 277 Broadway, New York:

"Gentlemen—Last year we requested the establishment of the position of Engineer in the Borough of Richmond for one incumbent at a salary of $5,000, making an increase for the present incumbent of the position of $1,000.

"Due to the great effort making for economy and even decreasing City expenditures, favorable consideration was not given to our request and, in fact, we were willing to have this Borough share reasonably with the whole City in the line of retrenchment.

"There are other questions, however, beside those of retrenchment, and the important ones are justice and proper equalization in remuneration for similar work in similar departments of the City service.

"The incumbent of the present position, whose services it is our desire to recognize by this increase, has been in different departments of New York City and the County of Richmond for nearly twenty-seven years, with increasing responsibilities and increasing efficiency.

"The expense can be met for this year without any increase in present appropriation.

"We would ask that this matter receive immediate and favorable consideration, so that the Board of Aldermen may be able to pass upon the establishment of the position and the change can go into effect as soon as possible.

"Yours very truly, GEORGE CROMWELL, President of the Borough."

William B. Grubbe, Cherry Lane, West New Brighton;
Henri Mouronval, Westerleigh, West New Brighton;
William MacDonald, Richmond avenue, Port Richmond.

The above three men are in charge of divisions of work and have been receiving $2,250 since January 1, 1909. Their services require judgment, accuracy and the full responsibility for their work and that of the men under them which they are obliged to carry. They have been faithful in their services and the work under them has been carried on in a satisfactory manner, and I believe their services are worth at least $2,400 per annum. I would, therefore, recommend that the salaries of the above men be increased from $2,250 to $2,400 per annum, to take effect as soon as the necessary authorizations are obtained.

William J. Noonan, 421 Cary avenue, West New Brighton, Assistant Engineer at $1,800 per annum. Mr. Noonan has been employed for the last three years on the St. George improvement. Since the resignation from the service of Mr. Weinstock, Mr. Noonan has taken charge of all street grades and holds a responsible position. His last increase in salary was two years ago, and his services have been in every way satisfactory, and the character of his work is of much importance and deserving of greater remuneration, and I recommend that his salary be increased to $2,000, to take effect as above.

Travis E. Harris, Jr., 201 Dongan street, West New Brighton, Assistant Engineer at $1,650 per annum, has been in this Bureau for over five years. He is highly recommended by his immediate superiors for general ability, and he is receiving a much lower compensation than other engineers in this department doing similar work. He was increased from $1,500 to his present salary on January 1, 1910. I would recommend that his salary be made $1,800 per annum, to take effect as soon as the necessary authorization has been obtained.

Amzi T. Rogers, Topographical Draftsman, 136 Bodine street, West New Brighton, has been receiving $1,650 for the past three years. He has been employed principally in the sewer designing room in preparing maps showing locations of old sewers in the Borough, and latterly of subsurface structures developed by sewer construction. It is proposed to place him on the special work of substructure maps as soon as this division is established, which will be in a short time, and provision must be made in the next Budget for this work. He has been faithful in his services, and his immediate superior recommends him for promotion; therefore, I would request that his salary be increased to $1,800 per annum, to take effect as above.

George F. Callahan, Clerk at $1,350 per annum, has been receiving this salary for the past two years. He has charge of the preparation of all contract forms, both for the printer and for contract letting; also all bidding sheets and advertisements. This work is of great importance and the accuracy which has been shown is rather remarkable when the difficulty of the matter is considered. There are constant changes being made by the Corporation Counsel in contract forms, which must all be noted particularly and used in future work. The entire responsibility of these matters is placed on Mr. Callahan's shoulders, and I would recommend that his salary be increased to $1,500 per annum as being more commensurate with the duties he performs than his present salary; same to take effect as above recommended.

John H. Dickermann, 43 Elm place, Castleton Corners, Laborer at $720 per annum. He is the only laborer in this Bureau receiving less than $900 per annum. His services have been satisfactory, and I would recommend that his salary be increased to $900 per annum, as soon as the necessary authorization can be obtained.

In connection with the issue of Corporate Stock for Sewage Disposal Experiment Plant, we wish to have adopted the following schedule of salaries:

1 Assistant Engineer	$2,250 00
1 Chemist	1,500 00
3 Laborers at $900	2,700 00

Very truly yours, GEORGE CROMWELL, President of the Borough.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 7, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 2, 1911, the President of the Borough of Richmond requested modification of the budgetary part schedule for the Bureau of Engineering-Construction in his office for the year 1911; and approval of a schedule for employees to be paid out of a Corporate Stock Fund for a Sewerage Disposal Experimental Plant. In connection therewith we report as follows:

It is proposed to increase the compensation of nine incumbents. One increase is for $1,000 per annum, one for $200, and seven are for $150 each, or a total yearly increase in cost of $2,250.

The $1,000 increase is for Theodore S. Oxholm, Engineer, in charge of the Bureau. On June 27, 1911, the necessary grade of position for the increase was established, pursuant to the provisions of section 56 of the Greater New York Charter.

Three assistant engineers are proposed for increase from $2,250 to $2,400 per annum. The incumbents are William B. Grubbe, Henri Mouronval and William MacDonald. All three are in charge of divisions, and have been at their present rate since January 1, 1909. The President states that their services require judgment and accuracy, and entail full responsibility for the work of the men under them.

The $200 increase is for William J. Noonan, an Assistant Engineer, at $1,800 per annum. The incumbent has been assigned for the last three years to the St. George improvement, and for some time, in addition, has had full charge of all street grades. He was last increased two years ago.

Travis E. Harris, assistant engineer, is proposed for increase from $1,650 to $1,800 per annum. The President states that Mr. Harris is receiving a much lower rate of compensation than other engineers in the department doing similar work.

Amzi T. Rogers, Topographical Draftsman, is proposed for increase from $1,650 to $1,800 per annum. He has been at the present rate three years. He has worked chiefly in sewer designing, in the preparation of maps showing locations of old sewers and of subsurface structures developed by sewer construction. It is proposed to assign him to the special work of subsurface maps as soon as a division for this work is established.

George F. Callahan, Clerk, is proposed for increase from $1,350 to $1,500 per annum. He has been at the present rate for two years. He is in charge of all contract forms, both for the printer and for contract letting; also bidding sheets and advertisements. The President states that the work requires the utmost accuracy.

It is further proposed to increase John H. Dickerman, a Laborer, from $750 to $900 per annum. The incumbent is the only laborer in the Bureau receiving less than $900.

Your Committee has approved of the issue of Corporate Stock to the amount of $30,000 for the Sewerage Disposal Experimental Plant. The authorization is for construction and maintenance. The proposed schedule calls for an Assistant Engineer, at $2,250 per annum, a Chemist at $1,500, and three Laborers at $900 per annum each. Your Board has approved of the establishment of the position of Chemist at $1,500, pending action by the Board of Aldermen. The line has been omitted from the schedule.

We recommend that the request be approved, with the exception noted, by the adoption of the attached resolutions. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan; Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the office of the President of the Borough of Richmond, for the year 1911, as follows:

President, Borough of Richmond.

Bureau of Engineering—(Construction)—

1892. Salaries:

Engineer	1 at	$5,000 00
Assistant Engineer	1 at	3,000 00
Assistant Engineers	3 at	2,700 00
Assistant Engineers	3 at	2,400 00
Assistant Engineers	2 at	2,250 00
Assistant Engineers	4 at	2,000 00
Assistant Engineers	2 at	1,800 00
Assistant Engineer	1 at	1,650 00
Transitmen	2 at	1,800 00
Transitman	1 at	1,650 00
Transitman	1 at	1,350 00
Transitman and Computer	1 at	1,800 00
Transitmen and Computers	2 at	1,650 00
Transitman and Computer	1 at	1,500 00
Leveler	1 at	1,500 00
Rodmen	5 at	1,200 00
Rodmen	2 at	900 00
Axemen	3 at	900 00
Searcher	1 at	1,200 00
Topographical Draftsmen	2 at	1,800 00
Topographical Draftsman	1 at	1,650 00
Topographical Draftsmen	3 at	1,500 00
Topographical Draftsman	1 at	1,350 00
Clerk	1 at	1,650 00
Clerk	1 at	1,500 00
Stenographer and Typewriter	1 at	1,500 00
Messenger	1 at	1,050 00
Auto-Engineman	1 at	1,050 00
Inspectors of Regulating, Grading and Paving	8 at	1,200 00
Inspectors of Sewer Construction	9 at	1,500 00

Wages, Regular Employees:

Foremen	8 at	1,050 00
Drivers	5 at	900 00
Laborers	18 at	900 00

Laborers, 3 at $2 per day (302 days).

Budgetary part allowance, $40,525.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule for the office of the President of the Borough of Richmond, as follows:

Sewerage Disposal Experimental Plant—

Salaries Corporate Stock Force:

Assistant Engineer	1 at	$2,250 00
Laborers	3 at	900 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following report of the Corporate Stock Budget Committee relative to increases in compensation of four employees in the Topographical Bureau, Borough of Queens.

(On March 9, 1911, the request of the President of the Borough of Queens for authority to increase the compensation of three Topographical Draftsmen, and one Stenographer and Typewriter in the Topographical Bureau, was referred to the Committee on Salaries and Grades.)

(On April 13, 1911 (pages 1560-1561 pamphlet minutes), the Board adopted a resolution, on the recommendation of the Committee on Salaries and Grades, disapproving said request, and on April 20, 1911 (page 1657 pamphlet minutes), the vote on the resolution of April 13 was reconsidered and the matter ordered placed on the Calendar for the meeting of May 4, 1911.)

(At various meetings after said date the matter was placed on the Calendar and laid over, and on May 25, 1911, was referred to the above committee.)

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, June 30, 1911.

To the Board of Estimate and Apportionment.

Gentlemen—On March 1, 1911, the President of the Borough of Queens requested increased compensation, in the sum of $600 per annum, for four employees paid from funds other than Budget appropriation. On May 25, 1911, a report of the Select Committee on the matter was referred to the Corporate Stock Budget Committee. In connection therewith we report as follows:

The incumbents for the proposed increases are in the Topographical Bureau of the Borough. Their periods of service, rates of compensation, etc., are as follows:

Topographical Draftsman, from $1,350 *to* $1,500 *Per Annum.*

Gilbert S. Lemley, appointed on September 9, 1907, at $1,200 per annum; increased on July 1, 1909, to the present rate.

Topographical Draftsman, 2 from $1,200 *to* $1,350 *Per Annum.*

Henry P. Labelle, appointed on December 1, 1906, as Axeman with the Rapid Transit Commission, at $720 per annum. Appointed as Topographical Draftsman in the office of the President of the Borough of Queens on September 1, 1907, at the present rate.

John W. Soule, appointed on December 10, 1906, as Rodman with the Rapid Transit Commission, at $960 per annum. Appointed as Topographical Draftsman in the office of the President of the Borough of Queens on September 16, 1907, at the present rate.

Stenographer and Typewriter, 1, *from* $900 *to* $1,050 *Per Annum.*

Mary A. Carabine, appointed on May 1, 1908, in the Department of Public Charities, at $600 per annum. Transferred to the office of the President of the Borough of Queens on June 21, 1909, at the present rate.

No additional appropriation or modification of the schedule is necessary, as vacancies permit of the increases. Mr. Lemley is to be promoted to a vacancy caused by the death of a Topographical Draftsman. One of the Draftsmen, at $1,200, is to fill Mr. Lemley's present position; the other $1,200 incumbent is to be promoted to fill a $1,350 position left vacant by resignation. The two $1,200 positions are to be filled by appointment. On February 23, 1911, your Board provided by modification of the Topographical Schedule for an additional Stenographer at $1,050. It is proposed to promote Miss Carabine to the rate, and fill the $900 position by appointment.

The attached resolution, if adopted, will grant the request. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan; Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of increases in compensation for employees in the Topographical Bureau, office of the President of the Borough of Queens, as follows:

		Rate Per Annum.
Topographical Draftsman	1	from $1,350 00 to $1,500 00
Topographical Draftsman	2	from 1,200 00 to 1,350 00
Stenographer and Typewriter	1	from 900 00 to 1,050 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the District Attorney, New York County, requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen recommending, the establishment in the Office of said District Attorney of the grade of position of Stenographer to Grand Jury at $10 per diem for three incumbents, and that the grade of Stenographer to Grand Jury at $3,000 per annum be abolished:

(On July 6, 1911, a communication from the District Attorney of New York County relative to the above matter was referred to the Comptroller.)

District Attorney's Office, County of New York, July 5, 1911.

To the Honorable Board of Estimate and Apportionment, City of New York:

Gentlemen—I hereby respectfully request that, pursuant to section 56 of the Greater New York Charter, you recommend to the honorable Board of Aldermen the establishment of the position of Stenographer to the Grand Jury, three (3) incumbents at $10 per diem each, in the Office of the District Attorney of the County of New York, to take effect September 1, 1911.

The necessity for this request is due to the fact that chapter 115, Laws of 1911, provides for the appointment of two (2) additional Grand Jury Stenographers, County of New York. The additional cost to the County for the employment of said two additional Grand Jury Stenographers is fully explained in my communication to your honorable Board under date of the 29th ultimo, wherein the necessary appropriation is requested for the employment of said two Stenographers. This application will appear on your calendar on Thursday, July 6, 1911.

Very truly yours, CHARLES S. WHITMAN, District Attorney.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 12, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 5, 1911, the District Attorney of the County of New York requested the establishment, pursuant to the provisions of section 56 of the Greater New York Charter, of the grade of position of Stenographer to the Grand Jury, at $10 per diem, for three incumbents, to take effect September 1, 1911. In connection therewith we report as follows:

Chapter 115 of the Laws of 1911 provides, in part, as follows:

> In the county of New York it shall be lawful for the District Attorney of such county to appoint three stenographers, each of whom shall have authority to take and transcribe the testimony given before the grand juries in said county of New York.

The District Attorney states that the establishment is necessary owing to an increase in the number of grand juries.

We recommend the adoption of the attached resolution approving the request.

Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, recommends to the Board of Aldermen the establishment in the office of the District Attorney, New York County, of the grade of position, as follows:

Title.	Rate Per Diem.	No. of Incumbents.
Stenographer to Grand Jury	$10 00	3

—and that the grade of position of Stenographer to Grand Jury, at $3,000 per annum, be hereby abolished.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Board of Education requesting, and report of Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending, that the compensation of Janitors in the Department of Education be fixed temporarily and until further modified:

(On July 6, 1911, a resolution of the Board of Education relative to the fixing of the compensation of Janitors of certain school buildings was referred to said Committee.)

Board of Education, Park Avenue and 59th Street, New York, June 29, 1911.

Mr. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Dear Sir—I have the honor to transmit herewith a certified copy of a resolution adopted by the Board of Education at a meeting held on the 28th inst., relative to fixing the compensation of the Janitors of certain school buildings.

Respectfully yours, A. E. PALMER, Secretary, Board of Education.

Resolved, That the Board of Estimate and Apportionment be and it is hereby respectfully requested to recommend to the Board of Aldermen that the compensation of Janitors of public school buildings, etc., be fixed in accordance with the following list, taking effect on the date indicated in each instance:

Transfer.

William J. Meaney, Jr. (Janitor), from Public School 23, Queens, to Public School 37, Brooklyn; annual compensation, $1,836; taking effect July 1, 1911.

Temporary Assignment.

John E. Rooke, assigned to Public School 22, Brooklyn; compensation, $90 per month; taking effect June 12, 1911.

Appointment.

Benjamin T. Corwin (Janitor with knowledge of steam heating); Public School 32 (Annex), The Bronx; compensation, $884; taking effect July 1, 1911.

Changes in Compensation.

Janitor, Public School 15, The Bronx, for the care of additional portable buildings, from $480 to $720 per annum, taking effect June 14, 1911.

Janitor, Public School 66, Manhattan, for the temporary care of Public School 30, Manhattan, from $200 to $292 per month, taking effect June 16, 1911. (In order to get the building in proper condition.)

Janitor, Jamaica High School, from $900 to $1,080 per annum, taking effect July 1, 1911. (Compensation made the same as all direct system schools.)

Janitors of all school buildings having baths, which are used in connection with summer playgrounds, $1 per session.

True copy of resolution adopted by the Board of Education on June 28, 1911.

A. E. PALMER, Secretary, Board of Education.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 13, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 28, 1911, the Board of Education requested the fixation, pursuant to the provisions of section 56 of the Greater New York Charter, of the compensation of six Janitors for Public Schools 37 and 22, Brooklyn, 32 Annex and 15, The Bronx, 66, Manhattan, and the Jamaica High School, and an extra allowance of $1 per session each for all Janitors of school buildings having baths which are used in connection with summer playgrounds.

We recommend that the request be granted by the adoption of the attached resolution. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following was offered:

Whereas, By opinions of the Corporation Counsel, as of June 28, 1910, and July 30, 1910, the Comptroller was advised that the payment of salaries of Janitors in the Department of Education is illegal, unless such salary shall have been established under the provisions of section 56 of the Greater New York Charter; and

Whereas, The matter of adjusting the compensation of Janitors and the fixation of their salaries under the provisions of section 56 of the Charter, is now in the hands of a Special Committee of the Board of Estimate and Apportionment; therefore be it

Resolved, That pursuant to the provisions of section 56 of the Charter, the Board of Estimate and Apportionment hereby recommends to the Board of Aldermen, pending the report of said Committee, the compensation of Janitors in the Department of Education be fixed temporarily, and until further modified, in accordance with the following list:

Title and School.	Compensation.
Janitor, 37, Borough of Brooklyn	$1,836 00 per annum
Janitor, 22, Borough of Brooklyn	90 00 per month
Janitor (J. S. H.), 32 (Annex), Borough of The Bronx	884 00 per annum
........, 15, Borough of The Bronx (for care of portable buildings)	720 00 per annum
........, 66, Borough of Manhattan (for temporary care of Public School 30)	292 00 per month
Janitor, Jamaica High School	1,080 00 per annum
Janitor, in any school having bath, which is used in connection with a summer playground	$1 per session, extra

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented a report of the Commissioner of Parks, Boroughs of Brooklyn and Queens, referring to a resolution of the Board of Aldermen requesting the establishment of the grades of positions of Gardener in Charge, at $115 per month, and Gardener, at $90 per month, and stating that he is in favor of increasing the compensation of skilled men performing such work, and will request an appropriation for this purpose in the Budget estimate for his Department for the year 1912.

Which was ordered filed and the Secretary directed to transmit a copy thereof to the Board of Aldermen and William Dilm, Secretary, Special Committee of Gardeners in Greater New York.

(On July 6, 1911, a report of the Committee on Salaries and Grades, relative to the above resolution of the Board of Aldermen, and to a communication from the Secretary of a Special Committee of Gardeners in Greater New York, was referred to the Commissioners of Parks, for such action as they deemed proper.)

The Secretary presented a report of the Commissioner of Parks, Boroughs of Brooklyn and Queens, referring to a communication from the New York Per Diem Men's Civil Service Association and the New York Civil Service Association, relative to equalizing the wages of Foremen in the Park Department in the above boroughs, and stating that he has considered the compensation of these employees inadequate and will renew a request for an appropriation to increase their salaries in the Budget estimate for his Department for the year 1912.

Which was ordered filed and the Secretary directed to transmit a copy thereof to the above-named associations.

(On July 6, 1911, a report of the Committee on Salaries and Grades, recommending that the communications from the above associations be referred to the Commissioner for such action as he deemed proper, was presented and referred accordingly.)

The Secretary presented the following communication from the Acting President of the Borough of Queens, transmitting a report of the Engineer in Charge of Highways concerning certain public thoroughfares, with a request that the Board adopt such thoroughfares as City highways, to be repaired and maintained until officially mapped and physically improved at the expense of the City at large, together with a report of the Chief Engineer of the Board and a report of Consulting Engineers of the various boroughs relative thereto:

The City of New York, Offices, Commissioner of Public Works of the Borough of Queens, Long Island City, July 15, 1911.

JOSEPH HAAG, Esq., *Secretary, Board of Estimate and Apportionment:*

Dear Sir—Herewith I transmit a report of the Engineer in Charge of Highways, containing a list of streets which are also shown on the accompanying map, which

I request the Board of Estimate and Apportionment to adopt as City highways to be repaved and maintained as such until officially mapped, physically opened, and a complete paving authorized by the Board as an assessment matter. The present pavement is to be laid to a width not exceeding 25 feet, of a character best suited to withstand the amount of travel to be accommodated. I also submit separate resolutions for adoption in each case. Respectfully,

WALTER H. BUNN, Commissioner of Public Works, and Acting President of the Borough of Queens.

July 10, 1911.

Hon. LAWRENCE GRESSER, *President of the Borough of Queens:*

Dear Sir—In further reference to our most recent interview regarding the improvement of thoroughfares in Queens County, I feel that the time is ripe for you to make a request on the Board of Estimate and Apportionment to temporarily assume this burden, making the construction and maintenance of the through highways a City matter.

Claim has been made that these highways should be kept up by the maintenance bureau of the Borough of Queens. Most or all of these highways have outlived the average life of the water-bound macadam road and effective patching is out of the question in many cases, furthermore it is poor policy from an economical standpoint to further patch these worn out highways; what is needed is reconstruction along more modern lines; the rebuilding of these pavements by methods and with material suitable to withstand changed conditions. On account of the worn out condition of these highways, the patching of them so as to keep them in a travelable condition is beyond the capacity of the maintenance force as provided for in the Budget.

Again claim has been made by others that these thoroughfares should be rebuilt by assessing the cost on the adjoining property. The highways which I now have in mind and which are included in the accompanying list are mostly unmapped, crooked, narrow county roads, not having any fixed widths or established grades other than those established by user. They are yet to be mapped in all but a few cases, and when mapped they are, or will be, shown as widened streets, or as abandoned streets, because of the fact that in many cases they are not adapted to a possible street system and are entirely out of harmony with the same. These highways, however, cannot be abandoned at once, but must be kept up to afford means of communication through the County and between sections of the County until such time as a City street system is not only adopted, but is physically opened and improved on the ground, then and then only can these streets be closed to traffic. It is therefore a fact that after mapping, streets must first be legally opened and then be physically changed as to lines and grades, and according to our system of doing things in this City, the subsurface improvements should be placed before the final pavement for the full width of the street is laid. I would also call attention in connection with this matter that in the majority of the cases, if streets were graded to conform with the street system, the grading would so change the manner and points of collection of surface drainage as to make a storm water sewer system necessary. While the flow and collection of storm water under natural conditions to their present points of collection cause no complaint, or very little, the changed collection to new points would undoubtedly seriously affect properties that now have no water draining upon them, and unless the City were prepared to take care of such collections by means of sewers, disputes and claims for damages would undoubtedly arise. The property facing upon these streets should not be relieved from assessment for paving, but the pavement which they should be assessed for is the final pavement placed for the full width of the street from curb to curb with all subsurface improvements in place. In the meantime the City at large should provide the pavement of sufficient width to properly accommodate the travel.

Again claim has been made by others that the cost of the present macadam pavements were made by the issue of bonds which were assumed in whole or in part by the City at large at the time of consolidation, and that therefore they should not be repaved out of the repaving fund. It seems entirely proper that the City at large should have paid for these improvements, for they bear the same relation to the City as do the state roads of Nassau County to the State, and it would be fair to assume that the State would have paid and maintained the greater portion or all of the highways contained in the accompanying list were they not within the limits of the Greater City.

The travel upon these highways is mostly through travel from Manhattan and Brooklyn into Nassau County, the local traffic being a very, very small percentage of the entire travel upon them, and for this reason the City at large should maintain these highways until these streets are either abandoned or until they become a part of the regular street system of the City.

Again claim has been made by some that in a few instances like the College Point causeway and Jackson avenue the grading of the streets along adopted lines and grades has buried the pavement and therefore a new pavement on this fill should not be properly classed as repaving. Wherein does this case differ from the repaving of streets in Manhattan, where the sheet asphalt paving had been laid upon depressed granite blocks and where in the repaving the entire paving to the bare earth was removed and a new concrete foundation laid in the act of repaving, or wherein does it differ from the streets in Brooklyn, which were paved with cobble stones which in the act of repaving were removed and a concrete foundation laid for sheet asphalt? There is more or less regulating whenever the type of pavement is changed, but still when a street was once paved, a second paving is a repaving, regardless as to whether the grade of the street is changed or not.

In the opinion of the Corporation Counsel submitted to you relative to the repaving of Jackson avenue, we have been advised that the Board of Estimate and Apportionment has authority to authorize the paving or repaving of any streets. It therefore appears to me that this is the key to the situation, and I would suggest that an endeavor be made to have the Board of Estimate and Apportionment pass resolutions adopting the accompanying list of streets as City highways to be paved and maintained as a City charge, the pavement to be laid to such width, as travel may demand, ranging from 18 to 25 feet, the expense thereof to be charged against the repaving fund or any other fund that may be appropriated for the purpose.

On the main through highways a first-class pavement should be laid on a concrete foundation, while on some of the minor highways a bitulithic macadam should be used. The first cost of a high-class pavement will be greater, but the economy in maintenance will within the life of these pavements make them the most economical to the City and they will afford greater comfort to travel and a large saving in maintenance on vehicles, thereby further justifying their use. Let it be understood and be made a part of the preamble to the resolution, if you like, that the property owners are not to be relieved from bearing one full assessment when the street is in condition to receive its permanent pavement for the full width of the street.

I would further suggest that a resolution be adopted authorizing you to repave at once, chargeable against the repaving fund, those portions of the highways contained in the following list, which must require immediate attention.

Herewith I submit a list of streets which should be classed and adopted as *City Highways,* to be paved and maintained at the expense of the City at large until such time as it may be possible to replace them with a City street system.

Respectfully, J. H. WEINBERGER, Engineer in Charge.

List of streets to be paved and maintained by the City at large, until the City street system replaces them:

Flushing and Astoria road, Long Island City line to Jackson avenue; Jackson avenue, Woodside avenue to Flushing Creek; Laurel Hill boulevard, Shell road and Flushing and Newtown turnpike, Newtown Creek to Jackson avenue; Grand street, Newtown Creek to Hoffman boulevard; Metropolitan avenue, Newtown Creek to Jamaica avenue; Myrtle avenue, Cooper avenue to Jamaica avenue; Cooper avenue, Kings County line to Trotting Course lane; Trotting Course lane, Woodhaven avenue, Hoffman boulevard to Rockaway Plank road; Thomson avenue and Hoffman boulevard, Jackson avenue to Jamaica avenue; North Hempstead Plank road, Strongs Causeway, Hempstead Plank road, Hoffman boulevard to Queens road; Main street, Flushing and Jamaica road, Broadway to Hillside avenue; Parsons avenue and Queens road, Broadway to Jamaica, Hempstead turnpike; Bell avenue and Rocky Hill road, Willetts Point road to Jericho turnpike; Little Neck road, Broadway to Jericho turnpike; 13th street, College Point Causeway, Lawrence street, North boulevard to North Hempstead turnpike; 3d avenue and 18th street, Flushing Bay to Bayside avenue; Whitestone avenue, Broadway to 18th street; 4th street and Willetts Point road, Whitestone avenue to Rocky Hill road; 11th avenue and Whitestone road, Boulevard to Broadway; Broadway, Flushing Creek to City line; Union turnpike, Metropolitan avenue to Jamaica Flushing road; Hillside avenue, Myrtle avenue to Rocky Hill road; Jamaica and Hempstead turnpike, Kings County line to City line; Jericho turnpike, Jamaica Hempstead turnpike to City line; Broadway and Liberty avenue, Kings County line to Rockaway road; Rockaway Plank road, Elderts lane to Rockaway road; Alsop street, Rockaway road, Hillside avenue to Hook Creek; Bergen avenue and Merrick road, Hillside avenue to City line; Central avenue, Merrick road to City line; Locust avenue, Rockaway road to Farmers avenue; Farmers avenue, Rockaway road to Jamaica Hempstead turnpike;

Springfield road, Lincoln avenue, Rockaway road to Hillside avenue, Washington avenue, Boulevard, 5th avenue to Nortons Creek; Atlantic avenue, Sea View avenue, Cornaga avenue, Rockaway turnpike, Broadway, Nortons Creek to McNeil avenue.

Board of Estimate and Apportionment, City of New York, Office of the Chief Engineer, 277 Broadway, July 20, 1911.

Hon. William J. Gaynor, *Mayor, Chairman of the Board of Estimate and Apportionment:*

Sir—Under date of July 15, 1911, the Commissioner of Public Works and Acting President of the Borough of Queens has addressed a communication to the Board of Estimate and Apportionment submitting a report of the Borough Engineer in Charge of Highways, with a list of 34 highways which he asks the Board "to adopt as City highways to be repaved and maintained as such until officially mapped, physically opened and a complete pavement authorized by the Board as an assessment matter." This communication was at the meeting of the Board held on July 20, 1911, referred to the Chief Engineer of the Board and the Consulting Engineers of the various boroughs.

Some of the highways named, while continuous, include two or more roads with different names, and their total length is said to be about 115 miles. The recommendation of the Acting Borough President is that, inasmuch as many of these highways have not yet been included in the City plan, and as their final location may differ from their present position, and as the abutting property is largely unimproved and cannot stand an assessment for a substantial pavement, and as these highways are extensively used and their maintenance in good condition is essential for the further development of the Borough of Queens, the only plan which seems feasible is for the City to assume the care of these roads as City streets and to place upon them such pavement as will sustain the existing traffic until the time arrives when they can in their final positions be substantially paved at the expense of the abutting property owners.

The condition of the highways in the Borough of Queens is admittedly most unsatisfactory and has been the occasion of severe criticism by all who have had occasion to use them. The appropriations allowed for the maintenance of existing highways have been wholly inadequate for the care, maintenance and renewal of the system of county roads which was in existence in the Borough of Queens at the time it became a part of the Greater City. The solution proposed by the Acting Borough President would be an easy one for the Borough authorities, but it would involve the appropriation of a large sum of money, anywhere from $1,500,000 to $3,000,000, depending upon the kind of pavement to be used. The highways included in the list submitted with his letter are of two general classes: First, those which have already been officially mapped or are included within the lines of streets officialy mapped, although they may not cover the entire width of such streets. Second, those which have not been mapped or are not included within territory or individual streets already mapped either by local authorities before consolidation or by The City of New York. Assuming that any pavements which might be laid at the public expense would not operate to relieve the abutting owners from the obligation of paying for one substantial pavement covering the entire width of the street, there appear to be good reasons why the general plan proposed by the Acting Borough President should be adopted. There are, however, some very objectionable features of the plan as outlined in his communication, especially that which provides that the highways should be "repaved and maintained as such until officially mapped, physically opened, and a complete paving authorized by the Board as an assessment matter." If the abutttng owners saw a possibility of having the existing highways well paved and maintained, it is extremely probable that the official mapping and the legal opening of these streets would be vigorously opposed in order to save expense to the abutting owners. One of the most serious defects in the development of the outlaying portions of the City has been the failure to fix the lines of what are destined to be important arteries of traffic, giving them an adequate width, and to acquire title to the property required for their ultimate width. Delay in doing this has resulted in the development of the abutting property to such an extent that much needed widenings have been almost prohibitive on account of the expense, and have had to be abandoned. These conditions exist in a marked degree in the Borough of Queens at the present time. There are a great number of highways which will of necessity be the traffic arteries of a great City. No serious effort has been made to establish proper City streets along the lines of these highways, straightening and widening them where necessary and acquiring the property while it is unimproved. I believe, therefore, that the adoption of any such plan as is proposed by the Acting Borough President should be predicated upon the mapping of every one of the streets to be so improved at a width adequate for the future development of the Borough, and the immediate institution of proceedings to acquire the property for the full width of the streets. If the abutting property owners are only asked at the present time to meet the expense of acquiring land so cheap that it is unable to stand an assessment for the improvement of the street, and if the City would then be willing to furnish a substantial pavement for a portion of the width of that street until the property shall have been so developed and its value shall have been so increased as to enable it to pay an assessment for the full improvement of the street, it seems to me that the property owners of the Borough would be treated with extreme liberality, and an opportunity would be offered them to secure a system of streets which would become the traffic arteries of the future city at a minimum of expense.

To simply adopt 115 miles of country roads as City streets and furnish several millions of dollars for their improvement on their present lines, would be unwise, but in my opinion a modified form of the plan suggested by the Borough President might be proper and advantageous. If the Board should approve of this plan, it would seem only proper that it be on condition that the President of the Borough submit to the Board of Estimate and Apportionment for its approval a contract and specification for the paving of each one of these streets before bids are asked for the work.

I have prepared a form of resolution which is designed to carry this plan into effect, and beg to submit it herewith for the consideration of the Board.

Respectfully, NELSON P. LEWIS, Chief Engineer.

Whereas, There are in the Borough of Queens a large number of thoroughfares in general use, some of which have been important highways for many years, and many of which have not yet been mapped; and

Whereas, The traffic on these thoroughfares is so heavy as to require a more substantial pavement than water-bound macadam; and

Whereas, The abutting property is largely undeveloped and is not of sufficient value to justify an assessment for a substantial and permanent pavement; and

Whereas, Such permanent pavement if laid at the present time and on the present roadways will not conform with the final lines and grades on these streets; and

Whereas, The laying of a bituminous macadam, and in some cases a more substantial pavement is necessary for the accommodation of existing traffic and for the further development of the Borough until such time as the abutting property on these streets can be assessed for the full cost of one permanent pavement; and

Whereas, The Acting President of the Borough of Queens has under date of July 15, 1911, submitted a list of thoroughfares which he believes should be paved as City highways for a portion of their width, the cost of such paving to be paid from appropriations made for that purpose, and should be maintained as City highways until the said streets shall have been officially mapped and physically opened, and a complete pavement shall be authorized by the Board as an assessable improvement, with the understanding that such preliminary pavement shall not relieve the abutting property owners from the obligation to pay the expense of at least one substantial pavement for the full width of each street; and

Whereas, The Board realizes the difficulty of maintaining the existing roads in the Borough of Queens with the heavy traffic to which they are subjected, and the inability of the undeveloped abutting property on many of the said roads to meet an assessment for a substantial pavement at the full width of a city street; therefore, be it

Resolved, That the Board of Estimate and Apportionment do, and it hereby does, authorize the President of the Borough of Queens to expend any portion of such sums as may be allowed either by an issue of Corporate Stock, by the issue of Special Revenue Bonds, or by Budgetary Appropriation, for the rebuilding or repairing of any of the highways hereinafter named, provided that the said highways shall have already been laid out upon the map of The City of New York, or where not already laid out, that the Board of Estimate and Apportionment shall have first approved a plan submitted by the President of the Borough of Queens laying out such highways, and shall have instituted proceedings to acquire title to the full width of the streets as so mapped, and provided, further, that the said Borough President shall, before asking for bids for the improvement of any of the said streets, submit to the Board the proposed form of contract and specification for such improvement; and be it further

Resolved, That the Board of Estimate and Apportionment in authorizing the improvement without assessment of the highways hereinafter mentioned, does so with the distinct understanding that such improvement is authorized at the present time in order to facilitate traffic and to stimulate the further development of the

Borough of Queens, and that such improvement shall not operate to relieve the abutting property owners from the expense of the laying of at least one permanent or Class A pavement and for the complete improvement of the said highways when the property shall have been sufficiently developed to justify such improvement; and be it also

Resolved, That the highways designated for improvement under these resolutions be as follows:

The Flushing and Astoria road, from Long Island City to Jackson avenue; Jackson avenue from Woodside avenue to Flushing Creek; Thompson avenue and Hoffman Boulevard, from Jackson avenue to Jamaica avenue; The Merrick road, from Hillside avenue to the City line; Central avenue, from The Merrick road to the City line; Broadway, from Flushing Creek to the City line; Rockaway Plank road, from Eldert's lane to Rockaway road; Trotting Course lane and Woodhaven avenue, from Hoffman boulevard to Rockaway Plank road; Jamaica and Hempstead turnpike, from Kings County line to the City line; Grand street, from Newton Creek to Jamaica avenue; Cooper avenue, from Kings County line to Trotting Course lane, or such other or additional highways as may be agreed upon.

Office of Commissioner of Public Works, Borough of Manhattan, 21 Park Row, New York City, July 25, 1911.

Hon. WILLIAM J. GAYNOR, *Mayor, Chairman of the Board of Estimate and Apportionment:*

Sir—The following report is submitted in compliance with the request of the Board of Estimate and Apportionment at its meeting of July 20, 1911, at which time was presented to it a report from the Acting President of the Borough of Queens with regard to a request that the City adopt as Highways certain public thoroughfares for the purpose of repaving and maintenance until such time as the streets have been acquired and all improvements installed, at which time a pavement for the full width can be assessed upon the abutting property.

This matter was referred to the Chief Engineer of the Board jointly with the Consulting Engineers of the various Boroughs. Because of intended absence from the city, the Chief Engineer of the Board submitted a separate report accompanied by resolutions. Copies of such report and resolutions are transmitted herewith.

In making their recommendations the Consulting Engineers considered in detail the recommendations of the Chief Engineer of the Board, with whom they agree in all but a few minor items. At the suggestion of the Consulting Engineers, the Engineer in Charge of Highways, Borough of Queens, has withdrawn from the consideration of the Board certain roads which were included in the original request. The Consulting Engineers discussel at considerable length the quality and character of the preliminary pavement which should be installed for each section of each highway and special recommendations are included in this report as to this matter. These special recommendations were made so as to make it possible for the Borough authorities to expedite as much as possible the preparation of plans and specifications, so as to obviate the necessity of submitting such specifications for specific approval of your Board.

The Consulting Engineers agree heartily in principle with the Chief Engineer of the Board as to the propriety of requiring that all streets be legally mapped and title acquired before moneys are spent upon them, but in view of conditions of traffic and the present condition of the pavement itself, the Consulting Engineers have deemed it advisable that a few of the roads originally suggested by the Engineer in Charge of Highways, Borough of Queens, should be repaved under the authority of the Board now asked, even though the Topographical Bureau has not yet completed maps establishing the lines and grades of those thoroughfares. This recommendation is made, however, upon the express stipulation that the President of the Borough of Queens will not ask for further authorizations beyond those now to be granted for improvement of the special highways mentioned in this report, until the latter have been officially mapped.

It is believed that the ideas of the Chief Engineer of the Board are fully covered by the stipulation that no further appropriations be requested till all streets are properly mapped and title acquired.

It is further recommended that the Board of Estimate and Apportionment proceed immediately to take the necessary steps to acquire title to all streets upon which moneys are to be spent. It is the opinion of the Consulting Engineers that by requiring the mapping and the initiation of opening proceedings of the streets at this time (before further authorizations are granted for improvement of highways) more money will be saved than will be expended in special improvement work under this authorization. In this connection it is understood that no other appropriations beyond those already granted by your Board for repaving purposes in the Borough of Queens are involved in the present request from the authorities of that Borough.

The condition of the highways in the Borough of Queens has been made a special subject of personal examination by the Consulting Engineers and the recommendations carried in the attached resolutions are the outcome of such examination.

Respectfully submitted,

E. P. GOODRICH, Consulting Engineer, Borough of Manhattan; GEO. W. TILLSON, Consulting Engineer, Borough of Brooklyn; AMOS L. SCHAEFFER, Consulting Engineer, Borough of The Bronx; LEONARD C. L. SMITH, Consulting Engineer, Borough of Queens; THEODOR S. OXHOLM, Acting Consulting Engineer, Borough of Richmond.

The following was offered:

Whereas, There are in the Borough of Queens a large number of thoroughfares in general use, some of which have been important highways for many years, and many of which have not yet been mapped; and,

Whereas, The traffic on those thoroughfares is so heavy as to require a more substantial pavement than waterbound macadam; and,

Whereas, The abutting property is largely undeveloped and is not of sufficient value to justify an assessment for a substantial and permanent pavement; and,

Whereas, Such permanent pavement, if laid at the present time, and on the present roadways, will not conform with the final lines and grades of these streets; and

Whereas, The laying of a bituminous macadam, and in some cases a more substantial pavement, is necessary for the accommodation of existing traffic and for the further development of the Borough until such time as the abutting property on these streets can be assessed for the full cost of one permanent pavement; and

Whereas, The Acting President of the Borough of Queens has, under date of July 15, 1911, submitted a list of thoroughfares which he believes should be paved as city highways for a portion of their width, the cost of such paving to be paid from appropriations made for that purpose, and should be maintained as city highways until the said streets shall have been officially mapped and physically opened, and a complete pavement shall be authorized by the Board as an assessable improvement, with the understanding that such preliminary pavement shall not relieve the abutting property owners from the obligation to pay the expenses of at least one substantial pavement for the full width of each street; and,

Whereas, The Board realizes the difficulty of maintaining the existing roads in the Borough of Queens with the heavy traffic to which they are subjected, and the inability of the undeveloped abutting property on many of the said roads to meet an assessment for a substantial pavement at the full width of a city street; therefore be it

Resolved, That the Board of Estimate and Apportionment do, and it hereby does authorize the President of the Borough of Queens to expend any portion of such sums as have been heretofore authorized for the rebuilding or repairing of the highways hereinafter named; and, be it further

Resolved, That before any future appropriation is requested by the President of the Borough of Queens for the rebuilding or repairing of any highway, such highway shall have already been laid out upon the map of The City of New York and proceedings shall have been instituted to acquire title to the full width of the highway, as mapped; and be it further

Resolved, That the Board of Estimate and Apportionment in authorizing the improvement without assessment of the highways hereinafter mentioned, does so with the distinct understanding that such improvement is authorized at the present time in order to facilitate traffic and to stimulate the further development of the Borough of Queens, and that such improvement shall not operate to relieve the abutting property owners from the expense of the laying of at least one permanent or Class A pavement, and for the complete improvement of the said highways when property shall have been sufficiently developed to justify such improvement; and be it further

Resolved, That the President of the Borough of Queens be, and he is hereby authorized to advertise for bids for regulating, grading and repairing with improved granite blocks on sand cushion on macadam foundation sand joints, those pavements listed below in Class A, except that those portions of Metropolitan avenue, from Newtown creek to Fulton street which are to be repaved are to be supplied with a concrete foundation, all to a width not to exceed twenty-five (25) feet; and be it further

Resolved, That the President of the Borough of Queens be, and he is hereby authorized to advertise for bids for regulating, grading and repaving with bitulithic concrete upon macadam foundation (Topeka Sterling specifications), and with bitulithic concrete laid under the patents of the Warren Brothers, and with bitulithic laid under the patents of the Amiesite Company, the pavements listed in Class B of the list below, this Board being of the opinion that the conditions set forth in the form of contract and specifications will secure, as required by section 1554 of the Charter, a fair and reasonable opportunity for competition between the several varieties of pavement mentioned, and, accordingly, the Board of Estimate and Apportionment prescribes that the conditions set forth in the form of proposals for bids or estimates, bond, contract and specifications shall be the conditions under which the said patented pavements shall be advertised for, such pavements to be laid to a width not to exceed eighteen (18) feet; and be it further

Resolved, That the President of the Borough of Queens be, and he is hereby authorized to advertise for bids for regulating, grading and repaving with bitulithic concrete upon macadam foundation (Topeka Sterling specifications), and with bitulithic concrete laid under the patents of the Warren Brothers, and with bitulithic laid under the patents of the Amiesite Company, the pavements listed in Class C of the list below, such pavements not yet having been legally mapped and opened upon the express conditions stipulated above for such streets, such pavements to be laid to a width not to exceed eighteen (18) feet; and be it further

Resolved, That the President of the Borough of Queens be and he is hereby authorized to advertise for bids for relaying the present granite block pavement on such portions of Grand street, between Newtown creek and Flushing avenue, as require same; and be it further

Resolved, That the highways designated for improvement under these resolutions be as follows:

CLASS A.

Jackson avenue, Woodside avenue to Flushing river; Broadway, Flushing river to City line; Thompson avenue and Hoffman boulevard, Jackson avenue to Fulton street; Metropolitan avenue, Newtown creek to Fulton street.

CLASS B.

Flushing and Astoria road, Bowery Bay road to Jackson avenue; College Point Causeway, Broadway to 13th avenue, College Point; Lawrence street, Broadway to North Hempstead turnpike; Woodhaven avenue, Hoffman boulevard to Rockaway plank road; Laurel Hill boulevard, Shell road, Newtown turnpike, Newtown creek to Jackson avenue; Cooper avenue, Kings County line to Woodhaven avenue; Broadway and Liberty avenue, Kings County line to Rockaway road.

CLASS C.

Merrick road, Hillside avenue to City line; Hempstead and Jamaica turnpike, Grand street to City line; Little Neck road, Broadway to Floral Park road; Floral Park road, Little Neck road to City line (State road under construction); Rockaway plank road, Kings County line to Rockaway road; Central avenue, Merrick road to City line

—and, be it further

Resolved, That the President of the Borough of Queens proceed forthwith to map all streets herein mentioned which are not already laid out on the map of The City of New York, and that the Secretary of the Board of Estimate and Apportionment is hereby directed to prepare and submit, as soon as legal conditions have been met, proper resolutions to institute proceedings for acquiring title to all streets herein mentioned.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Court of General Sessions requesting, and report of the Comptroller relative to, the modification of Salary Schedule 1970, supporting the appropriation made in the Budget for the year 1911, for said court, to provide for the increase in salary of a Deputy Clerk from $3,000 to $4,000 per annum:

Court of General Sessions of the Peace, June 16, 1911.

Board of Estimate and Apportionment, New York City:

Gentlemen—Under the provisions of chapter 412 of the Laws of 1907, the Judges of the Court of General Sessions were authorized to appoint "not more than eleven Deputy Clerks," and the Comptroller was authorized to pay such Deputy Clerks such salaries "as is now provided by law."

Upon June 28, 1907, the Board of Estimate and Apportionment recommended to the Board of Aldermen that the salary of Deputy Clerks of the Court of General Sessions be fixed at the sum of $4,000 per annum, which recommendation was subsequently approved and adopted by the Board of Aldermen.

Mr. Richard Tone Pettit was, under date of April 6, 1908, transferred from the position of Assistant Special Deputy Clerk of the Supreme Court to the position of Deputy Clerk of the Court of General Sessions, with salary at the rate of $3,000 per annum. At the time of his transfer he was not eligible to the salary of $4,000 per annum, under the State Civil Service Rules, but since has become eligible to receive that rate of compensation. His duties as Deputy Clerk in this Court are identical with the duties of all other Deputy Clerks in said Court; and it is the desire of the Judges of the Court of General Sessions that his compensation be fixed at the same amount received by the other Deputy Clerks, to wit, $4,000.

Request is therefore made upon the Board of Estimate and Apportionment that recommendation be made to the Board of Aldermen for the fixing of the salaries of the Deputy Clerks of this Court at $4,000 per annum, for eleven incumbents, and that the salary schedule supporting the appropriation for said Court for the year 1911 be modified by eliminating the items "Deputy Clerks, 10 at $4,000, $40,000; Deputy Clerk, $3,000," and substituting in place thereof "Deputy Clerks, 11 at $4,000, $44,000," thereby reducing the unassigned balance from $2,100 to $1,100. This additional grade and modification of salary schedule will not increase the amount appropriated for the Court for the year 1911. Very respectfully yours,

THOMAS C. O'SULLIVAN, JAMES T. MALONE, OTTO A. ROSALSKY, EDWARD SWANN, JOSEPH F. MULQUEEN, Judges of the Court of General Sessions.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 24, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 16, 1911, the Judges of the Court of General Sessions requested modification of the salary schedule for the court for the year 1911. In connection therewith I report as follows:

Chapter 412 of the Laws of 1907 provides that the Judges of the Court of General Sessions may appoint "not more than eleven Deputy Clerks." There are ten Deputies, at $4,000 per annum each. The modification is proposed for Richard Tone Pettit, who was transferred on April 6, 1908, from the position of Assistant Deputy Clerk of the Supreme Court to the position of Deputy Clerk of the Court of General Sessions, at the rate of $3,000 per annum. Mr. Pettit was not then eligible under the State Civil Service Rules for the $4,000 rate. He has become eligible and it is therefore proposed to promote him to the grade. His duties are similar to those of the other Deputy Clerks of the Court. The funds for the increase are available in an unassigned balance.

The additional grade of Deputy Clerk at $4,000, to provide for the increase, was established on July 18, 1911, pursuant to the provisions of section 56 of the Greater New York Charter.

The following tables shows the line item changes in detail:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
1970.	Deputy Clerks, 10 at $4,0000.	....	$4,000 00	....	$2,000 00
	Deputy Clerk, 1 at $3,000....	$3,000 00	....	$1,500 00	....
	Balance unassigned, $2,100..	1,000 00	....	500 00	....
		$4,000 00	$4,000 00	$2,000 00	$2,000 00

The attached resolution, if adopted, will grant the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule as revised for the office of the Court of General Sessions, County of New York, for the year 1911, as follows:

Court of General Sessions, County of New York.

1970. Salaries:	
Judges, 7 at $15,000	$105,000 00
Clerk	5,000 00
Deputy Clerks, 11 at $4,000	44,000 00
Assistant Clerk	4,000 00
Record Clerks, 9 at $2,000	18,000 00
Stenographers, 6 at $2,500	15,000 00
Interpreters, 5 at $2,000	10,000 00
Warden Grand Jury	2,000 00
Attendants, 56 at $1,800	100,800 00
Attendants, 5 at $1,500	7,500 00
Attendant, 1 at $1,200	1,200 00
Unassigned balance	1,100 00
	$313,600 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the President of the Borough of Manhattan requesting, and report of the Comptroller recommending, the modification of Salary Schedule 1704, supporting the appropriation made in the Budget for the year 1911, for the office of said Borough President, providing for the elemination of a Clerk at $1,500 per annum and the addition of five Clerks at $300 each per annum, said modification to be effective as of August 1, 1911:

City of New York, Office of the President of the Borough of Manhattan, City Hall, July 18, 1911.

Joseph Haag, Esq., *Secretary of Board of Estimate and Apportionment,* 299 Broadway, New York City:

Dear Sir—Request is hereby made that the supporting schedules, attached to the budget of the President of the Borough of Manhattan for the year 1911, be amended so as to read as follows:

Bureau of Buildings, Administration

1704—Salaries—	
Superintendent	$6,000 00
Assistant Superintendent	4,000 00
Secretary to Superintendent	2,500 00
Clerk	2,100 00
Clerks, 4 at $1,800	7,200 00
Clerks, 2 at $1,650	3,300 00
Clerks, 6 at $1,500	9,000 00
Clerks, 2 at $1,350	2,700 00
Clerks, 7 at $1,200	8,400 00
Clerks, 7 at $1,050	7,350 00
Clerk, 1 at $900	900 00
Clerks, 5 at $300	1,500 00
Confidential Stenographer	1,800 00
Stenographers and Typewriters, 2 at $1,500	3,000 00
Stenographers and Typewriters, 3 at $1,200	3,600 00
Stenographers and Typewriters, 2 at $1,050	2,100 00
Typewriting Copyists, 12 at $720	8,640 00
Cleaners, 5 at $400	2,000 00
Telephone Operator	900 00
Watchmen, 3 at $600	1,800 00
Automobile Engineman	1,200 00
	$79,990 00

The only change is in the substitution of five (5) Clerks at $300 for one (1) Clerk at $1,500. The total of the schedule remains unchanged, so that no transfer of funds is necessary. It is requested that the resolution be made effective as of August 1, 1911.

Very truly yours,

GEORGE McANENY, President, Borough of Manhattan.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 24, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 18, 1911, the President of the Borough of Manhattan requested modification of the salary schedule for the Bureau of Buildings, Administration No. 1704, in his office for the year 1911. In connection therewith I report as follows:

It is proposed to strike out a Clerk at $1,500 per annum and add five Clerks, at $300 per annum each. The Superintendent of Buildings states that the employment of the five clerks at the low rate will facilitate business in the Bureau. The following table shows the changes in detail:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
1704.	Clerks, 7 at $1,500	$1,500 00		$625 00	
	Clerks, 5 at $300		$1,500 00		$625 00

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the office of the President of the Borough of Manhattan, for the year 1911, to take effect as of August 1, 1911, as follows:

President of the Borough of Manhattan.

Bureau of Buildings, Administration—

1704. Salaries:

Superintendent	$6,000 00
Assistant Superintendent	4,000 00
Secretary to Superintendent	2,500 00
Clerk	2,100 00
Clerks, 4 at $1,800	7,200 00
Clerks, 2 at $1,650	3,300 00
Clerks, 6 at $1,500	9,000 00
Clerks, 2 at $1,350	,2700 00
Clerks, 7 at $1,200	8,400 00
Clerks, 7 at $1,050	7,350 00
Clerk, 1 at $900	900 00
Clerks, 5 at $300	1,500 00
Confidential Stenographer	1,800 00
Stenographers and Typewriters, 2 at $1,500	3,000 00
Stenographers and Typewriters, 3 at $1,200	3,600 00
Stenographers and Typewriters, 2 at $1,050	2,100 00
Typewriting Copyists, 12 at $720	8,640 00
Cleaners, 5 at $400	2,000 00
Telephone Operator	900 00
Watchmen, 3 at $600	1,800 00
Automobile Engineman	1,200 00
	$79,990 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Acting President of the Borough of Queens requesting and report of the Comptroller recommending, approval of the schedule of wages of Temporary Employees, Bureau of Highways, Borough of Queens, Engineering and Inspection Division, Corporate Stock and Assessment Force, providing for twenty Inspectors of Regulating, Grading and Paving, at $4 per diem each:

The City of New York, Office of the President of the Borough of Queens, Long Island City, June 15, 1911.

William A. Prendergast, Esq., *Comptroller, City of New York,* New York, N. Y.:

Dear Sir—Confirming our application of May 24, 1911, and the several conversations with your representatives, in relation thereto, we now beg to inform you that pursuant to your recommendations, the Board of Estimate and Apportionment, by resolution of June 8, 1911, the Board of Aldermen concurring therein, by resolution of June 27, 1911, the position of Inspector of Regulating, Grading and Paving, at $4 per diem, for twenty (20) incumbents, became a law, without the approval or disapproval of his Honor the Mayor, on June 11, 1911.

We would, therefore, thank you to take such action as is necessary to have the Board of Estimate and Apportionment approve the new schedule of positions, to be entitled: "President of the Borough of Queens, Bureau of Highways, Engineering and Inspection, Inspectors of Regulating, Grading and Paving, twenty (20) at $4 per diem," incumbents thereof to be paid from any funds, other than appropriation funds, against which the work they may be employed upon are properly chargeable.

Immediate action on your part would greatly facilitate improvement work in this Borough. Yours respectfully,

WALTER H. BUNN, Acting President of the Borough of Queens.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 24, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 15, 1911, the Acting Borough President of the Borough of Queens requested approval of a schedule in his office for the position of Inspector of Regulating, Grading and Paving, at $4 per diem, for 20 incumbents. In connection therewith I report as follows:

On June 8, 1911, the Board of Estimate and Apportionment approved of the establishment, pursuant to the provisions of section 56 of the Greater New York Charter, of the grade of position of Inspector of Regulating, Grading and Paving, at the $4 rate and for the 20 incumbents. On June 27, 1911, the Board of Aldermen fixed the grade. Grades for Inspector are established in the office from $1,050 to $1,650 per annum, for an unlimited number of incumbents, and at $4 per diem for one incumbent. The Acting President states that the per diem rate is for temporary employees, on account of many contracts for regulating, grading and paving work. The Inspectors are to be employed in the Engineering and Inspection Division of the Bureau of Highways. It is proposed to pay the incumbents from the corporate stock or assessment funds, according to the character of the work.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule of wages paid from other than Budget funds in the office of the President of the Borough of Queens for the year 1911, as follows:

President, Borough of Queens.

Bureau of Highways, Engineering and Inspection Division—
Wages, Temporary Employees, Corporate Stock and Assessment Force:
Inspectors of Regulating, Grading and Paving, 20 at $4 per diem.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Deputy Register of Kings County requesting, and report of the Comptroller recommending, the modification of Salary Schedule 2077, supporting the appropriation made in the Budget for the year 1911 for the office of the Register of Kings County, providing for a change in title of Clerk at $1,200 per annum to Executive Clerk at the same rate:

Office of the Register of Kings County, Hall of Records, Borough of Brooklyn, New York City, April 29, 1911.

Honorable Board of Estimate and Apportionment, New York City:

Dear Sirs—I desire to establish the position of Executive Clerk at an annual salary of $1,200 per annum in this office, as such a position is necessary.

As the establishment of this grade will not involve any additional expense to the City, I respectfully ask that the following modification be made in the Budget schedule lines for the current year:

To insert a line reading, Executive Clerk, $1,200. To change the line reading 14 Clerks at $1,200 so as to read 13 Clerks at $1,200.

Awaiting your favorable action, believe me,

Yours very truly, JAMES S. REGAN, Deputy Register.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 24, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On April 29, 1911, the Register of Kings County requested modification of a salary schedule in his office for the year 1911. In connection therewith I report as follows:

The request is in No. 2077, General Administration, and involves only a change in title for a Clerk, at $1,200 per annum, to Executive Clerk at the same rate. The grade for the new title was established on July 18, 1911, pursuant to the provisions of section 56 of the Greater New York Charter. The following table shows the line item changes in detail:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
2077.	Clerks, 14 at $1,200..........	$1,200 00	....	$500 00	....
	Executive Clerk.............	....	$1,200 00	....	$500 00

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule as revised for the office of the Register of Kings County, for the year 1911, as follows:

Register of Kings County.

General Administration—

2077.	Salaries:	
	Register	$8,000 00
	Deputy Register	5,000 00
	Assistant Deputy Register	2,500 00
	Counsel	3,500 00
	Expert Clerk	3,500 00
	Tickler Clerk	2,500 00
	Chief Block Index Clerk	2,500 00
	Chief Clerk of Records	1,800 00
	Chief Current Index Clerk	1,800 00
	Secretary	1,500 00
	Clerks, 15 at $1,500	22,500 00

	Messengers, 3 at $800	2,400 00
	Keeper of Coat Room	720 00

Salaried Copyists, 35 at $1,200	42,000 00
Telephone Operator	900 00
	$136,120 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented a report of the Commissioner of Bridges relative to the proposed terminal of the Manhattan end of the Brooklyn Bridge in connection with the new Municipal building.

Which was laid over one week—August 3, 1911.

The Secretary presented the following communication from the Comptroller requesting the modification of salary schedules supporting the appropriation made in the Budget for the year 1911, for the Department of Finance, to provide for appointments to positions now vacant, etc., involving the transfer of $2,617.50:

City of New York, Department of Finance, Comptroller's Office, July 24, 1911.

The Honorable, Board of Estimate and Apportionment:

Gentlemen—Request is hereby made that the Budget Schedule lines supporting the salaries appropriations as made to the Department of Finance for the year 1911, be amended in order to provide for the following changes:

First—For the appointment of four Accountants, 2 at $2,100 per annum each, and two at $1,800 per annum each, in the Auditing Bureau, Expert Accountants' Division.

Second—For the transfer of a Statistician at $1,650 per annum, from the Bureau of Municipal Investigation and Statistics to the Auditing Bureau.

Third—For abolishing the position of Assistant Engineer at $1,650 per annum, now vacant, in the Auditing Bureau.

Fourth—For striking out line "Balance Unassigned, $1,310," in Account No. 32, Revenue, Taxes, Assessments and Arrears, Miscellaneous.

Fifth—For striking out item "Balance Unassigned, $1,050," in Account No. 33, Bureau of Municipal Investigation and Statistics.

Sixth—For striking out item "Clerk with Knowledge of Statistics, $1,500," in Account No. 33, Bureau of Municipal Investigation and Statistics.

Seventh—For reducing number of Clerks at $750 in the Auditing Bureau by one and striking out line in Auditing Bureau Schedule, "Clerk with special knowledge of handwriting, $1,050," both positions being at present unfilled.

Eighth—For reducing the Clerks in the Auditing Bureau at $540 per annum by one.

Resolutions (2), providing for the changes as enumerated above, are submitted herewith for adoption.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the following modifications of the schedule of salaries supporting the appropriations made to the Department of Finance for the year 1911, entitled and as follows:

Auditing Bureau—

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The following resolution was offered:

Resolved, That the sum of twenty-six hundred and seventeen dollars and fifty cents ($2.617.50) be and the same is hereby transferred from the appropriations made to the Department of Finance for the year 1911, entitled and as follows:

Revenue—Taxes, Assessments and Arrears, Miscellaneous, No. 32	$655 00
Bureau of Municipal Investigation and Statistics, Account No. 33	1,962 50
	$2,617 50

—the said appropriation being in excess of the amounts required for the purpose thereof—to the appropriation made to the said Department for the same year, entitled

"Auditing Bureau, Account No. 31," the amount of the said appropriation being insufficient.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following report of the Corporate Stock Budget Committee recommending the authorization of $200,000 corporate stock for the construction of a central library in Brooklyn, said authorization to be conditional upon approval by the Board of Estimate and Apportionment of a site for the library, and with the further condition that no additional liabilities shall be contracted for in connection with the present site until the approval of the Board of Estimate and Apportionment has been obtained:

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 22, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—At a meeting of this Board held July 17, 1911, the question of an authorization of corporate stock for a central library in Brooklyn was referred back to the Corporate Stock Budget Committee for further consideration and report.

The report of this Committee submitted on July 17, did not recommend an appropriation for this purpose, but recommended rescindments of $18,010 of the $300,000 authorization made in the 1910 Corporate Stock Budget.

When this matter was first considered by the Committee several weeks ago it was our opinion that a further appropriation for the central library in Brooklyn should be included in the Budget for 1911. In fact we made a tentative allowance of $1,065,000 for this purpose. After this tentative agreement we discovered that there was a serious controversy among the citizens of Brooklyn over the site for the library building. This controversy convinced the Committee that it would not be wise to further commit the City by a large appropriation while the question of the site was still at issue. Accordingly we determined to make no recommendation for additional appropriation.

We believe that Brooklyn should have a central reference library. Reference libraries are used to a very large extent by persons with whom time is a most essential element. The average Brooklynite who might have occasion to use the facilities afforded by a reference library could not afford to lose the time required for the long trip to the reference library in Manhattan. In many cases the round trip to the library at 42d street, Manhattan, from certain sections of Brooklyn would consume approximately three hours' time. In the great majority of cases there would be at least one hour's difference in the time required for a round trip to the Manhattan library, and a round trip to the proposed site for the Brooklyn library. The long trip to Manhattan would deter Brooklyn people from using that library. A reference library conveniently located in Brooklyn would no doubt be used regularly by persons who would never think of going to Manhattan to consult books of reference.

It is unfortunate that there is no agreement upon a proper site for the library in Brooklyn. We believe that the controversy over this question can be settled. We believe, also, that the City should make some further provision at this time for the building of the library.

We recommend the authorization of $200,000 in addition to the $300,000 authorized in last year's Corporate Stock Budget. This will make an appropriation of $500,000, which is about all that could be spent in the next twelve months.

We recommend, however, that this authorization be made conditional upon approval by the Board of Estimate and Apportionment of a site for the library, and upon a further condition that the President of the Borough of Brooklyn contract no additional obligations against the corporate stock authorized last year, or the $200,000 recommended for authorization this year until after this Board had approved the site. Respectfully,

WM. A. PRENDERGAST, Comptroller; , President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan, Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York

Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding two hundred thousand dollars ($200,000), to provide means for the erection of a central library building including the foundations thereof in the Borough of Brooklyn, to be built under the jurisdiction of the President of the Borough of Brooklyn, and that when authority therefor shall have been obtained from the Board of Aldermen the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid; provided, however, that the President of the Borough shall incur no obligation against this authorization of corporate stock until the Board of Estimate shall have approved a site for the new central library building.

Hon. Edward M. Grout, representing the Trustees of the Library, appeared and urged that the words "provided, however, that the President of the Borough shall incur no obligation against this authorization of corporate stock until the Board of Estimate shall have approved a site for the new central library building" be eliminated from the resolution.

John W. Devoy, Esq., Trustee, and A. J. Keogh endorsed the request of Mr. Grout.

Gilbert Elliott, Esq., Chairman, Committee on Parks, Brooklyn League; John Thatcher, Esq., Superintendent of Buildings, Borough of Brooklyn; John F. Gies, Esq., secretary, Brooklyn League; Guy DuVal, Esq., George D. Brower, Esq., and Wm. I. Nicholls, Esq., representing the Brooklyn League, appeared in favor of the condition contained in the resolution as submitted by the Committee.

The Comptroller moved that the resolution be amended by striking therefrom the words "provided; however, that the President of the Borough shall incur no obligation against this authorization of corporate stock until the Board of Estimate shall have approved a site for the new central library building."

The amended resolution failed of adoption by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—11.

Negative—The President of the Borough of Manhattan—2.

During the discussion the President of the Borough of Manhattan suggested that the Board request the opinion of the Corporation Counsel as to the legislation in regard to the site and as to whether or not the Board had the power to change its location.

Subsequently, upon the arrival of his Honor, the Mayor, the matter was again considered.

The President of the Borough of Manhattan stated that objection had been raised to the present location of the site and that he had suggested requesting an opinion of the Corporation Counsel as to whether or not the Board had the power to change its location.

His Honor, the Mayor, stated that the question of the location of the site had been settled by the Act of Legislature.

The following resolution was then offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of the corporate stock of The City of New York to an amount not exceeding two hundred thousand dollars ($200,000) to provide means for the erection of a central library building, including foundations thereof, in the Borough of Brooklyn, to be built under the jurisdiction of the President of the Borough of Brooklyn, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be, and is hereby authorized to issue said corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the Acting President of the Board of Aldermen, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—14.

Negative—The President of the Borough of Manhattan—2.

The Secretary presented the following report of the Corporate Stock Budget Committee recommending the authorization of $500,000 corporate stock for the acquisition of additional land for site, for architects' fees, foundations of and for construction of new municipal building in the Borough of Brooklyn; also recommending that the request for $500,000 corporate stock for the Eighth Ward Market be denied:

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 17, 1911, the Board of Estimate and Apportionment referred back to the Corporate Stock Budget Committee the request of the President of the Borough of Brooklyn, for an authorization of $4,000,000 Corporate Stock for the new municipal building.

Your Committee has recognized from the first the need of Brooklyn for a new municipal building. It has been compelled, however, to consider this matter in its relation to other necessary public improvements, and it did not appear to us that this was as urgent as many other matters.

From representations made to us, it appeared that an authorization of $500,000 for the Eighth Ward Market should take precedence over the Municipal Building. Further investigation had led to the conclusion that there is greater need for the building than the market.

The arguments in favor of a new municipal building in Brooklyn are very convincing. This building has been needed for many years, and there is no doubt that public administration in the Borough has been severely handicapped, and that the taxpayers of Brooklyn have been put to a serious inconvenience because there was no adequate and conveniently located building for the use of the City, the Borough and the County Departments.

On February 27, 1903, a beginning was made to remedy the situation. At that time $32,000 was authorized for the appropriation of plans and specifications for a new municipal building.

On December 5, 1905, the sum of $500,000 was authorized for the construction and erection of the new municipal building. For various reasons no material progress was made on the work.

It was not until June 30, 1910, that $20,500 was released from the authorization of $32,000 made February 27, 1903. At the same time $123,000 was released from the authorization of $500,000 made December 5, 1905. However, on that same date the remaining balances of $11,500 and $377,000 respectively, were rescinded.

The $123,000 released for the construction and erection of the new Municipal building was represented by a balance of $90,000, subject to a contract liability of $10,000 on December 31, 1910. In addition to this unencumbered balance of $80,000 the President of the Borough of Brooklyn requested an additional authorization of $4,000,000, to be authorized in 1911 for the completion of the new Municipal building. He estimated that $750,000 be expended in 1911, $1,750,000 in 1912, and $1,500,000 in 1913.

The Borough Administration is not only handicapped by inadequate quarters, but the city is at the same time burdened with the heavy rent for offices that should be located in a Municipal building.

The amounts estimated for rent in 1911 of buildings, offices, etc., by Departments not located upon city property in the Borough of Brooklyn is $159,606.25. From this amount the sum of $85,664, rentals for Armories, for the Departments of Street Cleaning, Education, Park, Fire and the Courts and Sheriff's offices is to be deducted. This leaves a balance of $73,942,25 for rents for Departments that will be housed in the proposed Municipal building. Upon an investment of $4,143,500, which it is estimated the new Municipal building will cost, the interest charge will be $165,740. These figures show that the interest charge will be greater than the rental now paid, but we must consider at the same time that it will not be long before the growth of the Borough will necessitate enlargement of quarters, which will make the rental charges higher than the interest upon the proposed investment.

However, the question of rental charge as compared with the interest charge is not the main consideration. The people of Brooklyn should have a Municipal building, capable of accommodating all Borough Departments so that Taxpayers would not be compelled, as now, to travel over the Borough looking for Borough Departments, all of which should be under one roof. The present Municipal building is unsanitary and not fitted for an office building. It is not only unfiitted and unsafe for use as an office building, but the arrangement of the offices is such that crowding is unavoidable, and the ventilation is so poor that the sanitary conditions are necessarily bad. We believe that no time should be lost in beginning work on a new building

It is proposed to erect a building upon the Municipal Park, fronting on Joralemon street, and upon a strip of land now privately owned along Court street. The total assessed valuation of the three lots making up the Court street strip is $215,900.

It was the intention of the Borough President to construct three stories and cellar of the building this year at a cost of about $490,000, in addition to the cost of the land. It was estimated that the work could easily be completed and the three floors occupied at the end of twelve months.

We recommend the authorization of $500,000 in addition to the unexpended balance of $80,000, to be used by the Borough President for the acquisition of three lots on Court street, for plans, specifications and the construction of foundation and erection of the new Municipal building.

When this matter was referred back to the Committee on July 17, we were instructed to consider an appropriation for the Municipal Building in connection with the proposed authorization of $500,000 for the Eighth Ward Market and to decide which improvement should be provided for first. It is the opinion of the Borough President that the need for a Municipal building is by far more urgent than the need for another market. This opinion is supported by the views of the leading Civic Organizations of Brooklyn.

We recommend that no authorization be made for the Eighth Ward Market. Attached hereto is a resolution, which, if adopted, will carry out our recommendations.

Respectfully,

WM. A. PRENDERGAST, Comptroller; ...., President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan; Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding five hundred thousand dollars ($500,000) to provide means for drawing plans and specifications, and for constructing foundations for and erecting a new Municipal Building in the Borough of Brooklyn, to be built at Court and Joralemon streets, Borough of Brooklyn, and for the further purpose of acquiring three lots of land on the Court street side, to be used in addition to the Municipal Park adjoining as a site for the Municipal Building, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be, and is hereby authorized to issue said corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

Action on the denial of the request for an appropriation for the Eighth Ward Market, Borough of Brooklyn, was deferred until August 3, 1911.

The Secretary presented the following report of the Corporate Stock Budget Committee recommending the authorization of $50,000 Corporate Stock for the General improvement of Silver Lake Park, Borough of Richmond:

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 27, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 17, 1911, when the report of the Corporate Stock Budget Committee was considered by this Board, the question of authorizing $50,000 to provide means for the general improvement of Silver Lake Park, Borough of Richmond, was reopened and referred back to the Committee for further consideration and report.

Your Committee has already considered this question very thoroughly and was impressed by the need for improvement of Silver Lake Park, but it was considered that there was no urgent reason for doing the work this year.

The only objection that has been raised to an appropriation for Silver Lake Park is that practically all of Staten Island is a park. Even if the entire island were a park, it would be of little value for park purposes unless improved so that it could be used for such purposes. At present Silver Lake Park, although a beautiful and attractive spot, is not fully available for park purposes, because it lacks several essentials to a usable park.

We recommend that $50,000 in Corporate Stock be authorized to provide for the general improvement of this park, and that the resolution be so drawn that it will include the erection of a shelter house, which is seriously needed.

We recommend the adoption of the attached resolution. Respectfully,

WM. A. PRENDERGAST, Comptroller; ...., President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan; Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding fifty thousand dollars ($50,000) to provide means for the general improvement of Silver Lake Park, including the erection of a shelter house, under the jurisdiction of the Department of Parks, Boroughs of Manhattan and Richmond, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be, and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented a report of the Corporate Stock Budget Committee recommending that the request of the Commissioner of Correction for $800,000 corporate stock for a Reformatory on Harts Island, and for $250,000 corporate stock, for acquiring a site and for the erection thereon of a Magistrate's Court for Women, a Women's Jail and a place of detention for Women, be denied.

Patrick A. Whitney, Esq., Commissioner of Correction appeared in opposition to the recommendations of the Committee, and the matter was laid over.

The Secretary presented the following communications from the Commissioner of Parks, Boroughs of Brooklyn and Queens, relative to, and report of the Corporate Stock Budget Committee recommending, the amendment of resolutions adopted June 3, 1910, and July 17, 1911, authorizing Corporate Stock for Green Houses and Instruction Building in the Brooklyn Botanic Garden in order that four separate authorizations may be lumped together to obtain economy in construction:

The City of New York, Department of Parks, Boroughs of Brooklyn and Queens, Litchfield Mansion, Prospect Park, Borough of Brooklyn, July 24, 1911.

To the Honorable Board of Estimate and Apportionment, of the City of New York:

Gentlemen—On June 3d, 1910, your Honorable Board authorized the following issues of Corporate Stock:

Construction of Plant Houses in Botanic Garden........................	$25,000 00
Construction of Rooms for Instruction of Botany in the Botanical Garden	25,000 00

A careful study of the plans shows it will be extremely difficult to physically separate one part of the work from the other, owing to the fact that the heating plant provides heat for both the Instruction Building and the Plant Houses, and there are communications between the two.

Upon recommendation of the Board of Trustees of the Brooklyn Institute of Arts and Sciences, and Messrs. McKim, Mead and White, the Architects, I would respectfully request your Honorable Board to combine the two appropriations above mentioned into a single appropriation.

Very truly yours, M. J. KENNEDY, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—I transmit herewith four resolutions amending corporate stock authorizations to the amount of $100,000, to provide means for the construction of plant houses, the construction of rooms for instruction of botany and the construction and equipment of an instruction building in the Botanic Garden and Arboretum, under the jurisdiction of the Department of Parks, Boroughs of Brooklyn and Queens.

The amendments to the resolutions entail only a change to make the titles of the accounts uniform to enable the Commissioner to award contracts for the improvement as a whole, thereby obtaining greater economy in construction. Respectfully,

WM. A. PRENDERGAST, Comptroller; ...., President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan; Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That, subject to the concurrence herewith by the Board of Aldermen, the resolution adopted by the Board of Estimate and Apportionment on June 3, 1910, and concurred in by the Board of Aldermen on June 14, 1910, as follows:

"Resolved, That, pursuant to the provisions of chapter 618 of the Laws of 1906, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York, to an amount not exceeding twenty-five thousand dollars ($25,000) to provide means for the construction of rooms for instruction of botany in the Botanic Garden and Arboretum, Borough of Brooklyn, under the jurisdiction of the Department of Parks, Boroughs of Brooklyn and Queens, and when authority therefor shall have been obtained from the Board of Aldermen the Comptroller be and he is hereby authorized to issue corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, to an amount not exceeding twenty-five thousand dollars ($25,000), the proceeds whereof to be applied to the purposes aforesaid."

—be amended by eliminating the words "construction of rooms for instruction of botany," and inserting in lieu thereof the words, "erection and construction of a laboratory building and greenhouses, including equipment thereof."

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The following resolution was offered:

Resolved, That, subject to the concurrence herewith by the Board of Aldermen, the resolution adopted by the Board of Estimate and Apportionment on June 3, 1910, and concurred in by the Board of Aldermen on June 14, 1910, as follows:

"Resolved, That, pursuant to the provisions of chapter 618 of the Laws of 1906, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York, to an amount not exceeding twenty-five thousand dollars ($25,000), to provide means for the construction of plant houses in the Botanic Garden and Arboretum situated southerly from the building of the Brooklyn Institute of Arts and Sciences, and lying between Washington and Flatbush avenues, Borough of Brooklyn, under the jurisdiction of the Department of Parks, Boroughs of Brooklyn and Queens, and when authority therefor shall have been obtained from the Board of Aldermen the Comptroller be and he is hereby authorized to issue corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, to an amount not exceeding twenty-five thousand dollars ($25,000), the proceeds whereof to be applied to the purposes aforesaid."

—be amended by eliminating the words "construction of plant houses," and inserting in lieu thereof the words, "erection and construction of a laboratory building and greenhouses, including equipment thereof."

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The following resolution was offered:

Resolved, That, subject to the concurrence herewith by the Board of Aldermen, the resolution adopted by the Board of Estimate and Apportionment on July 17, 1911, as follows:

"Resolved, That, pursuant to the provisions of chapter 178 of the Laws of 1911, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding thirty-three thousand dollars ($33,000), to provide means for the construction and equipment of an instruction building, in the Botanic Garden and Arboretum, under the jurisdiction of the Department of Parks, Boroughs of Brooklyn and Queens, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid."

—be amended to read as follows:

Resolved, That, pursuant to the provisions of chapter 178 of the Laws of 1911, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding thirty-three thousand dollars ($33,000), to provide means for the erection and construction of a laboratory building and greenhouses, including equipment thereof, in the Botanic Garden and Arboretum, under the jurisdiction of the Department of Parks, Boroughs of Brooklyn and Queens, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The following resolution was offered:

Resolved, That, subject to the concurrence herewith by the Board of Aldermen the resolution adopted by the Board of Estimate and Apportionment on July 17, 1911, as follows:

Resolved, That, pursuant to the provisions of chapter 178, of the Laws of 1911, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York, to an amount not exceeding seventeen thousand dollars ($17,000), to provide means for the construction of greenhouses in the botanic garden and arboretum, under the jurisdiction of the Department of Parks, Boroughs of Brooklyn and Queens, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

—be amended to read as follows:

"Resolved, That, pursuant to the provisions of chapter 178 of the Laws of 1911, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York, to an amount not exceeding seventeen thousand dollars ($17,000), to provide means for the erection and construction of a laboratory building and greenhouses, including equipment thereof, in the Botanic Garden and Arboretum, under the jurisdiction of the Department of Parks, Boroughs of Brooklyn and Queens, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the President of the Borough of Richmond requesting an authorization of $5,000 Corporate Stock in addition to the amount heretofore authorized, to be used by the President of the Borough of Richmond for carrying on the work of elimination of grade crossings in that Borough, together with a report of the Corporate Stock Budget Committee, recommending an appropriation of $2,000 for this purpose, and also recommending the approval of a schedule for said fund:

The City of New York, Office of the President of the Borough of Richmond, Borough Hall, New Brighton, New York City, June 2, 1911.

Board of Estimate and Apportionment, 277 Broadway, New York.

Gentlemen—We had expected to include in our departmental estimate for 1912, to be provided by Budget appropriation, moneys necessary to prosecute our work of preliminary studies, surveys and layout of Grade Crossing elimination, but are advised in the Department of Finance that Corporate Stock should preferably be provided for this work, as it is essential to improvements that will have a long life.

To that end, we would, therefore, request an issue of Corporate Stock in the sum of $5,000 to cover the following schedule:

One Assistant Engineer	$2,700 00
One Draftsman	1,500 00
One-eighth Service of Field Party	800 00
	$5,000 00

The employees of the Field Party would all be scheduled in the Departmental Budget under the general classification of part Budget and part Bond Issue payments.

Yours very truly,

GEORGE CROMWELL, President of the Borough; by LOUIS L. TRIBUS.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 2, 1911, the President of the Borough of Richmond requested an additional authorization of corporate stock for preliminary studies, surveys and layout for grade crossing elimination. In connection therewith we report, as follows:

On March 11, 1910, the Board of Estimate and Apportionment approved of an authorization of corporate stock amounting to $5,000 for making studies, preliminary surveys and other data in connection with the work of eliminating grade crossings in the Borough. Of the amount there remains an available total of $1,566.12. In a communicaton dated July 18, 1911, the Engineer in charge of the work stated that the estimated cost of continuing the work to July 1, 1912, would be $3,500. The permanent staff consists of an Engineer, at $2,700 per annum, and a part of the services of a field party, amounting to $800.

We recommend the approval of the request to the extent of $2,000, and a schedule for the fund by the adoption of the attached resolutions. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan; Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of Corporate Stock of The City of New York to an amount not exceeding two thousand dollars ($2,000), in addition to amounts heretofore authorized (C-PR-1A), to provide means for defraying the expense of making studies and plans for the elimination of grade crossings of steam railroads in the Borough of Richmond, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said Corporate Stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

—

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule for the corporate stock force plans for the elimination of grade crossings, in the Borough of Richmond (C-PR-1A), under the jurisdiction of the President of the Borough of Richmond, as follows:

Corporate Stock Force (C-PR-1A)—
Salaries:
Assistant Engineer .... 1 at $2,700 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Commissioner of Street Cleaning requesting an authorization of $43,500 corporate stock for the construction of a Storehouse, etc., together with a report of the Corporate Stock Budget Committee, recommending that said request be denied:

Department of Street Cleaning of The City of New York, 13-21 Park Row, New York, July 6, 1911.

Hon. Wm. J. Gaynor, Mayor, *Chairman of the Board of Estimate and Apportionment, City of New York:*

Dear Sir—I desire to construct a Storehouse to serve as the Office of the Property Clerk of this Department, on the property in Manhattan under the Williamsburg Bridge, and to pave the yard and build a Wall about said property. This property was formerly in the joint possession of this Department and the Department of Bridges: but by the recent action of the Sinking Fund Committee was turned over exclusively to this Department.

The estimated total cost of making these projected improvements will approximate $43,500, and I request that your Board authorize the issue of Corporate Stock to that amount for this purpose pursuant to section 546 of the New York Charter.

Respectfully, WM. H. EDWARDS, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 15, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—In reference to the communication received from the Commissioner of Street Cleaning under date of July 6, 1911, requesting that an issue of Corporate Stock to an amount of $43,500 be allowed to provide means for the construction of a Storehouse to serve as the office of the Property Clerk, I report as follows:

The site upon which the building is to be erected is under the Williamsburgh Bridge, and was formerly in the joint possession of the Department of Street Cleaning and Bridges, but by a recent action of the Sinking Fund Commission was turned over exclusively to the Department of Street Cleaning.

The Commissioner proposes to make alterations to the building now there, and to build an addition that will be large enough to use for a Storehouse, and to build a brick wall around the property, and pave the yard.

The estimated cost is $43,500, itemized as follows:

Alterations to Old Building	$3,000 00
Erection of New Storehouse	32,000 00
Brick Wall	2,000 00
Lumber Sheds	2,200 00
Paving Yard	2,000 00
Architects' and Engineers' Fees, etc.	2,300 00
	$43,500 00

The present storehouse is located in Stable A, Avenue C, between 16th and 17th streets, but is said not to be well adapted for the purpose.

There does not appear to be an urgent need for this improvement, and we recommend that the Commissioner's request be denied. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan; Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That the request of the Commissioner of Street Cleaning, as contained in a communication, dated July 6, 1911, for an issue of corporate stock in the sum of forty-three thousand five hundred dollars ($43,500), pursuant to section 546 of the Greater New York Charter, for the construction of a storehouse to serve as the office of the Property Clerk of the Department of Street Cleaning on the property in the Borough of Manhattan, under the Williamsburg Bridge, and to pave the yard and build a wall about said property, be and the same is hereby denied.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Board of Education requesting, and report of the Corporate Stock Budget Committee recommending, an authorization of $450,000 Corporate Stock for Fire Protection Work on various Schools in all Boroughs:

Board of Education, Park Avenue and 59th Street, New York, July 13, 1911.

Mr. Joseph Haag, Secretary, *Board of Estimate and Apportionment:*

Dear Sir—I have the honor to transmit herewith a certified copy of a report and resolution adopted by the Board of Education at a meeting held on the 12th inst., relative to the issue of Corporate Stock to the amount of $450,000 for Fire Protection Work. Respectfully yours,

A. E. PALMER, Secretary, Board of Education.

To the Board of Education:

The Committee on Finance has received a request from the Committee on Buildings to take the necessary steps to procure funds for fire protection work in public school buildings for expenditure during the next twelve months. The following communication from the Superintendent of School Buildings explains the necessities of the case and the conditions that make the request necessary:

"New York, July 1, 1911.

"To the Committee on Buildings, Board of Education:

"In the matter of work for fire protection of the public school buildings permit me to report as follows:

"Early in 1908 we reported that it would require about three millions of dollars to make such permanent improvements or betterments in the school buildings of this City as to render them reasonably safe for pupils and teachers in the event of fire.

"Manifestly it was impossible to perform all of this work at once, therefore request was made upon the Board of Estimate and Apportionment for an appropriation of one million of dollars with which to take up the more urgent cases. This sum was granted in April, 1908.

"A further sum of $450,000 was granted in June, 1910.

"These sums were apportioned to the various Boroughs on the basis of necessity.

"The carrying out of much of the work has been under great difficulties owing to the fact that school sessions could not be suspended.

"Therefore, where there were three or four wood stairways to be removed and those of fireproof construction substituted therefor, it was impossible to proceed with the work on more than one at a time, thus covering a long period of time.

"The total appropriations for each Borough, together with their balances are as follows:

Manhattan	$484,800 00	Unencumbered balance	$63,555. 78
The Bronx	37,557 00	Unencumbered balance	7,563 76
Brooklyn	687,320 00	Unencumbered balance	89,961 86
Queens	156,450 00	Unencumbered balance	12,019 23
Richmond	83,873 00	Unencumbered balance	38,765 77
Total	$1,450,000 00		$211,866 40

"The reports of the Deputy Superintendents include, as requested, condensed statements of

"(a). What improvements have been made to the public schools in their respective Boroughs in the way of fire protection work since funds were originally authorized in 1908.

"(b). What work will be done from funds now on hand.

"(c). What funds will be required to bring each building up to the standard set by the Fire Protection Rules.

"The list (a) of improvements already made and (b) to be carried out during the present season are most interesting, but of too great length to be introduced here. As to statement (c) the estimates are as follows:

Manhattan	$531,274 00
The Bronx	122,853 00
Brooklyn	443,897 00
Queens	186,080 00
Richmond	95,235 00
	$1,379,339 00

"It would seem that many of the items are subject to variation when it actually comes to the laying out of the work.

"There are also the new demands from the building department for the performance of this, that or the other item of fire protection work, for which no provision has been made.

"It is safe to say, therefore, that ultimately the entire sum originally named will be required, but owing to the fact that the work must be carried on largely with the schools in session, I think it best to proceed carefully and systematically, asking only for those funds which we can really use during the next twelve months.

"I would, therefore, suggest that a request be made for an appropriation of $450,000, being the same amount as last year, and that it be apportioned as to the needs of the Boroughs as expressed in the items comprising the $1,379,339.

"Also that the Deputy Superintendents be required to prepare a list of the most necessary work which, with the estimated wages of Draftsmen and Inspectors, will equal the amounts thus apportioned. Very truly yours,

"C. B. J. SNYDER, Superintendent of School Buildings."

The Committee on Finance is of opinion that a request for the sum of $450,000 Corporate Stock should be made upon the Board of Estimate and Apportionment.

The following resolution is submitted for adoption:

Resolved, That the Board of Estimate and Apportionment be, and it is hereby, respectfully requested to authorize the Comptroller to issue Corporate Stock to the extent of four hundred and fifty thousand dollars ($450,000), and that said sum of $450,000 be apportioned as follows:

Manhattan	$173,340 00
The Bronx	40,095 00
Brooklyn	144,810 00
Queens	50,705 00
Richmond	31,050 00
	$450,000 00

to provide means for such permanent improvements or betterments in the school buildings of this City as to render them reasonably safe for pupils and teachers in the event of fire.

A true copy of report and resolution adopted by the Board of Education on July 12, 1911. A. E. PALMER, Secretary, Board of Education.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 24, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 13, 1911, the Secretary of the Board of Education transmitted a request for $450,000 Corporate Stock for fire protection work. This request was in addition to the various other requests for Corporate stock acted upon at the meeting of July 17, 1911. The new request was referred to the Corporate Stock Budget Committee. We endeavored to procure from the Department of Education a list of the school buildings on which the fire protection work was to be done. Although the request had been accompanied with a schedule showing the amounts that would be needed for each Borough, the Department of Education was unable to give a list of the buildings to be improved with fire protection. It was stated that the buildings had not yet been selected.

We believe that nothing should be left undone to provide fire protection work for public schools, but we believe that expensive work should not be done on buildings that will soon be abandoned.

We recommend the authorization of $450,000 Corporate Stock on condition that the Board of Estimate and Apportionment shall approve the list of buildings on which the proposed work is to be done.

We recommend the adoption of the attached resolutions. Respectfully,

WM. A. PRENDERGAST, Comptroller; ...., President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan: Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding four hundred and fifty thousand dollars ($450,000), to provide means for fire protection work on various public schools in all boroughs under the jurisdiction of the Department of Education, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposes aforesaid; provided, however, that no obligation against this authorization of corporate stock shall be incurred until after the Board of Estimate and Apportionment has given its approval to the plans, specifications and estimates of cost, and the school or schools selected for fire protection equipment.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Commissioner of Parks, Borough of The Bronx, requesting $4,345.90 Corporate Stock in addition to the amount already authorized for reconstructing and resurfacing the Roadway of Bronx and Pelham Parkway, from Williamsbridge road to White Plains road, Borough of The Bronx, together with a report of the Corporate Stock Budget Committee, recommending that said request be denied:

The City of New York, Department of Parks, Office of Commissioner for the Borough of The Bronx, Zbrowski Mansion, Claremont Park, July 15, 1911.

Hon. WILLIAM J. GAYNOR, Mayor and Chairman, *Board of Estimate and Apportionment,* 277 Broadway, New York City.

Dear Sir—Your Honorable Board has heretofore authorized a Corporate Stock issue of $20,000.

"For furnishing all the labor and material for reconstructing and surfacing with asphaltic mixture the roadway of the Bronx and Pelham Parkway, from the Williamsbridge road to the White Plains road, in the Borough of The Bronx, in the City of New York."

This authorization was based upon the estimate of the Engineer of this Department. On last Thursday bids were opened and the lowest bid was $1.06½ per yard, which would be either $23,682.58, or $24,345.90, depending upon the number of yards calculated.

As the amount of this bid is greater than the amount of the authorization, I respectfully request a further authorization by your Honorable Board of an amount equal to the difference between the original authorization and $24,345.90. This contract has been advertised on three different occasions and the present is the lowest bid that has been received at any time.

Requesting early action by your honorable Board, I am, Yours truly,

T. J. HIGGINS, Commission of Parks, Borough of The Bronx.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 15, 1911, the Commissioner of Parks, Borough of The Bronx, addressed a communication to the Board of Estimate and Apportionment in which he stated that this Board had authorized a corporate stock issue of $20,000 for furnishing all the labor and material for reconstructing and surfacing with asphaltic mixture the roadway of the Bronx and Pelham Parkway from the Williamsbridge Road to the White Plains Road, in The Bronx. He stated that on opening bids on this work, the lowest bid was $1.06½ per yard, which would make the cost of the work either $23,682.58 or $24,345.90, depending upon the number of yards calculated. He requested a further authorization of corporate stock to an amount equal to the difference between the original authorization and $24,345.90.

This matter was referred to the Corporate Stock Budget Committee. We report thereon as follows:

There is no record of any specific authorization of $20,000 for reconstructing and surfacing the roadway of the Bronx and Pelham Parkway from Williamsbridge Road to White Plains Road.

On July 13, 1911, the Board of Estimate and Apportionment adopted a resolution approving plans and specifications and estimate of cost to the amount of $19,000 for the reconstruction of this section of the Bronx and Pelham parkway. This is probably the action of the Board which the Commissioner regards as an authorization of $20,000. This work was chargeable to the following corporate stock fund:

C-DP-334—Construction and repaving of drives, etc.—under contract—
The Bronx—for completion of work.......................... $86,007 93

This authorization was released in the corporate stock budget adopted June 3, 1910. We are informed that the balance in this account is more than ample to meet the cost of the reconstruction and surfacing work under the contract on which bids have been opened.

As there appears to be no necessity for any additional authorization of corporate stock, we recommend that the Commissioner's request be denied and that the Secretary of the Board of Estimate and Apportionment be directed to suggest to the Commissioner that the proper way to make funds available, is to request the Board of Estimate and Apportionment to approve a new estimate of cost sufficient to meet the expenditures of the proposed contractor. Respectfully,

WM. A. PRENDERGAST, Comptroller; President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan, Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That the request of the Commissioner of Parks, Borough of The Bronx, as contained in a communication dated July 15, 1911, for an additional appropriation of four thousand three hundred and forty-five dollars and ninety cents ($4,345.90) for furnishing all labor and material for reconstructing and surfacing with asphaltic mixture the roadway of The Bronx and Pelham Parkway, from the Williamsbridge road to the White Plains road, in the Borough of The Bronx, be and the same is hereby denied.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented a report of the Corporate Stock Budget Committee relative to the acquisition of site for court house in New York County and request of Commissioner of Bridges for $2,500,000 corporate stock for constructing a terminal at Manhattan end of Brooklyn Bridge, with recommendation that action be deferred.

Which was laid over one week—August 3, 1911.

The Secretary presented the following report of the Corporate Stock Budget Committee recommending that provision be made for the extension of Irving place in connection with Rapid Transit Route 5, known as the Lexington avenue route.

City of New York, Office of the President of the Borough of Manhattan, City Hall, July 26, 1911.

Board of Estimate and Apportionment, 277 Broadway, New York City:

Gentlemen—Our report dated July 11, 1911, upon the request made by the President of the Borough of Manhattan for corporate stock to be authorized in 1911, did not include a recommendation for the authorization of the corporate stock for the extension of Irving place, although this item had been included among the requests originally submitted by the President of the Borough of Manhattan.

Since the action of the Board of Estimate and Apportionment on July 21 in authorizing the Public Service Commission to proceed with the construction of the

Rapid Transit railway on Lexington avenue, Irving place extension, etc., it has been deemed to be expedient to authorize an issue of moneys for the acquisition of title to lands acquired by the Irving place extension, and the opening of such street, or such part thereof as it may be determined by the Board of Estimate and Apportionment which shall be borne by the City at large.

It is therefore recommended that one hundred thousand ($100,000) dollars of corporate stock be authorized for Irving place extension.

Schedule A—New Authorizations.

Irving place extension in the Borough of Manhattan................	$100,000 00

We recommend the adoption of the attached resolution.

WM. A. PRENDERGEST, Comptroller; FRANCIS P. BENT, Acting President of the Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan, Committee on Corporate Stock Budget.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding one hundred thousand dollars ($100,000), to provide means for the Irving Place Extension, in the Borough of Manhattan, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller be, and is hereby authorized to issue said corporate stock of The City of New York in the manner provided by section 169 of the Greater New York Charter, the proceeds thereof to the amount of the par value of the stock to be applied to the purposs aforesaid.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Acting President of the Borough of Brooklyn requesting, and report of the Comptroller recommending, the modification of the Corporate Stock Salary and Wage Schedule of the Topographical Bureau, for the year 1911, in the office of the President of the Borough of Brooklyn; involving increases of salary for various employees and additional force:

The City of New York, Office of the President of the Borough of Brooklyn, July 24, 1911.

JOSEPH HAAG, Esq., *Board of Estimate and Apportionment:*

Dear Sir—At the meeting of the Board of Estimate to be held on the 27th inst., it is proposed to consider a resolution of the Comptroller relative to the matter of increases in the salaries of employees paid out of the corporate stock accounts. I attach hereto proposed schedule for this department which will increase the salaries of a number of deserving employees in our Topographical Bureau. I would respectfully request that a resolution be presented to the Board approving this schedule.

Kindly have the matter placed on the calendar for consideration.

Yours truly, L. H. POUNDS, Acting Borough President.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 24, 1911 and July 26, 1911, the Acting President of the Borough of Brooklyn requested modification of the corporate stock salary and wage schedule of the Topographical Bureau in his office for the year 1911. In connection therewith, I report as follows:

In the salary schedule it is proposed to add a Topographical Draftsman, at $1,500 per annum; a Rodman, at $1,200, and to increase the compensation of twenty-three incumbents in the sum of $5,410 per annum. In the wage schedule it is proposed to increase the rate of compensation of seven Laborers from $2.50 to $3 per diem.

The following table shows the incumbents proposed for increase, their service record, etc.:

Arthur C. Forbes, Assistant Engineer, from $3,000 to $4,000 per annum. He was appointed March 18, 1897; on June 1, 1908, he was increased to present rate.

George W. Herbert, Assistant Engineer, from $2,700 to $3,000 per annum. He was appointed July 18, 1896; on June 1, 1908, he was increased to present rate.

Edward C. Ranson, Assistant Engineer, from $2,700 to $3,000 per annum. He was appointed March. 22, 1899, and on June 1, 1908, increased to present rate.

Nathan W. Stanley, Assistant Engineer, from $2,400 to $2,700 per annum. He was appointed August 16, 1897, and on June 1, 1908, increased to present rate.

John B. Stein, Assistant Engineer, from $2,400 to $2,700 per annum. He was appointed July 1, 1901; on June 1, 1908, increased to present rate.

Arthur R. Ebel, Assistant Engineer, from $2,250 to $2,400 per annum. He was appointed April 20, 1903; on December 30, 1909, increased to present rate.

Robert L. Allen, Assistant Engineer, from $2,100 to $2,700 per annum. He was appointed April 1, 1897; on April 1, 1907, increased to present rate.

Edmund M. French, Assistant Engineer, from $1,800 to $2,100 per annum. He was appointed February, 1906; on January 16, 1908, increased to present rate.

Willis Cheyney, Assistant Engineer, from $1,800 to $2,100 per annum. He was appointed July, 1903; on May 9, 1906, he was transferred to the Topographical Bureau at the present rate.

Charles Tilgner, Assistant Engineer, from $1,800 to $2,100 per annum. He was appointed July, 1904; on May 1, 1906, was transferred to the Topographical Bureau at the present rate.

George J. Schweitzer, Assistant Engineer, from $1,800 to $2,100 per annum. He was appointed April 16, 1901; on May 1, 1906, increased to present rate.

Frederick E. Lane, Assistant Engineer, from $1,800 to $2,100 per annum. He was appointed July, 1902; on May 7, 1906, was transferred to Topographical Bureau at the present rate.

Francis Martin, Transitman, from $1,500 to $1,600 per annum. He was appointed August 1, 1900; on April 1, 1907, transferred to the Topographical Bureau at present rate.

William E. McLaughlin, Topographical Draftsman, from $1,200 to $1,500 per annum. He was appointed December 7, 1908, at the present rate.

Elias J. Siegel, Clerk, from $900 to $1,200 per annum. He was appointed April 4, 1905; on March 15, 1909, he was increased to present rate.

John F. Hurley, Clerk, from $540 to $750 per annum. He was appointed May 6, 1907; on November 2, 1909, he was transferred to Topographical Bureau at present rate.

William M. Hansen, Laborer, from $2.50 to $3 per diem. He was appointed in May, 1905; on December 17, 1906, increased to present rate.

John J. Egan, Laborer, from $2.50 to $3 per diem. He was appointed in May, 1902; on December 17, 1906, increased to present rate.

James J. Stackpole, Laborer, from $2.50 to $3 per diem. He was appointed June 15, 1903; on December 17, 1906, increased to present rate.

James W. O'Brien, Laborer, from $2.50 to $3 per diem. He was appointed June 15, 1904; on March 11, 1907, increased to present rate.

Francis M. Keenan, Laborer, from $2.50 to $3 per diem. He was appointed June 10, 1907; on July 13, 1908, increased to present rate.

Henry Ashcroft, Laborer, from $2.50 to $3 per diem. He was appointed April 13, 1908; on April 26, 1909, increased to present rate.

Victor A. Beard, Laborer, from $2.50 to $3 per diem. He was appointed June 1, 1909; on June 14, 1909, was transferred to the Topographical Bureau at present rate.

The Acting President states that the employees of the Topographical Bureau are paid out of corporate stock accounts; that the increases asked are for deserving employees who have not received increases for some time; that the increased work of the Bureau for the coming year will necessitate the employment of an additional Draftsman and an additional Rodman.

The following table shows the changes in detail.

Schedule Line.	Schedule Transfer.	
	Decrease.	Increase.
Assistant Engineer, at $4,000	....	$4,000 00
Assistant Engineer, 1 at $3,000	....	3,000 00
Assistant Engineers, 2 at $2,700	....	2,700 00
Assistant Engineers, 2 at $2,400	$2,400 00	....
Assistant Engineers, 2 at $2,250	2.250 00	....
Assistant Engineers, 5 at $2,100	....	8,400 00

	Schedule Transfer.

Clerk, 1 at $1,200	....	1,200 00
Clerk, 1 at $900	900 00	....
Clerk, 1 at $750	....	750 00
Clerk, 1 at $540	540 00	....
	$17,790 00	$25,900 00
Wages, Regular Force:		
Laborers, 1 at $3 per diem, 302 days	....	6,342 00
Laborers, 7 at $2.50 per diem, 302 days	5,285 00	....

The attached resolution, if adopted, will grant the request. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves the schedule, as revised for the Topographical Bureau, in the office of the President of the Borough of Brooklyn, for the year 1911, to be effective as of July 1, 1911, as follows:

President, Borough of Brooklyn.

Topographical Bureau—

Salaries, Regular Force:

Chief Engineer	1 at	$6,000 00
Assistant Engineer	1 at	4,000 00
Assistant Engineers	2 at	3,000 00
Assistant Engineers	3 at	2,700 00
Assistant Engineer	1 at	2,400 00
Assistant Engineer	1 at	2,250 00
Assistant Engineer	1 at	2,100 00
Assistant Engineers	2 at	1,800 00
Transitman and Computer	2 at	1,800 00
Transitmen	2 at	1,800 00
Transitmen,	4 at	1,650 00
Topographical Draftsmen	2 at	1,800 00
Topographical Draftsmen	2 at	1,650 00
Topographical Draftsmen	4 at	1,500 00
Searcher	1 at	1,800 00
Chainmen and Rodmen	3 at	1,200 00
Rodmen	6 at	1,200 00
Axemen	3 at	900 00
Stenographer and Typewriter	1 at	1,500 00
Stenographer and Typewriter	1 at	1,200 00
Clerk	1 at	1,200 00
Clerk,	1 at	750 00
Messenger	1 at	1,050 00

Wages, Regular Force:

Assistant Foreman, 1 (302 days), at $3.50 per day.

Laborers, 8 (302 days), at $3.00 per day.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following report of the Comptroller recommending the modification of salary schedule No. 1342, of the Department of Taxes and Assessments, in order to provide for a proper accounting of salaries paid jointly out of budget appropriation and special revenue bonds:

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 26, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 20 this Board approved of a schedule of salaries for the Department of Taxes and Assessments. The schedule as approved included a provision for salary increases to be paid from an issue of special revenue bonds, and further provision for the payment of added force out of special revenue bonds. The schedule combined the force without respect to the source of funds used for payment of salaries.

It has been the practice to establish separate schedules for those portions of salaries paid out of special revenue bonds. The result has been two unconnected schedules, neither of which showed the real payroll conditions. For instance, in the case where three clerks were increased from $1,200 to $1,350 each, the schedule did not show the increase, but still carried the clerks at $1,200 each.

On an entirely separate and isolated schedule there would appear a line, three clerks at $450 per annum, without anything to indicate that the $450 was to be used to pay increases of $150 per year, each, to three clerks drawing $1,200 per annum, each, from the budget appropriation. This has resulted in difficulty and inconvenience in auditing payrolls The difficulties can be eliminated by the adoption of a schedule which will show not only the amount to be paid to each employee out of the budget appropriation, but will show, also, the amount each employee is to receive from the proceeds of special revenue bonds. This combination schedule will not affect in any way the budget schedule which will remain as an independent schedule, although, for administrative and accounting purposes, it will be coupled with the corresponding schedule of salaries and portions of salaries paid out of special revenue bonds.

By having opposite each title of position the number of incumbents, the amount paid out of budget appropriation, the amount paid out of the special revenue bond funds, and the total, a better control will be assured.

Attached hereto is a schedule of salaries, set up as proposed above. I recommend its adoption. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of a schedule of salaries, as revised, for Account No. 1342 in the budget appropriation for the Department of Taxes and Assessments for the year 1911, also a schedule of salaries and parts of salaries payable from Special Revenue Bond Funds to employees scheduled in part under budget salary Account No. 1432, as follows:

Department of Taxes and Assessments.

		Paid from Budget Appropriation.	Paid from Special Revenue Bond Funds.	Total.
1342.	Salaries:			
	President, 1 at $8,000	$8,000 00	....	$8,000 00

Which was adopted by the following vote:
Affirmative—The Comptroller, the Acting President of the Board of Aldermen,

the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Chief Clerk of the Court of Special Sessions, requesting a modification of the salary schedule for the Court for the year 1911, together with a report of the Comptroller recommending that said request be not approved, as it would necessitate the use of salary accruals:

Clerk's Office, Court of Special Sessions, Corner Franklin and Centre Streets, New York, July 12, 1911.

To the Honorable the Board of Estimate and Apportionment of The City of New York, 280 Broadway, City:

Dear Sir—Request is hereby made for the modification of Salary Schedule No. 1423, Lines 37 and 38, supporting the appropriation made in the Budget for the year 1911 for the Court of Special Sessions, to be effective July 21, 1911, providing for the increase in the salary of Clerk of Court, Brooklyn, from $3,000 to $4,000 per annum, and the increase in salary of Deputy Clerk, Brooklyn, from $2,500 to $3,500 per annum, involving the transfer of $887.06 within the said appropriation.

Respectfully, FRANK W. SMITH, Chief Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 12, 1911, the Chief Clerk in the Court of Special Sessions requested modification of the salary schedule for the Court for the year 1911. In connection therewith I report as follows:

It is proposed to use $887.06 in salary account to increase the compensation of the Clerk and the Deputy Clerk in Part II., Borough of Brooklyn. The grades of positions for the proposed increases were approved by the Board of Estimate and Apportionment on July 6, 1911, and were fixed by the Board of Aldermen on July 11.

The use of accruals is contrary to the resolutions governing the 1911 Budget.

We recommend, therefore, that the request be not approved, and that the Secretary of the Board be directed to notify the Chief Clerk of the Court of Special Sessions that if other funds are not available, the proper procedure would be to make application for special revenue bonds in the necessary amount. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the request of the Court of Special Sessions, as contained in the communication dated July 12, 1911, for the modification of salary schedule 1423, lines 37 and 38, supporting the appropriation made in the Budget for the year 1911, be and the same is hereby disapproved.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary was directed to transmit a copy of the report of the Comptroller to the Chief Clerk, Court of Special Sessions.

The Secretary presented a report of Comptroller in the matter of a request of the Fire Commissioner for authority to purchase two automobiles at an expenditure not exceeding $4,000 each, and recommending that the Fire Commissioner be notified that the automobile for the Chief of Department should not be charged to corporate stock, and that expenditure for an automobile for the Electrical Engineer should not exceed $2,000.

Which was referred to the Fire Commissioner.

The Secretary presented the following communication from the Fire Department requesting, and report of the Comptroller recommending approval, pursuant to resolution adopted June 3, 1910, of specifications and estimate of cost ($16,800), for two three-ton motor trucks, two one and one-half-ton motor trucks and two self-propelled wagons for the use of the said Department:

Fire Department of The City of New York, Office of the Commissioner, May 22, 1911.

Hon. William A. Prendergast, *Comptroller:*

Sir—I have the honor to forward herewith for the approval of the Board of Estimate and Apportionment specifications for two three-ton motor trucks, equipped with power winch for pulling cable, two one and one-half-ton motor trucks and two self-propelled wagons.

It is proposed to purchase one three-ton motor truck, one one and one-half-ton motor truck and one self-propelled wagon under C-FD-3B, "for the purpose of providing means for the installation of a new fire alarm system in the Borough of Manhattan," at an estimated cost of $8,400, and also to purchase one three-ton motor truck, one one and one-half-ton motor truck and one self-propelled wagon under C-FD-22, "for placing electrical conductors underground," at an estimated cost of $8,400.

These trucks are intended for use in installing cable, fire alarm posts and boxes in connection with the new fire alarm telegraph system for the Borough of Manhattan and for placing fire alarm conductors underground, in the Borough of Brooklyn. The self-propelled wagons are for the use of the Engineers and Inspectors in the Fire Alarm Telegraph Bureau, for the purpose of collecting information and data from which to prepare specifications for this work and for supervising the installation of the work. Respectfully, R. WALDO, Fire Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On May 22, 1911, the Fire Commissioner requested approval of the specifications and estimated costs in the sum of $16,800 for two three-ton motor trucks, equipped with power winch for pulling cable, two one and one-half-ton motor trucks and two self-propelled wagons.

The estimated cost for the three-ton trucks are $4,700 each, for the one and one-half-ton trucks $3,000 each, and for the self-propelled wagons $700 each.

It is stated by the Commissioner that the trucks are intended for use in installing cable, fire alarm posts and boxes in connection with the new fire alarm telegraph system for the Borough of Manhattan, and for placing fire alarm conductors underground in the Borough of Brooklyn. The self-propelled wagons are for the use of the Engineers and Inspectors in the Fire Alarm Telegraph Bureau, for the purpose of collecting information and data from which to prepare specifications for this work and for supervising the installation of the work.

It is proposed to purchase one three-ton truck, one one and one-half-ton truck and one self-propelled wagon from the corporate stock fund entitled C-FD-3B, for the purpose of providing means for the installation of a new fire alarm system in the Borough of Manhattan, and one three-ton truck, one one and one-half-ton truck and one self-propelled wagon from the corporate stock fund entitled C-FD-22, underground electrical conductors, Borough of Brooklyn.

There is a sufficient unencumbered balance in each fund for the purpose.

With the consent of the Fire Commissioner, the Department of Finance has made the following changes in the specifications:

In the specifications for the three-ton and the one and one-half-ton trucks the guarantee clause has been changed to read as follows:

"Guarantee—The contractor shall guarantee the apparatus against all defects of material, workmanship and design."

The following clause has been added to each specification:

"The bond shall be for the full amount of the contract and shall continue for one year from the date of the acceptance of the trucks by the Fire Department."

In the specification for the self-propelled wagons, the words "cylinders shall have removable heads," have been stricken out in order to allow better competition.

As the trucks are to be used exclusively upon corporate stock work, the cost of their purchase is properly chargeable to corporate stock funds.

I recommend that the specifications (as amended) and the estimates of cost be approved by the adoption of the attached resolution. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution adopted on June 3, 1910, hereby approves the specifications and estimate of cost, sixteen thousand eight hundred dollars ($16,800), for two three-ton motor

trucks, equipped with power winch for pulling cable; two one and one-half-ton motor trucks, and two self-propelled wagons, for the use of the Fire Department.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communications from the Department of Docks and Ferries requesting, and report of the Comptroller recommending, modification of two wage schedules, Nos. 189 and 195, in said Department for the year 1911, involving a transfer of $4,739:

Department of Docks and Ferries, City of New York, Pier "A," North River, New York, May 12, 1911.

Hon. William A. Prendergast, *Comptroller:*

Sir—On March 27, 1911, a letter was sent to the Board of Estimate and Apportionment, asking that in the 1911 Budget the sum of $4,770 allowed for Stationary Engineers, in Line 189, be transferred to Line 195, Wages of Temporary Mechanics and Helpers. That letter requested that the item of $4,770 be assigned to cover emergency time for Mechanics and Helpers.

The request was referred to you for investigation and report, and I understand some objection has been raised as to assignment of the money in bulk under the heading suggested.

Since the submission of our former request, charges have been made against Line 189 to the extent of $30.94, leaving the balance now in that line $4,379, instead of the original amount of $4,770.

I now submit the following suggested detailed allotment of the amount to various positions and ask that the Budget be modified by the transfer of the sum of $4,739, from Line 189, and by the assignment of said amount to the various positions in Line 195, as follows:

Title.	Number.	Rate.	Amount.
Pipefitters	225	$5 50	$1,237 50
Pipefitter's Helper	225	3 00	675 00
Machinists	202	4 50	909 00
Machinist's Helper	303	3 00	909 00
Dock Builders	47	3 50	164 50
Foreman Dock Builder	10	4 50	45 00
Ship Carpenter	43	4 00	172 00
Carpenters	60	4 80	288 00
Riggers	45	3 50	157 50
Blacksmith	12	4 50	54 00
Blacksmith's Helper	12	3 00	36 00
Dock Laborer	15	2 50	37 50
Wiremen	12	4 50	54 00
			$4,739 00

Yours respectfully, CALVIN TOMKINS, Commissioner of Docks.

Department of Docks and Ferries, City of New York, Pier "A," North River, New York, May 18, 1911.

Hon. William A. Prendergast, *Comptroller:*

Sir—In a letter sent to you under date of May 12, 1911, asking transfer of the sum of $4,739, from Line 189, to Line 195, in this Department's 1911 Budget, several titles were referred to in the singular number, such as Pipefitter's Helper, Machinist's Helper, etc.

It is desired that all of these titles in the detailed statement be provided for in the plural number.

Yours very truly, CALVIN TOMPKINS, Commissioner of Docks.

Department of Docks and Ferries, City of New York, Pier "A," North River, New York, March 27, 1911.

Hon. William J. Gaynor, *Mayor, Chairman, Board of Estimate and Apportionment:*

Sir—In the Budget of this Department for the year 1911, Code No. 189, Wages of Temporary Employees, allows the sum of $4,770 for Stationary Engineers at $4.50 per day. Code No. 195, Wages of Temporary Employees, makes allowance for wages for temporary employment of Mechanics and Helpers.

From time to time we have occasion to use Mechanics and Helpers for more than eight hours per day in emergency cases which arise in connection with repairs to ferryboats while on the run, the employment of these Mechanics and Helpers in excess of eight hours being necessary to avoid laying up of boat and thus crippling the service.

We have no appropriation at present to pay the wages of these Mechanics and Helpers for the overtime. There is now due various employees for such work $186.75.

From present indications the amount allowed in Code No. 189 for temporary employment of Stationary Engineers, $4,770, will not be required for temporary Stationary Engineers, owing to rearrangement of the force of Engineers.

I respectfully request that the amount of $4,770, allowed in Code No. 189, for temporary employment of Stationary Engineers, be transferred to Code No. 195, and that it be classified in Code No. 195 as Emergency Time for Mechanics and Helpers, $4,770.

Yours respectfully, CALVIN TOMKINS, Commissioner of Docks.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On May 12, 1911, the Commissioner of Docks requested modification of two wage schedules, involving the transfer of $4,739, in the Department of Docks and Ferries, for the year 1911. In connection therewith I report as follows:

The request is in the Bureau of Ferries, Operation, No. 189, and Bureau of Ferries, Maintenance, No. 195. It is proposed to add to No. 195 Mechanics required for emergency work. The $4,739 necessary is to be covered by striking out Piledriver or Stationary Engineers, at $4.50 per day (1,060 days), $4,770, in No. 189.

The Commissioner states the following:

"From time to time we have occasion to use Mechanics and Helpers for more than eight hours per diem in emergency cases which arise in connection with repairs to ferryboats while on the run, the employment of these Mechanics and Helpers in excess of eight hours being necessary to avoid laying up of boat and thus crippling the service. We have no appropriation at present to pay the wages of these Mechanics and Helpers for the overtime."

The following table shows the changes in detail:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.

Blacksmith's Helper, at $3 per day (12 days).................	36 00
Dock Laborer, at $2.50 per day (15 days).....................	37 50
Wiremen, at $4.50 per day (12 days)..........................	54 00
	$19,498 50

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

—

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 237 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves transfer of funds appropriated to the Department of Docks and Ferries for the year 1911, to be effective as of June 1, 1911, as follows:

From

Department of Docks and Ferries.

Bureau of Ferries, Operation—	
189. Wages, Temporary Employees	$4,739 00

To

Bureau of Ferries, Maintenance—	
195. Wages, Temporary Employees	$4,739 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Public Service Commission for the First District, and report of Corporate Stock Budget Committee in the matter of the request of the said Commission for an authorization of corporate stock to the amount of $100,000 for the acquisition of real estate and interests therein necessary for the construction and operation of the Manhattan-Bronx Rapid Transit Railroad:

State of New York, Public Service Commission for the First District, Tribune Building, 154 Nassau Street, New York, June 30, 1911.

To the Board of Estimate and Apportionment of The City of New York:

The Public Service Commission for the First District herewith transmits to you as a part hereof a requisition for the sum of one hundred thousand dollars ($100,000) for the acquisition of real estate or interests therein necessary for the construction and operation of the Manhattan-Bronx Rapid Transit Railroad. Pursuant to requisitions made by the former Board of Rapid Transit Railroad Commissioners and this Commission the following amounts have already been appropriated by the Board of Estimate and Apportionment for the acquisition of real estate or interests therein for the said Manhattan-Bronx Rapid Transit Railroad:

1900	$500,000 00
1904	1,500,000 00
Making a total of	$2,000,000 00
Of which there has been expended to date the sum of, approximately	1,874,500 00
Leaving a balance of unissued bonds of	125,500 00

These amounts do not include premiums realized from the sale of bonds.

In addition to the amounts so appropriated the sum of $6,000 was appropriated on January 24, 1908, to pay for easements on the east side of Broadway at 233d street, and the sum of $500,000 was appropriated on January 31, 1908, to pay awards for property on 4th avenue, between 8th and 9th streets. These amounts, however, have been fully expended.

Certain awards have recently been made and confirmed for the easements condemned for the construction and operation of the said Manhattan-Bronx Rapid Transit Railroad on Westchester avenue, from 3d avenue to the Southern boulevard; on the Southern boulevard, from Westchester avenue to the Boston road, and thence on the Boston road to 181st street, in the Borough of The Bronx. The Commissioners of Appraisal in this matter filed their oaths of office on May 29, 1906, from which date, therefore, under the Rapid Transit Act, interest on the awards runs, and the amount of the awards so made and confirmed, with interest from May 29, 1906, is approximately $190,000.

Certain awards made and expenses incurred in the Fort George and Van Cortlandt Park condemnation proceedings are also still to be paid.

The Public Service Commission for the First District, therefore, pursuant to the provisions of section 37 of the Rapid Transit Act, being chapter 4 of the Laws of 1891, as amended, and pursuant to the provisions of the Public Service Commissions Law, being chapter 48 of the Consolidated Laws, hereby makes requisition upon the Board of Estimate and Apportionment of The City of New York for the authorization of the further amount of corporate stock of The City of New York to be issued and sold by the Comptroller sufficient to pay the estimated expense of the acquisition of real estate or of interests therein necessary for the construction and operation of the Manhattan-Bronx Rapid Transit Railroad, being the rapid transit railroad constructed under the contract of February 21, 1900, between The City of New York and John B. McDonald, that is to say, the sum of one hundred thousand dollars ($100,000).

In witness whereof, the Public Service Commission for the First District has caused this requisition to be subscribed by its Chairman and Secretary and its official seal to be hereto affixed this 30th day of June, 1911.

PUBLIC SERVICE COMMISSION FOR THE FIRST DISTRICT, by W. R. Willcox, Chairman. [seal]

Attest: Travis H. Whitney, Secretary.

Resolved, That the Public Service Commission for the First District make requisition upon the Board of Estimate and Apportionment of The City of New York for the authorization of a further amount of corporate stock of The City of New York to be issued and sold by the Comptroller in addition to the amounts of corporate stock already authorized to be issued sufficient to pay the estimated expense of the acquisition of real estate and of interests therein necessary for the construction and operation of the Manhattan-Bronx Rapid Transit Railroad, that is to say, the sum of one hundred thousand dollars ($100,000), and that the Chairman and the Secretary be and they hereby are authorized and directed to send a communication including a requisition for the said sum of one hundred thousand dollars ($100,000) to the said Board of Estimate and Apportionment in the following form:

State of New York, County of New York, ss.:

I, Travis H. Whitney, Secretary of the Public Service Commission for the First District, do hereby certify that I have compared the above with the original adopted by said Commission on June 30, 1911, and that it is a correct transcript therefrom and of the whole of the original.

In testimony whereof, I have hereunto subscribed my hand and affixed the seal of the Commission this 30th day of June, 1911.

[seal] Travis H. Whitney, Secretary.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 30, 1911, the Public Service Commission for the First District made requisition upon the Board of Estimate and Apportionment for corporate stock to the amount of $100,000 for the acquisition of real estate and interests therein necessary for the construction and operation of the Manhattan-Bronx Rapid Transit Railroad. In connection herewith we report as follows:

Pursuant to requisitions made by the former Board of Rapid Transit Railroad Commissioners, and the present Public Service Commission for the First District, the following amounts have already been appropriated for the acquisition of real estate and interest therein for the Manhattan-Bronx Rapid Transit Railroad:

March 1, 1900	$500,000 00
February 5, 1904	500,000 00
December 16, 1904	1,000,000 00
Total	$2,000,000 00

The expenditures to June 30, 1911, amounted to $1,903,943.51, leaving a balance of $96,056.49.

The Commission estimates that the $100,000 will be required to pay the awards recently made and confirmed for the easements for the construction and operation of the Manhattan-Bronx Rapid Transit Railroad, on Westchester avenue from 3d avenue to the Southern boulevard, on the Southern boulevard from Westchester avenue to the Boston road, and thence on the Boston road to 181st street, Borough of The Bronx.

There are claims for the awards in the Department of Finance to the amount of $150,085.08, with interest thereon from May 29, 1906, the date on which the Commissioners of Appraisal filed their oaths of office, to August 29, 1911, the date set for the payment of said awards, amounting to $47,276.80, making the total amount $197,361.80.

In view of the fact that the balance available only amounts to $96,056.49 there is need for the $100,000 requested.

We recommend, therefore, the adoption of the attached resolution approving the request. Respectfully,

WM. A. PRENDERGAST, Comptroller; ...., President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan; Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 37, of chapter 4, Laws of 1891, as amended, and chapter 429, Laws of 1907, as amended, and a requisition of the Public Service Commission for the First District, duly made by the Chairman and Secretary thereof on June 30, 1911, the Comptroller be and is hereby authorized to issue corporate stock of The City of New York to an amount not exceeding one hundred thousand dollars ($100,000), the proceeds whereof to be applied to the purchase of real estate or interest therein, to meet the requirements under the contract with John B. McDonald for the construction and operation of the Rapid Transit Railroad of The City of New York.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Public Service Commission for the First District requesting, and report of the Corporate Stock Budget Committee in the matter of the requisition of said Commission for $10,720 for the cost of changes in the Manhattan-Bronx Rapid Transit Railroad structure, necessitated by the widening of 207th street at Broadway, and 42d street, west of 5th avenue:

State of New York, Public Service Commission for the First District, Tribune Building, 154 Nassau Street, New York, June 23, 1911.

Joseph Haag, Esq., *Secretary, Board of Estimate and Apportionment,* 277 Broadway, New York City:

Dear Sir—The Commission is informed that under the date of April 6, 1911, at the request of the President of the Borough of Manhattan you appropriated the sum of $400,000 to cover the cost of widening certain streets and work incidental thereto, expressly mentioning changes in the Manhattan-Bronx Rapid Transit Railroad occasioned by such widening. The Commission has been requested by the President of the Borough of Manhattan to order its contractor to make such changes, but is advised by its Counsel that before issuing such orders an appropriation should be made against which the Commission can draw vouchers, as it cannot do with the present appropriation which is made to the credit of the President of the Borough of Manhattan.

The Commission is informed that changes in the subway structure due to the widening of 207th street at Broadway will cost about $2,400, and the changes in the subway structure under 42d street west of 5th avenue will be about $8,320. The Commission is further advised in this respect that expenditures such as this for other than railroad purposes cannot properly be charged against the railroad and made the basis for the payment of rental. In this respect the work will follow the precedent of the street widening at 3d avenue and 149th street, where the former Rapid Transit Board, at the request of the President of the Borough had the work done by its contractor, providing, however, in the agreement that the cost thereof should not be included in the cost of constructing the railroad and made the basis for the payment of additional rental.

The Commission, therefore, in pursuance of the provisions of the Rapid Transit Act, being chapter 4 of the Laws of 1891, as amended, hereby makes requisition upon the Board of Estimate and Apportionment for the sum of $10,720 for the purpose of making changes in the Manhattan-Bronx Rapid Transit Railroad necessitated by the widening of 207th street at Broadway, and of 42d street west of 5th avenue.

Very truly yours, TRAVIS H. WHITNEY, Secretary.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 23, 1911, the Public Service Commission for the First District made requistion for $10,720 for the cost of changes in the Manhattan-Bronx Rapid Transit Railroad structure, necesssitated by the widening of 207th street at Broadway, and of 42d street, west of 5th avenue. In connection therewith, we report as follows:

On April 6, 1911, the Board of Estimate and Apportionment adopted a resolution approving of an issue of $400,000 corporate stock, to provide means for widening, regrading, recurbing and otherwise improving the roadways of certain streets, and for "moving and replacement of subway entrances, and for other expenses incidental to such widening." The resolution was approved by the Board of Aldermen on April 18, 1911.

It now appears that a special authorization of corporate stock is not necessary to meet the requisition. The President of the Borough of Manhattan has authority, under the provisions of the resolution providing the appropriation of $400,000 for widening streets, to use funds from that account to pay the cost of changes in subway structure occasioned by the street improvement.

We are informed that Ernest P. Goodrich, Consulting Engineer in the office of the President of the Borough of Manhattan, and Alfred Craven, Engineer of Subways of the Public Service Commission, are of the opinion that the cost of the changes in the subway structure will not exceed $10,720, and that the expense is properly chargeable to the appropriation for widening streets.

It is stated by the Public Service Commission that expenditures of this character, "for other than railroad purposes, cannot properly be charged against the railroad and made the basis for the payment of rental." In this respect the work will follow the precedent of the street widening at 3d avenue and 149th street, where the former Rapid Transit Board, at the request of the President of the Borough had the work done by its contractors, providing, however, in the agreement that the cost thereof should not be included in the cost of constructing the railroad and made the basis for the payment of additional rental."

We recommend the adoption of the attached resolution, granting the request.

WM. A. PRENDERGAST, Comptroller; ...., President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan; Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That the Public Service Commission is hereby notified that the cost of making changes in the Manhattan-Bronx Rapid Transit Railroad, necessitated by the widening of 207th street at Broadway, and of 42d street west of 5th avenue, to the extent of ten thousand seven hundred and twenty dollars ($10,720), is chargeable to appropriation account "C-PM-48, Widening, Repaving and Otherwise Improving Roadways in the Borough of Manhattan," provided that the plans for the changes and the work done under the direction of the Public Service Commission are approved by the President of the Borough of Manhattan; and it is further provided that all expenditures for the purposes mentioned shall be properly certified for payment to the President of the Borough of Manhattan by the Public Service Commission.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented a report of the Comptroller in the matter of the request of the Secretary of the Armory Board for transfer of $166.85 within the appropriations made to the Armory Board for the year 1907, and recommending that the proper method of procedure to balance the accounts involved would be to request the issue of special revenue bonds.

The Secretary was directed to so notify the Secretary of the Armory Board.

The Secretary presented the following communication from the President of the Borough of The Bronx requesting, and report of the Corporate Stock Budget Committee recommending, modification of schedules for employees in the office of said Borough President, paid from other than Budgetary funds, involving salary increases in the sum of $5,050 per annum, and additional force in the sum of $5,700 per annum:

City of New York, President of the Borough of The Bronx, 3d Avenue and 177th Street, Office of the President, June 30, 1911.

Joseph Haag, Esq., *Secretary, Board of Estimate and Apportionment:*

Dear Sir—I transmit herewith a salary schedule of employees whose time will be charged, either wholly or in part, against corporate stock which was requested on

January 25, 1911. This schedule should be considered by the Corporate Stock Budget Committee in connection with the appropriation of corporate stock.

Yours truly,

CYRUS C. MILLER, President of the Borough of The Bronx.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 30, 1911, the President of the Borough of The Bronx requested modification of schedules paid for wholly or in part from other than Budget appropriations. In connection therewith we report as follows:

It is proposed to provide for salary increases and additional employees as follows:

Name and Title.	Present Salary.	Proposed Salary.	Increase.	Additions to Force.
Office of Chief Engineer of Sewers and Highways.				
R. H. Gillespie, Chief Engineer.....	$5,000 00	$6,000 00	$1,000 00	....
Bureau of Highways, Engineering Division.				
John R. Moore, Assistant Engineer..	2,700 00	3,000 00	300 00	....
Thomas B. Dyer, Assistant Engineer	2,250 00	2,500 00	250 00	....
F. F. McDowell, Assistant Engineer.	2,250 00	2,500 00	250 00	....
F. L. Smith, Assistant Engineer.....	1,950 00	2,100 00	150 00	....
Geo. C. Molloy, Assistant Engineer.	1,950 00	2,100 00	150 00	....
Geo. F. Capper, Transitman.......	1,500 00	1,650 00	150 00	....
W. A. Smith, Rodman to Transitman	1,200 00	1,500 00	300 00	....
A. Arent, Jr., Axeman to Rodman..	900 00	1,050 00	150 00	....
J. A. Spears, Axeman to Rodman..	900 00	1,050 00	150 00	....
Rose Jackson, Stenographer........	900 00	1,050 00	150 00	....
Topographical Bureau.				
Emil A. Wiggers, Topographical Draftsman	1,350 00	1,500 00	150 00	....
Jas. J. Walsh, Topographical Draftsman	1,200 00	1,350 00	150 00	....
Thos. F. Hennessy, Clerk..........	1,050 00	1,200 00	150 00	....
———, Clerk	....	....	....	$300 00
Bureau of Design.				
Chas. Gartensteig, Assistant Engineer	3,600 00	4,000 00	400 00	....
R. J. Smyth, Assistant Engineer.....	1,950 00	2,100 00	150 00	....
G. L. Bennett, Assistant Engineer..	2,250 00	2,400 00	150 00	....
———, Structural Steel Draftsman	....	....	....	1,800 00
———, Structural Steel Draftsman	....	....	....	1,800 00
A. Brenzinger, Topographical Draftsman	1,650 00	1,800 00	150 00	....
J. Sendach, Topographical Draftsman	1,350 00	1,500 00	150 00	....
E. Hohn, Topographical Draftsman.	1,350 00	1,500 00	150 00	....
J. L. Grindle, Mechanical Draftsman	1,650 00	1,800 00	150 00	....
———, Clerk	....	....	....	300 00
Bureau of Sewers, Engineering Division, Sewerage District Plans.				
W. E. Downs, Assistant Engineer..	1,800 00	1,950 00	150 00	....
W. E. Morris, Jr., Assistant Engineer	1,800 00	1,950 00	150 00	....
———, Topographical Draftsman.	....	....	....	1,500 00
			$5,050 00	$5,700 00

The total increases in salaries, as shown, amount to $5,050, and the added force represents an additional cost of $5,700 per year, making a total added cost per annum of $10,750.

It is stated by the President that the changes shown for the force assigned to the work of preparing sewerage and drainage district plans are not intended for immediate effect, but are proposed from January 1, 1912. The force assigned to this work is fixed as to the service performed and the funds from which the employees are paid are always the same. The schedule is therefore submitted in the form identical with a Budget schedule, where the force is fixed and the fund from which the individuals are paid is the same at all times. The balance unassigned is the amount of the authorization deemed to be available for the purpose of paying salaries, and may be modified when desired for the proposed January 1 increases.

The following table shows the line item changes in detail:

Code No.		Schedule Transfer.	
		Increase.	Decrease.
1734.	Assistant Engineer, 1 at $2,700	....	$2,700 00
	Assistant Engineer, 1 at $3,000	$3,000 00	....
	Assistant Engineers, 3 at $2,500	5,000 00	....
	Assistant Engineers, 3 at $2,250	....	4,500 00
	Assistant Engineer, 1 at $2,100	4,200 00	....

	Assistant Engineer, at $2,100	2,100 00	....
	Assistant Engineer, 1 at $1,950	....	1,950 00
	Topographical Draftsmen, 2 at $1,800	1,800 00	....
	Topographical Draftsmen, 3 at $1,650	....	1,650 00
	Topographical Draftsmen, 4 at $1,500	4,500 00	....
	Topographical Draftsmen, 3 at $1,350	....	4,050 00
	Structural Steel Draftsmen, 3 at $1,800	3,600 00	....
	Mechanical Draftsmen, 2 at $1,800	1,800 00	....
	Mechanical Draftsmen, 2 at $1,650	....	1,650 00
	Clerk	300 00	....

We recommend the approval of the request, with the changes noted, and transmit herewith resolutions providing therefor.

Respectfully,

WM. A. PRENDERGAST, Comptroller; ...., President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan; Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules, as revised, for the office of the President of the Borough of The Bronx for the year 1911, as follows:

Division Chief Engineer, Sewers and Highways—

1716. Salaries:

Chief Engineer	1 at	$6,000 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Commissioner of Water Supply, Gas and Electricity requesting an appropriation of $8,500 from the water revenues received in the Borough of Brooklyn, to provide for the equipment of additional quarters allotted to the Water Registrar in the Borough; together with a report of the Comptroller recommending the approval of said request:

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13 to 21 Park Row, City of New York, July 15, 1911.

Mr. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Dear Sir—The offices in the Municipal Building, Borough of Brooklyn, formerly occupied by the Coroner's office, have been assigned by the Sinking Fund Commissioners to the use of this Department, and I want to equip these new quarters for the Water Register's force. There is not sufficient money remaining in the proper account for that purpose, and I respectfully request that the Board of Estimate and Apportionment make a further appropriation out of the water revenue of that Borough of $8,500. The principal items making up this amount are as follows:

33 Bookkeepers desks, at $125 (steel)	$4,125 00
24 10-drawer steel letter files for the filing of historical cards, at $60 (steel)	1,440 00
8 flat top desks, at $58 (steel)	464 00
4 special filing cabinets for Meter Setting Division, at $300 (steel)	1,200 00
1 Burroughs adding machine, 15 bank, at	668 12
Wire screening, railing and counter, estimated	400 00

Yours truly, HENRY S. THOMPSON, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 15, 1911, the Commissioner of Water Supply, Gas and Electricity requested a further appropriation of $8,500 from the water revenues received in the Borough of Brooklyn to provide for the equipment of additional quarters allotted to the Water Registrar in the Borough. In connection therewith I report as follows:

The rooms in the Municipal Building formerly occupied by the Coroner's office have been assigned to the Water Registrar and it is proposed to install the Frontage Rate Division in them.

To equip their quarters with modern steel office furniture similar to that in the other divisions of the Bureau, and to provide for filing cabinets for the Meter Setting Division, the following items are stated to be necessary:

33 steel Bookkeepers' desks, at $125	$4,125 00
24 10-drawer steel letter files, for filing historical cards, at $60	1,440 00
8 steel flat-top desks, at $58	464 00
4 special steel filing cabinets for Meter Setting Division, at $300	1,200 00
1 Borroughs adding machine, 15-bank	668 12
Wire screening, railing and counter	400 00
	$8,297 12

Minor items are estimated to give the total of $8,500, requested.

The Board of Estimate and Apportionment has appropriated funds for the equipment of the remaining divisions of the Bureau and provision for similar equipment for the new quarters appears to be needed.

On July 13, 1911, $400 was appropriated for the purchase of furniture and fittings for the Water Registrar's Bureau. The sum was not taken into consideration at the time of the Commissioner's request.

I recommend, therefore, the adoption of the attached resolution granting the request to the extent of $8,100. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That, pursuant to the provisions of subdivision 1 of section 242 of the Greater New York Charter, the Board of Estimate and Apportionment hereby determines that the additional sum of eight thousand one hundred dollars ($8,100) be and hereby is set aside and appropriated from the water revenues received in the Borough of Brooklyn, during the year 1911, for the use of the Department of Water Supply, Gas and Electricity in the maintenance and distribution of the water supply of the Borough of Brooklyn, during the year 1911; said appropriation to be used to replenish the account entitled S-221, Maintenance and Distribution of Water Supply in the Borough of Brooklyn, 1911, Administration, Purchase of Furniture and Fittings, Bureau of Water Registrar.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen,

the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Acting President of the Borough of Manhattan requesting, and report of the Comptroller recommending, a modification of two wage schedules (Nos. 1694 and 1702), involving a transfer of $1,200, in the office of the President of the Borough for the year 1911, to provide for increasing salary of eight Male Attendants from $900 to $1,050 per annum, and for the employment of an additional Male Attendant at $1,050, and an additional Female Attendant at $720 per annum:

City of New York, Office of the President of the Borough of Manhattan, City Hall, July 24, 1911.

Joseph Haag, *Secretary, Board of Estimate and Apportionment*, 277 Broadway, New York City:

Dear Sir—Request is hereby made that the supporting schedules, attached to the Budget of the President of the Borough of Manhattan for the year 1911, be amended so as to read as follows:

Bureau of Public Buildings and Offices, Maintenance of Public Buildings and Offices.

1694. Wages Regular Employees:

Janitor	$1,500 00
Janitors, 9 at $1,200	10,800 00
Janitors, 2 at $1,050	2,100 00
Janitors, 2 at $900	1,800 00
Inspector	1,500 00
Inspector	1,200 00
Watchmen, 4 at $900	3,600 00
Attendant	1,050 00
Attendants, 3 at $720	2,160 00
Cleaners (female), 186 at $360	66,960 00
Engineer, 1 at $6 (365 days)	2,190 00
Engineers, 2 at $5 (365 days)	3,650 00
Engineers, 12 at $4.50 (365 days)	19,710 00
Firemen, 35 at $3 (365 days)	28,325 00
Oilers, 4 at $3 (312 days)	3,744 00
Foremen, 2 at $1,200	2,400 00
Foremen Elevatormen, 2 at $3 (312 days)	1,872 00
Foreman, 1 at $5 (312 days)	1,560 00
Assistant Foreman, 1 at $4 (365 days)	1,460 00
Assistant Foremen, 2 at $3 (312 days)	1,872 00
Assistant Foreman, 1 at $3.50 (312 days)	1,092 00
Assistant Foremen, 2 at $2.50 (312 days)	1,560 00
Elevatormen, 24 at $900	21,600 00
Laborers, 8 at $3 (312 days)	7,488 00
Laborers, 15 at $2.50 (365 days)	$13,687 50
Laborers, 83 at $2.50 (312 days)	64,740 00
	$279,620 50

Public Baths and Comfort Stations.

1702. Wages, Regular Employees:

Engineers, 25 at $4.50 per diem (365 days)	$41,062 50
Attendant (male), 1 at $1,200	1,200 00
Attendants (male), 24 at $1,050	25,200 00
Attendants (female), 73 at $900	65,700 00
Attendants (female), 90 at $720	64,800 00
Firemen, 36 at $3 per diem (365 days)	39,420 00
Unassigned	117 50
	$237,500 00

Under Code No. 1694 the number of Cleaners is reduced from 194 to 186.

Under Code No. 1702 the number of Attendants at $1,050 is increased by nine, and the number of Attendants at $900 is decreased by eight. The number of Female Attendants at $720 is increased by one.

In this change the salary of nine Attendants is increased from $900 to $1,050 per annum.

Arrangements have been made for this modification to take effect August 1, 1911. It is requested that a clause to that effect be inserted in the resolution. There is also enclosed a form for the necessary transfer of funds. Very truly yours,

E. V. FROTHINGHAM, Acting President of the Borough of Manhattan.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 24, 1911, the President of the Borough of Manhattan requested modification of two wage schedules for regular employees, involving a transfer of $1,200 in his office for the year 1911. In connection therewith, I report as follows:

The request is in the Bureau of Public Buildings and Offices, Maintenance of Public Buildings and Offices, No. 1694, and Public Baths and Comfort Stations, No. 1702.

The changes call for increases in the salaries of eight Male Attendants, from $900 to $1,050 per annum, for an additional Male Attendant at $1,050, and an additional Female Attendant at $720. The amount necessary is to be obtained by dropping eight Female Cleaners at $360. The net decrease of $90 is to be carried as an unassigned balance.

The modification is to be effective as of August 1, 1911.

The following table shows the changes in detail:

Account No.	Schedule Line.	Schedule Transfer. Decrease.	Schedule Transfer. Increase.	Cash Transfer. Decrease.	Cash Transfer. Increase.
1694.	Cleaners, 194 at $360	....	$2,880 00	....	$1,200 00
1702.	Attendants, 15 at $1,050	$9,450 00	....	$3,937 50	....
	Attendants (Male), 81 at $900	....	7,200 00	....	3,000 00
	Attendants (Female), 89 at $720	720 00	....	300 00	....
	Unassigned	....	90 00	....	37 50
		$10,170 00	$10,170 00	$4,237 50	$4,237 50

The attached resolutions, if adopted, grant the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules, as revised, for the office of the President of the Borough of Manhattan for the year 1911, to take effect August 1, 1911, as follows:

President, Borough of Manhattan.

Bureau of Public Buildings and Offices, Maintenance of Public Buildings and Offices—

1694. Wages, Regular Employees:

Firemen, 36 at $3 per diem (365 days)	39,420 00
Unassigned	117 50
	$237,500 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 237 of the Greater New York Charter, hereby approves transfer of funds appropriated to the office of the President of the Borough of Manhattan for the year 1911, as follows:

From

President, Borough of Manhattan, Bureau of Public Buildings and Offices, Maintenance of Public Buildings and Offices—

1694. Wages, regular employees $1,200 00

To

President, Borough of Manhattan, Bureau of Public Buildings and Offices, Public Baths and Comfort Stations—

1702. Wages, regular employees $1,200 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the President of the Borough of Richmond in the matter of and report of the Corporate Stock Budget Committee recommending that the Corporation Counsel be requested to begin proceedings to acquire by condemnation the easement in the land traversed by the sewer from the Sea View Hospital, Borough of Richmond:

The City of New York, Office of the President of the Borough of Richmond, Bureau of Engineering Construction, Borough Hall, New Brighton, New York City, July 5, 1911.

Board of Estimate and Apportionment, 277 Broadway, New York City:

Gentlemen—At the meeting of the Board held on February 9, 1911, a communication from me requesting an issue of corporate stock to the amount of $1,500 to be used for the acquisition of an easement in land traversed by the sewer from the Sea View Hospital, was referred to the Corporate Stock Budget Committee, and an opinion of the Corporation Counsel was attached thereto, which stated that he believed the

Comptroller should purchase this land at private sale. Mr. O'Malley of the Real Estate Division of the Department of Finance states that he has found it impossible to purchase this land at private sale at a reasonable figure, and that it is necessary that a condemnation commission be appointed.

We, therefore, request that previous action taken in this matter be rescinded, and that the Corporation Counsel be requested to proceed with the application for the appointment of Commissioners of Estimate and Assessment for the condemning of this easement. We also request that the date for the vesting of title of this easement be determined to be that on which the Commissioners file their oaths of office as there are no buildings on the property, and as early acquirement of title in this easement is urgently needed, so that the sewer for the Sea View Hospital can be constructed and put into operation at the earliest possible date.

Yours very truly,

GEORGE CROMWELL, President of the Borough, by Louis L. Tribus, Acting Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On February 9, 1911, the Board of Estimate and Apportionment referred to the Corporate Stock Budget Committee a communication from the President of the Borough of Richmond requesting $1,500 in Corporate Stock, to be used for the acquisition of an easement in land traversed by the sewer from the Sea View Hospital. On July 5, 1911, the President requested that the previous action be rescinded and that the Corporation Counsel be requested to proceed with an application for the appointment of Commissioners of Estimate and Assessment for the condemning of the easement. In connection therewith we report, as follows:

An item in the 1911 Corporate Stock Budget provides $2,500 for the easement. At the time the original request was made the President of the Borough was of the opinion that the easement could be acquired by private purchase, and that the cost would be about $1,500. An investigation by the Bureau of Real Estate of the Department of Finance developed the fact that there were many owners in the line of the proposed easement, and that, owing to the insignificant individual damage or values, that it would be more economical and practical if the City brought a proceeding and condemned the land required for the sewer. It was estimated that the cost would approximate $2,500, and your Committee recommended an authorization accordingly.

We recommend, therefore, that the Corporation Counsel be requested to begin proceedings to acquire the easement by condemnation procedings. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; GEORGE McANENY, President, Borough of Manhattan; Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That the Corporation Counsel be and he is hereby requested to begin proceedings to acquire by condemnation the easement in land traversed by the sewer from the Sea View Hospital, Borough of Richmond, as requested in a communication from the President, Borough of Richmond, dated July 5, 1911.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Acting President of the Borough of Manhattan requesting, and report of the Comptroller relative to the modification of salary schedules Nos. 1653, 1658, 1682 and 1689, supporting the appropriation made in the Budget for the year 1911 for the office of the President of the Borough of Manhattan, providing for increases in the salaries of certain positions, the addition of new positions, and the elimination of other positions, involving the transfer of $1,666.66:

City of New York, Office of the President of the Borough of Manhattan, City Hall, July 22, 1911.

Joseph Haag, Esq., *Secretary of Board of Estimate and Apportionment,* 277 Broadway, New York City:

Dear Sir—Request is hereby made that the supporting schedule of salaries, attached to the Budget of the President of the Borough of Manhattan for the year 1911, be amended so as to read as follows:

Foreman	1,200 00
Messenger	1,500 00
Messengers, 5 at $1,200	6,000 00

Messenger	1,050 00
Automobile Enginemen, 2 at $1,200	2,400 00
Attendant	1,050 00
Attendant	900 00
Unassigned	140 00
	$41,850 00

Bureau of Sewers, Administration—

1682. Salaries:

Chief Engineer	$6,000 00
Engineer	4,000 00
Secretary	2,850 00
Clerk	2,400 00
Clerk	1,800 00
Messenger	1,500 00
Messenger	1,050 00
General Inspector	3,000 00
Inspector of Connections, 5 at $1,200	6,000 00
Inspector of Masonry	2,100 00
Automobile Enginemen, 2 at $1,200	2,400 00
	$33,100 00

Bureau of Public Buildings and Offices, Administration—

1689. Salaries:

Superintendent	$5,000 00
Assistant Engineer	3,500 00
Assistant Engineer	2,550 00
Assistant Engineers, 2 at $1,800	3,600 00
Clerk	1,650 00
Clerk	1,350 00
Mechanical Engineer	2,550 00
Mechanical Engineer	2,100 00
Structural Steel Draftsmen, 2 at $1,800	3,600 00
Mechanical Draftsman	1,800 00
Architectural Draftsman	1,800 00
Clerk	1,200 00
Clerk	900 00
Stenographer and Typewriter	1,200 00
Storekeeper	1,800 00
Automobile Engineman	1,200 00
Attendant	1,050 00
Unassigned	220 00
	$37,070 00

The changes made in the foregoing schedules are the following:

Under Code No. 1653 the number of Clerks at $1,650 per annum is increased by one. The number of Clerks at $1,500 is reduced by three. An Attendant at $1,200 is added. A Stenographer at $1,800 is eliminated.

These changes are to provide increases in salary from $1,500 to $1,650 for two Clerks, and from $1,050 to $1,200 for one Attendant.

Under Code No. 1658 the number of Clerks at $1,050 is reduced by one. A Clerk is added. An Attendant at $1,050 is added. An Attendant at $900 is eliminated.

By this change it is intended to increase one Attendant from $900 to $1,050 per annum.

Under Code No. 1682 the only change made in this schedule is the addition of an Engineer at $4,000 per annum. This is a new position.

Under Code No. 1689—An Assistant Engineer at $3,500 is substituted for one at $3,000. The number of Assistant Engineers at $1,800 is reduced from three to two. A Mechanical Engineer at $2,100 is substituted for one at $1,800. An Architectural Draftsman at $1,800 is substituted for one at $1,500. A Clerk at $720 is eliminated. A Stenographer and Typewriter at $1,200 is added.

It is intended by this change to increase the salary of an Assistant Engineer from $3,000 to $3,500; a Mechanical Engineer from $1,800 to $2,100, and an Architectural Draftsman from $1,500 to $1,800.

Arrangements have been made to make these salary changes effective August 1, 1911, and it is accordingly requested that the modifications be made effective as of that date. There is also enclosed a form for the necessary transfer of funds.

Very truly yours,

E. V. FROTHINGHAM, Acting President of the Borough of Manhattan.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 22, 1911, the President of the Borough of Manhattan requested modification of four salary schedules, involving a transfer of $1,666.66, in his office for the year 1911. In connection therewith I report as follows:

The request is in General Administration, No. 1653; Bureau of Highways, Administration, No. 1658; Bureau of Sewers, Administration, No. 1682, and Bureau of Public Buildings and Offices, Administration, No. 1689.

The changes call for increased compensation for one Clerk, from $1,500 to $1,650 per annum; for an Attendant, from $1,050 to $1,200, and one from $900 to $1,050; for an Assistant Engineer, from $3,000 to $3,500; a mechanical Engineer, from $1,800 to $2,100, and an Architectural Draftsman, from $1,500 to $1,800.

It is also proposed to add an Engineer, at $4,000 per annum, for new work in the Bureau of Sewers; a Stenographer and Typewriter, at $1,200, and a Clerk, at $480 per annum.

The funds necessary for the changes are to be provided by dropping two Clerks, at $1,500 per annum each; a Stenographer, at $1,800, and a Clerk, at $1,050, and by transfer from unassigned balances.

The following table shows the line item changes in detail:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
1653.	Clerks, 7 at $1,500	....	$3,000 00	....	$1,250 00
	Stenographer, 1 at $1,800	....	1,800 00	....	750 00
	Attendant, 1 at $1,200	$1,200 00	....	$500 00	....
1658.	Clerks, 3 at $1,050	....	1,050 00	....	437 50
	Attendant, 1 at $1,050	1,050 00	....	437 50	....
	Attendants, 2 at $900	....	900 00	....	375 00
	Clerk, 1 at $480	480 00	....	200 00	....
	Unassigned balance, $120	20 00	....	8 33	....
1689.	Assistant Engineer, 1 at $3,000	....	3,000 00	....	1,250 00
	Assistant Engineer, 1 at $3,500	3,500 00	....	1,458 33	....
	Assistant Engineers, 3 at $1,800	....	1,800 00	....	750 00
	Mechanical Engineer, 1 at $1,800	....	1,800 00	....	750 00
	Mechanical Engineer, 1 at $2,100	$2,100 00	....	875 00	....
	Architectural Draftsman, 1 at $1,500	....	1,500 00	....	625 00
	Architectural Draftsman, 1 at $1,800	1,800 00	....	750 00	....
	Clerk, 1 at $720	....	720 00	....	300 00
	Stenographer and Typewriter, 1 at $1,200	1,200 00	....	500 00	....
	Unassigned balance	220 00	....	91 67	....
1682.	Engineer, 1 at $4,000	4,000 00	....	1,666 67	....
		$15,570 00	$15,570 00	$6,487 50	$6,487 50

The attached resolutions, if adopted, will grant the request. Respectfuly,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules, as revised, for the office of the President of the Borough of Manhattan, for the year 1911, to take effect August 1, 1911, as follows:

President, Borough of Manhattan.

General Administration—

Storekeeper	1,800 00
Automobile Engineman	1,200 00
Attendant	1,050 00
Unassigned balance	220 00
	$37,070 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

—

Resolved, That, pursuant to the provisions of section 237 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves transfer of funds appropriated for the office of the President of the Borough of Manhattan, for the year 1911, as follows:

From

President, Borough of Manhattan.

General Administration—	
1653. Salaries	$1,500 00
Bureau of Highways, Administration—	
1658. Salaries	166 66

To

President, Borough of Manhattan.

Bureau of Sewers, Administration—	
1682. Salaries	$1,666 66

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen,

the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communications from the President of the Borough of Richmond requesting, and report of the Comptroller relative to, modification of the non-budgetary schedule of salaries and wages, for the Topographical Bureau in the office of said Borough President to include every employee in the Bureau at the present rate of compensation:

The City of New York, Office of the President of the Borough of Richmond, Borough Hall, New Brighton, New York City, June 29, 1911.

Honorable Board of Estimate and Apportionment, 277 Broadway, New York:

Gentlemen—I would request a modification of the Schedule of Salaries and Wages of the Topographical Bureau of this office (payable from Corporate Stock Fund entitled "C-PR-2, Fund for Topographical Bureau of the Borough of Richmond"), as herein set forth.

I would further particularly request that in the resolution adopting this schedule there be inserted a provision to the effect that in respect of those lines of the schedule where increases in salary or promotions are shown over those now in force that these lines be construed to cover the incumbents of the positions in question at their present salaries until the increases in salaries to the amount shown in the schedule herein proposed have been made. This request is made in order that there may be no obstacle to the passing of our payrolls in the Department of Finance pending the increases in salaries and promotions referred to.

The schedule proposed is as follows:

Principal Assistant Engineer	1 at	$3,600 00
Assistant Engineer	1 at	2,700 00
Assistant Engineers	4 at	2,400 00
Assistant Engineers	2 at	2,250 00
Assistant Engineers	4 at	2,000 00
Assistant Engineers	3 at	1,800 00
Assistant Engineers	3 at	1,650 00
Assistant Engineers	2 at	1,500 00
Assistant Engineer	1 at	1,350 00
Assistant Engineer	1 at	1,200 00
Chief Draftsman	1 at	2,000 00
Topographical Draftsman	1 at	2,000 00
Topographical Draftsmen	3 at	1,800 00
Topographical Draftsmen	2 at	1,650 00
Topographical Draftsman	1 at	1,500 00
Topographical Draftsmen	8 at	1,350 00
Topographical Draftsmen	3 at	1,200 00
Transitman and Computer	1 at	1,800 00
Transitmen and Computers	3 at	1,650 00
Transitmen and Computers	2 at	1,500 00
Transitmen and Computers	4 at	1,350 00
Transitmen and Computers	7 at	1,200 00
Leveler	1 at	1,500 00
Rodmen	5 at	1,200 00
Rodman	1 at	1,050 00
Rodmen	3 at	900 00
Axemen	9 at	900 00
Foremen	4 at	1,200 00
Drivers	3 at	900 00
Laborers	17 at	900 00
Stenographer and Typewriter	1 at	1,650 00
Clerk	1 at	1,350 00

This schedule is the same as that adopted by your Board on June 1, with the following exceptions:

1. The following lines were omitted from said schedule of June 1 for the reason that the positions had not been established according to section 56 of the Charter, but as they have now been established we believe there will be no objection to incorporating them in the proposed schedule, viz.:

Topographical Draftsman	1 at	$2,000 00
Topographical Draftsmen	8 at	1,350 00

Stenographer and Typewriter	1 at	1,650 00
Clerk	1 at	1,350 00

2. The line Rodmen, 4 at $1,200, has been increased to Rodmen, 5 at $1,200, and the line Rodmen, 2 at $1,050, has been decreased to 1 at $1,050, an increase of $150 in these two lines.

3. The line 1 Messenger at $900 has been eliminated for the reason that there is no further need for this position, a decrease of $900.

As practically all the increases in salary, promotions, etc., have been considered by the Corporate Stock Budget Committee in connection with our request for corporate stock and have been favorably reported upon by the Committee, I believe there is no objection to the adoption of the schedule requested.

I would request that the schedule be put into effect as of July 1, 1910.

Respectfully yours, GEORGE CROMWELL, President of the Borough.

The City of New York, Office of the President of the Borough of Richmond, Borough Hall, New Brighton, New York City, July 24, 1911.

Hon. W. A. Prendergast, *Comptroller:*

Dear Sir—John D. Kohlmann, Jr., Laborer, has been on leave of absence for one year and we desire to reinstate him as an Axeman, his name being on the promotion list for this position. We would, therefore, ask that our schedule for the present year be made to read, 10 Axemen at $900 instead of 9 Axemen at $900, so that Mr. Kohlmann may be reinstated, such reinstatement to be in the Bureau of Topography of this office. Yours respectfully,

GEORGE CROMWELL, President of the Borough.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 29, 1911, the President of the Borough of Richmond requested modification of the non-budgetary schedule for the Topographical Bureau under his jurisdiction. In connection therewith I report as follows:

The following table shows the proposed line item changes in detail:

	Line transfer.	
	Increase.	Decrease.
Assistant Engineer, 1 at $2,700	$2,700 00	....
Assistant Engineer, 1 at $2,400	7,200 00	....
Assistant Engineers, 6 at $2,250	....	$9,000 00
Assistant Engineers, 3 at $1,800	1,800 00	....
Assistant Engineers, 4 at $1,650	....	1,650 00
Topographical Draftsman, at $2,000	2,000 00	....
Topographical Draftsman, 4 at $1,800	....	1,800 00
Topographical Draftsman, 1 at $1,650	1,650 00	....
Topographical Draftsman, 4 at $1,200	....	1,200 00
Transitman and Computer, 4 at $1,650	....	1,650 00
Transitman and Computer, 2 at $1,500	3,000 00	....
Transitman and Computer, 5 at $1,350	....	1.350 00
Transitman and Computer, 5 at $1,200	2,400 00	....
Rodmen, 2 at $1,200	3,600 00	....
Rodmen, 7 at $1,050	....	6,300 00
Axemen, 9 at $900	900 00	....
Foreman, 1 at $1,200	3,600 00	....
Foremen, 3 at $1,050	....	3,150 00
Messenger, 1 at $900	....	900 00
Stenographer and Typewriter, 1 at $1,650	1,650 00	....
Stenographer and Typewriter, 1 at $1,500	....	1,500 00
Clerk, at $1,350	1,350 00	....
Clerk, 1 at $1,200	....	1,200 00
Clerk, 1 at $1,050	....	1.050 00
	$31,850 00	$30,750 00

The President states that the various changes were considered by the Corporate Stock Budget Committee, and were favorably reported on by the Committee in recommending the appropriation for the Bureau in the 1911 Corporate Stock Budget.

In his request the President states the following:

"I would further particularly request that in the resolution adopting this schedule there be inserted a provision to the effect that in respect of those lines of the schedule where increases in salary or promotions are shown over those now in force that these lines be construed to cover the incumbents of the positions in question at their present salaries until the increases in salaries to the amount shown in the schedule herein proposed have been made. This request is made in order that there may be no obstacle to the passing of our payrolls in the Department of Finance pending the increases in salaries and promotions referred to."

For purposes of audit it is essential that an accurate schedule of employees and their existing rates of compensation should be in force for the months in which they have performed service. The suggestion of the President would not make this condition possible, and for that reason I recommend that this part of the request be not approved.

As a substitute, however, I recommend that the schedule of salaries and wages be adopted representing the actual pay-roll condition, and that the difference between the annual pay-roll cost and the $143,350 allowed for salaries and wages in the 1911 Corporate Stock Budget be added to the schedule as an "unallotted balance."

The attached resolution, if adopted, will include every employee in the bureau at the present rate of compensation. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the non-budgetary schedule, as revised, for the Topographical Bureau in the office of the President of the Borough of Richmond, as follows:

President, Borough of Richmond.

Topographical Force—

Salaries:

Principal Assistant Engineer, 1 at	$3,600 00

Clerk, 1 at	1,350 00
Unallotted Balance	850 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs

of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Department of Parks, Boroughs of Manhattan and Richmond requesting, and report of the Comptroller recommending approval, of plans, specifications and estimate of cost ($22,000) for furnishing and laying cork tile floors in the Metropolitan Museum of Art, Central Park, providing the specifications be amended to provide that 2 per cent. of the amount of the contract be retained for one year from the date of the acceptance of the work:

The City of New York, Department of Parks, Arsenal, Central Park, July 8, 1911.

Hon. William A. Prendergast, *Comptroller,* City of New York:

Sir—Herewith I beg to forward to you, as required by resolution of the Board of Estimate and Apportionment, for the approval of said Board, plan and specifications for furnishing and laying cork tile floors in the Metropolitan Museum of Art, Central Park.

The cost of this work is approximately estimated at $22,000, which will be chargeable against the fund provided by corporate stock issue known as C-DP-63.

Respectfully,

CHAS. B. STOVER, Commissioner of Parks, Boroughs of Manhattan and Richmond.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 22, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 8, 1911, the Commissioner of Parks, Boroughs of Manhattan and Richmond, requested approval of plans, specifications and estimate of cost in the sum of $22,000 for furnishing and laying cork tile floors in the Metropolitan Museum of Art, Central Park.

The cork tile floors are to replace wooden floors, laid on the second floor of buildings A, B and C when the buildings were constructed eighteen or twenty years ago. The new floors are to be similar to those in the New York Public Library, Forty-second street and Fifth avenue. They are noiseless, sanitary and can be easily cleaned, and have proved very durable where used.

The removal of the wooden floors also is desired in order to minimize as much as possible the danger from fire. The cork tiling, which is only half an inch in thickness, is laid on a concrete foundation.

The plan and specifications are satisfactory, excepting that the specifications, in my opinion, should provide for the retention of a sum sufficient to insure the maintenance of the work in good condition for a period of at least one year. For this purpose I recommend that the specifications be amended to provide that 2 per cent. of the amount of the contract be retained for one year from the date of the acceptance of the work. The cost of the tile floor is to be charged to the Corporate Stock Fund, entitled "C-DP-63, Metropolitan Museum of Art, in Central Park, constructing and completing extensions, etc."

I recommend the adoption of the attached resolution, granting the request, with the exception noted. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the plans, specifications and the estimate of cost to the amount of twenty-two thousand dollars ($22,000), for furnishing and laying cork tile floors for picture galleries in the Metropolitan Museum of Art, Central Park, Manhattan, provided that there be included in the specifications and contract by the Commissioner of Parks, Boroughs of Manhattan and Richmond, provisions that the contractor shall guarantee and maintain the stability of all work and materials and keep the same in repair for a period of one year after the date of completion and acceptance of the work, and that two (2) per cent. of the contract price shall be retained for the said period of one year after completion and acceptance in order to insure the carrying out of the guarantee, and that a provision shall be included in the contract that in the event of failure on the part of the contractor to make repairs when duly notified to do so, the Commissioner of Parks, Boroughs of Manhattan and Richmond, shall have the right to undertake and complete the repairs and to charge the expense thereof against any sum of money retained by the City, or to the contractor and his sureties.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Department of Water Supply, Gas and Electricity requesting, and report of the Comptroller relative to a modification of the budgetary part schedule entitled "Water Supply, Boroughs of Manhattan and The Bronx, Distribution, Maintenance of Croton and Bronx Systems, No. 506, Wages, Regular Employees, Maintenance and Construction Force," providing for increase of one Inspector and one Foreman from $4 to $5 per diem, etc.:

Department of Water Supply, Gas and Electricity, Bureau of Supplies, Room 1904, 13-21 Park Row, City of New York, July 15, 1911.

Hon. William A. Prendergast, *Comptroller:*

Dear Sir—I respectfully request that you recommend to the Board of Estimate and Apportionment a modification of the salary schedule supporting the budgetary part allowance appropriation entitled, "Water Supply, Boroughs of Manhattan and The Bronx, Distribution, Maintenance of Croton and Bronx Systems, 506, Wages, Regular Employees, Maintenance and Construction Force," so that by the elimination of two positions I may promote one Inspector and one Foreman one dollar per day each to make their salaries uniform with the others holding the same positions and doing the same class of work. The schedule so modified is attached.

Yours truly, HENRY S. THOMPSON, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 15, 1911, the Commissioner of Water Supply, Gas and Electricity requested modification of the budgetary part schedule, entitled Water Supply, Boroughs of Manhattan and The Bronx; Distribution, Maintenance of Croton and Bronx Systems, No. 506, Wages, Regular Employees, Maintenance and Construction Force. In connection therewith I report, as follows:

It is proposed to increase one Inspector and one Foreman from $4 to $5 per diem, each, and schedule both as Foremen. The increase of $730 is to be provided by striking out two Foreman Inspectors, at $4, for 365 days, each, the balance of $2,190 to be dropped from the schedule.

The Commissioner states that the increases are for the equalization of the compensation for Foremen and Inspectors.

The following table shows the schedule changes in detail:

	Schedule Transfer.	
	Decrease.	Increase.
506. Foremen, 14, at $5 per diem (365 days)	....	$1,825 00
Foreman Inspectors, 2 at $4 per diem (365 days)	$2,920 00	
Foremen, 2 at $4 per diem (365 days)	2,920 00	
Inspector, 1 at $5 per diem (365 days)	....	1,825 00
	$5,840 00	$3,650 00

The attached resolution, if adopted, will grant the request. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the Department of Water Supply, Gas and Electricity, for the year 1911, as follows:

Department of Water Supply, Gas and Electricity.

Water Supply, Boroughs of Manhattan and The Bronx; Distribution, Maintenance of Croton and Bronx Systems; Maintenance and Construction Force—

506. Wages, Regular Employees:	
Foremen, 16 at, per day (365 days)	$5 00
Inspectors, 2 at, per day (365 days)	5 00

Assistant Foremen, 19 at, per day (303 days)	$3 00
Machinist, 1 at, per day (303 days)	4 50
Machinist Helpers, 2 at, per day (303 days)	3 00
Blacksmith, 1 at, per day (303 days)	4 50
Blacksmith Helper, 1 at, per day (303 days)	3 00
Caulkers, 67 at, per day (303 days)	4 00
Tappers, 9 at, per day (303 days)	4 00
Flagger, 1 at, per day (303 days)	4 50
Toolmen, 2 at, per day (303 days)	5 50
Cement Worker, 1 at, per day (303 days)	2 50
Carpenter, 1 at, per day (303 days)	5 00
Laborer, 1 at, per day (303 days)	3 00
Laborers, 100 at, per day (365 days)	2 50
Laborers, 99 at, per day (302 days)	2 50

Budgetary, part allowance, $257,622.40.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Fire Department requesting, and report of the Comptroller in the matter of the modification of four schedules of wages, Regular Employees (Accounts Nos. 965, 967, 969 and 1021), supporting appropriation made to the said Department for the year 1911, involving a transfer of $343.75, in order to provide for increase in compensation of one Foreman Machinist from $4.50 to $5 per diem, and five Plumbers from $5 to $5.50 per diem, in conformity with recent establishment of said grades, pursuant to provisions of section 56 of the Greater New York Charter:

Headquarters Fire Department, City of New York, 157-159 East 67th Street, Borough of Manhattan, July 18, 1911.

Hon. William J. Gaynor, *Mayor, and Chairman Board of Estimate and Apportionment:*

Sir—To provide for the payment for the remainder of the current year from July 1, 1911, of contemplated increases in the per diem compensation of 1 Foreman Machinist, from $4.50 to $5, and of 5 Plumbers from $5 to $5.50, rates fixed by the Board of Aldermen, pursuant to the provisions of section 56 of the Greater New York Charter, also of an additional Blacksmith's Helper in lieu of Foreman Steamfitter, I have the honor to request revision and modification of wage schedule supporting appropriations made to this Department for 1911 and certain transfers in connection therewith, as set forth in the accompanying statement.

The proposed revision and modification will involve no increase in the total of the appropriations made to this Department for the current year. The necessary funds will become available by the elimination of two positions of Stableman, Hospital and Training Stables, Boroughs of Manhattan, The Bronx and Richmond, both of the former incumbents having died since the beginning of the year, and one position of Foreman Steamfitter, the late incumbent having been removed.

Respectfully, JOS. JOHNSON, Fire Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 18, 1911, the Commissioner of the Fire Department requested modification of four schedules for wages, regular employees, in his Department, for 1911, involving a transfer of $343.75. In connection therewith, I report as follows:

It is proposed to increase the per diem compensation of a Foreman Machinist from $4.50 to $5; and of five Plumbers from $5 to $5.50. Grades for the proposed rates have been fixed by the Board of Aldermen, pursuant to the provisions of section 56 of the Greater New York Charter. It is also proposed to substitute a Blacksmith's Helper for a Foreman Steamfitter.

The necessary funds are to be made available by the elimination of two Stablemen and the Foreman Steamfitter.

The following table shows the line item changes in detail:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
965.	Foreman Steamfitter, 1 at $5 a day (277 days)	$1,385 00	....	$687 50	....
	Foreman Machinist, 1 at $4.50 a day (277 days)	1,246 50	....	618 75	....
	Foreman Machinist, 1 at $5 a day (277 days)	....	$1,385 00	....	$687 50
	Blacksmith's Helpers, 4 at $3 a day (277 days)	....	831 00	....	412 50
967.	Stablemen, 2 at $730 per annum	1,460 00	....	730 00	....
	Unassigned balance	....	1,183 00	....	592 50
969.	Plumbers, 3 at $5 a day (277 days)	4,155 00	....	2,062 50	....
	Plumbers, 3 at $5.50 a day (277 days)	....	4,570 50	....	2,268 75
1021.	Plumbers, 2 at $5 a day (277 days)	2,770 00	....	1,375 00	....
	Plumbers, 2 at $5.50 a day (277 days)	....	3,047 00	....	1,512 50
		$11,016 50	$11,016 50	$5,473 75	$5,473 75

I recommend that the request be granted by the adoption of the attached resolutions. Respectfully,
WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules, as revised, for the Fire Department, for the year 1911, to be effective as of July 1, 1911, as follows:

Which was adopted by the following vote:

Affirmative—The Comptroller. the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

—

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 237 of the Greater New

York Charter, the Board of Estimate and Apportionment hereby approves transfers of funds appropriated to the Fire Department for the year 1911, as follows:

From

General Administration, Manhattan, The Bronx and Richmond, Repair Shops—

965. Wages, regular employees	$206 25

General Administration, Manhattan, The Bronx and Richmond, Hospital and Training Stables—

967. Wages, regular employees	$137 50

To

General Administration, Manhattan, The Bronx and Richmond, Bureau of Repairs and Supplies—

969. Wages, regular employees	$206 25

General Administration, Brooklyn and Queens, Bureau of Repairs and Supplies—

1021. Wages, regular employees	$137 50

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Acting President of the Borough of Brooklyn requesting, and report of the Comptroller relative to, the modification of budgetary part allowance Schedule No. 1804 for the office of the President of the Borough of Brooklyn, for the year 1911, providing for increase in salary of an Assistant Engineer from $3,000 to $4,000, and of two Assistant Engineers from $2,550 to $3,000 each per annum, also for the elimination of the positions of Axeman at $750, Draftsman's Helper at $1,050, and Clerk at $300 per annum, to take effect as of August 1, 1911:

July 20, 1911.

Hon. WILLIAM A. PRENDERGAST, *Comptroller:*

Dear Sir—I respectfully request that you kindly prepare for the Board of Estimate and Apportionment a resolution modifying Salary Schedule No. 1804, "Bureau of Sewers, Engineering Division, Regular Force," this Department, in accordance with the attached statement.

This modification will allow for the increase in salary of one Assistant Engineer from $3,000 to $4,000 and two Assistant Engineers from $2,550 to $3,000. It eliminates two Assistant Engineers at $2,550, one Axeman at $750, one Draftsman's Helper at $1,050, and one Clerk at $300.

This modification will not increase the appropriation for the year 1911 and does not require any transfer of funds. I would, therefore, respectfully request that this matter be given early consideration, and if possible a report be prepared for the meeting of the 27th, increases to be effective August 1, 1911.

Very truly yours, L. H. POUNDS, Acting Borough President.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 20, 1911, the Acting President of the Borough of Brooklyn requested modification of the budgetary part allowance schedule for the Bureau of Sewers, Engineering Division, Regular Force, No. 1804, Salaries, in his office for the year 1911. In connection therewith I report as follows:

Increases in compensation, at a yearly cost of $1,900, are proposed for three incumbents. Three positions, amounting to $2,100 yearly, are to be abolished.

The following table shows the changes involved:

Increase in Compensation.

	Present Rate.	Proposed Rate.	Increase Per Annum.
Assistant Engineer	$3,000 00	$4,000 00	$1,000 00
Assistant Engineers, 2 at	2,550 00	3,000 00	900 00
			$1,900 00

Positions Abolished.

Axeman, 1 at	$750 00
Draftsman's Helper, 1 at	1,050 00
Clerk, 1 at	300 00
	$2,100 00

The incumbents proposed for increases, their periods of service, etc., are as follows:

Frank R. Bartlett, Assistant Engineer, from $3,000 to $4,000 per annum. Mr. Bartlett was appointed on February 28, 1895, at $1,350 per annum. On March 7, 1899, he was increased to $1,600; on February 1, 1901, to $1,800; on December 1, 1901, to $2,100; on June 15, 1903, to $2,250, and on April 1, 1906, to the present rate.

Isaac H. Kirby, Assistant Engineer, from $2,550 to $3,000 per annum. Mr. Kirby was appointed on April 3, 1900, as Rodman, at $1,000 per annum. On February 1, 1901, he was promoted to Leveler, at $1,320; on May 1, 1902, he was increased to $1,350, and on June 15, 1903, he was promoted to Transitman, at $1,650. On January 1, 1905, he was increased to $1,800, and on November 1, 1905, he was promoted to Assistant Engineer, at $1,800. On January 1, 1907, he was increased to $2,250, and on June 1, 1909, to present rate.

John C. Reidel, Assistant Engineer, from $2,550 to $3,000 per annum. Mr. Reidel was appointed as a Chainman on January 14, 1901, at $1,200 per annum. On June 15, 1903, he was promoted to Transitman, at $1,650. On January 1, 1905, he was increased to $1,800. On February 1, 1907, he was promoted to Assistant Engineer, at $2,250, and on May 1, 1909, he was increased to the present rate.

The following table shows the line item changes in detail:

Account No.	Schedule Line.	Schedule Transfer.	
		Decrease.	Increase.
1804.	Assistant Engineers, 3 at $4,000	....	$4,000 00
	Assistant Engineers, 6 at $3,000	....	3,000 00
	Assistant Engineers, 4 at $2,550	$5,100 00	....
	Axeman, 1 at $750	750 00	....
	Clerk, 1 at $300	300 00	....
	Draftsman's Helpers, 2 at $1,050	1,050 00	....
		$7,200 00	$7,000 00

The attached resolution, if adopted, will grant the request. Respectfully,
WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the office of the President of the Borough of Brooklyn, for the year 1911, to take effect as of August 1, 1911, as follows:

President Borough of Brooklyn.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Department of Parks, Borough of The Bronx, requesting, and report of the Comptroller recommending, the modification of Salary Schedule No. 1133 supporting the appropriation made in the Budget for the year 1911, for said Department, providing for the substitution of an Automobile Engineman at $1,200 per annum for a Driver at the same rate, to take effect August 1, 1911:

The City of New York, Department of Parks, Office of Commissioner for the Borough of The Bronx, Zbrowski Mansion, Claremont Park, July 10, 1911.

Hon. WILLIAM J. GAYNOR, *Mayor, and Chairman Board of Estimate and Apportionment*, 277 Broadway, New York City:

Sir—I respectfully request modification in Schedule 1133, Maintenance of Parks and Boulevards, Wages, Regular Employees, 1911, as follows:

Line, Drivers, 2 at $1,200—$2,400, to be amended to read Driver, 1 at $1,200; insert Automobile Engineman, 1 at $1,200.

Schedule as revised to read as follows:

Department of Parks, The Bronx.

Maintenance of Parks and Boulevards—

1133. Wages, Regular Employees, 1911:	
Foremen, 15 at $1,200	$18,000 00
Helper (Storeroom)	900 00
Janitress	600 00
Cottage Attendant	720 00
Cleaners, 3 at $600	1,800 00
Assistant Foremen, 10 at $3.50 per day (303 days)	10,605 00
Gardeners, 2 at $1,200	2,400 00
Gardeners, 15 at $900	13,500 00
Hostlers, 6 at $2.50 per day (365 days)	5,475 00
Driver	1,200 00
Automobile Engineman	1,200 00
Drivers, 2 at $2.75 per day (313 days)	1,721 50
Drivers, 5 at $2.50 per day (365 days)	4,562 50
Driver, 1 at $2.50 per day (277 days)	692 50
Stablemen, 3 at $2.50 per day (365 days)	2,737 50
Climber and Pruner, 1 at $2.50 per day (303 days)	757 50
Balance unassigned	110 00
	$66,981 50

The foregoing revision is requested for the purpose of providing an Automobile

Engineman for the Superintendent's automobile. The two Drivers originally provided for were to drive the Commissioner and Superintendent respectively; now that the Superintendent has an automobile, one less Driver will be needed, and the Automobile Engineman is a necessity.

Trusting that the above request will meet with the approval of your honorable Board, I remain. Respectfully,

T. J. HIGGINS, Commissioner of Parks, Borough of The Bronx.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 10, 1911, the Commissioner of Parks, Borough of The Bronx, requested modification of the 1911 schedule, No. 1133, Maintenance of Parks and Boulevards, Wages, Regular Employees. In connection therewith, I report as follows:

It is proposed to eliminate a Driver at $1,200 per annum, and substitute an Automobile Engineman at the same rate. There are two automobiles in the Department, and only one Automobile Engineman.

A previous request for this modification was made on May 25, 1911, but at that time the grade was limited to one incumbent. The request was held pending the establishment of the grade for an additional incumbent, pursuant to the provisions of section 56 of the Greater New York Charter. The grade for one additional incumbent was established on July 18, 1911.

The following table shows the line item changes in detail:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
1133.	Drivers, 2 at $1,200..........	$1,200 00	....	$500 00	....
	Automobile Engineman, 1 at $1,200	....	$1,200 00	....	$500 00

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the Department of Parks, Borough of The Bronx, for the year 1911, to take effect August 1, 1911, as follows:

Department of Parks, Borough of The Bronx.

Maintenance, Parks and Boulevards—

1133. Wages, Regular Employees:

Foremen, 15 at $1,200	$18,000 00
Helper (Storeroom)	900 00
Janitress	600 00
Cottage Attendant	720 00
Cleaners, 3 at $600	1,800 00
Assistant Foremen, 10 at $3.50 per day (303 days)	10,605 00
Gardeners, 2 at $1,200	2,400 00
Gardeners, 15 at $900	13,500 00
Hostlers, 6 at $2.50 per day (365 days)	5,475 00
Driver	1,200 00
Automobile Engineman	1,200 00
Drivers, 2 at $2.75 per day (313 days)	1,721 50
Drivers, 5 at $2.50 per day (365 days)	4,562 50
Driver, 1 at $2.50 per day (277 days)	692 50
Stablemen, 3 at $2.50 per day (365 days)	2,737 50
Climber and Pruner, 1 at $2.50 per day (303 days)	757 50
Balance unassigned	110 00
	$66,981.50

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs

of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Fire Department requesting, and report of the Comptroller recommending, approval of a schedule of salaries for corporate stock funds in the said Department for the years 1911 and 1912, Bureau of Repairs and Supplies, Division of Buildings, providing for an additional force necessary for the carrying out of plans for the improvement and extension of the fire alarm telegraph system:

Fire Department of The City of New York, Office of the Commissioner. July 19, 1911.

Hon. William A. Prendergast, *Comptroller:*

Sir—In compliance with today's telephonic request of Mr. Savage, of the Bureau of Municipal Investigation and Statistics, of your Department, I have the honor to furnish list of employees at present paid from proceeds of corporate stock issues and their salaries, as follows:

Bureau of Repairs and Supplies.

Division of Buildings (Payable from Sites and Buildings C-FD-19)—

3 Inspectors of Building at $1,800 each (Charles S. McCarthy, John R. Sliney, Harry T. Booth).

2 Architectural Draftsmen at $1,500 each (George Stiratt, Charles A. Rhind).

1 Inspector of Masonry Construction at $1,500 (Andrew J. Fleming).

Fire Alarm Telegraph Bureau.

Fire Alarm Telegraph System, Borough of Manhattan, Installation of New System (Payable from C-FD-3B)—

1 Electrical Engineer at $5,000 (John C. Rennard).

2 Assistant Electrical Engineers at $1,800 each (Charles M. Reed, Byron W. Smith).

2 Cable Testers at $1,200 each (David G. Shears, Jr., G. Raymond Mackey).

1 Architectural Draftsman at $1,050 (William L. Schlubdibir).

1 Stenographer and Typewriter at $1,050 (Peter J. Hickey).

Respectfully, JOS. JOHNSON, Fire Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On April 27 and July 19, 1911, the Fire Commissioner requested the approval of a schedule for salaries, to be paid from corporate stock funds, in his Department during the years 1911 and 1912.

The Commissioner states that the force is necessary in order to carry on the work of the Division of Buildings and the Fire Alarm Telegraph Bureau.

The schedule calls for additional force, as follows:

		Rate per annum.
Assistant Electrical Engineers	2 at	$1,800 00
Cable Testers	3 at	1,200 00
Cable Splicers	2 at	1,200 00
Stenographer and Typewriter	1 at	1,050 00

The additional employees are stated to be necessary for the carrying out of plans for the improvement and extension of the fire alarm telegraph system.

I recommend the adoption of the attached resolution approving the schedule, as requested. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules of salaries for Corporate Stock funds in the Fire Department for the years 1911 and 1912, as follows:

Bureau of Repairs and Supplies, Division of Buildings—

Salaries:

Inspectors of Buildings	**4 at**	**$1,800 00**
Draftsman	**1 at**	**1,500 00**
Architectural Draftsmen	**2 at**	**1,500 00**
Inspector of Masonry Construction	**1 at**	**1,500 00**

Fire Alarm Telegraph Bureau—

Salaries:

Electrical Engineer	1 at	$5,000 00
Assistant Electrical Engineers	2 at	1,800 00
Cable Testers	3 at	1,200 00
Cable Splicers	2 at	1,200 00
Architectural Draftsmen	2 at	1,050 00
Stenographers and Typewriters	2 at	1,050 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communications from the Department of Correction requesting, and report of the Comptroller recommending, the modification of Schedules Nos. 273, 276, 279, 282 and 285, supporting the lump appropriations made in the Budget for the year 1911, for the wages of Keepers in said Department, by transferring the sum of $850 to provide for the wages of Keepers in the Penitentiary, Branch Workhouse and Reformatory, to take effect July 1, 1911:

City of New York, Department of Correction, July 22, 1911.

Hon. William A. Prendergast, *Comptroller,* New York City:

Dear Sir—I would respectfully request the honorable the Board of Estimate and Apportionment to authorize the revision of the Wages, Keepers' Schedule, in the following items, viz.:

273. City Prison (Manhattan), Wages, Keepers from 42 employees at total yearly cost of $45,950 to 42 employees, total	$45,250 00
276. Workhouse, B. I., Wages, Keepers from 33 employees at total yearly cost of $37,350 to 33 employees, total	37,200 00
279. Penitentiary, B. I., Wages, Keepers from 64 employees at total yearly cost of $70,500 to 64 employees, total	70,800 00
282. Branch Workhouse, H. I., Wages, Keepers from 13 employees at total yearly cost of $11,950 to 13 employees, total	12,350 00
285. Reformatory, H. I., Wages, Keepers from 12 employees at total yearly cost of $11,600 to 12 employees, total	11,750 00

Inasmuch as no additional appropriation will be required, I trust that your honorable Board will take favorable action in the matter.

Very respectfully, PATRICK A. WHITNEY, Commissioner.

City of New York, Department of Correction, July 24, 1911.

Hon. William A. Prendergast, *Comptroller:*

Dear Sir—In order to provide for the revision of the schedules requested in our communication to you of July 22, 1911, I would request the transfer of $850 from appropriations entitled:

273. City Prison (Manhattan), Wages, Keepers	$700 00
276. Workhouse, B. I., Wages, Keepers	150 00
	$850 00
To	
279. Penitentiary, B. I., Wages, Keepers	$300 00
282. Branch Workhouse, H. I., Wages, Keepers	400 00
285. Reformatory, H. I., Wages, Keepers	150 00
	$850 00

Inasmuch as no additional appropriation will be required, I trust that the honorable the Board of Estimate and Apportionment will take favorable action in the matter.

Respectfully, PATRICK A. WHITNEY, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 22, 1911, the Commissioner of Correction requested modification of 1911 schedules Nos. 273, 276, 279, 282 and 285 supporting the lump appropriations for the wages of Keepers. In connection therewith I report as follows:

The only change involved is the transfer of $850 to provide for the wages of Keepers in the Penitentiary, Branch Workhouse and Reformatory. It is stated that the deficit has been caused by the transfer of Keepers at different grades from one institution to another.

The change entails no additional cost to the City.

I recommend the adoption of the attached resolutions granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules, as revised, for the Department of Correction for the year 1911, as follows, to take effect July 1, 1911:

Department of Correction.

	Administration of Institutions, District Prisons—	
	City Prison:	
273.	Wages, Keepers (42)	$45,250 00
	Workhouse:	
276.	Wages, Keepers (33)	$37,200 00
	Penitentiary:	
279.	Wages, Keepers (64)	$70,800 00
	Branch Workhouse, Harts Island:	
282.	Wages, Keepers (13)	$12,350 00
	Reformatory, Harts Island:	
285.	Wages, Keepers (12)	$11,750 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 237 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves transfers of funds appropriated to the Department of Correction for the year 1911, as follows:

Department of Correction.

	From	
	Administration of Institutions, District Prisons—	
	City Prison:	
273.	Wages, Keepers	$700 00
	Workhouse:	
276.	Wages, Keepers	150 00
	To	
	Administration of Institutions, District Prisons—	
	Penitentiary:	
279.	Wages, Keepers	$300 00
	Branch Workhouse, Harts Island:	
282.	Wages, Keepers	400 00
	Reformatory, Harts Island:	
285.	Wages, Keepers	150 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communications from the Department of Correction requesting, and report from the Comptroller relative to, the modification of Salary Schedules Nos. 249 and 250, supporting the appropriation made in the Budget for the year 1911, for said Department, providing for a General Bookkeeper and Auditor at $3,000, instead of $3,600, the present rate, for the increase in salary of three Clerks, one from $1,800 to $2,100, one from $1,000 to $1,200 and one from $1,200 to $1,500 per annum; also for the elimination of a Clerk at $1,800 per annum, involving the transfer of $300, said modification to be effective from August 1, 1911:

Department of Correction of The City of New York, Commissioner's Office, 148 E. 20th street, July 22, 1911.

Hon. WILLIAM A. PRENDERGAST, *Comptroller*, City of New York:

Dear Sir—Owing to the death of the General Bookkeeper and Auditor of this Department on April 12, 1911, it has become necessary to reorganize the positions in the central office, and with this end in view, I have made the accompanying application for a modification of the salaries schedules, numbers 249 and 250.

The work in this office has been somewhat hampered on account of existing conditions, and it is essential that this be remedied at an early date. The following contemplated changes will bring about the desired results: Promotion of the Clerk first in line to fill the vacancy; the establishment of an additional position, and the advancement of three worthy Clerks. These changes can be made without any additional appropriation, as the amount allowed will suffice; and the additional grades required have already been established.

I would like very much to put these change into effect on August 1, 1911, and would respectfully request that you give this matter your immediate consideration.

In order that the work of this office may be properly carried out, I trust that you will act favorably on this appeal.

Yours very respectfully, PATRICK A. WHITNEY, Commissioner.

City of New York, Department of Correction, July 22, 1911.

Hon. WILLIAM A. PRENDERGAST, *Comptroller:*

Dear Sir—I would respectfully request the honorable the Board of Estimate and Apportionment to authorize the revision of the salary schedules, transmitted herewith; also the transfer of $300 from appropriation entitled,

250. Office of the General Bookkeeper and Auditor, Salaries—

To

249. Office of the Commissioner, Salaries.

Inasmuch as no additional appropriation will be required, I trust that your honorable Board will take favorable action thereon.

Very respectfully, PATRICK A. WHITNEY, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation

Gentlemen—On July 20, 1911, the Commissioner of Correction requested modification of schedules No. 249, Salaries, Office of the Commissioner, and No. 250, Salaries, Office of the General Bookkeeper and Auditor, necessitating a transfer of $300 within appropriation to the Department for 1911. In connection therewith I report as follows:

The Commissioner states that as a result of the death of John P. Dreyer, General Bookkeeper and Auditor, it has become necessary to reorganize the office of the General Bookkeeper within the Budget allowance for salaries for the year.

The modification calls for a General Bookkeeper and Auditor, at $3,000 per annum, instead of at the rate of $3,600 paid to Mr. Dreyer. It also calls for an increase for John J. O'Neill, a Clerk, from $1,800 to $2,100 per annum, a Clerk from $1,000 to $1,200 per annum, and for an additional position of Inspector of Repairs and Supplies, at $1,500. In No. 249, the only change is an increase in the salary of a Clerk, from $1,200 to $1,500 per annum.

The funds for the several changes are to be provided by eliminating a Clerk at $1,800 per annum.

The need for the reorganization was considered by the Select Committee of this Board. The grades for the changes were established on July 11, 1911, pursuant to the provisions of section 56 of the Greater New York Charter.

The following table shows the line item changes in detail:

Account No.	Schedule Line.	Schedule Transfer. Decrease.	Schedule Transfer. Increase.	Cash Transfer. Decrease.	Cash Transfer. Increase.
249.	Clerk, 1 at $1,200........	$1,200 00	....	$500 00	....
	Clerk, at $1,500..........	....	$1,500 00	....	$625 00
250.	General Bookkeeper and Auditor, 1 at $3,600....	3,600 00	....	1,500 00	....
	General Bookkeeper and Auditor, at $3,000......	....	3,000 00	....	1,250 00

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
	Clerk, 1 at $1,800........	1,800 00	....	750 00	....

	Clerk, 1 at $1,200........	....	1,200 00	....	500 00
	Balance unassigned......	....	100 00	....	41 66
		$9,400 00	$9,400 00	$3,916 66	$3,916 66

The attached resolution, if adopted, will grant the request. Respectfully,
WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules, as revised, for the Department of Correction, for the year 1911, to take effect August 1, 1911, as follows:

Department of Correction.

General Administration, Office of the Commissioner—

249. Salaries:

Commissioner	$7,500 00
Deputy Commissioner	4,000 00
Secretary	3,000 00
Private Secretary	2,500 00
Clerk	1,800 00
Clerk	1,500 00
Clerk	800 00
Clerk	480 00
Telephone Operator	600 00
	$22,180 00

Office of the General Bookkeeper and Auditor—

250. Salaries:

General Bookkeeper and Auditor	$3,000 00
Inspector	2,500 00
Purchasing Agent	1,800 00
Inspector of Repairs and Supplies	1,500 00
Clerk	2,100 00
Clerk	1,200 00
Laundress	450 00
Cleaner	240 00
Balance unassigned	100 00
	$12,890 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

—

The following resolution was offered:

Resolved, That, pursuant to the provisions of section 237 of the Greater New York Charter, the Board of Estimate and Apportionment hereby approves transfers of funds appropriated to the Department of Correction for the year 1911, as follows:

Department of Correction.

From

Office of the General Bookkeeper and Auditor—

250. Salaries	$300 00

To

Office of the Commissioner—
249. Salaries $300 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Department of Water Supply, Gas and Electricity requesting, and report of the Comptroller relative to, the approval of salary schedule as revised for the Account S-216, Maintenance and Distribution of Water Supply in the Borough of Brooklyn, 1911, Administration, Salaries, Bureau of Water Register, providing for the increase in salary of an Inspector of Meters and Water Consumption from $1,800 to $2,100 per annum and for the decrease in salary of a Clerk from $1,200 to $900 per annum:

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13-21 Park Row, July 8, 1911.

Hon. William A. Prendergast, *Comptroller:*

Dear Sir—The Board of Aldermen, at the request of the Board of Estimate and Apportionment, recently established, under section 56 of the Charter, the rate of $2,100 per annum for an Inspector in the Bureau of Water Registrar, Borough of Brooklyn, and, in order that I may promote from a salary of $1,800 the Inspector in charge, for whom this new rate was established, I request that you recommend to the Board of Estimate and Apportionment that they approve the enclosed salary schedule, supporting account S-216, entitled "Maintenance and Distribution of Water Supply in the Borough of Brooklyn, 1911, Administration, Salaries, Bureau of Water Registrar." Yours truly, HENRY S. THOMPSON, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 8, 1911, the Commissioner of Water Supply, Gas and Electricity requested modification of the water revenue schedule supporting the Account S-216, Maintenance and Distribution of Water Supply in the Borough of Brooklyn, 1911, Administration, Salaries, Bureau of Water Registrar. In connection therewith, I report as follows:

It is proposed to increase an Inspector of Meters and Water Consumption from $1,800 to $2,100 per annum. The $300 necessary is to be provided by decreasing a Clerk from $1,200 to $900 per annum. The grade for the increase was established on June 6, 1911, pursuant to the provisions of section 56 of the Greater New York Charter.

The incumbent proposed for increase is Charles W. Rennie, appointed on November 15, 1901, at $1,000, and increased as follows: June 1, 1905, to $1,200; May 1, 1906, to $1,350; April 1, 1907, to $1,500; July 1, 1909, to present rate.

The following table shows the schedule changes in detail:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
S-216.	Inspector of Meters and Water Consumption, 1 at $1,800	$1,800 00	....	$900 00	....
	Inspector of Meters and Water Consumption, 1 at $2,100	....	$2,100 00	....	$1,050 00
	Clerks, 10 at $1,200........	1,200 00	....	600 00	....
	Clerks, 28 at $900..........	....	900 00	....	450 00
		$3,000 00	$3,000 00	$1,500 00	$1,500 00

The attached resolution, if adopted, will grant the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule as revised for the Department of Water Supply, Gas and Electricity for the year 1911, to be effective as of July 1, 1911, as follows:

Department of Water Supply, Gas and Electricity.

Bureau of Water Register, Borough of Brooklyn, Water Revenue Force—Salaries, Regular Employees:

Water Registrar	1 at	$4,000 00
Cashier	1 at	2,250 00
Financial Clerk	1 at	2,100 00
Clerk	1 at	2,250 00
Clerks	3 at	1,650 00
Clerks	5 at	1,350 00
Clerks	9 at	1,200 00
Clerks	7 at	1,050 00
Clerks	29 at	$900 00
Clerk	1 at	540 00
Stenographers and Typewriters	2 at	1,200 00
Stenographers and Typewriters	4 at	1,050 00
Messenger	1 at	1,050 00
Inspector of Meters and Water Consumption	1 at	2,100 00
Inspectors	3 at	1,500 00
Inspector	1 at	1,250 00
Inspectors	9 at	1,200 00
Inspectors	73 at	1,100 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Department of Water Supply, Gas and Electricity requesting, and report of the Comptroller relative to, the modification of the budgetary part schedule No. 461, for said Department, for the year 1911, providing for the increase in salary of a Clerk (Typewriting) from $1,200 to $1,350 per annum:

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13-21 Park Row, June 26, 1911.

Mr. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Dear Sir—I would like to promote, by an increase of salary from $1,200 to $1,350, a Clerk now employed at the Mount Prospect Laboratory, to which position he was transferred some three years ago with, I am informed, a promise of an increase in salary.

He has been in the Department for ten years, and is now, and has been for the past three years, performing work which requires a knowledge of technical and bacteriological terms, and the quantity and quality of the work performed are satisfactory, and I consider that he is clearly entitled to an increase.

I therefore request that the Board of Estimate and Apportionment modify the schedule supporting the account out of which he is paid, namely, "Water Supply, General Administration, Laboratories, Salaries, Maintenance and Construction Force, No. 461—1911."

A copy of the schedule with the proposed modification is enclosed.

Yours truly, HENRY S. THOMPSON, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 26, 1911, the Commissioner of Water Supply, Gas and Electricity requested modification of the budgetary part schedule, No. 461, Water Supply, General Administration, Laboratories, Salaries, Maintenance and Construction Force. In connection therewith, I report as follows:

It is proposed to increase the salary of a Clerk (Typewriting) from $1,200 to $1,350 per annum. The Commissioner states that the Clerk is in the Mount Prospect

Laboratory. He has been in the Department for ten years, and for the last three years has been doing work requiring a knowledge of technical and bacteriological terms. In the opinion of the Commissioner, the quantity and quality of the work entitles the incumbent to the increase.

The following table shows the schedule change in detail:

	Schedule Transfer.	
	Decrease.	Increase.
Clerk	$1,200 00	....
Clerk	....	$1,350 00

No change is proposed in the budgetary part allowance.

The attached resolution, if adopted, will grant the request. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the Department of Water Supply, Gas and Electricity for the year 1911, to be effective as of July 1, 1911, as follows:

Department of Water Supply, Gas and Electricity.

Water Supply, General Administration, Laboratories—

461. Salaries, Maintenance and Construction Force:

Chief Chemist	1 at	$3,500 00
Chemist	1 at	1,950 00
Chemists	4 at	1,500 00
Chemists	2 at	1,200 00
Bacteriologist	1 at	1,800 00
Bacteriologist	1 at	1,500 00
Bacteriologists	2 at	1,200 00
Laboratory Assistants	5 at	900 00
Clerk (Typewriting)	1 at	1,350 00
Clerk	1 at	1,050 00

Budgetary part allowance, $13,022.22.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Department of Parks, Borough of Manhattan and Richmond, requesting, and report of the Comptroller relative to, approval of the schedule for salaries of the Engineering and Construction force paid from corporate stock account for said Department, for the years 1911 and 1912, providing for an increase of $600 in the salary of a Mechanical Engineer and for an additional force, consisting of an Assistant Engineer at $2,500, 2 Axemen at $900 each, and 3 Inspectors at $1,260 each per annum:

The City of New York, Department of Parks, The Arsenal, Central Park, July 19, 1911.

Hon. William A. Prendergast:

Sir—In conformity with your request, I forward schedule. Should you want any further information let me know. Yours truly, EDWARD A. MILLER.

Approved: Chas. B. Stover, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 19, 1911, the Commissioner of Parks, Boroughs of Manhattan and Richmond, requested the approval of a schedule for the salaries of the Engineering and Construction Force to be paid from corporate stock funds during the years 1911 and 1912.

The schedule calls for additional force, as follows:

		Rate Per Annum.
Assistant Engineer	1 at	$2,500 00
Axemen	3 at	900 00
Inspectors	3 at	1,260 00

It is stated that the additional employees are necessary to enable the Chief Engineer of the Department to handly properly large improvements about to be started for paving drives in Central Park, building bulkhead on the Harlem River drive, and the installation of a water system in Central Park.

The schedule provides an increase of $600 for a Mechanical Engineer. The grade of position for the increase was established on July 18, 1911, pursuant to the provisions of section 56 of the Greater New York Charter.

The attached resolution, if adopted, will grant the request. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves the schedule of salaries for corporate stock funds in the Department of Parks, Boroughs of Manhattan and Richmond, for the years 1911 and 1912, as follows:

Parks, Boroughs of Manhattan and Richmond.

Engineering and Construction Force—

Salaries:

Assistant Engineers	3 at	$2,500 00
Transitmen	2 at	1,800 00
Mechanical Engineer	1 at	2,100 00
Leveler	1 at	1,320 00
Rodman	1 at	1,200 00
Rodmen	4 at	1,050 00
Axeman	1 at	1,050 00
Axemen	9 at	900 00
Inspectors	3 at	1,260 00
Topographical Draftsman	1 at	1,500 00
Laborer, 1 at, per day (312 days)		2 50

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following report of the Comptroller recommending the adoption of a resolution approving the schedule of the Revenue Bond Fund for the wages of three Stationary Engineers at $4.50 per diem each, for 825 days, and Hospital Helper (Mechanic) at $720 per annum for nine months, in Bellevenue Hospital.

(On March 23, 1911, the Board authorized the issue of $4,252.50 special revenue bonds (subdivision 8, section 188 of the Charter) to provide for the above salaries from April 1, 1911).

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On March 23, 1911, a resolution was adopted by the Board of Estimate and Apportionment authorizing $4,252.50 in special revenue bonds for the wages of three Stationary Engineers and one Hospital Helper-Mechanic, for nine months, beginning April 1, 1911, in the Department of Bellevue and Allied Hospitals. No schedule was then approved for the appropriation. I therefore recommend the adoption of the attached resolution, providing for a schedule, to be effective as of April 1, 1911. Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule for the Revenue Bond Fund for the Department of Bellevue and Allied Hospitals for the year 1911, as follows:

Bellevue and Allied Hospitals.

Bellevue Hospital, Operation and Maintenance, Special Revenue Bond Force—Wages, Regular Employees:

Stationary Engineers, at $4.50 per diem (825 days)	$3,712 50
Hospital Helper-Mechanic, at $720 per annum (9 months)	540 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

(The resolution of the Board relative to the issue of $4,252.50 special revenue bonds, above referred to, appears in the Financial Minutes of March 23, 1911, at page 1142 of the pamphlet.)

The Secretary presented the following communication from the Acting Commissioner of Public Works, Borough of Richmond, requesting, and report of the Comptroller recommending approval, pursuant to resolution of June 3, 1910, of the plans, specifications and estimate of cost ($4,200) for the construction of a radial brick chimney at the Clifton Destructor, Borough of Richmond:

The City of New York, Office of the President of the Borough of Richmond, July 14, 1911.

Hon. William A. Prendergast, *Comptroller,* 280 Broadway, New York:

Dear Sir—Please find herewith contract, plan and specifications for the construction of a radial brick chimney at the Clifton Destructor, Borough of Richmond, to be paid out of corporate stock fund C-PR-3B. The estimated cost of this contract is $4,200.

If the contract, plan and specifications are found satisfactory, we will appreciate early action thereon, so that the contract may be advertised and the work commenced at an early date. Yours truly, WM. R. HILLYER, Acting Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 14, 1911, the President of the Borough of Richmond requested approval of the plans, specifications and estimated cost in the sum of $4,200 for the construction of a radial brick chimney at the Clifton Destructor, Borough of Richmond.

The plans and specifications provide for the erection of a radial brick chimney, 134 feet in height, and 5 feet in diameter, on the foundation installed under the building contract.

The plans and specifications appear to be complete and satisfactory, and the estimate of cost reasonable.

The cost is to be charged to the corporate stock fund "C-PR-3B, for the Construction of a Refuse Destructor at Clifton, Borough of Richmond." There is a sufficient balance in the fund for the proposed expenditure.

I recommend the adoption of the attached resolution approving the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to its resolution of June 3, 1910, hereby approves the plans, specifications and estimate of cost, four thousand two hundred dollars ($4,200), for the construction of a radial brick chimney at the Clifton Destructor, Borough of Richmond, under the jurisdiction of the President of the Borough of Richmond.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented a communication from Transit Committee of the Chamber of Commerce of the Borough of Queens, making certain recommendations in regard to subway routes in the Borough of Queens.

Which was referred to the Committee of the Whole and to the Public Service Commission for the First District.

The Secretary presented the following resolution of the Board of Aldermen, adopted July 18, and approved by the Mayor July 25, 1911, concurring in the resolution of the Board of Estimate and Apportionment, adopted July 6, 1911, recommending the establishment of the grade of position of Clerk at $3,500 per annum, for one incumbent, in the office of the Board of Estimate and Apportionment:

In the Board of Aldermen.

Whereas, The Board of Estimate and Apportionment adopted the following resolution at a meeting held July 6, 1911:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, hereby recommends to the Board of Aldermen the establishment of the grade of position of Clerk, in the office of the Board of Estimate and Apportionment, in addition to those already existing therein, with salary at the rate of three thousand five hundred dollars ($3,500) per annum, for one incumbent.

Resolved, That the Board of Aldermen hereby approves of and concurs in the above resolution and fixes the salary of said position as set forth therein.

Adopted by the Board of Aldermen July 18, 1911, a majority of all the members elected voting in favor thereof.

Approved by the Mayor July 25, 1911. P. J. SCULLY, Clerk.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Estimate and Apportionment July 6, 1911, which reads as follows:

"Resolved, That the resolution adopted by the Board of Estimate and Apportionment June 22, 1911, which reads as follows:

"'Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules for salary increases to be paid from other than budgetary funds under the jurisdiction of the Board of Estimate and Apportionment for the year 1911, as follows:

Board of Estimate and Apportionment.

General Administration—

Salary increases of regular employees to be paid from special revenue bonds:

	Per Annum.
Clerk, 1, from $750 to $900 per annum, from June 1, 1911	$150 00

Clerk, 1, from $1,500 to $1,800 per annum, from June 1, 1911	300 00
Clerk, 1, from $1,050 to $1,200 per annum, from June 1, 1911	150 00
Clerk, 1, from $600 to $750 per annum, from June 20, 1911	150 00
Clerk, 1, from $300 to $480 per annum, from June 1, 1911	180 00
Law Clerk, 1, from $1,650 to $1,950 per annum, from June 20, 1911	300 00
Stenographer and Typewriter, 1, from $1,200 to $1,350 per annum, from June 1, 1911	150 00
Stenographers and Typewriters, 2, from $1,050 to $1,350 per annum, from June 1, 1911	600 00

—be and the same is hereby amended by striking therefrom the item, "Topographical Draftsman, 1, *from* $1,800 *to Assistant Engineer at* $2,100 *per annum, from June* 1, 1911, $300," *and inserting in place thereof the item "Topographical Draftsman,* 1, *from* $1,800 to $2,100 *per annum, from June* 20, 1911, $300."

—be and the same is hereby further amended by adding the item "Clerk, 1, *from* $3,000 *to* $3,500 *per annum, from July* 25, 1911, $500," under the heading of *"General Administration."*

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Board of Education requesting, and report of the Comptroller recommending, the modification of salary schedule No. 1209 supporting the appropriation made in the budget for the year 1911 for the Department of Education, providing for the substitution of a Clerk at $400 for one at $300 per annum, involving no additional appropriation:

Department of Education, City of New York, Office of the Secretary, Park avenue and 59th street, July 14, 1911.

Mr. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Dear Sir—In accordance with a resolution adopted by the Board of Education on November 23, 1910, the undersigned respectfully request modifications in Schedule No. 1209, Office of the Auditor, Salaries, for the year 1911, as follows:

Strike out—	
Clerks, 3 at $400	$1,200 00
Clerks, 6 at $300	1,800 00
Unassigned balance	120 00
and insert—	
Clerks, 4 at $400	$1,600 00
Clerks, 5 at $300	1,500 00
Unassigned balance	20 00

The above request involves no increase in appropriation.

A copy of the schedule, as modified, is enclosed.

Respectfully yours, A. E. PALMER, Secretary, Board of Education; HENRY R. M. COOK, Auditor, Board of Education.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 14, 1911, the Board of Education requested modification of the Salary Schedule No. 1209, Office of the Auditor, for the year 1911. In connection therewith I report as follows:

The only change proposed is the striking out of a Clerk at $300 per annum, and the adding of one at $400, the $100 necessary to be transferred from an unassigned balance of $120.

The following table shows the line item changes in detail:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
1209.	Clerks, 3 at $400............	....	$400 00	....	$200 00
	Clerks, 6 at $300............	$300 00	....	$150 00	....
	Unassigned balance $120.....	100 00	....	50 00	....
		$400 00	$400 00	$200 00	$200 00

It is stated that no increase in compensation is involved.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the Board of Education for the year 1911, to take effect as of July 1, 1911, as follows:

Special School Fund.

General Administration, Office of the Auditor—

1209.	Salaries:	
	Auditor	$5,500 00
	Clerk	3,000 00
	Clerk	2,100 00
	Clerk	1,800 00
	Clerk	1,650 00
	Clerks, 2 at $1,500	3,000 00
	Bookkeeper	2,250 00
	Examiners of Claims, 8 at $1,500	12,000 00
	Clerk	1,350 00
	Clerks, 7 at $1,200	8,400 00
	Clerk	1,050 00
	Clerks, 4 at $900	3,600 00
	Clerk	660 00
	Clerks, 5 at $600	3,000 00
	Clerks, 5 at $540	2,700 00
	Clerks, 4 at $400	1,600 00
	Clerks, 5 at $300	1,500 00
	Stenographer and Typewriter	1,350 00
	Typewriter Accountants, 3 at $900	2,700 00
	Unassigned balance	20 00
		$59,230 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Acting President of the Borough of The Bronx requesting, and report of the Comptroller recommending, the modification of salary schedule No. 1762, supporting the appropriation made in the budget for the year 1911, for the office of the President of the Borough of The Bronx, providing for the decrease in compensation of a Typewriting Copyist from $750 to $600 per annum, said modification to be effective as of July 1, 1911:

The City of New York, Office of the President of the Borough of The Bronx, Municipal Building, Crotona Park, July 19, 1911.

To the Honorable, the Board of Estimate and Apportionment:

Gentlemen—Request is hereby respectfully made for a modification of the schedule lines supporting the appropriation made to the Bureau of Buildings of this office, for the year 1911, as below described:

PRESIDENT, BOROUGH OF THE BRONX.

Bureau of Buildings—Administration.

Code 1762—Salaries—

Superintendent	$5,000 00
Secretary to Superintendent	2,500 00
Plan Clerk	1,800 00
Clerks, 3 at $1,800	5,400 00
Clerks, 2 at $1,650	3,300 00
Clerks, 3 at $1,500	4,500 00
Clerk	1,200 00
Clerk	300 00
Stenographers and Typewriters, 2 at $900	1,800 00
Typewriting Copyist	600 00
Messengers, 3 at $1,200	3,600 00
Automobile Enginemen, 2 at $1,200	2,400 00
Driver	900 00
Unassigned balance	1,200 00
	$34,500 00

The only change provided for in the above modification from the present schedule is the decrease of one Typewriting Copyist from $750 to $600. Respectfully,

THOMAS W. WHITTLE, Acting President, Borough of The Bronx.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 19, 1911, the President of the Borough of The Bronx requested modification of salary schedule supporting the Budget appropriation to his office for the year 1911. In connection therewith I report as follows:

The request is in the Bureau of Buildings, Administration. The only change is a decrease in the compensation of a Typewriting Copyist from $750 to $600 per annum.

The following table shows the line item changes in detail:

Code No.		Schedule Transfer.		Cash Transfer.	
		Increase.	Decrease.	Increase.	Decrease.
1762.	Typewriting Copyist, 1 at $750	......	$750 00	......	$375 00
	Typewriting Copyist, at $600..	$600 00	......	$300 00	......
	Unassigned balance	150 00	......	75 00	......
		$750 00	$750 00	$375 00	$375 00

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule, as revised, for the office of the President of the Borough of The Bronx for the year 1911, to take effect as of July 1, 1911, as follows:

President, Borough of The Bronx.

Bureau of Buildings, Administration—

1762. Salaries:

Superintendent	**$5,000 00**
Secretary to Superintendent	**2,500 00**
Plan Clerk	**1,800 00**
Clerks, 3 at $1,800	**5,400 00**
Clerks, 2 at $1,650	**3,300 00**
Clerks, 3 at $1,500	**4,500 00**

Clerk	1,200 00
Clerk	300 00
Stenographers and Typewriters, 2 at $900	1,800 00
Typewriting Copyist	600 00
Messengers, 3 at $1,200	3,600 00
Automobile Enginemen, 2 at $1,200	2,400 00
Driver	900 00
Unassigned balance	1,200 00
	$34,500 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Department of Docks and Ferries requesting, and report of the Comptroller recommending, the modification of wage schedule Nos. 156, 167 and 196, supporting the appropriation made to said Department for the year 1911, providing for the elimination of a Roofer at $4.75 for 276 days and the addition of a Tinsmith and Roofer at $4.85 for 302 days, said modification to be effective as of July 1, 1911:

Department of Docks and Ferries, City of New York, Pier "A," North River, June 9, 1911.

Hon. William J. Gaynor, *Mayor and Chairman of the Board of Estimate and Apportionment:*

Sir—In the budget for this Department for the Mechanical Bureau, provision is made for the employment of one Roofer and also for the employment of one Tinsmith and Roofer.

I recommend that these two lines be combined and that instead of allowing one Roofer and one Tinsmith and Roofer the budget be modified to provide for two men under the joint title of Tinsmith and Roofer. The pay in both cases is the same and appointments to either position are made from the same civil service eligible list. The work done by both men is very similar.

The modification suggested will make the line available for either Roofer, Tinsmith or Tinsmith and Roofer. Yours very truly,

CALVIN TOMKINS, Commissioner of Docks.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—In reference to a request of the Commissioner of Docks on June 9, 1911, for modification of a wage schedule supporting the appropriation to the Department of Docks and Ferries for the year 1911, I report as follows:

The request is in the Mechanical Bureau, Wages, Regular Employees. It is proposed to drop a Roofer, at $4.75, for 276 days and add a Tinsmith and Roofer, at $4.75, for 302 days. The increase is to be provided for by transfer from the unassigned balance of $708.70.

The Commissioner states that the modification will make the line item available for either Roofer, Tinsmith or Tinsmith and Roofer, as the appointments are made from the same Civil Service eligible list.

The following table shows the changes in detail:

Mechanical Bureau.

Schedule Line.	Schedule Transfer.		Cash Transfer.	
	Decrease.	Increase.	Decrease.	Increase.
Roofer, 1 at $4.75 per diem (276 days)	$1,311 00	......	$655 50	......
Tinsmith and Roofer, 1 at $4.75 per diem (302 days)	......	$1,434 50	......	$712 25
Unassigned balance	123 50	......	61 75	......
	$1,434 50	$1,434 50	$717 25	$717 25

I recommend the adoption of the attached resolution granting the request.

Respectfully,

WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules, as revised, for the Department of Docks and Ferries for the year 1911, to be effective as of July 1, 1911, as follows:

Department of Docks and Ferries.

Mechanical Bureau, 57th Street Yard—

The schedules included under this heading are the supporting schedules for and are apportioned to accounts in the Budget of the Department of Docks and Ferries, as follows:

156. Bureau of Engineering, Wages, Mechanical Bureau, Budgetary Part Allowance	$36,575 02
167. Bureau of Engineering, Maintenance of Floating Property While Engaged in Repairs, Wages, Mechanical Bureau, Budgetary Part Allowance	33,783 80
196. Bureau of Ferries, Maintenance, Wages, Mechanical Bureau, Budgetary Part Allowance	138,364 76
The amount represented by these schedules in excess of the Budget items is the estimate of the Department of the amount of corporate stock disbursements chargeable to the Mechanical Bureau for 1911.	
Chargeable to corporate stock amount	106,821 12
Total	$315,544 70

Mechanical Bureau—

Salaries:

Mechanical Engineers, 2 at $4,000 each	$8,000 00
Assistant Engineer	2,100 00
Draftsman	1,200 00
Clerk	2,100 00
Clerk	1,200 00
Clerks, 2 at $1,050 each	2,100 00
Clerk	900 00
Timekeeper	1,200 00
Stenographer and Typewriter	900 00
	$19,700 00

Wages, Regular Employees:

Pilot	1,650 00
Engineer (Marine)	1,500 00
Engineer (Pile Driver or Stationary), at $4.50 per day (364 days)	1,638 00
Engineer (Pile Driver or Stationary), $4.50 per day (312 days)	1,404 00
Stokers, 3 at $3.50 per day (364 days)	3,822 00
Stokers, 2 at $3.50 per day (312 days)	2,184 00
Oiler	1,140 00
Foreman Dock Laborers	1,500 00
Dock Laborers, 2 at $3 per day (364 days)	2,184 00
Dock Laborers, 11 at $2.50 per day (364 days)	10,010 00
Dock Laborers, 16 at $2.50 per day (312 days)	12,480 00
Watchmen, 3 at $2 per day (634 days)	2,184 00
Boat Builders, 2 at $4 per day (312 days)	2,496 00
Foremen Carpenters, 2 at $1,800 each	3,600 00
Carpenters, 10 at $4.80 per day (312 days)	14,976 00
Foremen Ship Carpenters, 2 at $5 per day (312 days)	3,120 00
Ship Carpenters, 40 at $4 per day (312 days)	49,920 00
Foreman Ship Caulker, 1 at $4.50 per day (312 days)	1,404 00
Ship Caulkers, 15 at $4 per day (312 days)	18,720 00
Foreman Painter	1,500 00
Painters, 9 at $4 per day (312 days)	11,232 00
Painters and Letterers, 2 at $4 per day (312 days)	2,496 00
Tinsmiths and Roofers, 2 at $4.75 per day (302 days)	2,869 00
Wood Sawyer, 1 at $4.50 per day (312 days)	1,404 00
Saw Filer, 1 at $4 per day (302 days)	1,208 00
Housesmith, 1 at $5 per day (302 days)	1,510 00

Blacksmiths, 7 at $4.50 per day (312 days)	9,828 00
Blacksmiths' Helpers, 9 at $3 per day (312 days)	8,424 00
Foreman Blacksmith, 1 at $5 per day (312 days)	1,560 00
Pipe Fitters, 2 at $5.50 per day (302 days)	3,322 00
Pipe Fitter, 1 at $5.50 per day (276 days)	1,518 00
Pipe Fitters' Helpers, 2 at $3 per day (312 days)	1,872 00
Foremen Machinists, 2 at $5 per day (312 days)	3,120 00
Machinists, 30 at $4.50 per day (312 days)	42,120 00
Machinists' Helpers, 20 at $3 per day (312 days)	18,720 00
Plumber, 1 at $5.50 per day (312 days)	1,716 00
Plumbers' Helpers, 2 at $3 per day (312 days)	1,872 00
Foreman Rigger, 1 at $4 per day (312 days)	1,248 00
Riggers, 7 at $3.50 per day (312 days)	7,644 00
Captain Pile Driver	1,650 00
General Foreman	1,800 00
Boatman, 1 at $3 per day (312 days)	936 00
Deckhand, 1 at $3 per day (312 days)	936 00
Wireman, 1 at $4.50 per day (312 days)	1,404 00
Foreman Boilermaker, 1 at $4.50 per day (312 days)	1,404 00
Boilermakers, 9 at $3.50 per day (312 days)	9,828 00
Unassigned	585 20
	$279,658 20

Wages, Temporary Employees:

Engineer (Pile Driver or Stationary), at $4.50 per day (222 days)	999 00
Stoker, at $3.50 per day (372 days)	1,302 00
Foreman Machinists, at $5 per day (200 days)	1,000 00
Machinists, at $4.50 per day (965 days)	4,342 50
Machinists' Helper, at $3 per day (926 days)	2,780 00

Pipe Fitters' Helper, at $3 per day (50 days)	150 00
Roofer, at $4.75 per day (10 days)	47 50
Foreman Ship Caulker, at $4.50 per day (6 days)	27 00
Ship Caulker, at $4 per day (30 days)	120 00
Wood Sawyer, at $4.50 per day (5 days)	22 50
Unassigned	96 00
	$16,186 50
Total	$315,544 70

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Fire Department requesting, and report of the Comptroller relative to, the modification of Salary Schedules Nos. 960 and 968 supporting the appropriation made in the budget for the year 1911, for the said Department, providing for increases in salary of a Storekeeper from $1,500 to $1,800 per annum and of a Clerk from $1,200 to $1,500 per annum and the elimination of the position of Bookkeeper at $1,200 per annum, involving the transfer of $300:

Fire Department of The City of New York, Office of the Commissioner, July 19, 1911.

Hon. William J. Gaynor, *Mayor, and Chairman Board of Estimate and Apportionment:*

Sir—In compliance with application of this Department, an additional grade of the position of Storekeeper, with salary at the rate of $1,800 per annum, for one incumbent, has been established in this Department.

The purpose of the request was to permit of an advance from $1,500 to $1,800 per annum in the salary of the Storekeeper of this Department, payroll Bureau of Repairs and Supplies, Boroughs of Manhattan, The Bronx and Richmond.

It is also my desire to increase from $1,200 to $1,500 per annum the salary of a Clerk in the same bureau, the latter rate already existing in this Department.

To provide the funds for these purposes will necessitate revision and modification of salary schedules supporting appropriations made to this Department, Boroughs of Manhattan, The Bronx and Richmond, for the current year, entitled "960, Office of the Commissioner, Salaries," and "968, Bureau of Repairs and Supplies, Salaries"; also necessary transfer in connection therewith.

I have the honor, therefore, to request that one of the two positions of Bookkeeper at $1,200 per annum be eliminated from the first specified appropriation, and that from the $600 unaccrued balance of the salary thereof the sum of $300 be transferred to the last mentioned appropriation to pay the proposed increases for the remainder of the year from July 1, 1911. This will leave unassigned in account No. 960 the sum of $300. Respectfully, JOS. JOHNSON, Fire Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 19, 1911, the Commissioner of the Fire Department requested modification of two salary schedules supporting appropriations to his Department for 1911, involving a cash transfer of $300. In connection therewith I report as follows:

In No. 968, Bureau of Repairs and Supplies, Manhattan, The Bronx and Richmond, it is proposed to increase the compensation of Francis McCaffrey, Storekeeper, from $1,500 to $1,800 per annum, and John S. Julian, Clerk, from $1,200 to $1,500 per annum.

Mr. McCaffrey was appointed on January 3, 1900, as Assistant Storekeeper, at $1,200 per annum, and promoted to Storekeeper on May 1, 1902, at the present rate. He has charge of the departmental storehouses and the inspection of janitors' and household supplies.

Mr. Julian was appointed Clerk in the Finance Department, at $1,000 per annum, on September 11, 1899. On May 15, 1907, his compensation was increased to $1,200. On May 9, 1910, he was transferred to the Fire Department, at $1,200 per annum.

The funds for the increases are to be provided by the elimination of the position of Bookkeeper, at $1,200 per annum, in No. 960, office of the Commissioner.

The following table shows the changes in detail:

Account No.	Schedule Line.	Schedule Transfer.		Cash Transfer.	
		Decrease.	Increase.	Decrease.	Increase.
960.	Bookkeepers, 2 at $1,200......	$1,200 00	......	$600 00	......
	Unassigned balance	......	$600 00	......	$300 00
968.	Storekeeper, 1 at $1,500.......	1,500 00	......	750 00	......
	Storekeeper, 1 at $1,800.......	......	1,800 00	......	900 00
	Clerks, 3 at $1,200...........	1,200 00	......	600 00	......
	Clerk, 1 at $1,500...........	......	1,500 00	......	750 00
		$3,900 00	$3,900 00	$1,950 00	$1,950 00

The attached resolutions, if adopted, will grant the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules, as revised, for the Fire Department, for the year 1911, to take effect as of July 1, 1911, as follows:

Fire Department, Manhattan, The Bronx and Richmond.

General Administration.

Office of the Commissioner—

960. Salaries:

Commissioner	$7,500 00
Deputy Commissioner	5,000 00
Secretary to Department	4,800 00
Assistant Secretary to Department	3,500 00
Secretary to Commissioner	3,000 00
Clerk	3,000 00
Clerks, 2 at $2,400	4,800 00
Clerk	1,800 00
Clerk	1,500 00
Clerks, 2 at $900	1,800 00
Stenographer and Typewriter	1,800 00
Stenographer and Typewriter	1,350 00
Stenographers and Typewriters, 2 at $1,200	2,400 00
Bookkeeper	1,800 00
Bookkeeper	1,500 00
Bookkeeper	1,200 00
Messenger	1,200 00
Unassigned balance	600 00
	$48,550 00

Bureau of Repairs and Supplies—

968. Salaries:

Clerk	$2,100 00
Clerk	1,800 00
Clerk	1,650 00
Clerk	1,500 00
Clerks, 2 at $1,200	2,400 00
Clerks, 4 at $900	3,600 00
Stenographer and Typewriter	1,200 00
Stenographer and Typewriter	1,050 00
Storekeeper	1,800 00
	$17,100 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 237 of the Greater New York Charter, hereby approves transfer of funds appropriated to the Fire Department for the year 1911, as follows:

From

General Administration, Manhattan, The Bronx and Richmond, Office of the Commissioner—

960. Salaries $300 00

To

General Administration, Manhattan, The Bronx and Richmond, Bureau of Repairs and Supplies—

968. Salaries $300 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following resolution from the Board of Education requesting, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen, recommending that the compensation of the

Janitors of Public Schools Nos, 114, Manhattan, and 58, Queens, Department of Education, be fixed temporarily and until further modified:

Resolved, That the Board of Estimate and Apportionment be, and it is hereby, respectfully requested to recommend to the Board of Aldermen that the compensation of Janitors of public school buildings, etc., be fixed in accordance with the following list, taking effect on the date indicated in each instance:

Changes in Compensation.

Patrick Guina, School 114, Manhattan, present compensation, $5,256, proposed compensation $5,700; taking effect July 1, 1911. (Entire building being occupied for school purposes).

Thomas J. Hendry, School 58, Queens, proposed compensation, $2,412; taking effect May 15, 1911.

True copy of resolution adopted by the Board of Education on July 12, 1911.

A. E. PALMER, Secretary, Board of Education.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 12, 1911, the Board of Education requested the fixation, pursuant to the provisions of section 56 of the Greater New York Charter, of the compensation of two Janitors for Public Schools Nos. 114, Manhattan, and 58, Queens.

We recommend that the request be approved by the adoption of the attached resolution. Respectfully,

WM. A. PRENDERGAST, Comptroller; FRANCIS P. BENT, Acting President, Board of Aldermen; Select Committee.

The following was offered:

Whereas, By opinions of the Corporation Counsel, as of June 28, 1910, and July 30, 1910, the Comptroller was advised that the payment of salaries of Janitors in the Department of Education is illegal, unless such salary shall have been established under the provisions of section 56 of the Greater New York Charter; and

Whereas, The matter of adjusting the compensation of Janitors and the fixation of their salaries under the provisions of section 56 of the Charter is now in the hands of a Special Committee of the Board of Estimate and Apportionment; therefore, be it

Resolved, That pursuant to the provisions of section 56 of the Charter, the Board of Estimate and Apportionment hereby recommends to the Board of Aldermen pending the report of said Committee, the compensation of Janitors in the Department of Education be fixed temporarily, and until further modified, in accordance with the following list:

Janitor, with knowledge of steam heating, Public School 114, Manhattan, per annum	$5,700 00
Janitor-Engineer, Public School 58, Queens, per annum	2,412 00

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Department of Water Supply, Gas and Electricity requesting, and report of the Corporate Stock Budget Committee recommending, the issue of $40,000 corporate stock to provide for the purchase of additional land in the village of Mount Kisco, New York, for the protection of the water supply of The City of New York:

(On June 29, 1911, the request of the Commissioner of Water Supply, Gas and Electricity, for the above appropriation was referred to said Committee.)

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13-21 Park Row, June 26, 1911.

Mr. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Dear Sir—An authorization to issue $100,000 of corporate stock was made by the Board of Estimate and Apportionment for the purpose of the acquisition of land for building sewer at Mt. Kisco. Of this amount over $70,000 has been expended for that purpose, and there is now in our hands a report of the Commissioners of

Appraisal awarding for other parcels of land about $50,000. The expenses of the Commissioners, with their compensation and the interest to be paid on the amounts of the awards, make a total of about $60,000. It will be necessary that a further authorization be made to provide for the payment of these expenses, of about $30,000.

As there is a still further report of the Commissioners to be made it will be well, I think, that the amount now authorized be $40,000, and I respectfully request that the Board of Estimate and Apportionment authorize an issue of corporate stock to that amount. Yours truly, HENRY S. THOMPSON, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 26, 1911, the Commissioner of Water Supply, Gas and Electricity requested the Board of Estimate and Apportionment to authorize corporate stock to the amount of $40,000, for the purchase of additional land in the village of Mount Kisco, for the protection of the water supply of The City of New York. In connection therewith we report, as follows:

Chapter 428 of the Laws of 1907 authorizes The City of New York to enter into a contract or agreement with the village of Mount Kisco, Westchester county, New York, to provide for the disposal of sewage of said village, and to acquire such lands as may be necessary in and about said village to carry into effect any agreed plan for the disposal of sewage, and to improve and protect the water supply of The City of New York within said village; provided, however, that the said land may only be taken on the consent and approval of the municipal authorities of the village.

Section 3, chapter 428, Laws of 1907, provides that the Board of Estimate and Apportionment may authorize the issue of corporate stock, without the concurrence or approval of any other board or public body, to pay any sums of money that may become due from The City of New York, under the provisions of this act.

On February 5, 1908, the Commissioner of Water Supply, Gas and Electricity transmitted to the Board of Estimate and Apportionment for its approval, a form of agreement signed by the duly authorized representative of the village of Mount Kisco, providing briefly that the City acquires certain parcels of land; that the village of Mount Kisco is to instal trunk and lateral sewers, under the inspection of representatives of The City of New York, to which all residences on the line of said sewers are required to be connected within sixty days after notice to make such connection, and to deliver the sewage of said village to The City of New York at a point designated as a pumping station, and that The City of New York will then receive the same and dispose of the sewage permanently without cost and expense to the village of Mount Kisco, all as shown on a map attached to the agreement.

On February 14, 1908, the Board of Estimate and Apportionment approved the terms of the form of agreement and authorized the Commissioner of Water Supply, Gas and Electricity to execute the same on behalf of The City of New York.

On March 20, 1908, pursuant to the terms of the agreement, the Board of Estimate and Apportionment authorized corporate stock for the purchase of certain parcels of land for the building of sewers in the village of Mount Kisco to the amount of $100,000. This account is entitled C-DW-21.

To July 15, 1911, there had been expended $81,000. The Commissioner of Water Supply, Gas and Electricity states that there is now in his hands a report of the Commissioners of Appraisal awarding about $50,000 for other parcels of land, in addition to those in the original agreement. He further states that the expenses of the Commissioners, with their compensation and interest to be paid on the amounts of the awards, will be about $10,000 more, leaving an estimated balance of $41,000 to be provided for.

We recommend the adoption of the attached resolution granting the request.

Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Boardc of Aldermen; GEORGE McANENY, President, Borough of Manhattan; Corporate Stock Budget Committee.

The following resolution was offered:

Resolved, That, pursuant to the provisions of chapter 428 of the Laws of 1907, and the requisition of the Commissioner of Water Supply, Gas and Electricity, under date of June 26, 1911, the Board of Estimate and Apportionment hereby approves of the issue of corporate stock of The City of New York to an amount not exceeding forty thousand dollars ($40,000), for the purpose of complying with the terms of the agreement between The City of New York and the village of Mount Kisco, approved by the Board of Estimate and Apportionment February 14, 1908, as follows:

For the purchase of twenty parcels of land, containing about 14.093 acres (shown upon map forming part of said agreement), for the building of sewers by the village of Mount Kisco	$40,000 00

—and for the purpose of providing means therefor, the Comptroller be and he is hereby authorized to issue corporate stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, to an amount not exceeding forty thousand dollars ($40,000), the proceeds whereof to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the Fire Department relative to, and report of the Select Committee, consisting of the Comptroller and the President of the Board of Aldermen recommending, the establishment in the said Department of the grades of positions of Assistant Electrical Engineer, at $3,000 for one incumbent, and Draftsman at $1,200 per annum for two incumbents:

(On May 4, 1911, the request of the Fire Commissioner for the establishment of the above grades was referred to said committee).

Fire Department of The City of New York, Office of the Commissioner, July 8, 1911.

Hon. William A. Prendergast, *Comptroller, Member of Select Committee, Board of Estimate and Apportionment:*

Sir—I beg to request your further consideration of a request of this Department, dated May 4, 1911, for the establishment of the following grades of positions:

		Per annum.
Assistant Electrical Engineer	1 at	$3,000 00
Draftsmen	2 at	1,200 00
Cable Tester	1 at	1,200 00
Cable Splicers	2 at	1,200 00

Upon report of your committee, the Board of Estimate and Apportionment at the meeting of July 6, 1911, established the grades of Cable Tester, one incumbent, and Cable Splicer, two incumbents.

The posititons of Assistant Electrical Engineer, one incumbent, and Draftsmen, two incumbents, are urgently needed for the following reasons:

There are in the telegraph system of the Borough of Brooklyn some 1,119 miles of overhead circuits and 13 miles of underground circuits, the majority of the latter having been placed during the last year. Many of these overhead circuits are carried on the elevated structures in open wires, are in poor condition, in continuous danger of interruption from third rail current and extravagant in maintenance in that the City pays to the Brooklyn Rapid Transit Company for the privilege of these connections some $7,600 annually. The number of circuits in the Borough at the present time is entirely inadequate to care for the number of fire alarm signal boxes at present in service and yet there are hundreds of applications for additional boxes, many of which are necessary for the proper protection of property. To carry these overhead circuits many pole lines are maintained by the City, which carry no other wires, and in a great many cases subways parallel these pole lines in which the wires can be placed at no expense to the City except for the necessary cable and connections from manholes to signal posts, thus placing the circuits in a much safer condition and permitting the removal of unsightly and objectionable pole lines. It is for the purpose of preparing the necessary plans and specifications for this underground work that the services of the additional employees above requested are required.

The Electrical Engineer of the Department with the assistance of an Assistant Electrical Engineer and two Draftsmen, appointed for preparing plans and specifications for a new fire alarm telegraph system in Manhattan, are devoting any available time to the preparation of specifications for placing underground cables in Brooklyn, but this work is necessarily slow on account of the time available. Furthermore, a comprehensive study should be made for a cable and box distribution for the entire Borough of Brooklyn in order that the installation of underground cable may be intelligently made.

A corporate stock issue of $100,000 was available February 28, 1905, and an additional amount of $175,000 on January 23, 1906, for placing the fire alarm telegraph conductors in the Borough of Brooklyn underground, and as up to June 3, 1910, none of this money had been used, your Board rescinded $125,000 of the amount, leaving under title of C.F.D.-22 an amount of $150,000 available. During the past year about $14,000 of this has been spent for underground work.

I presume that the reason none of this money was used for very desirable work was the reason that nobody was appointed to prepare plans and specifications, as it is a fact that there was no one available in the Bureau for such work.

Respectfully, JOS. JOHNSON, Fire Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 24, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On April 27, 1911, the Fire Commissioner requested the establishment in his Department, pursuant to the provisions of section 56 of the Greater New York Charter, of the following grades of positions:

Title.	Rate Per Annum.	Number of Incumbents.
Assistant Electrical Engineer	$3,000 00	1
Draftsman	1,200 00	3
Cable Tester	1,200 00	1
Cable Splicer	1,200 00	2

The incumbents of the proposed positions were to be employed on the construction of an undreground fire alarm telegraph system in the Borough of Brooklyn, and their salaries paid from a corporate stock issue of $150,000 authorized for the work. On July 6, 1911, the Board of Estimate and Apportionment approved a report of its Select Committee, recommending the establishment of the grades of positions of Cable Tester and Cable Splicer.

On July 8, 1911, the Fire Commissioner requested further consideration of his original request, stating that the services of an Assistant Electrical Engineer and two Draftsmen were necessary. The plans which have been prepared for the installation of a new fire alarm system (known as the Corty-Miller plans) are descriptive only, and working plans will be necessary before the work of the construction of an underground system in Brooklyn can be proceeded with. These plans are to be prepared by the Department. The Commissioner states that there is no force now available for the work. The Assistant Electrical Engineer is to have general supervision of the work. The two Draftsmen are to be employed in preparing maps and plans of distribution of subway system.

We recommend that the request be approved for one Assistant Electrical Engineer and two Draftsmen by the adoption of the attached resolution. Respectfully,

WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President, Board of Aldermen; Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, recommends to the Board of Aldermen the establishment in the Fire Department of the grades of positions, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Assistant Electrical Engineer	$3,000 00	1
Draftsman	1,200 00	2

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented the following communication from the President of the Borough of Queens requesting, and report of the Select Committee, consisting of the

Comptroller and the President of the Board of Aldermen, recommending, the establishment in the office of said Borough President the position of Consulting Engineer at $6,000 per annum, for one incumbent:

(On July 20, 1911, the request of the President of the Borough of Queens for the establishment of the above position was referred to said committee.)

The City of New York, Office of the President of the Borough of Queens, Long Island City, July 19, 1911.

Hon. WILLIAM J. GAYNOR, *Mayor, Chairman Board of Estimate and Apportionment,* New York City:

Sir—Application is hereby made for resolution of your honorable Board recommending to the Board of Aldermen in accordance with section 56 of the Charter of The City of New York, the establishment of the position of Consulting Engineer, Office of the President of the Borough of Queens, at a salary of six thousand ($6,000) dollars per annum.

This position is now vacant in this office by reason of the resignation on June 30, 1910, of the late Mr. John J. McLaughlin, who was appointed in the year 1902, pursuant to the following authority, to wit:

In the Board of Aldermen.

Whereas, The Board of Estimate and Apportionment at a meeting held February 28, 1902 adopted the following resolution:

Resolved, That, pursuant to section 386, chapter 466 of the Laws of 1901, the President of the Borough of Queens is hereby authorized to employ a Consulting Engineer of Public Works at such times as the public interests may require, and at such proper compensation as the particular work upon which he is employed requires.

Resolved, That the Board of Aldermen hereby concurs in said resolution and authorizes the President of the Borough of Queens to employ a Consulting Engineer of Public Works at such times as the public interests may require and at such proper compensation as the particular work upon which he is employed requires.

Adopted by the Board of Aldermen April 1, 1902, a majority of all the members elected voting in favor thereof.

Approved by the Mayor April 14, 1902.

(Signed) P. J. SCULLY, Clerk.

The many problems arising in this Borough that require expert engineering advice and for which I have been dependent upon the Engineers in charge of the different bureaus, have become so voluminous that I have come to the conclusion that for the proper and efficient performance of the duties devolving upon me by law it is absolutely necessary to have a Consulting Engineer whose sole duties will be appropriate to his title, as many matters of importance have been delayed by reason of my having to take up the time of the Engineers in charge of the bureaus.

As you are well aware completion of the topographical map of this Borough is a tremendous proposition, street opening proceedings are augmenting every day.

The applications to the Local Board for improvements payable from assessment funds have assumed such proportions that it is a physical impossibility to promptly meet the demands of the petitioners.

The physical improvements of the highways, the construction of sewers, and the approval of the plans therefor are all matters requiring expert engineering advice, likewise, the construction of incinerating plants for the Bureau of Street Cleaning for which we have preliminary authorizations of corporate stock from your honorable Board.

Since July 1, 1910, this office has awarded contracts for work that will cost approximately $1,500,000.

The Board of Aldermen by resolution of June 20, 1911, authorized the Comptroller to issue special revenue bonds to an amount not exceeding three thousand ($3,000) dollars, proceeds whereof to be used to pay the salary of this position. This resolution which was approved by the Mayor July 5, 1911, is awaiting confirmation by your honorable Board. We enclose copy of resolution.

Respectfully, LAWRENCE GRESSER, President of the Borough of Queens.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 19, 1911, the President of the Borough of Queens requested the establishment in his office, pursuant to the provision of section 56 of the Greater

New York Charter, of the grade of position of Consulting Engineer, at $6,000 per annum, for one incumbent. In connection therewith, we report as follows:

On February 28, 1902, the Board of Estimate and Apportionment adopted the following resolution:

Resolved, That, pursuant to section 386, chapter 466, of the Laws of 1901, the President of the Borough of Queens is hereby authorized to employ a Consulting Engineer of Public Works at such times as the public interests may require, and at such proper compensation as the particular work upon which he is employed requires.

On April 1, 1902, the resolution was concurred in by the Board of Aldermen, and on April 14, 1902, it was approved by the Mayor.

The position is now vacant by reason of the resignation, on June 30, 1910, of John J. McLoughlin, who was appointed in 1902, pursuant to the above resolution.

The action of the Board of Estimate and Apportionment and the Board of Aldermen, under the provision of section 386 of the Greater New York Charter, is not regarded as a legal establishment of the position of Consulting Engineer at $6,000 per annum. The resolution, as adopted by the two boards, did not fix any compensation. There was no establishment of position or grade as required under section 56 of the Greater New York Charter.

It is stated that the intention of the Borough President is to appoint C. L. C. Smith to this position. The President of the Borough prefers that the position be legally established under section 56. He states that he is confronted with many problems requiring expert engineering advice and that he has serious need for a Consulting Engineer.

We recommend the adoption of the attached resolution approving the request.

Respectfully, WM. A. PRENDERGAST, Comptroller; JOHN PURROY MITCHEL, President Board of Aldermen, Select Committee.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 56 of the Greater New York Charter, recommends to the Board of Aldermen the establishment in the office of the President of the Borough of Queens, of the grade of position, in addition to those heretofore established, as follows:

Title.	Rate Per Annum.	Number of Incumbents.
Consulting Engineer	$6,000 00	1

Which was adopted by the following vote:

Affirmative—The Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—13.

The Secretary presented a report of the Comptroller in the matter of the request of the Fire Commissioner for approval of the specifications and estimate of cost ($1,400) for two self-propelled wagons for Chief Officers, intended for service in the Boroughs of Manhattan and Queens, and stating that no action is necessary in the premises as the proposed expenditure is a maintenance charge:

Which was ordered filed and the Secretary directed to transmit a copy thereof to the Fire Commissioner.

The Secretary presented communications, as follows:

From the Public Service Commission for the First District, requesting the Board to consent to the proposed contract between The City of New York and the Metropolitan Contracting Company for the construction of Section 5 of Route No. 5 of the proposed Lexington Avenue Rapid Transit Railroad, extending under Irving place, Gramercy Park and Lexington avenue, from East 14th street to East 26th street, Borough of Manhattan, and to authorize the issue of bonds to the amount of $2,419,127.20 for the estimated expense of executing said contract;

From the Sheriff of New York County, relative to a recent act of the Legislature increasing the salary of the Under Sheriff from $5,000 to $6,000 per annum and increasing the number of Deputy Sheriffs and Assistants to Deputy Sheriffs from twelve to fifteen and increasing the salary of the Assistants from $1,000 to $1,500 per annum.

—and

Resolutions (nine) of the Board of Aldermen, requesting issues of special revenue bonds (subdivision 8, section 188 of the Charter), for the following purposes:

A—$1,200 to provide for the compensation for overtime work during 1911, of Mechanics in the Repair Shops of the Fire Department.

B—$10,000 to provide for the maintenance expenses during the remainder of the year 1911 of the New York Public Library, under the jurisdiction of the Department of Parks, Boroughs of Manhattan and Richmond.

C—$1,021.92 to provide for the increase in the salary of the Secretary to the Armory Board from June 27, 1911.

D—$5,000 to provide for the compensation of special Measurers hired by the Commissioner of Weights and Measures.

E—$1,000 to provide for the salary for the remainder of the year 1911 of a Bond Clerk in the office of the District Attorney of Kings County.

F—$2,000 to provide for the restoration of the Heine monument at the entrance to the Grand Boulevard and Concourse at 161st street, The Bronx, under the jurisdiction of the President of The Bronx.

G—$100,575 to provide for the purchase by the Department of Street Cleaning of 270 draft horses and 30 driving horses.

H—$200,133 to provide for the installation of fire alarm systems, up-to-date fire escapes, stand pipes, hose and other necessary equipment in all hospitals and buildings under the jurisdiction of the Department of Public Charities.

I—$600 to provide for the salary of an Automobile Engineman in the Bureau of Weights and Measures, Mayor's Office, for the remainder of the year 1911.

Which were referred to the Comptroller.

The Secretary presented a communication from Charles T. Carroll, 373 Fulton street, Brooklyn, offering to sell to the City for the sum of $5,000, premises 239 and 241 Green street, Brooklyn, for hospital purposes.

Which was referred to the Commissioner of Public Charities.

The Secretary presented a report of the Comptroller recommending the issue of $6,065.51 special revenue bonds (subdivision 8, section 188 of the Charter), to provide for the salaries of two Pathologists from July 1 to December 31, 1911, at $1,500 each per annum, and for increases in wages of Deckhands from $500 to $720 per annum, from May 17 to December 31, 1911, and of Steamfitters from $5 to $5.50 a day from March 15 to December 31, 1911, Department of Public Charities; also recommending approval of a schedule for the fund.

Which was laid over one week, August 3, 1911.

(On July 6, 1911, the resolution of the Board of Aldermen requesting the above appropriation was referred to the Comptroller.)

(On July 17, 1911, the above matter was laid over to July 27, 1911.)

The Secretary presented the following resolution of the Board of Aldermen, requesting an issue of $8,225 special revenue bonds to provide for the employment of ten additional Inspectors and two additional Clerks from June 1, 1911, in the Bureau of Buildings, Borough of Queens, together with a report of the Budget Committee, recommending an issue of $3,000 for the employment of six Building Inspectors at the rate of $1,200 per annum, from August 1 to December 31, 1911, and also recommending approval of a schedule for said fund:

(On May 25, 1911, the resolution of the Board of Aldermen, above mentioned, was referred to the Comptroller.)

(On July 6, 1911, the report of the Comptroller, recommending that no action be taken on the request and that the Borough President be advised to make application for the additional force in the Budget estimate for his office for the year 1912, was referred to the above Committee.)

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of eight thousand two hundred and twenty-five dollars ($8,225), the proceeds whereof to be used by the President of the Borough of Queens for the purpose of employing in the Bureau of Buildings ten additional Building Inspectors at the rate of $1,200 per annum for seven months, from June 1, 1911=$7,000, and two additional Clerks, at the rate of $1,050 per annum for seven months, from June 1, 1911=$1,225.

Adopted by the Board of Aldermen May 2, 1911, three-fourths of all the members voting in favor thereof.

Received from his Honor the Mayor May 10, 1911, without his approval or disapproval thereof; therefore, as provided in section 40 of the Greater New York Charter, the same took effect as if he had approved it.

P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 17, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On May 2, 1911, the Board of Aldermen adopted a resolution requesting $8,225 in special revenue bonds to be used by the President of the Borough of Queens for the employment in the Bureau of Buildings of 10 additional Building Inspectors at $1,200 per annum, and two additional Clerks, at $1,050 per annum for seven months, from June 1, 1911.

At the present time the inspection work in the Bureau of Buildings is done by 1 Chief Inspector, 1 Steel and Iron Inspector, 9 Construction Inspectors and 5 Plumbing Inspectors. The territory covered by these men is approximately 128 square miles, and each construction inspector covers a district of approximately 15 square miles, each plumbing inspector covers a district of approximately 25 square miles and the steel and iron inspector, the entire Borough of Queens.

The number of new buildings started during the year 1910 was 4,138, the estimated cost of which was $15,144,377, and of this number 2,259 were started during the first six months of that year at an estimated cost of $7,549,837.

The records of the office show that during the first six months of 1911, 3,005 new buildings have been started at an estimate of cost of $12,675,210, or an increase in the number of new buildings of 746 in the first six months of 1911 over the corresponding period of 1910.

There were also issued 1,212 permits during 1910 for alterations, at an estimate of cost $895,804; 636 of which at an estimate of cost of $462,447 were issued during the first six months of the year. During the first six months of 1911, 637 permits were issued for alteration work at an estimate of cost of $406,624.

In addition to the above, the Bureau of Buildings also make inspections of buildings against which complaints have been made by the Fire Department and the Tenement House Department. Inspections of moving picture shows and all common shows and buildings used for concerts are also made prior to the issuing of permits by the Bureau of Licenses and the Police Department.

It will be seen from the above figures that the number of new building permits filed during the first six months of the year 1910 equalled 54 6-10 per cent. of the number filed during the entire year. If this proportion should hold good for the year 1911, 5.504 permits will have been filed during the year 1911, or an increase of 1,366 new building permits over the number 1910.

The number of alterations during 1911 should remain about the same as 1910.

It is claimed that even during 1910 there was not a sufficient number of inspectors employed to properly supervise the work assigned to them. Each inspector had between 300 and 500 building permits in his district to examine at this time and it is stated that it takes between two and three weeks for each man to make a circuit of his district.

An adequate inspection of the construction of buildings should be made, and, while the present force can cover all the territory, there is no assurance that they can do the work in a satisfactory manner. A thorough investigation has convinced us that the force should be increased in order to make sure of adequate inspection. However, the figures do not justify an addition of ten Inspectors. We believe that six new men would be sufficient, and that three of them should be Construction Inspectors, two Plumbing Inspectors, and 1 Steel and Iron Inspector.

Therefore, we submit for adoption the following resolution granting the request to the extent of $3,000 special revenue bonds to provide for the employment of six additional Building Inspectors at $1,200 per annum for five months to date from August 1, 1911, and approving a schedule for the fund.

Respectfully,

WM. A. PRENDERGAST, Comptroller; GEORGE McANENY, President, Borough of Manhattan; JOHN PURROY MITCHEL, President, Board of Aldermen; Budget Committee.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on May 2, 1911, requesting an issue of special revenue bonds in the sum of Eight Thousand, Two Hundred and Twenty-five ($8,225), the proceeds whereof to be used by the President of the Borough of Queens for the employment in the Bureau of Buildings of 10 additional Building Inspectors, at $1,200 per annum, and two additional Clerks, at $1,050 per annum, for seven months, from June 1, 1911, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment to the extent of Three Thousand Dollars ($3,000), for the employment of 6 Building Inspectors at $1,200 per annum, and for the purpose of providing means therefor the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding Three Thousand Dollars ($3,000), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules of salaries paid from other than budget funds in the office of the President of the Borough of Queens for the year 1911, to take effect August 1, as follows:

President, Borough of Queens; Bureau of Buildings—Inspection and Field Force—Salaries.

Revenue Bond Force.

Building Inspectors, 6 at $1,200 per annum.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—16.

The Secretary was directed to transmit a copy of the report of the Corporate Stock Budget Committee to the President of the Borough of Queens and to the Board of Aldermen.

The Secretary presented the following report of the Comptroller certifying the claim of the Excello Paint and Oil Company, pursuant to section 246 of the Charter, in the sum of $3,243.67 for oil and other supplies delivered for use by the Department of Water Supply, Gas and Electricity:

City of New York, Department of Finance, July 24, 1911.

Mr. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Dear Sir—I transmit herewith report of the Division of Law and Adjustment of this Department on the petition of the Excello Paint and Oil Company for a consideration of their claim under section 246 of the Charter, together with the papers in the matter.

Will you kindly arrange to have this on the calendar of the Board of Estimate for the meeting of July 27, 1911

Yours truly, WM. A. PRENDERGAST, Comptroller.

City of New York, Department of Finance, Comptroller's Office, July 24, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—Under and pursuant to the provisions of section 246 of the Charter, I hereby certify that a claim has been presented by the Excello Paint and Oil Company for $4,901.08, alleged to be due for oil and other supplies delivered for use by the Department of Water Supply, Gas and Electricity; that such claim, according to the opinion of Acting Corporation Counsel G. L. Sterling, is illegal and invalid as against The City of New York, but, notwithstanding, in my judgment, it is equitable and proper for the City to pay a portion of said sum inasmuch as the City has received value for the same, and that $3,243.67 is the amount which should be paid in full satisfaction of the said claim.

Respectfully, WM. A. PRENDERGAST, Comptroller.

City of New York, Department of Finance, Comptroller's Office, July 24, 1911.

In the matter of the application made by the Excello Paint and Oil Company for the adjustment by the Board of Estimate and Apportionment, under section 246 of the Charter, of its claim for $4,901.08, alleged to be due for goods sold and delivered for use by the Department of Water Supply, Gas and Electricity.

Hon. William A. Prendergast, *Comptroller:*

Sir—The Excello Paint and Oil Company asks for the adjustment by the Board of Estimate and Apportionment, under section 246 of the Charter, of its claim for $4,901.08, alleged to be due for goods sold and delivered for use by the Department of Water Supply, Gas and Electricity. The items claimed are as follows:

1909, January 30	$400 00
1909, January 30	400 00

1909, February 10-17	461 00
1909, March 1	628 00
1909, March 18	154 20
1909, March 18	63 95
1909, March 30	827 46
1909, April 2	52 00
1909, April 21	188 75
1909, May 18	210 00
1909, June 15	20 41
1909, June 16	143 75
1909, June 24	66 65
1909, July 22	53 30
1909, July 2	76 20
1909, August 4	93 50
1909, August 15	60 40
1909, August 16	174 53
1909, September 13	32 40
1909, September 27	48 00
1909, October 18	33 80
1909, October 20	143 38
1909, October 20-21	70 15
1909, October 23	107 80
1909, November 1	300 30
1909, November 9	13 75
1909, November 10	57 40
1909, November 17	20 00

Upon investigation it appears that the above mentioned charge of $461 was paid by Voucher No. 34410, C. O. P. of 1909. This item, therefore, must be eliminated.

Twenty-five vouchers, including the above-mentioned charges, have been prepared and transmitted to this Department for payment. Following is a statement showing the numbers of the vouchers, the dates of the orders, the dates of the bills rendered and the amounts of the vouchers:

Voucher No.	Date of Order.	Date of Bill Rendered.	Amount of Voucher.
6032	Jan. 29, 1909	Feb. 5, 1909	$400 00
6031	Jan. 29, 1909	Feb. 5, 1909	400 00
1498	Apr. 2, 1909	Apr. 2, 1909	782 20
1277	Mar. 1, 1909	Mar. 18, 1909	63 95
1497	Apr. 2, 1909	Apr. 2, 1909	879 46
1533	Apr. 13, 1909	Apr. 21, 1909	188 75
4838	Apr. 19, 1909	May 18, 1909	210 00
4770	Sept. 27, 1909	Sept. 27, 1909	20 41
2970	June 11, 1909	June 16, 1909	241 35
6205	June 18, 1909	June 24, 1909	56 65
4368	June 26, 1909	July 22, 1909	53 30
4772	July 8, 1909	July 2, 1909	76 20
3597	Sept. 11, 1909	Sept. 16, 1909	93 50
4771	Aug. 17, 1909	Aug. 16, 1909	60 40
4734	Aug. 11, 1909	Oct. 10, 1909	172 64
3762	Sept. 9, 1909	Sept. 13, 1909	32 40
3717	Sept. 24, 1909	Sept. 27, 1909	48 00
4211	Oct. 13, 1909	Oct. 18, 1909	33 80
4196	Oct. 18, 1909	Oct. 20, 1909	143 38
4195	Oct. 18, 1909	Oct. 20-21, 1909	70 15
4192	Oct. 21, 1909	Oct. 23, 1909	107 80
4681	Oct. 13, 1909	Nov. 1, 1909	300 30
4440	Nov. 6, 1909	Nov. 9, 1909	13 75
4679	Nov. 6, 1909	Nov. 10, 1909	57 40
4533	Nov. 13, 1909	Nov. 17, 1909	20 00
			$4,525 79

To each of these vouchers was attached an order with a certificate of necessity, with two exceptions bearing date prior to the delivery of the supplies. Voucher No. 4772 had attached an order dated July 8, 1909, but the bill attached was dated July 2,

1909. Voucher No. 4771 had attached an order dated August 17, 1909, but the bill attached was dated August 16, 1909.

The circumstances attending the issuing of these orders are explained in a letter dated October 14, 1909, received from M. F. Loughman, Deputy Commissioner of Water Supply, Gas and Electricity, in which he stated "Replying to your letters of August 23 and 26 in connection with the purchase of paints, oils, etc., from the Excello Paint and Oil Company in an amount exceeding $1,000, at the time of the purchase of the supplies in the amounts stated in the above claim there was no contract in existence. The Department had drafted a proposed form of contract without determining the quantity to be delivered, but the Corporation Counsel would not approve same. Another form was prepared, and after the award of the contract it was discovered that it was defective and all bids had to be rejected. There is another form or proposed form of contract in the hands of the printer which will soon be advertised. The oils which were purchased were absolutely necessary for the operation of the pumps in the several stations."

Herewith transmitted is a report, dated January 23, 1911, made by Inspector A. H. Witschieben, of the Division of Inspection of this Department, in which he stated:

"I have carefully gone over the claims and the reports made on some of them and respectfully recommend that deductions on the following claims for oils, etc., be made for the reasons hereinafter stated:

Voucher No. 1498—Bill Dated April 2, 1909—	
1,256 gallons cylinder oil, at 50 cents	$628 20
Recommended deduction 10 cents per gallon, or	125 60
Voucher No. 1497—Bill Dated April 2, 1909—	
1,247½ gallons cylinder oil, at 50 cents	623 75
Recommended deduction of 10 cents per gallon, or	124 75
Voucher No. 3717—Bill Dated September 27, 1909—	
60 gallons Excellorine Disinfectant, at 80 cents	48 00
Recommended deduction of 15 cents per gallon, or	9 00
Voucher No. 6205—Bill Dated June 24, 1909—	
54 gallons linseed oil, at 61 cents	32 94
Recommended deduction of 21 cents per gallon, or	11 34
47¾ gallons machine oil, at 35 cents	16 71
Recommended deduction of 7½ cents per gallon, or	3 58
Voucher No. 1533—Bill Dated April 21, 1909—	
151 gallons yellow paint, at $1.25	188 75
Recommended deduction of 10 cents per gallon, or	15 10
Voucher No. 3763—Bill Dated September 13, 1909—	
54 gallons auto oil, at 60 cents	32 40
Recommended deduction of 10 cents per gallon, or	8 10

RECAPITULATON.

Voucher.	Amount.	Deduction.	Net Amount.
1498	$782 20	$125 60	$656 60
1497	879 46	124 75	754 71
3717	48 00	9 00	39 00
6205	56 65	14 92	41 73
1533	188 75	15 10	173 65
3762	32 40	8 10	24 30
	$1,987 46	$297 47	*$1,589 99

"The above deductions on oil, etc., supplied on these vouchers are recommended for the following reasons:

"Cylinder Oil—Charged at 50 cents and allowed 40 cents per gallon.

"When bids on this oil were opened on June 23, 1909, the claimants bid 43 cents per gallon, as against 29 cents, next highest, and 19 cents, the lowest.

"These bids were rejected, and on August 18, 1909, new bids were opened and the award was made to the claimants at 10 cents per gallon, next lowest bidder being 22 cents and highest 29 cents. This item was part of a large lot of supplies, and although everything else was delivered no cylinder oil was furnished at the price quoted.

---

*Should be $1,689.99.

"The bids made by claimant would seem to indicate that 50 cents is an excessive price and I have recommended deduction accordingly.

"A peculiar part of this transaction which would seem to point conclusively to collusion in this matter is the fact that on August 5, 1909, the Department of Water Supply, Gas and Electricity placed three orders with claimants for a total of 5,020½ gallons of cylinder oil at 50 cents per gallon, all of which was supposed to be an 'emergency' case.

"The 'emergency' evidently consisted of getting a big enough stock on hand to preclude the necessity of claimants having to furnish any at the new contract price of 10 cents per gallon. If it can be legally done I would recommend that a deduction of 10 cents per gallon on this lot be made from the total amount of the pending claims.

"Excellorine Disinfectant. Reduction to 65 cents was recommended to conform to the highest price allowed by Comptroller Metz for disinfectants.

"Linseed Oil. Reduction to 40 cents was recommended to conform to the price previously accepted by claimants for linseed oil, it being of inferior grade.

"Machine Oil. Reduction to 27½ cents was recommended to conform to price charged on bill of November 9, 1909.

"Yellow Paint. Reduction to $1.15 per gallon was recommended to conform to the price previously accepted by claimants for similar paint.

"Automobile Oil. Reduction to 50 cents per gallon was recommended to conform to the price of Havoline Oil, which was called for in order.

"In addition to above claims for supplies on which excessive charges are noted, the following claims for work done, etc., appear to be excessive. (See report of Mr. McDermott herewith attached).

Voucher.	Amount.	Deduction.	Net Amount.
6032	$400 00	$100 00	$300 00
6031	400 00	100 00	300 00
4838	210 00	85 00	125 00
	$110 00	$285 00	$725 00

"In addition to these amounts Voucher No. 1510, for $210, for work done at the Oliver Street Station, has been paid, but the price charged was found to be excessive to the amount of $100. If it can be legally done I would recommend that this amount be deducted from the total amount of the attached claims.

"I recommend that the following vouchers be paid in full, as the prices charged on same appear to be reasonable:

No.		No.	
1277	$63 95	4681	$300 30
4770	20 41	4679	57 40
4368	53 30	4533	20 00
4772	76 20	4440	13 75
4771	60 40	4196	143 38
4734	172 64	3597	93 50
4211	33 80	2970	143 75
4195	70 15		
4192	107 80		$1,430 73

There are twenty-five vouchers in the lot submitted to me, amounting to a total of	*$4,428 29
Total deduction recommended on these claims	582 47
	†$3,845 82

"From this amount I recommended the additional deduction of $602.05, for overcharged on vouchers previously paid. This will bring the net amount down to $3,243.77."

							$3,243 67	

On the 23d of December, 1909, a report was made by me upon the application of the claimant for the adjustment by the Board of Estimate and Apportionment, under Section 246 of the Charter, of its claims for $8,211.31 and $2,045.60, for similar supplies furnished, including certain of the items now under consideration. The said report was transmitted to the Corporation Counsel, with a request for his advice as to whether or not the said claims were a proper subject for adjustment under the said enactment.

In reply to such request, a communication, dated December 28, 1909, was received from Acting Corporation Counsel G. L. Sterling, in which he stated in part: "Since the value of the supplies furnished by these claimants to the Department of Water Supply far exceeding the sum of $1,000, it is clear upon the facts disclosed in the auditor's report, as well as in the Deputy Comptroller's letter to this office, dated September 11, 1909, that the claims could not be enforced in an action at law, and that the City could, if it so desired, refuse to make compensation to the claimants for the benefits derived through the irregular procedure pursued by them and by the Commissioner of Water Supply. Chapter 601 of the Laws of 1907 vests the Board of Estimate and Apportionment with power, in its discretion, to pay claims which are unenforcible for reasons of technical illegality in procedures when such claims are certified as just and reasonable by the Comptroller. If you are satisfied that by reason of the delivery of paint and oil by these claimants to the Department of Water Supply, that Department, and consequently the City, have derived a benefit, and that there is a moral obligation upon the City to pay these debts, then I advise you that you may certify the claims to the Board of Estimate and that Board may direct payment in the amount prescribed by Chapter 601 of the Laws of 1907."

In accordance with the opinion of the Acting Corporation Counsel, such of the vouchers in respect to which there was no dispute were certified by Comptroller Herman A. Metz for adjustment by the Board of Estimate and Apportionment. Payment was accordingly made to the claimant of the aggregate of $5,055.54. None of the charges now under consideration was included in such adjustment.

It would appear from the foregoing that the considerations which were stated by the Acting Corporation Counsel to justify action by the Board of Estimate and Apportionment, apply equally well to the claims now presented, inasmuch as the City has received value for the same. In view of the fact that equitable relief is demanded by the claimant it seems to be just that the sum of $602.05, overpayment made on previous vouchers, be deducted from the amounts now found to be payable upon the present adjustment.

It is, therefore, respectfully recommended that the certificate prescribed in Section 246 of the Charter as a requisite for action by the Board of Estimate and Apportionment be issued in favor of the claimant for the payment of the vouchers enumerated in the following table in the amounts stated to be due

Voucher Numbers.	Date of Orders.	Date of Bills Rendered.	Accounts of the Vouchers.	Deductions	Amounts Recommended for Payment.

Respectfully, JOS. L. HANCE, Auditor of Accounts.

Approved: Albert E. Haddock, Chief, Division of Law and Adjustment.
Approved: Wm. A. Prendergast, Comptroller.

The following resolution was offered:

Resolved, That, pursuant to section 246 of the Charter, the Board of Estimate and Apportionment hereby determines that the City has received a benefit from the Excello Paint and Oil Company and is justly and equitably obligated to pay to it, without interest, the sum of $3,243.67 for oil and other material supplied for the use of the Department of Water Supply, Gas and Electricity; that the said sum shall be paid in full satisfaction of twenty-five vouchers aggregating $4,525.79, prepared in the said Department and transmitted to the Department of Finance for payment, and shall be paid only upon the execution by the Excello Paint and Oil Company for a full release in favor of the City in such form as shall be approved by the Corporation Counsel; that the numbers of the vouchers, the amounts of the vouchers and the amounts to be paid thereon, are as follows:

Voucher Numbers.	Amounts of Vouchers.	Amounts Recommended for Payment.
6032	$400 00	$300 00
6031	400 00	300 00

	$4,525 79	$3,243 67

—and that the said sums be paid out of the funds indicated on the vouchers.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—16.

The Secretary presented the following communication from the Department of Public Charities, and report of the Comptroller relative to, the authorization of an issue of $500 special revenue bonds (subdivision 8, section 188 of the Charter), in addition to the amount of $11,520 authorized on July 13, 1911, to provide for the salaries of help in the Central Office, Manhattan, the Kings County Hospital, New York City Home for Aged and Infirm (Brooklyn Division) and the Cumberland Street Hospital, Department of Public Charities, from July 1 to December 31, 1911, and approval of a schedule for the fund:

(The above appropriation is to provide for the increase in salary of the General Medical Superintendent at the Kings County Hospital from $5,000 to $6,000 per annum.)

(The resolution of the Board of Aldermen requesting the issue of $12,020 special revenue bonds for the above purpose, and report of the Comptroller relative thereto, is printed in the Financial Minutes of the meeting held July 13, 1911, at page 1818 of the City Record.)

Department of Public Charities of The City of New York, Foot of East 26th Street, May 23, 1911.

To the Honorable, the Board of Aldermen:

Gentlemen—We would respectfully request that special revenue bonds to the amount of twelve thousand and twenty dollars ($12,020) be issued to pay the salaries of the following help from July 1, at the Central Office, Manhattan; Kings County Hospital, Home for the Aged and Infirm, and Cumberland Street Hospital, Brooklyn, so that the efficiency of the Department may be increased and that the patients may receive the best care and attention, in order that they may be quickly cured and returned to their homes as speedily as possible to support their families, and, at the same time, relieve the City of their care:

Central Office, Manhattan.		
One (1) General Medical Superintendent of the Department of Public Charities, at $6,000 per annum (increased from $5,000 to $6,000)......		$500 00
Kings County Hospital.		
Seven (7) Trained Nurses, from $600 to $750 per annum each..	$525 00	
Ten (10) Trained Nurses, additional, at $600 per annum each..	3,000 00	
Twenty (20) Hospital Helpers (male), at $300 per annum each	3,000 00	
Twenty (20) Hospital Helpers (female), at $240 per annum each	2,400 00	
		9,425 00
New York City Home for the Aged and Infirm (Brooklyn Division).		
One (1) Trained Nurse, $600 to $750 per annum...............	$75 00	
Six (6) Hospital Helpers (male), at $300 per annum each.....	900 00	
Six (6) Hospital Helpers (female, at $240 per annum each.....	720 00	
		1,695 00
Cumberland Street Hospital.		
One (1) Deputy Medical Superintendent, at $1,800 per annum............		900 00
		$12,020 00

Respectfully yours, M. J. DRUMMOND, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 24, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 13, 1911, the Board of Aldermen adopted a resolution requesting special revenue bonds in the sum of $12,020, the proceeds to be used by the Department of Charities for the payment of salaries in several divisions of the Department from July 1 to December 31, 1911.

A partial report upon the request, recommending concurrence to the extent of $11,520, was approved by this Board on July 13, 1911. Action upon the request for funds to provide for an increase of the salary of a General Medical Superintendent from $5,000 to $6,000 per annum was withheld until the $6,000 rate should be established pursuant to the provisions of section 56 of the Greater New York Charter. The $6,000 rate has since been established.

It is proposed to promote to the new grade Dr. John F. Fitz Gerald, General Medical Superintendent of the Kings County Hospital. In 1886 and 1887 Dr. Fitz Gerald was with St. Peter's Hospital, Albany, N. Y.; from 1887 to 1894 he was Assistant and First Assistant Physician in the State Insane Asylum, Binghamton, N. Y., and from 1894 to 1902 he was Superintendent of the State Custodial Asylum, Rome, N. Y. On December 10, 1902, he was appointed General Medical Superintendent at Kings County Hospital, at $5,000 per annum, his present salary.

The attached resolutions, if adopted, will grant the request and approve a schedule for the fund.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on June 13, 1911, requesting an issue of special revenue bonds in the sum of twelve thousand and twenty dollars ($12,020), the proceeds whereof to be used by the Department of Public Charities for the purpose of paying salaries of help in the Central Office, Manhattan, Kings County Hospital, New York City Home for the Aged and Infirm (Brooklyn Division), and the Cumberland Street Hospital from July 1 to December 31, 1911, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment to the extent of five hundred dollars ($500), in addition to the amount of eleven thousand five hundred and twenty dollars ($11,520), heretofore authorized, and for the purpose of providing means therefor, the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding five hundred dollars ($500), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule for the Department of Public Charities for the year 1911, to take effect as of July 1, 1911, as follows:

Department of Public Charities.

Institutions, Brooklyn and Queens, Kings County Hospital—

Salary increase, to be paid from special revenue bonds, General Medical Superintendent, from $5,000 to $6,000 per annum	$1,000 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen, requesting an issue of $200 (subdivision 8, section 188, of the Charter), to be used by the Commissioner of Parks, Borough of The Bronx, for the purpose of placing fire escapes on "Turnbull Mansion," at Bartow-on-the-Sound, together with a report of the Comptroller, recommending the approval of said request:

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of two hundred dollars ($200), the proceeds whereof to be used by the Commissioner of Parks, Borough of The Bronx, for the purpose of placing fire-escapes on "Turnbull Mansion" at Bartow-on-the-Sound.

Adopted by the Board of Aldermen June 20, 1911, three-fourths of all the members voting in favor thereof.

Received from his Honor the Mayor July 5, 1911, without his approval or disapproval thereof; therefore, as provided in section 40 of the Greater New York Charter, the same took effect as if he had approved it. P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—In reference to a resolution adopted by the Board of Aldermen on June 20, 1911, requesting $200 in special revenue bonds. to be used by the Commissioner of Parks, Borough of The Bronx, for the purpose of placing fire escapes on the "Turnbull Mansion," at Bartow-on-the-Sound, I report as follows:

The "Turnbull Mansion" is used during the summer as a home for crippled children by the Home and School for Crippled Children. It has a daily attendance of forty children, who are cared for wholly at the expense of the school.

The Bureau of Buildings has ordered that fire escapes be placed on the building for the protection of the children. Representatives of the school state that they cannot afford to spend the $200 necessary for the improvement, and request the City to provide for the same.

The Commissioner of Parks, Borough of The Bronx, states that the fire escapes are necessary, and that he is in favor of an allowance for the purpose.

I recommend the adoption of the attached resolution granting the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on June 20, 1911, requesting an issue of special revenue bonds in the sum of two hundred dollars ($200), the proceeds whereof to be used by the Commissioner of Parks, Borough of The Bronx, for the purpose of placing fire escapes on "Turnbull Mansion," at Bartow-on-the-Sound, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment, and for the purpose of providing means therefor, the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding two hundred dollars ($200), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen, requesting an issue of $3,300 special revenue bonds (subdivision 8, section 188 of the Charter), to be used by the Municipal Civil Service Commission for paying salaries of two Investigators, at $1,500 each per annum, and installing fireproof safe, $1,500, and salary of one first grade Clerk, together with a report of the Comptroller, recommending the approval of said request and a schedule for the fund:

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of three thousand three hundred dollars ($3,300), the proceeds whereof to be used by the Municipal Civil Service Commission for the purpose of paying salaries of two Investigators, at $1,500 each per annum, installing fireproof safes, $1,500, and salary of one first grade Clerk, $300.

Adopted by the Board of Aldermen July 11, 1911, three-fourths of all the members voting in favor thereof.

Received from his Honor the Mayor July 25, 1911, without his approval or disapproval thereof; therefore, as provided in section 40 of the Greater New York Charter, the same took effect as if he had approved it.

P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—In reference to a resolution adopted by the Board of Aldermen on July 11, 1911, requesting special revenue bonds to the amount of $3,300, the proceeds to be used by the Municipal Civil Service Commission for the purpose of paying salaries of two Investigators at $1,500 each per annum; installing fireproof safes, $1,500, and salary of one First Grade Clerk, $300, I report as follows:

It is stated that the fireproof safes are necessary for the records of the Commission. At present the records are filed in wooden boxes and as they are of great value, the loss in case of a fire would seriously hamper the proper administration of the office.

The position of Investigator at the $1,500 rate for two incumbents was established by the Board of Aldermen on July 3, 1911. The sum of $1,375 will be necessary for the salaries of the two Investigators and the $300 Clerk from August 1 to December 31, 1911, making the total amount required, including the $1,500 for safes, $2,875.

I recommend the adoption of the attached resolutions concurring in the resolution to the extent of $2,875, and approving a schedule for the payment of salaries.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on July 11, 1911, requesting an issue of special revenue bonds in the sum of three thousand three hundred dollars ($3,300), the proceeds whereof to be used by the Municipal Civil Service Commission for the purpose of paying salaries of two Investigators at $1,500 each per annum, installing fireproof safes, $1,500, and salary of one First Grade Clerk, $300, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment to the extent of two thousand eight hundred and seventy-five dollars ($2,875); one thousand three hundred and seventy-five dollars ($1,375) to be applied to the payment of salaries, and one thousand five hundred dollars ($1,500) for the purpose of installing fireproof safes, and for the purpose of providing means therefor, the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding two thousand eight hundred and seventy-five dollars ($2,875), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of schedules for salaries paid from other than budget funds in the Municipal Civil Service Commission for the year 1911, to be effective as of August 1, 1911, as follows:

Municipal Civil Service Commission.

Administration—

Salaries, Regular Employees to be paid from Special Revenue Bonds:

Investigators, 2, at $1,500 each, per annum	$1,250 00
Clerk, 1, at $300 per annum	125 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen, requesting an issue of $5,000 special revenue bonds (subdivision 8, section 188 of the Charter), to be used by the President of the Borough of Richmond for the purpose of paying wages of engineering force and purchasing filing cases and supplies, and meeting other contingent expenses in connection with work of locating, recording and mapping subsurface structures in the Borough of Richmond during 1911, together with a report of the Comptroller, to whom, on July 6, 1911, this application was referred, recommending approval of said request and also a schedule for the fund:

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of five thousand dollars ($5,000), the proceeds whereof to be used by the President of the Borough of Richmond for the purpose of paying wages of engineering force and purchasing filing cases and supplies and meeting other contingent expenses in connection with work of locating, recording and mapping subsurface structures in the Borough of Richmond during 1911.

Adopted by the Board of Aldermen June 27, 1911, three-fourths of all the members voting in favor thereof.

Approved by the Mayor July 5, 1911. P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On June 27, 1911, the Board of Aldermen adopted a resolution requesting $5,000 in special revenue bonds, the proceeds to be used by the President of the Borough of Richmond for the purpose of paying wages of engineering force and purchasing filing cases and supplies and meeting other contingent expenses in connection with the work of locating, recording and mapping subsurface structures in the Borough of Rihmond during 1911. In connection therewith I report as follows:

The establishment of a record of the subsurface structures in other boroughs has proven of great value. Such a record furnishes information for making connections for water, gas or electric service as well as for sewer connections and the issuance of permits for openings. In the case of street improvements the engineers are in a position to know exactly what conditions are liable to present themselves in any given area, so that more accurate preliminary estimates may be made and more accurate data obtained for estimating on contracts.

The plan proposed by the President practically combines the features of the plants established in the Boroughs of Brooklyn and The Bronx. It is proposed to set up the information from the following data:

(1) During Construction of New Sewers—Field parties on sewer construction work to record the location, depth and description of all subsurface structures encountered, and report to the Bureau in memoranda form from week to week.

(2) From Street Openings for Connections to Mains and Repairs—The Superintendent of Highways will furnish the Bureau with a duplicate of the order made out to inspectors on backfilling to enable the Bureau to record the openings made. The Inspector of backfilling to record the distance from the curb and the depth of any main or conduit intercepted by the opening made and transmit the information for record purposes.

The Superintendent of Sewers will instruct the Inspectors on sewer connection to collect similar data and transmit the same for record.

A party of two engineers will follow up the openings and locate the same from street intersections and make locations in such cases, where a comprehensible record is not prepared by the Inspector. Surface features as shown by the topographical survey will also be noted to supplement the data.

(3) Location of New Water Mains—The data is obtainable from the Department of Water Supply, Gas and Electricity which has an accurate record of the mains, plotted on a large scale map.

(4) Telephone Ducts—The telephone company has complete maps showing the location of the lines in the Borough, from which a blue print copy can be obtained for the purpose of relocating the lines on the City plant.

The President estimates that the annual cost of preparing the record will be about $10,000, as follows:

1 Draftsman	$1,800 00
1 Draftsman	1,500 00
1/2 Draftsman, at $1,650	825 00
1 Transitman	1,500 00
1 Laborer	900 00
1/12 party, at $7,650	840 00
1/6 party, at $6,350	1,060 00
1/6 supervision, at $2,700	450 00
1/10 drafting, at $2,000	200 00
	$9,075 00
Filing cases and supplies	455 00
	$9,530 00

The work is such that it will not be necessary to add to the present force, beyond the employment of a Laborer, at $900, and a Draftsman, at $1,500. The remaining employees are assigned to the Bureau of Engineering-Construction, and a part of their time is to be charged against the revenue bond account.

I recommend the adoption of the attached resolutions approving the request and a schedule for the fund.

Respectfully, WM. A. PRENDERGAST, Comptroller.

Resolved, That the resolution adopted by the Board of Aldermen on June 27, 1911, and approved by the Mayor July 5, 1911, requesting an issue of special revenue bonds in the sum of five thousand dollars ($5,000), the proceeds whereof to be used by the President of the Borough of Richmond for the purpose of paying wages of engineering force and purchasing filing cases and supplies and meeting other contingent expenses in connection with work of locating, recording and mapping subsurface structures in the Borough of Richmond during 1911, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment, and for the purpose of providing means therefor, the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding five thousand dollars ($5,000) redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedules for the office of the President of the Borough of Richmond for the year 1911 as follows:

Preparation of Subsurface Construction Records:

Revenue Bond Force:

Salaries—

Draftsman, 1 at	$1,500 00
Wages:	
Laborer, 1 at	900 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen, requesting the issue of $4,100 special revenue bonds (subdivision 8, section 188 of the Charter), to provide for salaries in connection with the establishment of an ambulance service for insane patients at Kings County Hospital, Department of Public Charities, from May 1 to December 31, 1911, together with a report of the Comptroller, to whom, on May 11, 1911, said application was referred, recommending an issue of $2,562.50 for these salaries from August 1911, and also recommending approval of a schedule for the fund:

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revnue bonds to the amount of four thousand one hundred dollars ($4,100), the proceeds whereof to be used by the Department of Public Charities for the purpose of paying salaries in connection with the establishment of an ambulance service for insane patients at the Kings County Hospital.

Adopted by the Board of Aldermen April 18, 1911, three-fourths of all the members voting in favor thereof.

Received from his Honor the Mayor May 2, 1911, without his approval or disapproval thereof; therefore, as provided in section 40 of the Greater New York Charter, the same took effect as if he had approved it.

P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On April 18, 1911, the Board of Aldermen adopted a resolution requesting $4,100 in special revenue bonds, to be used by the Department of Public Charities for paying salaries in connection with the establishment of an ambulance service for insane patients at the Kings County Hospital. In connection therewith, I report as follows:

Chapter 557 of the Laws of 1910, empowers Judges or Magistrates in Brooklyn or Queens to commit to the Psychopathic Ward of the Kings County Hospital persons charged with minor offenses and suspected of being insane. To provide for the transportation of alleged insane persons, committed or otherwise, the Commissioner proposes to establish in the hospital a special ambulance service to be in charge of employees trained in the care of the insane, thereby obviating the use of police patrol wagons and policemen. The following force is estimated to be necessary for the service:

	Rate Per Annum.
1 Auto Engineman for ambulance	$1,200 00
2 Alienists, at $1,200 each	2,400 00
1 Stenographer and Typewriter	1,200 00
1 Supervising Nurse (male)	750 00
1 Trained Nurse (female)	600 00
	$6,150 00

The Kings County Hospital has a power ambulance available for the proposed service, but owing to insufficient help it is operated only a part of each day. The additional help will permit of its use at all times, and provide an Alienist and Nurse to accompany it when conveying patients to the Psychopathic Ward. The Stenographer and Typewriter is to keep the records of these patients.

On April 29, 1910, the Board of Estimate and Apportionment authorized the issue of $6,125 special revenue bonds for the establishment of a special ambulance service in Bellevue Hospital. Mr. Homer Folks, Secretary of the State Charities Aid Association, in a communication approving the present request, states that the results obtained at Bellevue Hospital justify the establishment of the special ambulance service at Kings County Hospital. He further states as follows:

"Since this service became available the number of patients coming to the hospital in an excitable state of mind has been very materially reduced, and this is entirely attributed to the fact that ambulances and Trained Nurses have been substituted for patrol wagons and police officers. These Trained Nurses, in addition to having a less disturbing effect upon the patient than policemen, have been able to secure considerable data bearing upon each case coming under their care and observation. This is of great value to the Alienist in the subsequent diagnosis of the case."

The $4,100 was to cover the cost from May 1, 1911. It is proposed to install the service on August 1, and the amount necessary from that date to December 31, 1911, will be $2,562.50.

I recommend the adoption of the attached resolutions granting the request to the extent of $2,562.50, and approving a schedule for the fund.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on April 18, 1911, requesting an issue of special revenue bonds in the sum of four thousand one hundred dollars ($4,100), the proceeds whereof to be used by the Department of Public Charities for the purpose of paying salaries in connection with the establishment of an ambulance service for insane patients at the Kings County Hospital, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment to the extent of two thousand five hundred and sixty-two dollars and fifty cents ($2,562.50), and for the purpose of providing means therefor the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding two thousand five hundred and sixty-two dollars and fifty cents ($2,562.50), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—16.

—

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule for employees of the Department of Public Charities, paid from special revenue bonds for the year 1911, to take effect as of August 1, 1911, as follows:

Department of Public Charities.

Institutions, Brooklyn and Queens, Kings County Hospital, Special Revenue Bond Force—

Salaries:

Alienists, 2 at $1,200 each per annum.

Stenographer and Typewriter, 1 at $1,200 per annum.

Special Revenue Bond Force—

Wages, Regular Employees:

Automobile Engineman for ambulance, 1 at $1,200 per annum.

Supervising Nurse, 1 at $750 per annum.

Trained Nurse, 1 at $600 per annum.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—16.

The Secretary presented the following communication from the Department of Water Supply, Gas and Electricity relative to, and report of the Comptroller recommending, the additional issue of $5,000 special revenue bonds (subdivision 8, section 188 of the Charter), to provide for Sunday, holiday and overtime work of employees of the Department of Water Supply, Gas and Electricity, assigned to the maintenance and construction force of the Engineering Bureau, Boroughs of Manhattan and The Bronx; also recommending approval of a schedule for the fund:

(On May 4, 1911, the Board adopted a resolution concurring, to the extent of $12,000, in the resolution of the Board of Aldermen, requesting an issue of $18,000 special revenue bonds for the above purpose.)

(The resolution of the Board of Aldermen requesting the issue of $18,000, as above set forth, report of the Comptroller, and resolution of the Board of Estimate and Apportionment authorizing the issue of $12,000 mentioned herein, are printed in the Financial Minutes of May 4, 1911, at pages 1770-1773 of the pamphlet.)

(On July 13, 1911, the communication from the Commissioner of Water Supply, Gas and Electricity, requesting the additional authorization of $6,000 to pay for extra work of Laborers not provided for in the Budget appropriations, was referred to the Comptroller.)

Department of Water Supply, Gas and Electricity, Commissioner's Office, 13 to 21 Park Row, City of New York, July 7, 1911.

Mr. Joseph Haag, *Secretary, Board of Estimate and Apportionment:*

Dear Sir—The Board of Estimate and Apportionment authorized special revenue bonds to the amount of $12,000, for extra time of Assistant Foremen and Caulkers, on account of the request of the Board of Aldermen for $18,000 to pay for the extra time of employees of the Engineering Bureau.

In the same Division of the Department and on the same payrolls the Laborers are not sufficiently provided for in the Budget appropriations, and I therefore respectfully request that the Board of Estimate and Apportionment authorize the balance of the $18,000, the money to be used to pay for extra work of Laborers.

Yours truly, HENRY S. THOMPSON, Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On March 14, 1911, the Board of Aldermen adopted a resolution requesting special revenue bonds to the amount of $18,000, the proceeds to be used by the Department of Water Supply, Gas and Electricity for the wages of employees assigned to the maintenance and construction force of the Engineering Bureau, Boroughs of Manhattan and The Bronx. On May 4, 1911, the Board of Estimate and Apportionment granted the request to the extent of $12,000 for the payment of Sunday, holiday and overtime work; and approved of a schedule for the fund as follows:

Assistant Foremen, at, per day (1,000 days)	$3 00
Caulkers, at, per day (2,250 days)	4 00

No allowance was made at that time for the temporary employment of Laborers, as the Commissioner's representative stated that no additional appropriation for that purpose would be required.

It now appears that this statement was made through a misunderstanding, and on July 7, 1911, the Commissioner requested that the balance of the $18,000 be authorized to provide for Sunday, holiday and overtime work of Laborers.

The additional amount needed for Laborers, at $2.50 a day, is estimated by the Engineer in charge of the maintenance and construction work in Manhattan and The Bronx as follows:

	Days.	Amount.
Sunday, holiday and emergency work paid for in 1910........	9,118	$22,795 00
Allowance for Sunday, holiday and emergency work in 1911 Budget schedules	7,200	18,000 00
Estimated deficit	1,918	$4,795 00

It is stated that the Budget allowance for temporary employment of Laborers was exhausted on April 26, 1911.

An additional allowance of $5,000 would appear to be sufficient for all needs.

I recommend the adoption of the attached resolutions granting the request to the extent of $5,000 and providing for the necessary schedule modification.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on March 14, 1911, requesting an issue of special revenue bonds in the sum of eighteen thousand dollars ($18,000), the proceeds whereof to be used by the Department of Water Supply, Gas and Electricity in the payment of wages of employees assigned to the maintenance and construction force of the Engineering Bureau, Boroughs of Manhattan and The Bronx, which resolution was approved of and concurred in on May 4, 1911, by the Board of Estimate and Apportionment to the extent of twelve thousand dollars ($12,000) for Sunday, holiday and overtime work, be and the same is hereby approved of and concurred in to the additional amount of five thousand dollars ($5,000), and for the purpose of providing means therefor the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding five thousand dollars ($5,000), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of schedule, as revised, for employees of the Department of Water Supply, Gas and Electricity paid from special revenue bonds for the year 1911, as follows:

Department of Water Supply, Gas and Electricity.

Water Supply, Boroughs of Manhattan and The Bronx, Distribution, Maintenance of Croton and Bronx Systems—

Wages, Temporary Employees, Special Revenue Bond Force, for Sunday, Holiday and Overtime Work:

Assistant Foremen, at $3 per day (1,000 days).

Caulkers, at $4 per day (2,250 days).

Laborers, at $2.50 per day (2,000 days).

Which was adopted by the following vote.

Affirmative—The Mayor, the Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—16.

The Secretary presented the following resolution of the Board of Aldermen requesting an issue of special revenue bonds (subdivision 8, section 188 of the Charter) in the sum of $100,000 for the maintenance of bridges as follows:

$35,000 for the New York and Brooklyn Bridge for 1911, $65,000 for the Williamsburg Bridge for 1911:

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of one hundred thousand dollars ($100,000), the proceeds whereof to be used by the Department of Bridges for the purpose of providing means for maintenance of bridges as follows: $35,000 to be applied to the expenditure of the New York and Brooklyn Bridge for 1911; $65,000 to be applied to the expenditure of the Williamsburg Bridge for 1911.

Adopted by the Board of Aldermen July 25, 1911, three-fourths of all the members voting in favor thereof.

Approved by the Mayor July 26, 1911. P. J. SCULLY, Clerk.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen July 25, 1911, and approved by the Mayor July 26, 1911, requesting an issue of special revenue bonds of The City of New York in the sum of one hundred thousand dollars ($100,000), the proceeds whereof to be used by the Department of Bridges for the maintenance of bridges, as follows: For the New York and Brooklyn Bridge for 1911, $35,000; for the Williamsburg Bridge for 1911, $65,000; be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment, and the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding one hundred thousand dollars ($100,000), redeemable from the tax levy of the year succeeding the year of their issue, the proceeds whereof to be applied to the purposes aforesaid.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—16.

The Secretary notified the Board that the plans, form of contract and specifications for steel file cases and furnishings in the office of the County Clerk of New York County, in the County Court House, submitted by the Commissioner of Records, New York County, had been returned to said Commissioner as requested by him under date of June 24, 1911, which request was referred to the Comptroller on June 29, 1911.

(On April 27, 1911, the plans, form of contract and specifications above mentioned were referred to the Comptroller.)

The following matters, not upon the Calendar for the day, were considered by unanimous consent:

The Comptroller presented the following communication from the Department of Public Charities requesting, and report recommending, the transfer of $97,531 within the appropriation made to said Department for the year 1911:

Department of Public Charities of The City of New York, Foot of East 26th Street, July 25, 1911.

To the Honorable, the Board of Estimate and Apportionment:

Gentlemen—In the Budget for 1911 there was granted to this Department an appropriation entitled:

"808b. Additional Allowance for General Supplies, subject to the approval of the Board of Estimate and Apportionment as to the purposes to which it is to be applied		$200,000 00"
From this account the following transfers have been made:		
On April 20, 1911, to General Supplies, Richmond	$34,200 00	
On July 17, 1911, to General Supplies, Manhattan and The Bronx	48,269 00	
On July 17, 1911, to General Supplies, Brooklyn and Queens	20,000 00	
		$102,469 00
Leaving a balance of		$97,531 00

In order to meet present and prospective deficiencies in various supply appropriations allowed to this Department for the current year, application is hereby respectfully made for the transfer of the above-mentioned balance of $97,531 to sundry accounts other than Salaries and Wages, as follows:

Manhattan and The Bronx.

747. Repairs and Replacements by Contract or Open Order:		
City Hospital—		
Repairs to Streker Memorial Laboratory	$1,500 00	
Repairs to plumbing	1,200 00	
Repairs to pumps	350 00	
Repairs to boilers	250 00	
Hot-water tank for laundry	800 00

Richmond.

796. Apparatus, Machinery, Vehicles, etc., including Care and Storage	1,000 00
798. Forage, Shoeing and Boarding Horses	400 00

Miscellaneous.

804. Clothing for Insane Patients	500 00
Total	$97,531 00

A request for the transfer of the foregoing items was included in an application addressed to your honorable Board on June 10, but was held in abeyance for the reason, I am informed, that the contention was made that no part of the appropriation account entitled:

"808b. Additional Allowance for General Supplies, subject to the approval of the Board of Estimate and Apportionment as to the purposes to which it is to be applied, $200,000."

—could be used for any purpose except for "General Supplies," in the restricted sense of the term—such as foodstuffs, bedding, dry goods, drugs, crockery, etc.— and that it could not be transferred to any account where it would be used, no matter how urgent the demand, for repairs, replacements, apparatus, machinery, vehicles, contingencies, forage, clothing for insane patients, etc.

In connection with this matter it might be well to consider the Departmental estimates for General Supplies for 1911, and the amounts appropriated therefor by your honorable Board:

Budget Allowance for 1911.

745.	General Supplies, Manhattan and The Bronx	$925,000 00
777.	General Supplies, Brooklyn and Queens	300,000 00
793.	General Supplies, Richmond	40,000 00
808b.	Additional Allowance for General Supplies, subject to the approval of the Board of Estimate and Apportionment as to the purposes to which it is to be applied	200,000 00
	Total allowance for General Supplies	$1,465,000 00

Departmental Estimate for 1911.

745.	General Supplies, Manhattan and The Bronx	$1,024,754 14	
777.	General Supplies, Brooklyn and Queens	359,809 00	
793.	General Supplies, Richmond	68,047 68	
			$1,452,610 82
	Budget allowance for General Supplies in excess of Departmental estimate		$12,389 18

That this Department was allowed for General Supplies more than twelve thousand dollars in excess of its estimated requirements for that purpose seems to justify the conclusion that the additional allowance of $200,000 (808b) was intended to replenish, from time to time, sundry appropriation accounts other than Salaries and Wages, as they might become depleted; and it is on that assumption that this application is predicated. When it is known that the Departmental estimate for No. 747, Repairs and Replacements by Contract or Open Order, Manhattan and The Bronx, was $406,704.80, and that the Budget allowance therefor was only $75,000, or less than 19 per cent., it will be seen that this Department will be hopelessly crippled unless there is transferred to that account some of the superfluous money appropriated for "General Supplies."

The condition of some of our institutional buildings, boats, docks, concrete walks, boilers, coal handling apparatus, roofs, ovens, fences, etc., is such that repairs are imperative; and as this work can be done, as a rule, only under favorable weather conditions, it is important that it be commenced forthwith, so as to reach completion before the winter weather sets in.

I trust that in considering this request you will give to the term "General Supplies," in its generic sense, that broad and liberal interpretation which will enable us to use the balance of the fund known as 808b for the purposes stated in this application. A proper regard for the comfort and welfare of the thousands of unfortunate inmates in our several institutions impels me to make this appeal to you in their behalf.

Herewith will be found a resolution for adoption.

Respectfully yours, WM. J. McKENNA, Third Deputy Commissioner.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 25, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 25, 1911, the Commissioner of Public Charities requested the transfer of $97,531 within the appropriations to the Department for the year 1911. In connection therewith I report as follows:

On June 10, 1911, the Commissioner requested the transfer of $165,800 from No. 808b, to fourteen other accounts. On July 17, 1911, the Board of Estimate and Apportionment approved the request to the extent of $68,269 to two general supplies accounts, Nos. 745 and 777. It is now proposed that the balance of $97,531 in No. 808b be transferred to the twelve other accounts to meet deficiencies and to meet estimated expenditures for the rest of the year, as follows:

Institutions, Manhattan and The Bronx.

747.	Repairs and Replacements by Contract or open Order—		
	City Hospital:		
	Repairs to Streker Memorial Laboratory	$1,500 00	
	Repairs to plumbing	1,200 00	
	Repairs to pumps	350 00	
	Repairs to boilers	250 00	
	Hot water tank for laundry	800 00	$4,100 00
	City Home:		
	Ward L, painting	$870 00	
	Roofing	6,500 00	
	Repairs to smoke stacks	600 00	
	Repairs to coal hoist, runway and yard	3,000 00	10,970 00
	Metropolitan Hospital:		
	Roofing	$3,300 00	
	Concreting grounds around kitchen building	2,000 00	
	Coal handling facilities for new boiler house	5,000 00	
	Repairs to boilers	2,150 00	12,450 00
	Randalls Island:		
	Painting Infants' Hospital	$1,250 00	
	Roofing	6,544 00	7,794 00
	Steamboats and Docks:		
	Repairs to Steamboat "Lowell"	$6,000 00	
	Electric light	3,000 00	
	Seventieth street dock, addition and change	1,500 00	
	Extension and fence at 53d street dock	1,000 00	
	Dock construction, 120th street	1,000 00	
	Docks at Randalls Island	2,000 00	
	New steam main, 26th street dock	1,000 00	15,500 00
	Bakery repairs, rebuild arches over ovens and renew tiles		1,500 00
			$52,314 00
748.	Apparatus, machinery, vehicles, etc., including care and storage		19,517 00
751.	Forage, shoeing and boarding horses		900 00
	Brooklyn and Queens:		
778.	Materials for repairs and replacements by Departmental Labor		5,000 00
779.	Repairs and replacements by contract or open order		13,000 00
780.	Apparatus, machinery, vehicles, etc., including care and storage		2,000 00
781.	Maintenance of automobiles, including equipment, care and storage		1,500 00
783.	Forage, shoeing and boarding horses		800 00
786.	Contingencies		600 00
	Richmond:		
796.	Apparatus, machinery, vehicles, etc., including care and storage		1,000 00
798.	Forage, shoeing and boarding horses		400 00
	Miscellaneous:		
804.	Clothing for insane patients		500 00
			$97,531 00

In the Budget for 1911 was included an appropriation (No. 808b) of $200,000 as an "additional allowance for general supplies, subject to the approval of the Board of Estimate and Apportionment as to the purposes to which it is to be applied." On April 20, 1911, the sum of $34,200 was transferred from the account to No. 793, General Supplies, Richmond, leaving a balance of $165,800.

I am informed that the President of the Borough of Manhattan, Chairman of the Committee on Charities, is of opinion that the Board of Estimate and Apportionment may, in its discretion, transfer funds from No. 808b to other purposes than the purchase of general supplies.

The attached resolution, if adopted, will grant the request.

Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment, pursuant to the provisions of section 237 of the Greater New York Charter, hereby approves transfers of funds appropriated to the Department of Public Charities for the year 1911, as follows:

Department of Public Charities.

From

Miscellaneous:

808b.	Additional allowance for general supplies, subject to the approval of the Board of Estimate and Apportionment as to the purposes to which it is to be applied	$97,531 00

To

747.	Repairs and replacements by contract or open order	$52,314 00
748.	Apparatus, machinery, vehicles, etc., including care and storage	19,517 00
751.	Forage, shoeing and boarding horses	900 00
778.	Materials for repairs and replacements by Departmental Labor	5,000 00
779.	Repairs and replacements by contract or open order	13,000 00
780.	Apparatus, machinery, vehicles, etc., including care and storage	2,000 00
781.	Maintenance of automobiles, including equipment, care and storage	1,500 00
783.	Forage, shoeing and boarding horses	800 00
786.	Contingencies	600 00
796.	Apparatus, machinery, vehicles, etc., including care and storage	1,000 00
798.	Forage, shoeing and boarding horses	$400 00
804.	Clothing for insane patients	500 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—16.

The Comptroller presented the following resolution of the Board of Aldermen requesting, and report recommending approval, of the request of the Board of Aldermen for an issue of $600 special revenue bonds (subdivision 8, section 188 of the Charter) for the salary of an Automobile Engineman in the Bureau of Licenses, Mayor's office, for the balance of the year 1911, to the extent of $500 to provide for said salary from August 1 to December 31, 1911; also recommending approval of a schedule for the fund:

(On July 20, 1911, the above resolution of the Board of Aldermen was referred to the Comptroller.)

In the Board of Aldermen.

Resolved, That, in pursuance of the provisions of subdivision 8 of section 188 of the Greater New York Charter, the Board of Estimate and Apportionment be and it is hereby requested to authorize the Comptroller to issue special revenue bonds to the amount of six hundred dollars ($600), the proceeds whereof to be used by the Chief of the Bureau of Licenses for the purpose of paying the salary of one Automobile Engineman for the balance of the year 1911, at the rate of one thousand two hundred dollars a year.

Adopted by the Board of Aldermen July 11, 1911, three-fourths of all the members voting in favor thereof.

Approved by the Mayor July 17, 1911. P. J. SCULLY, Clerk.

Department of Finance, City of New York, Bureau of Municipal Investigation and Statistics, July 26, 1911.

To the Board of Estimate and Apportionment:

Gentlemen—On July 11, 1911, the Board of Aldermen adopted a resolution requesting $600 in special revenue bonds, to be used by the Chief of the Bureau of Licenses, the Mayoralty, to pay the salary of an Automobile Engineman, for the balance of the year 1911, at the rate of $1,200 per annum. In connection therewith I report as follows:

The grade of the new position of Automobile Engineman, Bureau of Licenses, the Mayoralty, at $1,200 per annum, was approved by the Board of Estimate and Apportionment on July 13, 1911. The resolution establishing the grade was adopted by the

Board of Aldermen on July 25. The sum of $500 and not $600 will be required to pay the salary of the incumbent of the position from August 1 to December 31.

I recommend that the request be approved by the adoption of the attached resolution. Respectfully, WM. A. PRENDERGAST, Comptroller.

The following resolution was offered:

Resolved, That the resolution adopted by the Board of Aldermen on July 11, 1911, and approved by the Mayor July 17, 1911, requesting an issue of special revenue bonds in the sum of six hundred dollars ($600), the proceeds whereof to be used by the Chief of the Bureau of Licenses, the Mayoralty, for the purpose of paying the salary of one Automobile Engineman, for the balance of the year 1911, at the rate of one thousand two hundred dollars a year, be and the same is hereby approved of and concurred in by the Board of Estimate and Apportionment to the extent of five hundred dollars ($500), and for the purpose of providing means therefor the Comptroller be and is hereby authorized, pursuant to the provisions of subdivision 8 of section 188 of the Greater New York Charter, to issue special revenue bonds of The City of New York to an amount not exceeding five hundred dollars ($500), redeemable from the tax levy of the year succeeding the year of their issue.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—16.

The following resolution was offered:

Resolved, That the Board of Estimate and Apportionment hereby approves of the schedule for the Bureau of Licenses, the Mayoralty, for the year 1911, as follows:

The Mayoralty, Bureau of Licenses.

Salary to be paid from Special Revenue Bonds—

Automobile Engineman	$1,200 00

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—16.

The President of the Borough of Manhattan presented the following resolution authorizing the Board of City Record to pay a bill of the M. B. Brown Printing Company for printing in connection with the report and resolutions submitted to the Board by the Special Committee on Transit Proposals:

Resolved, That the Board of Estimate and Apportionment authorizes and directs the Board of City Record to pay a bill of M. B. Brown Printing and Binding Company, dated June 22, 1911, in the amount of $1,538.35, this being the expense incurred by the Special Committee on Transit Proposals of this Board for printing in connection with the report and resolutions submitted under date of June 5, 1911, and subsequent dates.

Which was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—16.

The Comptroller moved that when the Board adjourns it adjourn to meet Thursday, August 3, 1911, at 10.30 o'clock a. m.

Which motion was adopted by the following vote:

Affirmative—The Mayor, the Comptroller, the Acting President of the Board of Aldermen, the President of the Borough of Manhattan, the Acting Presidents of the Boroughs of Brooklyn and The Bronx, and the Presidents of the Boroughs of Queens and Richmond—16.

On motion of the Comptroller the Board adjourned to meet Thursday, August 3, 1911, at 10.30 o'clock a. m. JOSEPH HAAG, Secretary.
